Chapter 1

Maintenance

UK Bonded Inventory Management Maintenance Functions

The maintenance functions of Drinks Bonded Inventory Management enable the creation and amendment of master files and the parameters that are fundamental to the module's operation.

File maintenance, particularly Description file maintenance, should be executed with extreme care, since errors will have far reaching effects. A proper procedure should be introduced as a matter of company policy.

Where master file enquiries exist, these are generally output only versions of the maintenance facilities and are therefore not separately described.

Drinks Bonded Inventory Management also makes use of other modules for the maintenance of certain master file data. Description file maintenance within Inventory Management is an example. In these cases, this section explains the data requirements necessary for Drinks Bonded Inventory Management, but the method of data entry will be explained in the relevant module product information.

Company Profile Maintenance

3/DBU

This procedure is for maintaining company details within Drinks Bonded Inventory Management.

Company Profile Selection Screen

Select the Company Profile Maintenance from the Utilities menu.

An initial screen enables the selection of the company to be maintained. Once the company is selected, the Company Profile Maintenance Screen is displayed.

Note: Companies must be defined to both Drinks Sales Order Processing and Drinks Inventory Management before they can be used in Drinks Bonded Inventory Management.

Press **Enter** to display the Company Profile Maintenance Screen.

Company Profile Maintenance Screen

This screen is displayed when you have selected a valid company on the Company Profile Selection Screen and pressed **Enter**.

This screen enables the maintenance of the company parameters.

```

```

Fields:

Status

Enter a single character:

A - Active.

I - Inactive. I - Inactive. 'Inactive' allows the Bond to be prepared before making it 'Active' with other Drinks applications.

D - Deleted.

Note: Once set to 'Active' it cannot be reversed to 'Inactive' again.

VAT Reg. No.

Enter up to 15 alphanumeric characters for the company VAT Registration number.

VAT Turn No.

Enter up to 3 alphanumeric characters for the VAT Turn Number. The VAT Turn Number is a subscript of the VAT Registration Number and is used by companies who have a group registration to identify individual member companies.

Guarantees

Enter up to 30 alphanumeric characters for any applicable Guarantees.

Solicitor

Enter up to 30 alphanumeric characters for Solicitor Guarantee references.

Goods Receiving

Auto Rotation No.

1 - Specifies system generated Rotation numbers.

0 - Specifies rotation numbers are to be entered manually at time of receipt.

Warning: If, in your initial configuration, you set this field to 0 (enter rotation numbers manually) and then later change it to 1 (auto generate rotation numbers), you could get duplicate rotation numbers. The auto generation process does not check for duplicate rotation numbers.

Blind Entry

1 - Specifies that certain fields are generated by the system during receipts (e.g. commodity code, volume per stock unit, strength, etc.).

0 - Specifies that certain fields are not generated by the system during receipts and require entry.

Suspend Rotations at Receipt

1 - Specifies all receipts will not normally be suspended.

0 - Suspends all receipts and inhibits the Put-away process within the Drinks Warehousing application.

Note: Suspended/frozen Rotations must be maintained before the Put-away process can be performed.

Ownership at Statement or Delivery

S - restricts customer access to items by Statement account number.

D - restricts customer access to items by Delivery account.

Currency Rate Code

Enter up to 4 Alphanumeric characters to specify the Currency Rate Code to be used for converting Prime Currency to Base Values on the General Ledger.

To accept the required amendments, press **Enter**.

Bond Index Maintenance

1/DBM

This procedure is for maintaining a list of UK Authorised Bonds and other Duty Free addresses. It should include your own Bond.

Note: Bond Index addresses are used as the delivery address when maintaining Duty Free customer details.

Bond Index Maintenance Selection Screen

 Select the Bond Index option.

This screen enables the selection, or deletion, of an existing Bond, or the entry of a new Bond.

BWS10 HW - Handy Wholesalers Ltd USER GALBRAIJ 2/02/96 12:16:11

Bond Index File Maintenance

	Netherfield		
Post code.....	NT2 3LF		
Active (1 or 0)	1		
Stock held in base currency	1 (1=Yes, 0=No)		
F3=Exit F12=Previous			
07-10	SF	HW	KS IM II KENB20A PET129S2

Fields:

Name

Enter up to 35 alphanumeric characters for the name.

Address

Enter up to 35 alphanumeric characters for the first three address lines. Enter up to 25 alphanumeric characters for the last two address lines.

Post Code

Enter up to 10 alphanumeric characters for the post code.

Active (1 or 0)

Enter one of the following:

- 1 - to specify an Active Bond Number.
- 0 - to specify an Inactive Bond Number.

Note: Bond must be inactive to be deleted.

Stock Held in Base Currency

1 - Yes. Stock is converted from Prime to Base currency at time of receipt.

0 - No. Stock is converted at time of usage.

The cost is used for calculating the VAT due on the goods received. If paying acquisition VAT, the base value at time of receipt will always be used - however, deferred VAT can be at whichever cost you decide.

To accept the required amendments, press
Enter.

Bonded Stockroom Details Maintenance

2/DBM

When a company is Bonded, there is a specific option to enable the entry of HM Customs and Excise references. This procedure is used to maintain a list of valid Bonded Stockrooms.

The Drinks Sales Order Processing Product Guide gives a full explanation on how to amend/create standard Depot (Stockroom) Profile information. The details explained below only refer to the processes/entries required for Drinks Bonded Inventory Management.

This procedure produces an audit report. A log of the changes made are recorded in an audit file for subsequent enquiry and further reporting.

Implementing Warehousing for Bonded Stockrooms

If you want to implement warehouse control for a stockroom that is already Bond controlled, you do not need to carry out any additional steps. Receipts into a Bonded Warehouse will capture Bond information and issues from a Bonded Warehouse will calculate any duty payable.

If a stockroom is already warehouse controlled you must not use the Bond module to define this stockroom as Bonded.

To define a warehouse as a Bonded stockroom:

1. Issue all stock from the warehouse.
2. Use the Bond module to define the stockroom as a Bonded stockroom.

Re-receive the stock into the warehouse. The stock receipt will then capture the Bond details for the stock.

Bonded Stockroom Details Maintenance Selection Screen

Select the Bond Stockroom Details option. This displays a screen to maintain Bonded Stockrooms only.

Enter a valid two character Stockroom Code and press **Enter** to display the Bonded Stockroom Profile Maintenance Screen.

Bonded Stockroom Profile Maintenance Screen

This screen is displayed when a valid stockroom code has been entered on the Bonded Stockroom Details Maintenance Selection Screen.

09-27	SC	MW	KS IM II KENB20A PED129S1

Fields:

Bond Short Code

Enter a 2 character alpha code to define an abbreviated reference for the Bond. A different code must be entered for different Bond numbers. If a depot has already been assigned to a Bond, the Bond Short code will be in display only mode. The Bond Short code is included in the Rotation number at time of goods receipt.

Customs Account No.

Enter up to 15 alphanumeric characters to record the Customs Deferment Account Number applying to the Bond.

Customs Limit

Enter up to 11 numeric characters. This information is used for memo purposes only.

Excise Account No.

Enter up to 15 alphanumeric characters to record the Excise Deferment Account Number.

Excise Limit

Enter up to 11 numeric characters. This information is used for memo purposes only.

Customs Ref.

Enter up to 30 alphanumeric characters to record the Customs and Excise warehouse reference.

Local VAT Office Refs

Enter up to 30 alphanumeric characters to record the Local VAT Office references.

Guarantee Details

Enter up to 30 alphanumeric characters.

Solicitors' Refs.

Enter up to 30 alphanumeric characters.

Use Today's Date

1 - Transactions Movement Date will always be the current date.

0 - Transactions can be backdated.

No. of Days Allowed

Enter the number of days for which transactions can be backdated.

Note: Transactions cannot be backdated into a previous period which has already been reported.

Rotations Entered at Despatch

1 - Yes. The actual rotations picked and despatched have to be entered in Confirm Assembly to confirm the rotations that have been used.

0 - No. (Only permitted for EPD Stockrooms). Rotations will be used on an 'oldest first' basis.

Note: Chapter 7 'Examples' shows how this is used in Confirm Assembly.

Bond Type

0 - Customs Bond

1 - End Point Duty (EPD) Bond for beer.

4 - Third Party (a stockroom for which the bond duties are the responsibility of a third party).

Report Libraries

Library name for the output print queue.

Report Output Queues

Output print queue for each of the four special reports.

Allow Dual Units

0 - Quantities displayed and entered in decimal notation.

1 - Quantities displayed and entered as dual units, i.e. stock units and issue units. For example cases and bottles.

To accept the required amendments, press
Enter.

Bond Calendars

3/DBM

Use this procedure to maintain the calendars used within Drinks Bonded Inventory Management.

You maintain a separate set of calendars for each Bond Number.

This procedure produces an audit report. A log of the changes made are recorded in an audit file for subsequent enquiry and further reporting.

Calendar Maintenance Selection Screen

Select the Bond Calendars option.

This screen enables you to select the following calendar maintenance functions:

- EPD (End Product Duty) Calendar Maintenance
- Customs Calendar Maintenance
- Excise Calendar Maintenance
- Stock Return Calendar Maintenance.

To access the required calendar maintenance function, enter the appropriate Bond Number.

Fields:

Bond Number

Enter up to 10 alphanumeric characters for the required Bond number.

Note: This should be a valid Bond Number issued by HM Customs and Excise.

Note: Do not enter Bond numbers which refer to customers.

Functions:

F16

Display the EPD Calendar Maintenance Screen.

F17

Display the Customs Calendar Maintenance Screen.

F18

Display the Excise Calendar Maintenance Screen.

F19

Display the Stock Return Calendar Maintenance Screen.

To continue to the next screen, press the appropriate function key.

EPD Calendar Maintenance Screen (F16)

This screen is displayed when you enter a Bond Number and select **F16=EPD Cal** on the Calendar Maintenance Selection Screen.

The EPD (End Product Duty) Calendar holds the Period End Date for each reporting period, and the return date up to which beer returns to stock are included in the EX46 Beer Return.

You use this screen to maintain the Period End Dates, the associated Period Numbers and Return Dates of the EPD Calendar.

Item Variant and Customer Item Maintenance

1... **2...** 4/DBM

This procedure is for linking Customs and Excise tariff references to items. This linking process involves the creation of one, or more Item Variants.

For example: Two Item Variants would be necessary for an item sold as one product but sourced from two different countries.

This procedure also allows you to assign items to customers in order to inhibit other customers from obtaining the same items. Also, the customer item assignment process can be used to define items belonging to a specific customer where duty is paid against the customer's deferment account and not the proprietor of the bonded warehouse.

This procedure produces an audit report. A log of the changes made are recorded in an audit file for subsequent enquiry and further reporting.

Item Variant Selection Screen

Select the Item Variants / Customer Items option.

This screen enables the selection of an item and item variant.

```

 00-09 82 MW KS IM II KENB20A PET179S2

Fields:

Excise Rate Volume

(Normally used for Wines.) Enter Excise rate per 100 litres of liquid to a maximum of four decimal places.

Excise Rate Strength

(Normally used for Spirits.) Enter Excise rate per litre of alcohol to a maximum of four decimal places.

Note: For Beer, the rate is per 100 litres of liquid, per 1% of alcohol.

Functions:

F10

Add New Tax Type

F17

Commodity Code Maintenance

To accept the required amendments, press **F8=Update**.

To add new Tax Types and effective dates,
press **F10=Add**.

Maintain Tax Types Addition Screen (F10)

This screen is displayed by pressing **F10=Add** on the Maintain Tax Types Amendment Screen and enables the addition of new Tax Types, their rates and their effective dates. Blank lines are displayed for input of the required details.

Fields:

Tax Type

Enter up to 4 numeric characters to define a Tax Type. Only use codes for wines and spirits.

Excise Rate Volume

(Normally used for Wines.). Enter Excise rate per 100 litres of liquid to a maximum of four decimal places.

Excise Rate Strength

(Normally used for Spirits.). Enter Excise rate per litre of alcohol to a maximum of four decimal places.

Note: For Beer, the rate is per 100 litres of liquid, per 1% of alcohol.

Effective Date

Enter the date that the tax rate becomes effective, in the form DD/MM/YY.

To accept the required amendments, press **F8=Update**.

Maintain Commodity Codes Standard Rates Screen (Option 1)

This screen, accessed by selecting '1' against the Commodity Code on the Maintain Commodity Code Screen, enables the amendment of Customs Volume and Strength rates.

+

F3=Exit F8=Update F12=Previous

09-16 **S*** MW KS IM II KENB20A PET179S2

Fields:

Tax Type

Enter up to 4 numeric characters to assign Tax Types to a Commodity Code. Where the Tax Type is defined in the H M C & E Tariff book as a spirit Tax Type, the Goods Category and Commodity Code must relate to a spirit. Similarly, non spirit Tax Types must relate to non spirit Goods Categories and Commodity Codes.

Tip: See 'Examples' for details of calculating H M Customs & Excise Duty.

To remove a Tax Type combination, space over the entry.

Once the required amendments have been made, press **F8=Update** to update.

Rotation Detail Maintenance

6/DBM

This procedure permits the maintenance of rotation details where they may have been incomplete or incorrect on the receipt, or where goods have been received in a suspended state. If a Rotation has been received as suspended, it must be released from suspension before it can be used in any further movement transactions.

Only certain information may be amended, as illustrated in the examples given below.

This procedure produces an audit report. A log of the changes made are recorded in an audit file for subsequent enquiry and further reporting.

Rotation Detail Maintenance Selection Rotation Screen

Select the Rotation Details option.

This screen enables the selection of a Rotation for amendment.

BW053	HW - Handy Wholesalers Ltd	USER GALBRAIJ	12/03/96 16:34:04
Rotation Detail Maintenance			
Bond number	JKG651234		
Item number	C101		
Rotation number	96BW000002		
F3=Exit			
06-19	SA	MW	KS IM II PLYM400A PED171S1

Fields:

Bond Number

Enter up to 10 alphanumeric characters for the Bond number.

Item Number

Enter Item number.

Rotation Number

Enter 10 alphanumeric Rotation number applying to the item number. Rotation number will always be in the form YYSSNNNNNN.

YY - Year of receipt.

SS - Bond Short Code.

NN - 6 numeric digits.

To review or amend Rotation details, press
Enter.

Rotation Detail Maintenance Amendment Screen

This screen is displayed when you have entered valid details into the Selection Rotation Screen, and enables the amendment of details illustrated.

The current details are displayed, with space for the new details to be entered. Only overwrite details to be altered.

Fields:

Customs entry

Overtype new details as applicable. Note that the relative positions of the information should still conform to H M C & E regulations. Only enter new details if receipt was an import.

Customs Date

Leave as zeros if not an import or overtype revised date in form DD/MM/YY

VA/VI ref

(Mandatory for Wines.) Overtype details as applicable.

VAT or Vintage Reference (user-defined).

W81 Number

Overtype 7 digit number if original receipt came from another Bonded warehouse.

TRID/FAF saty

Overtype as applicable. The Tariff ID is used to define Customs Duty; must be one of the following:

M - Value of Goods from W81 (Payment of VAT deferred until sale).

MA - Value of Goods entered on receipt (Payment of VAT deferred until sale, and labelled 'Acquisition' VAT).

F - The original country of origin is entered on the receipt (also for an Import).
Value of Goods entered on receipt (Payment of VAT deferred).

Blank - Goods cannot be received into a bonded stockroom. The Supplier has already paid HM Customs and Excise duty, so the goods cannot go back into Bond. This is called Repatriation.

FAF Satisfactory - Must be set to 'Yes'.

Date Received

Overtyping new date in the form DD/MM/YY. Note that the original receipt date within all movement audit files will still remain unchanged.

FIC/Currency

F - Freight; I - Insurance; C - Goods

Overtyping original costs as applicable. Overtyping cost currency codes as applicable.

*Note that the costs represent a per case value,
or if received in bottles, a per bottle value.*

Functions

F9

This screen displays blank lines to allow the input of the required details.

Fields:

Commodity Code

Enter up to 22 numeric characters to record the EEC Commodity Code. The Commodity Code must have previously been defined.

Country Of Origin

Enter up to 4 characters for the country code. Country codes must exist in the Descriptions file.

Quota No.

Enter EEC Quota number. The quota number is used when maintaining Item Variants.

Status

Enter single character status code:

O - Open.

C - Critical.

X - Closed.

Rate Volume

Enter Customs rate per 100 litres of liquid to four decimal places.

Rate Strength

Enter Customs rate per litre of alcohol to four decimal places.

Note: For Beer, the rate is per 100 litres of liquid, per 1% of alcohol.

Commercial Value Percent

Enter the percentage to be applied to the Customs values to determine the Ad Valorem duty payable.

Note: This is normally applicable to Beer, the other rates not normally being used. However, all rates and percentages defined are applied.

Date Effective

Enter the date tax rate becomes effective, in the form DD/MM/YY.

To accept the required entries, press
F8=Update.

Commodity Codes Maintenance

You use this procedure to change Commodity Codes and Tax Types on existing rotations. This means that, for example, budget changes can be implemented without having to issue and re-receive items.

This is done in two stages:

1. Define a current commodity code and tax type combination that you want to change, then define the new commodity code and tax type combination. The system generates a list of all existing item variants with the current commodity code and tax type combination.
2. Change the commodity code and tax type for the item variants on this list. You can modify or delete individual lines from the list, as required.

Select Commodity Codes

1...
2...

10/DBM

You use this screen to define a change in Commodity Code and Tax Type combination for existing rotations.

You enter:

- the current commodity code and tax type combination that you want to change.
- the new commodity code and tax type combination.

The system generates a list of all existing item variants with the current commodity code and tax type combination.

Fields:

Alcohol by Vol(ume)

The Volume of Alcohol per case, printed on packing and delivery notes. (Not directly used by Drinks Bonded Inventory Management).

Stock Unit

Stock unit defines the stocking unit of measure code. This code would normally be set to represent a case, even if the case normally contains only one bottle.

Issue-stock Conversion

The issue to stock conversion must always be a whole number of issue units in a stock unit, and therefore would be the number of bottles in a case.

Issue Unit

Issue unit defines the unit of measure code - for example, single bottles - and should normally be a different code to Stock Unit, unless a case only has one bottle.

VAT Code

Enter a single character code conforming to major type 'VAT' from the Descriptions file. This VAT Code determines the VAT calculated on payable duties.

To reach the Item Maintenance Costing Details Screen, press **Enter** *twice*.

Item Maintenance Costing Details Screen

This screen is displayed when you have made entries onto the Details Screen and pressed **Enter** twice.

Only those entry fields which affect Drinks Bonded Inventory Management are detailed here.

Fields:

Size Code

(Optional.) Memo field printed on packing lists.

Vintage

(Optional.) Memo field used in Drinks Sales Analysis.

Equivalent Case Factor

Used for pricing - not used in Drinks Bonded Inventory Management.

Volume per Stock Unit

Used in Drinks Transport Planning.

Litrag

Litres per case must be entered. All duty and tax calculations are based on metric volumes.

Bottles per Case

Bottles per case must be entered. Where the Issue to Stock conversion factor has been entered on the first screen, Bottles per case will be set to the same number automatically.

Cases per Pallet

Cases per Pallet - used in Drinks Telesales only.

Duty Value / Duty Tariff / Duty Rate £ / Duty Value £

Used to calculate Duty values for items, and can be reflected in Standard Costs and Sales Price Lists. (Not used directly in Drinks Bonded Inventory Management.)

Duty Status

Single digit representing the Item's Duty Status:

- 1 - No Limitation. The item can be sold to either Duty Free or Duty Paid customers.
- 2 - Duty Free (Bonded) only. The item can only be sold to customers established as Bonded.
- 3 - Duty Paid only. The item can only be sold to normal Duty Paid customers that are not established as Bonded.

Note: A Warning message is displayed at Order Entry stage if you try to sell to a customer of the wrong Duty Status.

DSI Code

Applicable to US Bond only.

DSI Factor

Applicable to US Bond only.

Gallonage

Applicable to US Bond only.

Press **Enter** to validate any entries and update the file.

Customer Maintenance Drinks Sales Order Processing

Drinks Bonded Inventory Management requires additional Drinks Sales Order Processing data to be defined per customer in order to identify Duty Free and Duty Paid customer attributes.

This section explains details relevant to the company operating Drinks Bonded Inventory Management.

This procedure involves the display of a number of screens. Only the following screens are explained in detail in this product guide. Further instructions and details can be found in the Drinks Sales Order Processing Product Information.

- Customer Maintenance Selection Screen.
- Customer Maintenance Bond Details Screen.

This procedure produces an audit report.

Customer Maintenance Selection Screen

Select the Customer Maintenance from the Drinks Sales Order Processing Maintenance Screen. The Customer Maintenance Selection Screen is displayed.

```

Fields:

C&E Bond Number

Enter the customer's previously-defined Bond number (assigned to this customer by H M C & E) if a bonded customer. Leave blank for normal, Duty Paid, customers. It is validated against the Bond file.

Bonded Depot

Automatically set to '1' or '0' depending on whether or not the customer is bonded.

Note: If yes, then the customer must have a Bond number.

Deferment Account Customs

Enter the customer's Customs Deferment account number if the customer is defined as Duty Paid with deferment. Normally this entry should be blank.

Deferment Account Excise

Enter the Customer's Excise deferment number if the customer is defined as Duty Paid with deferment.

Local VAT Office

Enter local VAT office details if the customer is defined as Duty Free. This is a memo field.

VAT Reg. No.

The customer's VAT registration number if customer is Bonded, otherwise leave blank.

VAT Reg. Turn No.

The customers VAT turn number if applicable. This is a memo field.

Delivery Type

A Bond delivery type which must be a valid value held against Major Type 'DTYP'. This cannot be changed if there are outstanding orders for the customer.

Inter Company A/C

Enter one of the following:

1 - Yes. This is an inter company account.

0 - No. This is not an inter company account.

This is a memo only field.

To accept the required entries, press
F8=Update.
