Chapter 2

Maintenance

Drinks Sales Analysis Maintenance Functions

The following functions can be carried out using the options on the Drinks Sales Analysis Maintenance menu:

- Items.
- Customers.
- Descriptions.
- Calendar.
- Budget Formats.
- Spread Profiles.
- Budgets.
- Report Specifications.
- Ranking Analysis Specifications.
- Sales History Time Period Selection.
- Create New Budget.

These functions are explained in the sections below.

All options are selected from the Drinks Sales Analysis Maintenance menu.

Item Maintenance

1/DAM

You can add and amend Items by selecting this option.

Select the Items option.

For more information see Item Maintenance in Drinks Inventory Management.

Customer Maintenance

2/DAM

You can add and amend Customers by selecting this option.

Select the Customers option.

The first Customer Maintenance screen is displayed. For more information see Customer Maintenance in Drinks Sales Order Processing.

Descriptions Maintenance

3/DAM

You can add and amend Descriptions by selecting this option.

Select the Descriptions option.

The first Descriptions File Maintenance screen is displayed. For more information see Descriptions File Maintenance Drinks Inventory Management.

Calendar Maintenance

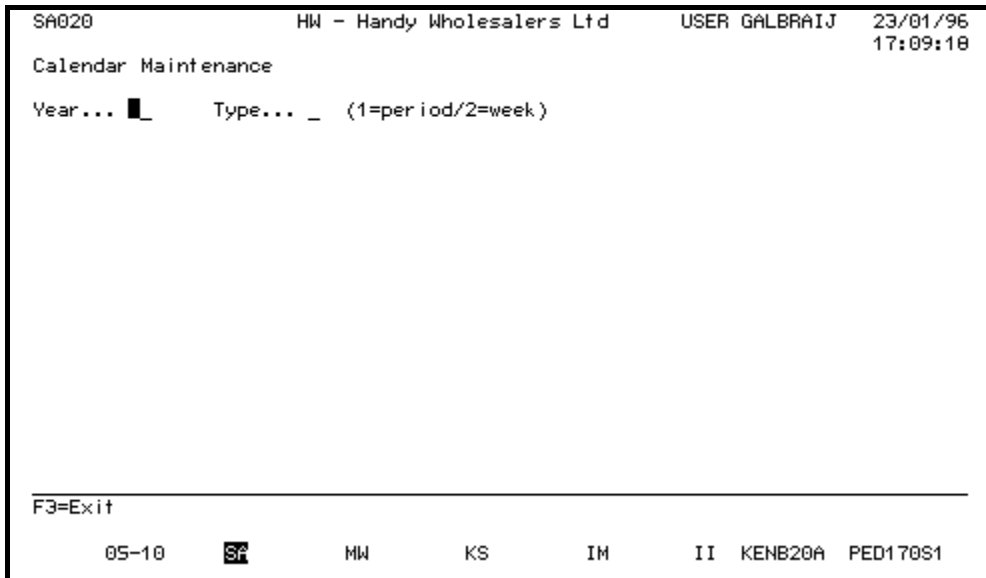

4/DAM

You can use a Drinks Sales Analysis calendar to group sales into time periods which are independent of any financial or manufacturing calendars. This calendar translates a date into a sales year, period and week.

Calendar Maintenance Selection Screen

 Select the Calendar option.

The Calendar Maintenance Selection Screen enables you to select the year and type:

```
SA020                      HW - Handy Wholesalers Ltd      USER GALBRAIJ    23/01/96
                                17:09:18

Calendar Maintenance

Year... █ Type... _ (1=period/2=week)

F3=Exit

05-10  SF  MW  KS  IM  II  KENB20A  PED170S1
```

Fields:

Year

Enter the year for which you want to maintain a calendar.

Type

Enter the calendar type. Valid entries are:

- 1 - Period. You can maintain end dates for periods.
- 2 - Week. You can maintain end dates for weeks.

 Press **Enter** to display the Calendar Maintenance Detail Screen.

Calendar Maintenance Detail Screen

This screen is displayed when you have made valid entries into the Calendar Maintenance Selection Screen and pressed **Enter**.

A screen will be displayed for the year and type entered into the Calendar Maintenance Selection Screen, broken down by the number of periods or weeks in the year depending on the type (the number of periods or weeks being obtained from the company profile).

08-14		SA	MM	KS	IM	II	KENB20A PED170S1

Fields:

Week

The periods in the year are displayed. If there are more than 13, you can use the Page Up and Page Down keys to see them all. The current Drinks Sales Analysis period is highlighted.

Enter the following fields for each period.

End Date

The calendar date on which the period ends. If you enter the date for the first period and press Enter, the system generates the remaining end dates. These can be accepted or edited.

Elapsed Days

The number of elapsed days. You maintain this data for your own reference. It is not maintained by the system.

Selling Days

The number of selling days. You maintain this data for your own reference. It is not maintained by the system.

Note: You must enter a calendar which includes all dates Drinks Sales Analysis is expected to encounter. If holding details at weekly level, a calendar must be created for both period and week end dates.

Press **F8=Update** to update the calendar with the details entered.

Budget Formats Maintenance

5/DAM

You can define the levels at which budgets can be held. Each budget is defined in terms of one customer attribute and/or one item attribute and a value to be budgeted. Within Drinks Sales Analysis, this definition is called a Format.

Sales Budget Definition Selection Screen

- ➡ Select the Budget Formats option to display the Sales Budget Definition Selection Screen.

This screen enables the selection of the format for the budget:

```
SA130          HW - Handy Wholesalers Ltd    USER GALBRAIJ    24/01/96
                                                    13:38:09

Sales Budget Definition

Format.?... SL

F3=Exit F4=Prompt

06-24  SF  MW  KS  IM  II  KENB20A  PED170S1
  
```

Fields:

Report Name

Enter up to 50 text characters to describe the report.

Sequence

You can select up to five elements by which the report will be sequenced. Enter a number from '1' to '5' against the required element. '1' is the lowest level of detail. If you wish to report simply on sales of items, then enter a '1' against the Item field. Totals will be produced automatically. If you wish to generate a report at several levels, for example, items within customers, then place a '1' against Item and a '2' against Customer. Totals are then produced for each customer, along with a final total.

Descend

Enter a '1' to indicate that the field values selected for sequencing are to be printed in descending sequence. Leave blank for ascending sequence.

New Page

Enter a '1' to indicate that the report should skip to a new page when the value of the field changes. This only applies to fields selected for sequencing.

Budget

Enter a '1' if budget details are to be shown on the report. The budget fields must be sequence fields and a budget format must exist.

Press **Enter** to display the Maintain Report Specifications Selection screen.

Maintain Report Specifications Selection Screen

 This screen is displayed when you have made selections on the Maintain Report Specifications Sequence Screen and pressed **Enter**.

This screen enables you to specify the database records to be included in the report, based on field values. The screen displays a list of possible fields. Press the Page Up and Page Down keys to display more fields.

```

Fields:

Save Specification Or Delete After Next Print

- 1 - To save the report specifications for use again.
- 2 - To delete the specifications after the report has run this time.

Format

This specifies the report content in terms of period data:

- 1 - YTD. The report displays This Period and Year To Date figures.
- 2 - PTD. The report displays This Week and Period To Date figures.
- 3 - Both. Two reports are produced displaying both the above detail levels.

Produce At End Of

Enter '1' against the time period when you want the report to be produced. The report will then be run when the appropriate period end update is submitted. If the report is not to be run at regular times but on request, enter a '1' against Ad-hoc.

Submit Report Now

- 1 - To submit the report now, or leave as
- 0 - If the report is to be requested later.

Budget Type

This field is only available for budget reports.

Budget Format

This field is only available for budget reports. It displays the associated budget format which matches the requested Customer/Item attribute.

Values

Select up to four values for inclusion in the report by entering '1' to '4' against the values required.

Exclusion Type

This field defaults to '1' and may be left as '1' if Sales Kits are not being used as there will be no components to exclude.

Where kits are in use, this indicator determines how the module will handle possible double counting, caused by posting both kit parent sales and kit component sales to Drinks Sales Analysis from Drinks Sales Order Processing.

0 - Will cause no exclusions and possible double counting.

1 - Will cause components to be excluded from the report, if both kit parents and components have been posted.

2 - Will cause parents to be excluded if both have been posted.

Actual

Enter a '1' to print the actual sales for this year, last year or both

If you are defining a budget report, the following printing details may also be specified:

Budget

Enter a '1' to print the budget for this year, last year or both.

Variance

Enter a '1' to print the variance between actual sales and budget for this year, last year or both.

Var %

Enter a '1' to print the variance as a percentage for this year, last year or both.

Press **Enter** to validate the entries, create the report and display the Maintain Report Specifications Report Selection Screen.

Ranking Analysis Specifications Maintenance

9/DAM

This procedure enables you to create and maintain ranking analysis specifications.

Ranking analysis reports can be used to create sophisticated reports. A simple ranking analysis report might:

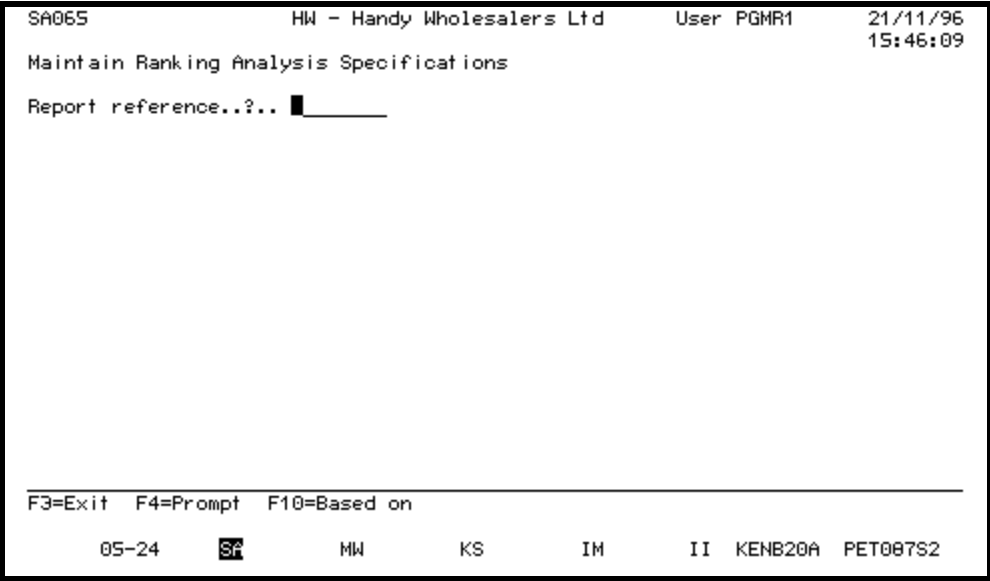

- Rank all salesmen (customer/item attribute)
- On the basis of total sales (invoice value)
- In the first six months of 97 (time period)

It is also possible to compare two time periods. If this option is chosen the selected invoice value is totalled over both time periods, then the selected customer/item attribute is ranked on the difference.

Maintain Ranking Analysis Specifications Report Selection Screen

 Select the Ranking Analysis Specifications option.

This screen enables you to select the name of the Ranking Analysis report to be created or maintained.

Report Reference

Enter the name of the ranking analysis report you wish to create or maintain. A report name must start with an alphabetical character, be a maximum of eight characters long and may contain numbers after the initial letter.

 *Note: If you are creating a new report, you may select **F10=Based on** to display a list of existing reports on which to base the new one.*

Functions:

F10

Based on. Prompt for a list of reports on which to base the new report.

 Press **Enter** to display the Maintain Ranking Analysis Specifications Major and Minor Level Screen.

Maintain Ranking Analysis Specifications Major and Minor Level Screen

This screen is displayed when you have entered a valid report reference into the Maintain Ranking Analysis Specifications Report Selection Screen and pressed **Enter**.

This procedure enables you to specify the report title printed at the top of each page, and to specify the ranking field or fields, the number of records to be printed, and any selection criteria.

Field name	Major level (1)	No.records to print	Major level selection From (?)	To (?)	Minor level

10-64 SF MW KS IM II KENB20A PED170S1

Fields:

Report Name

Enter text of up to 50 characters to describe the report.

The following may be specified at field level:

Major Level

Enter a '1' to indicate that the field is to be used as the major level for ranking. If no minor level is entered, then the major level will be used as the actual ranking field. If a minor level is entered, then the minor level will be ranked within each major level field.

Enter a '1' to indicate which field is to be used as the detail for the report.

Minor Level

The detail level. This will be the field which will be ranked within the major level.

No. Of Records To Print

The number of minor level records to print, within a major level, if both are entered, or the number of major level records to print if only a major level is specified.

Major Level Selection From (?)/To (?)

A specific range of major level values may be selected by entering the upper and lower limits here. A prompt of valid values is available. Leave blank for all values.

Press **Enter** to display to the Maintain Ranking Analysis Specifications Time Period and Ranking Screen.

Maintain Ranking Analysis Specifications Time Period and Ranking Screen

This screen is displayed when you have made valid entries into the Maintain Ranking Analysis Specifications Major and Minor Level Screen and pressed **Enter**.

This screen enables you to specify the time periods that the report is to span, and the values to be used for ranking.

Fields:

Time Period

Enter the year, period (and week if history is held at weekly level) from which you wish the report to start, and the year, period and week at which to end.

Compared With

If a comparison is being made between two time periods, enter the 'from' and 'to' values to define the time period with which the above period is to be compared. If no comparison is being made, leave these fields blank.

Asc/Dsc

Enter a '1' for ascending sequence ranking, or a '2' for descending sequence against the value to be used for ranking.

Selection

Enter values for the upper and lower limits of the value to be used for ranking.

Difference % Or Value

If a time period comparison is to be made enter:

1 - To have the difference between the compared time periods expressed as a percentage, or

2 - To have the difference expressed as a value.

Print

Enter a '1' against an additional value to be printed on the report (optional).

Press **Enter** to proceed to the Maintain Ranking
Analysis Specification Exit Screen.

Maintain Ranking Analysis Specification Exit Screen

This screen is displayed when you have made valid entries into the Maintain Ranking Analysis Specifications Time Period and Ranking Screen and pressed **Enter**.

This screen enables you to specify when a Ranking Analysis report is to be produced.

05-31 SF ML KS IM II KENB20A PED170S1			

Fields:

Save Specification

- 1 - To save the report specifications for use in the future.
- 2 - To delete the specification after the report has run this time.

Produce At End Of

Enter a '1' against the time period when you want the report to be produced. This will then be submitted when the appropriate period end update is run.

Enter a '1' against Ad Hoc if the report is not to be run on a regular basis.

Exclusion Type

Where kits are in use, this indicator determines how the module will handle possible double counting, caused by posting both kit parent sales and kit component sales to Drinks Sales Analysis from Drinks Sales Order Processing.

- 0 - Will cause no exclusions and possible double counting.
- 1 - Will cause components to be excluded from the report, if both kit parents and components have been posted.

2 - Will cause parents to be excluded if both have been posted.

Submit Report Now

Enter '1' to submit the report now, or leave as '0' if the report is to be requested later.

Press **Enter** to save the report and return to the
Maintain Ranking Analysis Specifications Report
Selection Screen.

Sales History Time Period Selection

1... **2...** 10/SAM

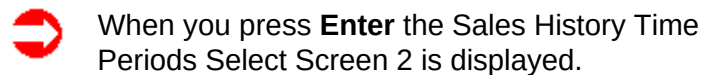

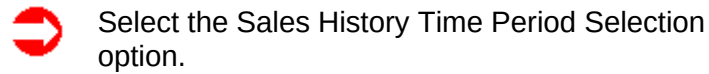

In order to determine the details shown on the enquiry display, at least one 'format' must be created. This determines the data shown on the display in terms of time period and value. As many as 36 different enquiry formats may be created. For example, one format may specify the four columns to be:

- Current period.
- Current period - 1.
- Current period - 2.
- Current year to date.

And another may specify:

- This year to date.
- Last year to date.
- This period.
- This period last year.

The values to be shown are also determined by the format, for example, one may show quantity, whilst another may show sales value.

Sales History Time Periods Select Screen 2

This screen is displayed when you have entered a valid enquiry format into the Sales History Time Periods Select Screen 1 and pressed **Enter**.

This screen enables you to define time periods and values that are to be displayed on the enquiry.

F3=Exit F12=Previous							
07-35		SF	MW	KS	IM	II	KENB20A PED170S1

Fields:

Ago

This enables you to define the period lag (depending on period type) for values displayed in each column. If the period type is Period, then blank here would indicate current period, '01' would indicate one period ago, '02' would indicate two periods ago and so on.

Period Type

The type of period for which values will be displayed:

- 1 - Year
- 2 - Moving annual
- 3 - Week
- 4 - Period

Data Type

The type of data for which values will be displayed:

- 1 - Actual
- 2 - Budget
- 3 - Variance

4 - Variance %

Note the following entries can be made in each column:

Column 1 if fixed should be '1'.

Column 2 may be '1' or '2'

Column 3 may be '1' or '3'

Column 4 may be '1' or '4'

Default Value

This defines the value you wish to see displayed as a default for this format. The value selected will be displayed in the four columns according to the rules defined above. The required value may be selected from the list.

The above fields define the output of the enquiry. For example, if you wish to see quantity displayed, and in the first column you wish to see quantity for the current period, then against Ago you would enter blank or space, in Period Type you would enter '4', and you would select Quantity as the default value.

Press **Enter** to write the information on the screen to the defined format.

Create New Budget

11/DAM

This procedure enables you to create new budgets which are based on a previously defined budget incorporating a percentage change.

Creating budgets in this way provides you with an efficient way of incorporating all the work invested on an old budget and taking this forward to the next year.

The new budget can be modified manually using the Budget option from the Maintenance menu.

Create New Budget Screen

 Select the Create New Budget option.

This screen enables you to define the new budget in terms of which budget it will be based on, the details for the new budget and the percentage change.
