Glossary

Glossary

Attribute

In Sales Analysis, a characteristic of either a customer or an **item**.

Barrelage

Invoice Line Quantity X Barrelage factor from the Item Master

The Invoice Line Quantity is stored in Issue units and the Barrelage factor on the Item Master is expressed in Issue units.

Budget

A forecast or estimate expressed in a value, against **attributes** of **items** or customers.

Cost Value

Cost of Sales from the invoice line.

Note that this is the value stored in the Inventory Movements file.

Database

The collection of Sales History information used for enquiries and reports.

Descriptions File

This is a file maintained within Inventory Management which defines a number of parameter codes and their descriptions.

Duty

Line quantity in Issue Units multiplied by Duty Value in Stock units from the Item Master divided by the Stock to Issue conversion factor.

Equivalent Cases

Litres divided by the Equivalent Cases factor ex Item Master.

Goods Value

Base Invoice Line Value

Gross Contribution

Base Line Value minus Cost of Sales (both from the invoice line)

Gross Profit

Gross Sales Value minus Cost of Sales (program change)

Gross Sales Value

(Net) Base Goods Line value from the invoice line plus Base Discount Value (program change)

Item

The product code defined to Inventory Management

Kit

A group of items which may be sold as a set. It is maintained in Inventory Management as a single level list.

Library

Means of grouping programs, files etc.

Litres

Line quantity (in issue units) X Litres factor ex Item Master (in stock units) divided by the Stock to Issue conversion factor.

Ranking

Sequencing by value, e.g. cost or quantity. Used in Sales Analysis as a means of report sequencing.
