Chapter 3

Reports And Enquiries

Drinks Sales Analysis Reports And Enquiries

Drinks Sales Analysis is supplied with some standard reports for basic housekeeping, such as an item listing. The analysis reports themselves, like the enquiry function, are user-defined. This section describes how those reports are defined and requested.

All functions involving the running of reports are held in the Drinks Sales Analysis Reports and Enquiries menu.

Sales Enquiry

Enquiries are made by choosing an attribute upon which to enquire, and an attribute by which to analyse. Once a combination of attributes is known to the system, it will be 'remembered' for future use, providing fast response times. The format of the information shown by the enquiry is chosen by you - which values to display, the scale of the values and the time periods for which to display the values.

1... **1/DAR**
2...

The Sales History Enquiry function enables you to create and view your own enquiries on the Sales History Database.

Sales History Enquiry Screen 1

Select the Sales Enquiry option.

This screen lists all Drinks Sales Analysis attributes available for enquiry from the Sales History Database. You must choose one attribute to be analysed by another - for example, a Customer can be analysed by Salesman.

Fields:

Enquire On :

This lists the attributes available for enquiry. Enter a valid value against the attribute you wish to enquire on.

Analysed By :

This lists the attributes by which to analyse. Enter '1' against the attribute you want to analyse by.

Exclusion Type

Where kits are in use, this indicator determines how the module will handle possible double counting, caused by posting both kit parent sales and kit component sales to Drinks Sales Analysis from Sales Order Processing.

1 - Will cause components to be excluded from the enquiry, if both kit parents and components have been posted.

2 - Will cause kit parents to be excluded if both have been posted.

0 - Will cause no exclusions and possible double counting.

Processing will vary depending on whether the enquiry (the combination of the two attributes), exists or not.

Press **Enter**.

If the enquiry already exists, the Sales History Enquiry Screen 3 is displayed, detailing the Drinks Sales Analysis for the attributes you selected.

If the enquiry does not exist, the Sales History Enquiry Screen 2 is displayed.

Sales History Enquiry Screen 2

This screen is displayed if the two attributes you selected in the Sales History Enquiry Screen 1 have not previously been used.

The screen enables you to create a new enquiry for an analysis of these selected attributes.

Fields:

Enquire On :

This shows the attribute selected in the Sales History Enquiry Screen 1 that you want to enquire on. This field is for information only and cannot be changed.

Analysed By :

This shows the attribute selected in the Sales History Enquiry Screen 1 that you want to analyse by. This field is for information only and cannot be changed.

Batch/Interactive

1 - To submit the enquiry creation to batch.

2 - To create the enquiry interactively.

Tip: If you are handling large amounts of sales history data, it is advisable to create the enquiry in batch.

Select **F8=Submit** to create the enquiry. This will generate summary files which provide the information for the enquiry. Once they have been created, these summary files will be updated by future Sales History Updates.

When the enquiry is created you will be returned to the Sales History Enquiry Screen 1.

Sales History Enquiry Screen 3

This screen is displayed if the two attributes you selected in the Sales History Enquiry Screen 1 have previously been used.

The screen details the analysis produced by the sales enquiry for the two attributes selected in the Sales History Enquiry Screen 1.

There are four columns showing data for your defined time periods. The current year, period and week numbers for the enquiry are indicated on the screen.

Note: The year, period or week numbers displayed relate to the Drinks Sales Analysis calendar which can be maintained in the Calendar Maintenance function.

Note: The time period format shown by the enquiry can be changed. The formats are maintained by the Sales History Time Period Selection function, where you define the time periods you want to use, and the values displayed.

Fields:

(Untitled)

1 - Upside Down option inverts the Drinks Sales Analysis for a selected line. When you enter '1' against a detail line, the Sales History Enquiry Screen 4 is displayed.

2 - Graph option displays the Drinks Sales Analysis for a selected line as a bar chart. When you enter '2' against a detail line, the Sales History Enquiry Screen 5 is displayed.

You may enter the following details:

Enquiry Attribute

A value for the attribute being enquired on may be entered at the top of the screen, in order to display an analysis for that value. Pressing **Enter** will step through the values in sequence. For example in a customer enquiry by item, another customer could be selected in this way.

Format

Enter a valid format previously defined in the Sales History Time Period Selection function. This will default to 1. Selection of another format will change the information displayed in the columns to that defined for the new format.

Note: Within the main enquiry screen the data can be viewed in a number of ways.

Press **Enter** to step through the attribute being enquired on in sequence.

You may key an actual value for the attribute, and then press **Enter** to present a breakdown of that value by the analysis attribute.

Sales History Enquiry Screen 4 (Option 1)

This screen is displayed if you entered the Upside Down option against a detail line in the Sales History Enquiry Screen 3.

This shows the data for the selected attributes inverted.

03-46 SF MK KS IM II EDN400A PET149S2

Fields:

(Untitled)

- 1 - Upside Down option inverts the Drinks Sales Analysis for a selected line.
- 2 - Graph option displays the Drinks Sales Analysis for a selected line as a bar chart. When you enter '2' against a detail line, the Sales History Enquiry Screen 5 is displayed.

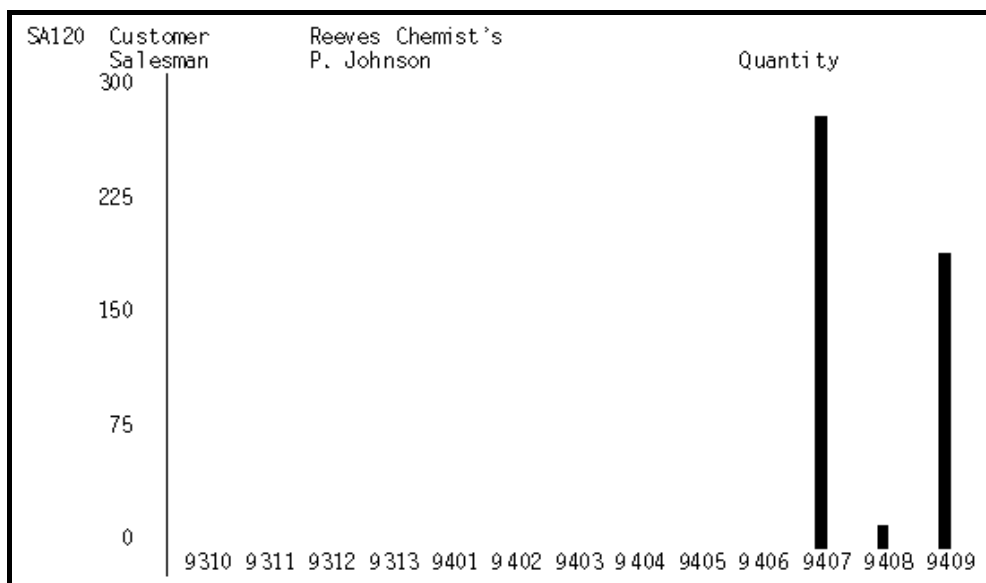

Enter a '2' against a detail line to display the Sales History Enquiry Screen 5.

Sales History Enquiry Screen 5 (Option 2)

This screen is displayed if you entered a '2' (the Graph option) against a detail line in the Sales History Enquiry Screens 3 or 4.

It displays the data for the selected attributes as a bar chart.

Use the keys as follows:

F12 goes back one year.

Enter goes forward 1 year, or back to the enquiry screen if the current year is displayed.

Sales History Display Values Selection Screen (F8)

You can change the values on the display, while keeping the time periods the same, by selecting **F8=Values**.

This will display a screen, showing both the values available and the scaling factors applied to these values.

SA100	Z1 - Demonstration Company	User SP1	14/09/94 15:18:49
Sales History Enquiry - Display Values Selection			
Displayed values Quantity		Scaling Key	
		01 = Units.	
		02 = Tens.	
		03 = Hundreds.	
		04 = Thousands.	
		05 = Ten thousands.	
	Scaling		
- Cost Value	01		
- Discount Value	01		
- Quantity	01		
- Goods Value	01		
- VAT	01		
- Margin	01		
1=Select			
F3=Exit			

Fields:

Untitled On Screen

You may select a value to be displayed by entering a '1' against it, and if required, change the scaling factor.

Press **Enter** to return to the enquiry screen. The change of the scaling factor remains in effect only for the duration of the enquiry.

Tip: If you wish to re-set the scaling to the default, select **F5=Default Scaling** on the main enquiry screen.

Scaling Key

Using scaling factors to display in thousands, for example, a value of less than 1,000 would not be shown. In this event, the field will show '0' but in reverse image, to indicate that a value is present, but too small to show using the current scaling factor. It may also be possible that a value is too large to display without scaling into larger units, in which case, the field will be highlighted, to indicate that overflow has occurred.

Scaling

Apply scaling key to factor.

Sales Reports

2/DAR

Within Drinks Sales Analysis all reports are user-defined in terms of sequence, selection and content. Thus two functions are provided to handle Sales Reports.

There is a maintenance function which enables you to define or modify a report, and optionally submit it for processing, and a simple select and submit function, which enables you to select and submit a report which has been previously defined.

In this way, the tasks of creating reports and running reports may be separated for security purposes.

The report generator produces new programs, and therefore creating a new report takes longer than running an existing one, since the system has to create the new program before it can run the report. This should be borne in mind when creating a large number of new reports.

Once reports have been created, however, they are available to run on request.

The Sales Reports function provides a means of selecting and running previously specified reports.

Request Sales Report Selection Screen 1

Select the Sales Reports option.

Select the report to be run as follows:

SA040	HW - Handy Wholesalers Ltd	User GALBRAIJ	24/01/96
Request Sales Report			17:27:10
Report reference...?.. <u>KGDSA01</u>			
F3=Exit F4=Prompt			
05-24	SA	MM	KS IM II KENB20A PED170S1

Fields:

Report Reference

Enter the name of the report you wish to run. The **F4=Prompt** is available.

Press **Enter** to confirm selection and to move to the Sales Report Selection Screen 2.

Request Sales Report Selection Screen 2

This screen is displayed when you have pressed **Enter** after entering a valid report reference on the Request Sales Report Selection Screen 1.

This facility enables you to submit a report for printing in batch.

SA040	HW - Handy Wholesalers Ltd	User GALBRAIJ	24/01/96 17:29:16
Request Sales Report			
Report reference...?.. KGDSA01			
Customer Sales Analysis 01 - Jan 96			
F3=Exit F8=Submit			
05-24	SF	ML	KS IM II KENB20A PED170S1

The report reference and title is displayed.

Select **F8=Submit** to submit the report and return to the Request Sales Report Selection Screen. 1

Ranking Analysis Reports

3/DAR

The Ranking Analysis Reports function provides a means of selecting and running previously specified reports.

Request Ranking Analysis Selection Screen 1

Select the Ranking Analysis Reports option.

This screen enables selection of the report reference.

SA000	HW - Handy Wholesalers Ltd	USER GALBRAIJ	24/01/96
Request Ranking Analysis			17:52:23
Report reference...?.. <u>0KGDAR01</u>			
F3=Exit F4=Prompt

Report reference...?.. JKGDAR01			
Customer Ranking Analysis - Jan 96			
F3=Exit F8=Submit			
05-24	SF	MM	KS IM II KENB20A PED170S1

Press **F8=Submit** to submit the report.

Item File Print

4/DAR

This provides a listing of the items defined within Inventory Management, together with their attributes chosen for inclusion on the Sales History Database.

Customer File Print

5/DAR

This provides a listing of the Customers defined within Sales Order Processing, together with their attributes chosen for inclusion on the Sales History Database.

Select the Customer File Print option.

Press **F8** to submit the report to batch

Report Specification Print

6/DAR

This function provides a listing of the specifications of reports defined within Drinks Sales Analysis.

Select the Report Specification Print option.

Press **F8** to submit the report to batch

Sales Totals by Period Report

7/DAR

The Sales Totals by Period Report gives you the ability to list the Sales Totals for a particular Year and/or Period.

Sales Totals by Period Report Selection Screen

Select the Sales Totals by Period Report option.

The selection screen enables you to choose the period for which the report is to be run.

```
SA057              HW - Handy Wholesalers Ltd          25/01/96
                                                         12:01:06

Sales Totals by Period Report

Enter year, year and period or leave blank for all.

Year.....  █
Period.....  █
Exclusion Type..(0/1/2)  1

F3=Exit

07-27  SF  MW  KS  IM  II  KENB20A  PED170S1
```

Fields:

Year

Three digit field to enter a valid year for analysis (one which exists on the calendar file). Leave blank for all.

Period

Three digit field to enter a valid period for analysis (one which exists for the chosen Year).

Exclusion Type

Where kits are in use, this indicator determines how the module will handle possible double counting, caused by posting both kit parent sales and kit component sales to Drinks Sales Analysis from Drinks Sales Order Processing.

0 - No exclusions and possible double counting.

1 - Components to be excluded from the enquiry, if both kit parents and components have been posted.

2 - Kit parents to be excluded if both have been posted.

Enter the Year, and, if required, the Period for which the report is required, or leave the field(s) blank to list all available data, and press **Enter**.

You are asked to confirm your request by pressing **F8=Update**.
