Chapter 2

Processing

UK Bonded Inventory Management Processing Functions

The primary stock movements within a Bonded Stockroom are:

- Goods Receiving. Goods receiving is performed either via Drinks Inventory Management, or via Drinks Purchase Management.
- Despatch. Despatch (Confirm Assembly) is performed via Drinks Sales Order Processing.
- Transfers. Transfers are performed via Drinks Distribution Requirements Planning (DRP) or Drinks Bonded Inventory Management transfers.
- Recording Stock Losses and Gains. Recording of stock losses, or gains are performed via Drinks Bonded Inventory Management.
- Payment of Customs Duty. Payment of Customs duty are performed via Drinks Bonded Inventory Management.

When Drinks Bonded Inventory Management is in operation for a company, certain restrictions are enabled if the Stockroom is defined as Bonded. In these circumstances the following functions are **not** available:

Inventory Management

- Customer Order Issue.
- Sundry Issue.
- Adjust Physical Stock.
- Adjust Allocated Stock.
- Transfer Out and In.
- Record Purchase Order.
- Cycle Counting Automatic Adjustments.

Sales Order Processing

- Allocation of Stock in excess of physical.
- Sundry Credit/Invoice with stock update.
- Sourcing of Duty Paid Stock for a Duty Free Customer.

Stock counting, and the reporting of stock variances, is performed via Drinks Bonded Inventory Management.

All stock movements are logged within Drinks Inventory Management, and all stock movements relevant to H M C & E are also in a separate movement file for enquiries and audit reports.

This section should be read in conjunction with the other module Product Information, where reference is made to transactions not performed directly within Drinks Bonded Inventory Management.

Mark Rotation As Free Circulation

1... **2...** 1/DBP

This procedure is for paying Customs duty for the current stock balance of a Rotation where the Rotation has been received into Bond as 'Not in Free Circulation'.

This procedure produces a C88A Backup Report and logs the change made in an audit file for subsequent enquiry and further reporting.

Mark Rotation As Free Circulation Selection Screen

Select the Mark Rotation As Free Circulation option.

This screen enables the selection of a Rotation.

Delivery Type ?		<u>12</u>					
F3=Exit F4=Prompt							
06-19		S2		MW		KS IM II PLYM400A PED171S1	

Fields:

Bond Number

Enter up to 10 characters for the Bond number.

Rotation Number

Enter 10 alphanumeric characters for the Rotation number.

Delivery Type

Enter up to two alphanumeric characters to specify Delivery Type. This must conform to Delivery Types under Major Type 'DTYP' in the Descriptions file.

If the item is not owned by the proprietor, use a Delivery Type assigned to Home Use with deferment. Otherwise, use normal To Home Use code. Where the Rotation was wrongly received as Not in Free Circulation and no further Customs duties are due, use Delivery Type applying to another Bond. This must be approved by H M C & E before entry.

Press **Enter** to continue to the Mark Rotation as Free Circulation Details Screen.

Mark Rotation as Free Circulation Details Screen

This screen is displayed when you have made valid entries into the Mark Rotation as Free Circulation Selection Screen.

This screen displays the current details.

Pressing **Enter** again displays the receiving stockroom details.

Pressing **F12=Previous** displays the Record Transfers Selection Screen and provides a batch control total of transfers, based on two movements per transfer.

Stock Write Offs / Gains in Storage and Stock Write Off (Bottles Only)

1... 3/DBP
2...

1... 5/DBP
2...

This procedure is for writing off, or adding, stock. Stock write-offs are usually performed as a result of a stock check, or a breakage.

There are two separate options:

- Case Write Offs and Gains in Storage.
- Bottle Write Offs.

Note: This procedure cannot be used for Duty Paid goods.

When writing off stock, it is possible to either write off the stock to Home Use (Duty Paid), to Losses Allowed In Storage (No Duty), or to Authorised Destruction's (No Duty).

When adding stock, the Rotation to be increased must already have a stock balance. If the Rotation is closed, the additional stock must be re-warehoused through the normal receipt process.

This procedure is logged in a transaction log file and recorded in an audit file for subsequent enquiry and further reporting.

Record Write Off / Stock Check Gain Selection Screen

Select the Stock Write Off / Gains In Storage, or
Stock Write Off (Bottles Only) option.

A screen is displayed which enables selection of the Stockroom.

Fields:

Item

Enter up to 15 alphanumeric characters for the Item number.

Variant

Enter three character Item Variant number, or leave blank for default number.

Rotation

Enter 10 alphanumeric characters for Rotation number.

Adj. In

Adjustment Code Inventory. Enter 2 character Movement Reason Code, conforming to major type 'MOVR' in the Descriptions file.

Code Bo

Enter 2 character Adjustment Code Bond Type, conforming to major type 'ADJT' in the Descriptions file.

Quantity

Gains - The entered quantity must be a whole number of cases.

'Case' Write Offs - The entered quantity can be either a whole number of cases or a bottle quantity - but the sum of all Bottle Quantity Lines must equal a whole Case. (The quantities are negative on Write Off Adjustments.)

'Bottle' Write Offs - The entered quantity should be negative and either a Bottle Quantity or multiple Bottle Quantity Lines - but the sum of all lines must equal the number of bottles originally received in the Rotation.

Cost

If not operating Standard Costing for the item, enter cost per unit of measure.

Narrative/Description

Enter details as explained for the previous screen.

Movt Type

Enter up to 3 character Movement Reference Type, conforming to major type 'TRAN' in the Descriptions file.

Once the required entries have been made,
press **F8=Update** to update the details.

You will be returned to the Record Write Off / Stock Check Gain Selection Screen with previous movements displayed at the bottom. Either enter more details for processing, or exit from the option.

Review Warehouse Details

Once an Item, a Rotation and an Adjustment Transaction have been entered, the warehouse details can be reviewed. Refer to the Drinks Warehousing Product Information for further details.

Record Return of W81 Documents

4/DBP

Each time a despatch is made to another UK Bond, the Inter Warehouse Transfer document, called a W81, is logged by Drinks Bonded Inventory Management. Each W81 is given a unique document number.

Receiving UK Bonds are required to return a copy of the W81 to the supplying warehouse, as confirmation of receipt.

This procedure is for logging the return of W81s so that those not returned can be identified, and detailed in the returns report.

Bond Number Selection Screen

Select the Record Return of W81 Document Numbers option.

Fields:

Bond Number

Enter up to 10 alphanumeric characters for the Bond Number referring to the supplying Bond.

Press **Enter** to continue to the Document Entry Screen.

- ```

### Fields:

#### Bond Index

Enter the Code Number for a Bond which has already been set-up.

#### Audit Reference Number

This is the number of the report generated when the Bond Exceptions Report is printed.

Type in valid codes for each field and press **Enter**, the Delivery Exceptions Clearance Detail Screen is displayed.

## Delivery Exceptions Clearance Detail Screen

This screen is displayed when you have made valid entries into the Delivery Exceptions Clearance Selection Screen.

### **Fields:**

#### **Rotation**

Enter the rotation number into which the cleared stock is to be returned.

#### **Transfer to Stockroom**

Enter the stockroom into which the cleared stock is to be returned.

#### **Return Reason**

Enter a two character return reason, which is validated against major type 'SMCA' in the Descriptions file.

#### **Narrative**

Enter 20 characters or leave blank. This is a memo field.

Press **F8=Update** to save the details to file.

# Stock Counting

In order that the accuracy of the stock levels can be checked and corrected, it is necessary to perform stock counts. The procedures produce count documentation and a report of stock variances.

The counting process consists of the following steps:

- Request Stock Count - to print stock count sheets. Printing the count sheets causes the Rotation/item/location stocks to be recorded for comparison against the counted stocks.
- Entry of stock counts.
- Request Stock Count Variance Report.

***This module does not prevent movements during the counting process. It is therefore vital that movements do not occur during the count process.***

Count sheets and the variance report can be printed in either location or Rotation sequence with the facility to specify From and To ranges.

The variance report compares the original physical stock with the count stock. Adjustments should be made via Stock Adjustment.

*Note: Inventory stock counting and Warehouse stock counting provide an alternative procedure to Bond stock counting. Bond is included in both these functions. This provides the facility to stock count in warehouse defined stockrooms that are also bonded. Inventory stock counting and Warehouse stock counting are the recommended functions for stock counting.*

*Note: If adjustments are required as a result of the stock count, then the adjustments are to be made using Bond Stock Write Offs / Gains in storage and Bond Stock Write Off (Bottles Only). This provides a greater flexibility for recording the reasons for the adjustment.*

# Stock Counting Request Stock Count

## 10/DBP

This procedure enables the request of stock count sheets.

# Request Stocktake Count Sheets Screen

 Select the Request Stock Count option.

Leave as '0' to leave data. Enter '1' to clear data.

Press **Enter** to submit the request for the a Variance Report.

# Goods Receiving Via Drinks Inventory Management

This procedure is for receiving stock directly into inventory and the production of a 'Landing Report'.

The Drinks Inventory Management Product Information gives full details on how to perform the receipt process when receiving into a Duty Paid stockroom. The instructions that follow, detail, by exception, the processes relevant to a receipt into a Bonded (Duty Free) Stockroom.

## Purchase Orders and Sundry Receipts

The illustrations that follow relate to Sundry Receipts. Purchase Order Receipts operate in exactly the same way. All instructions given assume the receipt refers to a Bonded Stockroom, unless stated otherwise.

## Record Purchase Receipts Selection Screen

This screen enables the entry of default data for the current batch.

### Fields:

#### Stockroom

Output only if Stockroom is Bonded. If Stockroom is not Bonded, you can enter a different Duty Paid Stockroom. But, you cannot switch from Duty Paid to Bonded without returning to the first screen by pressing **F12=Previous**.

#### Item Variant

Leave blank for the default Item Variant. Enter three character code for any other variants.

#### Movement qty

Enter the movement quantity which must not contain decimals. If receiving bottles, the quantity must be less than a case size.

#### Lot

This field will not appear for a Bonded Stockroom. Lot number, otherwise known as Rotation is displayed later on in the receipt process.

#### Cost/unit

Costs given by the supplier/importer for Customs and VAT purposes should not be entered here. These costs are entered on the next screen.

### Movement Reason

If entered, this code must conform to Description file codes assigned to Major Type 'RCPT'. If code was left blank on the first screen, this field will be mandatory.

*Note: If the Stockroom is not Bonded, the Rotation Receipt screen will not be displayed.*

Tip: After completing the Rotation Receipt, the process can be repeated for the next individual receipt.

On pressing **Enter**, details will be re-displayed until no more changes have been made.

Pressing **Enter** one more time displays the Rotation Receipt For Other Bonds Screen.

## Entry of Rotation Receipt Details

This process involves the entry of specific details relating to Duty Free goods.

The entries required, and therefore the format of the screen, are determined by the type of receipt, according to the chosen reason code. For example, an import will require Customs Entry details.

The table shows variable entries based on the type of receipt.

|                       | <b>Import</b> | <b>From Bond</b> | <b>Own Production</b> | <b>Stock Gain</b> |
|-----------------------|---------------|------------------|-----------------------|-------------------|
| Production Item       |               | O                | O                     | O                 |
| Production Variant    |               | O                | O                     | O                 |
| Production Rotation   |               | O                | O                     | O                 |
| Production Batch No.  |               | O                | O                     | O                 |
| W81 Number            |               | M                |                       | S                 |
| Port of Entry         | M             |                  |                       | S                 |
| Customs Entry No.     | M             |                  |                       | S                 |
| FAF Price OK          | M             | M                |                       | S                 |
| Duty Paid at Port     | M             | M                |                       | S                 |
| Line Cost - Goods     | M             | M                |                       | S                 |
| Line Cost - Freight   | O             | O                |                       | S                 |
| Line Cost - Insurance | O             | O                |                       | S                 |

Key: **M** = Mandatory

**O** = Optional

**S** = Selective (based on original consignment)

**Blank** = Entry not displayed

## Rotation Receipts For Other Bonds Screen

This screen is displayed when you press **Enter** on the Record Purchase Receipts Detail Screen.

This screen illustrates a receipt from another Bond (Movement Reason Code **OB**). Detailed below are the entries which may be required. Those marked by an asterisk may not apply. See the table of variable entries listed previously.

|                                                        |              |                            |                               |                 |                  |                      |  |

### Fields:

#### Rotation Number

Enter 6 digit Rotation number, including leading zeros. The first four characters of the Rotation number cannot be changed. Rotation numbers keyed must be unique for each item receipt. If Rotation numbers are allocated automatically, this field will not be displayed.

#### Free Circ

This defaults to the Item Variant setting. If Free defaults to '1', meaning Customs duty has been paid, you cannot change it to '0'. On an exception basis, you can change Free Circulation from '0' to '1'.

#### S/Rsn.

Suspension Reason will be displayed when the Company has been set to allow all receipts to be put away without maintaining the Rotation. The option to suspend a receipt only applies when **F20=Update as Suspended** is pressed and a reason code has been entered. Suspension reason codes must be in the Description file under Major Type of 'ROTS'.

#### Commodity Code

Enter 22 character Commodity Code. The code must agree with the primary code defined against the Item Variant.

**Date of Receipt**

Defaults to current date. If necessary, an earlier date can be entered.

**2 Litre C/Code**

Enter Commodity Code for goods originally supplied in over 2 litre containers but due to be stocked in under 2 litre containers. This code must be defined against the Item Variant.

**Volume per Stock Unit**

This is the volume of liquid per stock unit. Enter case size in litres if receiving cases. Key bottle size in litres if receiving bottles. The litre size must agree with the litres defined for the item.

**Production Item, Variant, Rotation, Batch No**

These fields are for information only and do not perform any function within the standard Drinks Bonded Inventory Management module. However, the details are logged in a Rotation file for ad-hoc reporting if required.

**Strength**

If item is a spirit, enter percentage alcoholic strength. If non spirit, leave as zero. Strength must be the same as that defined for the Item Variant.

**Lit / Gal of Liq. / Alc**

If item is a spirit, enter total litres of alcohol for the full quantity received. If non spirit, key the total litres of liquid. If the combination of quantity, volume per UOM and strength do not agree based on the total entered, you will not be able to receive the item.

**W81 Number**

Enter up to 7 digits for the supplier's W81 number. If stock is re-warehoused due to a stock gain, caused by extra stock identified by a stock count, then the entry of a W81 number will make the receipt process regard the original stock as having originated from another Bond.

**Tariff ID**

Enter Tariff Rate Identifier as applicable. Codes entered must conform to Description file codes.

**FAF Price OK**

0 - No. This is the default.

1 - Yes.

**Duty Paid at Port**

0 - No. This is the default.

1 - Yes.

**Line Cost - Goods**

Enter total goods cost. If stock is re-warehoused due to a stock gain identified by a stock count, a zero Line Cost will result in the receipt process regarding the stock as an 'Own Produced' item.

### Line Cost - Freight

Enter total freight cost. If freight cost is included in the goods cost, leave this field as zero.

### Line Cost - Insurance

Enter total insurance cost. Leave insurance cost as zero if value is included in goods cost.

### Currency Code - Gds, Frt, Ins

These currency codes default to 'GBP' and refer to their associated goods, freight and insurance cost values. Enter revised currency codes as necessary.

If a currency code record does not exist for the current business week, then the receipt will be rejected. Where successive item receipts are made, the Currency Codes will be re-displayed to avoid having to re-key the same information.

After each item receipt is confirmed, an audit report is produced.

## Functions:

### F20

Update as Suspended - requires entry of a Suspension Reason Code.

Once the required entries have been made, the following steps should be taken:

To check details on the Rotation receipt screen, press **Enter**.

To suspend, press **F20=Update as Suspended**.

To update the receipt for the item, and return to the original display ready for the next receipt, press **Enter** again.

# Goods Receiving Via Drinks Purchase Management

This procedure is for receiving stock against purchase orders and the production of a 'Landing Report'.

The Drinks Purchase Management Product Information gives full details on how to perform the receipt process when receiving into a Duty Paid stockroom. The instructions that follow detail, by exception, the processes relevant to a receipt into a Bonded Stockroom.

## Purchase Order Receipt Screen

The illustrations that follow assume the receipt refers to a Bonded Stockroom. This screen enables you to select the Receipt Point, and Receipt Date, for the goods to be confirmed as received.

*Note: Receipts into a Bonded Stockroom can only be direct to Stores. Receiving and transferring stock between Goods Inwards and Inspection is not supported.*

```
PM010 HW - Handy Wholesalers Ltd USER GALBRAITJ 11/03/96 12:16:26
Goods Receiving

ENTER:- Stockroom...?.. B1 Midlands Bonded S/Room

Receipt Date... 110396

F3=Exit F4=Prompt
07-37 Sf HW KS IM II KENB20A PED129S1
```

### Fields:

#### Stockroom

Enter the stockroom code.

#### Receipt Point

Enter the receipt point as follows:

- 1 - Goods Inwards.
- 2 - Inspection.
- 3 - Stores.

#### Receipt Date

Enter the receipt date in DDMMYY format.

Press **Enter** to display the Receipt Into Stores Screen.

## Receipt Into Stores Screen 1

This screen is displayed when you have entered valid data into the Purchase Order Receipt Screen and pressed **Enter**.

This screen enables you to select the Purchase Order, Item or Supplier against which receipts are to be made.

*Note: If you are not authorised to the Stockroom assigned to the order, you will be denied access to the order.*

### Fields:

#### Ref

Enter the Line Reference Number.

#### Qty

Enter the quantity being received.

#### UOM

Enter the Unit of Measure (if different to the Issue UOM).

#### Complete

Use this field if the balance of the line is to be cancelled.

#### No. Labels

Number of labels required, if label printing is used.

#### Int. Trace

Internal Trace (can be a lot number for lot controlled items).

#### Ext. Trace

External Trace.

#### Expiry Date

The date after which the order can no longer be received. If there is no specific requirement, this field is set to all 9's.

### Amend Landed Costs

Set to '1' to show Landed Costs screen for amendment.

*Note: Whichever type of receipt is requested, the Item Variant window is displayed, followed by the Rotation Receipt Screen.*

### Functions:

#### F8

Receive Whole Order and return to the Order Selection Screen.

#### F9

Container Receipt and Return.

#### F21

Enter Order Text.

There are several options from this screen - those detailed at the top of the screen enabling alteration or receipt of the order(s):

Receive Whole Order (**F8=Receive Whole Order**).

Receive Whole Line (option '2' or '5').

Receive Part of a Line (by entering details in the fields at the bottom of the screen).

Select the type of receipt you require.

## Item Variant Window

This window is always displayed at this stage, and allows the entry of an item variant and receipt type.

### Fields:

#### Rotation Number

Enter 6 digit Rotation number, including leading zeros. The first four characters of the Rotation number cannot be changed. Rotation numbers keyed must be unique for each item receipt. If Rotation numbers are allocated automatically, this field will not be displayed.

#### Free Circ

This defaults to the Item Variant setting. If Free defaults to '1', meaning Customs duty has been paid, you cannot change it to '0'. On an exception basis, you can change Free Circulation from '0' to '1'.

#### S/Rsn

Suspension Reason will be displayed when the Company has been set to allow all receipts to be put away without maintaining the Rotation. The option to suspend a receipt only applies when **F20=Update as Suspended** is pressed and a reason code has been entered. Suspension reason codes must be in the Description file under Major Type of 'ROTS'.

#### Commodity Code

Enter 22 character Commodity Code. The code must agree with the primary code defined against the Item Variant.

#### Date of Receipt

Defaults to current date. If necessary, an earlier date can be entered.

## **2 Litre C/Code**

Enter Commodity Code for goods originally supplied in over 2 litre containers but due to be stocked in under 2 litre containers. This code must be defined against the Item Variant.

## **Volume per Stock Unit**

This is the volume of liquid per stock unit. Enter case size in litres if receiving cases. Key bottle size in litres if receiving bottles. The litre size must agree with the litres defined for the item.

## **Production Item, Variant, Rotation, Batch No**

These fields are for information only and do not perform any function within the standard Drinks Bonded Inventory Management module. However, the details are logged in a Rotation file for ad-hoc reporting if required.

## **Strength**

If item is a spirit, enter percentage alcoholic strength. If non spirit, leave as zero. Strength must be the same as that defined for the Item Variant.

## **Lit / Gal of Liq. / Alc**

If item is a spirit, enter total litres of alcohol for the full quantity received. If non spirit, key the total litres of liquid. If the combination of quantity, volume per UOM and strength do not agree based on the total entered, you will not be able to receive the item.

## **W81 Number**

Enter up to 7 digits for the supplier's W81 number. If stock is re-warehoused due to a stock gain, caused by extra stock identified by a stock count, then the entry of a W81 number will make the receipt process regard the original stock as having originated from another Bond.

## **Tariff ID**

Enter Tariff Rate Identifier as applicable. Codes entered must conform to Description file codes.

## **FAF Price OK**

0 - No. This is the default.

1 - Yes.

## **Duty Paid at Port**

0 - No. This is the default.

1 - Yes.

## **Line Cost - Goods**

Enter total goods cost. If stock is re-warehoused due to a stock gain identified by a stock count, a zero Line Cost will result in the receipt process regarding the stock as an 'Own Produced' item.

## **Line Cost - Freight**

Enter total freight cost. If freight cost is included in the goods cost, leave this field as zero.

### Line Cost - Insurance

Enter total insurance cost. Leave insurance cost as zero if value is included in goods cost.

### Currency Code - Gds, Frt, Ins

These currency codes default to 'GBP' and refer to their associated goods, freight and insurance cost values. Enter revised currency codes as necessary.

If a currency code record does not exist for the current business week, then the receipt will be rejected. Where successive item receipts are made, the Currency Codes will be re-displayed to avoid having to re-key the same information.

After each item receipt is confirmed, an audit report is produced.

### Functions:

#### F20

Update as Suspended - requires entry of a Suspension Reason Code.

Once the required entries have been made, the following steps should be taken:

To check details on the Rotation receipt screen, press **Enter**.

To suspend, press **F20=Update as Suspended**.

To update the receipt for the item, and return to the original display ready for the next receipt, press **Enter** again.

# Order Entry

Recording customer orders, either within Drinks Telesales, or within Drinks Sales Order Processing, is the means by which bonded goods are supplied. The 'Order Entry' route is the only way of effecting the supply of bonded goods.

## Order Entry Outline

The different methods of creating and amending orders are explained in the Drinks Telesales and Drinks Sales Order Processing Product Guides. Further details are also given in the appropriate Drinks module Product Information.

When Drinks Bonded Inventory Management is in operation, the order entry screens display the following additional information:

- Customer Status - Duty Free or Duty Paid.
- Customer Bond Number, if bonded.
- Delivery Type - Export, Another UK Bond, Etc.

Certain restrictions are imposed by this module when using the order entry facilities. These are as follows:

- Operator must be authorised to the supplying Stockroom.
- Items assigned to specific customers, or owned by customers, cannot be supplied to other customers.
- Deliveries to a Duty Free customer can only be sourced from a Duty Free Stockroom.

In every other respect, the order entry facilities operate in the usual way, as per the standard applications.

## DRP Orders

Manually created Drinks DRP Orders allow transfer to other Bonded and Tax Paid Stockrooms - however, orders for delivery to a Bonded Stockroom must only be sourced from a Bonded Stockroom and ordered in Item Stock Unit of Measure multiples.
