Chapter 2

Forecasting

Drinks DRP Sales Forecasting Functions

This section deals with the maintenance of sales forecasts and stock level forecasts for DRP items.

Stock level forecasts allow stock to be built up to a planned level according to specified target quantities and dates.

Item Group Profiles Maintenance

10/DDM

This function allows definition of product mix percentages within sales families. DRP uses the minor item group codes specified for items in Inventory Management to identify product families. All items with the same minor item group code are treated as members of a family. The Item Group Profile function allows a percentage to be assigned to each product in the family reflecting its relative demand either in quantity or value terms. The overall sales forecast or stock level targets for each family can then be spread to each item according to these percentages.

Item Group Profiles Maintenance Centre / DC Selection Screen

Select the Item Group Profiles option.

The initial screen enables you to select the Centre/DC (via the prompt facility, if required) for which the Minor Item Group is to be maintained.

Fields:

Centre/DC

Enter a valid Centre or DC, i.e. one with periods and stockrooms defined.

Press **Enter** to display the Item Group Profiles
Maintenance Selection Screen.

Item Group Profiles Maintenance Selection Screen

This screen is displayed when you have entered a valid Centre / DC into the Item Group Profiles Maintenance Centre / DC Selection Screen.

It enables you to select the Minor Item Group to be maintained. A list of all valid minor item groups is displayed on the screen. Any group which already has a profile defined has a 1 displayed alongside it.

These groups are sourced from the Drinks Inventory Descriptions file (refer to Drinks Inventory Management for further details).

06-04 MW KS IM II KENB20A PED171S1

Fields:

Select

Enter a '1' against the required Item Group to select it.

Tip: If you receive the following error message:
"No Items Are Defined In This Item Group".

Make sure that the selected item group has at least one item defined to it (via Drinks Inventory Management Maintenance / Item Details).

Tip: If you receive the following error message:
"No Items In This Item Group Are Forecast Items For This Centre / DC".

Make sure that the Item is defined via the Drinks DRP Distribution Item Maintenance option.

Press **Enter** to display the Item Group Profiles

Maintenance Item Profile Screen.

Item Group Profiles Maintenance Item Profiles Screen

This screen is displayed when you have selected an Item Group on the Item Group Profiles Maintenance Selection Screen.

It enables you to update the spread of percentage sales across Items within the Item Group. A list of all valid items within the minor item group is displayed. The Description is taken from Drinks Inventory Management (refer to Drinks Inventory Maintenance / Item Details), and Source within Drinks DRP (refer to Distribution Item Master Maintenance).

08-69 S2 MW KS IM II KENB20A PED171S1			

Fields:

Percentage

A positive value may be entered against an item to represent its projected percentage sale within the item group. Blank is interpreted as zero.

Note: The total percentage for the item group must equal 100%.

Press **F8=Update** to update these percentages in the Drinks DRP Item Group Profile file.

Press **F11=Delete** to set all the percentages to zero as the relevant records are deleted from the profile file. The items themselves are not deleted.

Item Group Sales Forecasts Maintenance

11/DDM

This function lets you maintain sales forecasts for Item Groups by Centre/DC. Forecasts may be maintained by 'quantity' or financial 'value'. A seasonal profile may be selected to spread forecasts for selected periods, weeks and days.

Item Group Sales Forecasts Maintenance Selection Screen

Select the Item Group Sales Forecasts option.

The initial screen enables selection by Centre/DC, then (when a valid Centre/DC has been entered, with at least one Item Group Profile) further selection by Year and Item Group is available.

DR011	HW - Handy Wholesalers Ltd	USER GALBRAIJ	19/10/95

Fields:

Centre/DC

Valid Centre or DC entered as the initial selection - i.e. one with time phased planning periods and stockrooms defined.

Year

(Mandatory field). Enter the year (in 'YY' format) for which the forecast will be maintained - defaults to the current year. It may be changed to a subsequent year provided that it is defined to the calendar for the selected DC/Centre.

Item Group

Minor Item Group - set up for the Centre/DC through Item Group Profile Maintenance.

Select

Enter a valid option.

1 - To maintain forecasts by quantity.

2 - To maintain forecasts by value.

Note: If the Forecast Basis is altered, the system

*issues a warning with an **F8=Update** option to proceed.*

Enter a '1' or a '2' in the selection field next to a line, and press **Enter**.

Item Group Sales Forecasts Maintenance Forecast Selection Screen

This screen is accessed by entering either a '1' or a '2' against the required Item Group Profile on the Item Group Sales Forecasts Maintenance Selection Screen.

It allows entry of forecast Quantities or Values (respectively) by Item Group and Centre/DC, and definition of time intervals over which this forecast should be spread. The resulting forecast replaces any existing forecasts for the periods concerned.

Centre / DC, Year, Item Group

Entered on the previous selection screen.

Annual Forecast

The previously maintained annual forecast quantity or value for the Minor Item Group and year.

Week No.

The Week Number from the associated Calendar.

Start Date

The Start Date applicable to the Week No. from the associated Calendar.

Percentage

Enter the percentage sales for the weeks - the Quantity or Value is calculated automatically based on these figures.

Note: The entered percentages must add up to 100%.

The following data may be maintained:

- Weekly Forecast.
- Spread Forecast.

Functions:

F13

Weekly Forecast.

F17

Spread Forecast.

Press **F8=Update** to save any changes or use the function keys to update the weekly or spread forecast.

Generate Item Sales Forecasts

12/DDM

This function will take item group forecasts and break them down into item forecasts in proportion to the percentages defined for the items within the group profiles.

This function regenerates all item forecasts for items within the selected item groups.

Generate Item Sales Forecasts Item Group Selection Screen

 Select the Generate Item Sales Forecast option.

The initial screen allows selection by Centre/DC and Year.

Note: The Centre/DC must be one for which Periods, Stockrooms and at least one Item Group Profile have been defined.

 Enter the required details - the next screen enables selection of the Item Group for which item level forecasts are to be generated:

DR013	HW - Handy Wholesalers Ltd	USER GALBRAITJ	20/10/95
			10:30:34

☐	LA2	Premium Lager	
1=Select Item Group			
F3=Exit F12=Previous			
07-04	SA	MW	KS IM II KENB20A PED171S1

Fields:

Select

Select a profile by entering a '1' against the required line.

Centre / DC

The Centre or DC selected on the previous screen i.e. one with periods and stockrooms defined and at least one item group profile defined for the DC/Centre.

Year

Enter the year for which you wish to generate forecasts in YY format.

You are prompted, via a standard window, to confirm submission of the Job.

 Press **Enter** to submit the job.

Maintain Item Sales Forecast

13/DDM

This function supports creation and maintenance of item level sales forecasts. These forecasts may have been generated:

- By profiling Item Group Forecasts, using facilities within the Drinks DRP module.
- By transferring forecasts directly from the Forecasting Application using facilities within that application.
- By direct entry through this function without prior set-up of Item Group Profiles.

Maintain Item Sales Forecast Selection Screen

Select the Maintain Item Sales Forecast option.

The initial screen enables selection of the Centre / DC and Year for which sales forecasts are to be created or maintained. Any items defined for the selected profile are displayed on the next screen.

Note: The Centre / DC must have Periods and Stockrooms already defined.

Fields:

Sel

Select the required Item by entering a '1' in this column.

Press **Enter** to display the Maintain Item Sales Forecast Maintenance Screen.

Maintain Item Sales Forecast Maintenance Screen

This screen is displayed when you enter an Item on the Maintain Item Sales Forecast Selection Screen.

It allows maintenance of Forecast Quantities or Values by Item Group and Centre / DC. The resulting forecast replaces existing forecasts for the periods concerned.

08-25 SF HW KS IM II KENB20A PED171S1			

Fields:

Date Range

Enter the date 'From' which the stock build is to start, 'To' the date by which the stock should have decreased back to the safety stock level.

Note: The 'To' date must not be earlier then the 'From' date.

Target Quantity Or Value

Enter a target/maximum quantity to be built by the specified date. This should be a quantity above the safety stock level.

Target Date

Enter the date by which the target/maximum build quantity is to be achieved. Must be between the 'To' and 'From' date range.

Press **Enter** to generate the stock level indices and targets within the given date range.

Example:

There is a requirement to build stocks from 10/10/97 to a maximum stock position of 100,000 units above the safety stock level by 03/12/97 which will be consumed by 18/01/98.

The system generates time phased stock level targets building from the safety stock level on a straight line basis from 10/10/97 to a peak of 100,000 on 03/12/97 and back down to safety stock on a straight line basis by 18/01/98 (assuming there is sufficient demand to consume it).

Maintain Item Stock Levels

15/DDM

This function takes item group stock level targets and profiles them to item stock level targets in proportion to the percentages defined for the items within the item group profile.

This function regenerates all item stock targets for the items in the selected item groups.

Maintain Item Stock Levels Group Selection Screen 1

Select the Maintain Item Stock Levels option.

The initial screen allows selection by Centre/DC for which Item stock level targets are to be generated.

Fields:

Centre / DC

Enter a valid Centre / DC code.

*Note: The Centre/DC must be one for which
Periods, Stockrooms and at least one Item
Group profile have been defined.*

Press **Enter** to proceed to the Maintain Item
Stock Levels Group Selection Screen 2.

Maintain Item Stock Levels Group Selection Screen 2

This screen is displayed when you have entered a valid Centre / DC code in the Group Selection Screen 1.

It allows selection by Year and Item Group for which Item stock level targets are to be generated.
