Chapter 4

Enquiries

Drinks DRP Enquiries

The enquiries can be grouped into one of three categories:

- Planning.
- Static Information.
- Status.

More simply these can be regarded as:

- What is to be done?
- What are the parameters?
- Where are things?

This is how they are grouped:

- DC and Centre Schedule Enquiries.
- Distribution Item Master Enquiry.
- Shipments In - Transit Enquiry.

DC Schedule Enquiry

1... **2...** 1/DDE

This option is used to view the time-phased plan, per Item, created when the DC demand was last evaluated within a supply network.

It also provides details of actions suggested by DRP for the item.

DC Schedule Enquiry Selection Screen

Select the DC Schedule option.

This screen enables you to select the DC whose schedule is to be displayed.

Fields:

Enter DC

Enter a valid DC code, i.e. one with periods and stockrooms and defined as a DC within at least one network.

Press **Enter** to display the DC Schedule Enquiry
Item / Planner / Date Last Planned Selection
Screen.

DC Schedule Enquiry Item / Planner / Date Last Planned Selection Screen

This screen is displayed when a valid DC code has been entered into the DC Schedule Enquiry Selection Screen.

It allows flexible selection for the enquiry by Item, Planner or a range of plan dates.

```
DR080      HW - Handy Wholesalers Ltd      USER GALBRAIJ  25/10/95
                                           11:02:29

DRP DC Schedule Enquiry

DC..... C1 - Scotland

Optionally select one of the following:

Item.....?.. C101
OR
Planner.....?.. 
OR
Date last planned from...  to 

F3=Exit  F4=Prompt  F12=Previous

09-36  SP  MK  KS  IM  II  PLYM400A PED171S1
```

Fields:

DC

The code and description of the DC selected on the previous screen is displayed.

Item

Any valid item code can be specified.

OR

Planner

Any valid DRP planner code can be specified.

OR

Date Last Planned Range

A range of valid calendar dates can be specified.

Note: Only one selection criterion can be selected for a particular enquiry.

If item or planner are selected, the enquiry begins at the first valid item or planner on or after the value entered. Thus these entries need not themselves be valid

items / planners (though prompts on valid items / planners are available if required).

If a date range is selected, the enquiry begins at the first item with a last planned date on or after the from date.

All dates entered must be valid calendar dates. Alternatively, all selection fields can be left blank to begin the enquiry at the first valid item.

Press **Enter** to display the DC Schedule Enquiry
Item Summary Screen.

DC Schedule Enquiry Item Summary Screen

This screen is displayed when you have pressed
Enter on the DC Schedule Enquiry Item / Planner
/ Date Last Planned Selection Screen.

For each selected item, the supply, demand and calculated requirement quantities are displayed for each time period.

This gives an overall picture of the supply and demand pattern and makes obvious where shortfalls of supply are to occur in the future.

09-32	SA	MA	KS IM II PLYM400A PED171S1

Fields:

DC

From the selection screen.

Start

This is the start date for the last processing run which included this DC.

End

This is the end date for the last processing run which included this DC.

Time Fence

The plan is 'frozen' up to this date. New supply orders will only be planned from the time fence date onwards.

Item

Displays the code and description of the planned item.

Planner

A code for the planner with DRP responsibility for this item.

Purchase UoM

Displays the default unit of measure in which the planned item is ordered from the supplier.

Order Policy

A code representing how the item is to be replenished.

Please refer to Distribution Item Master Maintenance for a full description of these codes.

Item Type

Displays the inventory item type of the planned item.

Supplier

A valid supplier for this item.

Minor Item Group

The minor item group assigned to the item in Inventory Items Maintenance.

Physical Stk

Displays the amount of physical stock (excluding frozen stock) currently held at the stockroom for this Item.

Safety Stock

Fixed safety stock specified within DRP Distribution Item Master Maintenance.

Lead Time

The replenishment lead time for the item, expressed in days. For locally purchased items, this is sourced from the Drinks Purchase Management Item Supplier details (using the first valid supplier from the Inventory Item Stockroom Details). For centrally supplied items, the lead time is sourced from the Drinks Inventory Item Stockroom Details.

Value/Usage Class

Displays the Value/Usage Class code calculated for the planned item at Inventory stockroom level (if applicable).

Last Planned

Displays the date on which the item was last planned for the selected location.

Fixed Qty

All supply orders for this item will be for this fixed quantity, if greater than zero. This applies only to order policy D. Updated in Distribution Item Master Maintenance.

Min Qty

The minimum quantity that a supply order can be raised for this Item. Mandatory for order policies B and 'H.' Updated in Distribution Item Master Maintenance.

Max Qty

The maximum quantity for which a supply order should be raised for this Item. Applies to all order policies. If this quantity is exceeded, a warning is output

against it on the Planner Action Report. Updated in Distribution Item Master Maintenance.

Multiples

Any supply order quantity must be a multiple of this, if greater than zero. Applies only to order policy H. Updated in Distribution Item Master Maintenance.

At the detail level, the dates displayed are the start dates for each period. All figures are in terms of quantity rather than value. The overdue column includes orders which are still considered as outstanding demand or supply. Forecasts are not included here. The length of the overdue period, i.e. the number of days prior to the plan date, is defined in 'Overdue days' when the processing run was requested.

Sales Order

Total sales demand on item for the specified period at this DC. Extracted from Drinks Sales Order Processing.

Forecast

Total quantity forecasted (sales not stock level forecast) for the item in this period. Includes all forecasts, maintained in DRP, which have start dates falling into this period.

Distribution Orders

Total Distribution Order demand on item for the selected period at this DC. Extracted from Drinks Sales Order Processing. This demand results from defining this DC as a centre within a separate network (in a multi-level DRP environment.)

Demand

This is a calculation of the predicted demand for this period, based on actual, forecast and distribution order demand quantities. If consumption of forecast is not required, the demand for the period is simply the greater of actual and forecast plus the distribution order demand. If consumption is used, refer to the section on Application Configuration within this manual, for an explanation of this method.

Available

Actual available stock at this time. Calculated as:-

Previous available + Supply - Demand.

Supply

Total supply quantity due for delivery in this period. For locally purchased items, this supply will be purchase orders. For centrally supplied items, it will be Distribution Orders (from a supply centre).

Net Req'ment

Calculated difference between supply and demand, i.e.

Demand + Stock Level Forecast + Safety Stock - Previous Planned Available - Supply.

If the result is positive, there is a short fall. Otherwise, there is sufficient or excess stock, the output is blank.

Plan Orders

The planned supply quantity, if the DRP action suggestions are implemented, for this period. Includes any new supply orders, and rescheduled existing orders, whose due dates will now fall in this period.

Plan Avail

Planned available stock, if the DRP action suggestions are implemented.
Calculated as:-

Previous Planned Available + Plan Orders - Demand.

Scroll through period summaries by using the
Roll Keys.

DC Schedule Enquiry Item Supply / Demand Details Screen (F17)

This screen is displayed when you press **F17=Detail** from the DC Schedule Enquiry Item Summary Screen.

It displays details of supply and demand for the item, which were evaluated the last time the item was planned at the selected location.

This detail screen distinguishes between demand from:

- DRP, via Sales Transfer Orders. Sales Transfer Orders are designated DO.
- Production, via. Production Transfer Orders. Production Transfer Orders are designated TO.

Fields:

Date

Required date for demand and/or due date for supply.

Demand Order

Sales Order number for external customer demand, or Distribution Order number for internal supply (if this DC is also defined as a supply centre), or 'blank' if demand is a sales forecast rather than an order.

Demand SR

Delivery Stockroom.

Demand Quantity

Quantity of item required.

Demand St

Status of the demand. Valid codes are:

SO - Sales Order Line.

SX - Sales Order Line Excluded.

DO - Distribution Order Line.

TO - Production Transfer Order Line.

DX - Distribution Order Line Excluded.

FC - Sales Forecast.

FX - Sales Forecast Excluded.

Note: Order Lines are excluded for a period if the forecast is greater than the demand for the period and vice-versa. Exclusions do not occur if consumption of forecast is used.

Supply Order

Purchase order number for locally purchased items.

Distribution Order number for centrally supplied items.

Requisition number for requisitions not yet converted to orders.

Supply Quantity

Quantity of item on supply order line.

Supply St

Status of the supply. Valid codes are:

SP - Suggested Purchase Order Line.

CP - Confirmed Purchase Order Line.

SD - Suggested Distribution Order Line.

DO - Distribution Order Line.

TO - Production Transfer Order Line.

TI - In Transit.

GI - Received at Good Inwards.

IS - Received at inspection.

UP - Unconfirmed Purchase Order Line.

FS - Stock Level Forecast.

Action

The action suggested by DRP, if any, to be taken on this supply line.

Fields:

Centre

Passed forward from the selection screen.

Start

This is the start date for the last processing run which included this centre.

End

This is the end date for the last processing run which included this centre.

Time Fence

The plan is 'frozen' up to this date. New supply orders are only planned from the time fence date onwards.

Item

Displays the code and description of the planned item.

Planner

A code for the planner with DRP responsibility for this item.

Purchase UoM

Displays the default unit of measure in which the planned item is ordered from the supplier.

Order Policy

A code representing how the item is to be replenished.

Refer to Distribution Item Master Maintenance for a full description of these codes.

Item Type

Displays the inventory item type of the planned item.

Supplier

Displays a valid supplier for this item.

Minor Item Group

The minor item group assigned to the item in Inventory Items Maintenance.

Physical Stk

Displays the amount of physical stock (excluding any frozen stock) currently held at the stockroom defined for the item.

Safety Stock

Fixed safety stock specified within DRP Distribution Item Master Maintenance.

Lead Time

The replenishment lead time for the item, expressed in days. For locally purchased items, this is sourced from the Drinks Purchase Management Item Supplier details (using the first valid supplier from the inventory item stockroom details). For centrally supplied items, the lead time is sourced from the Drinks Inventory Item Stockroom Details.

Value/Usage Class

Displays the value/usage Class code calculated for the planned item at inventory stockroom level (if applicable).

Last Planned

Displays the date on which the item was last planned for the selected location.

Fixed Qty

All supply orders for this item will be for this fixed quantity, if greater than zero. This applies only to order policy D. Updated in Distribution Item Master Maintenance.

Min Qty

The minimum quantity that a supply order can be raised for this item. Mandatory for order policies B and 'H.' Updated in Distribution Item Master Maintenance.

Max Qty

The maximum quantity that a supply order should be raised for this item. Applies to all order policies. If this quantity is exceeded, a warning is output against it on the Planner Action Report. Updated in Distribution Item Master Maintenance.

Multiples

Any supply order quantity must be a multiple of this, if greater than zero. Applies only to order policy H. Updated in Distribution Item Master Maintenance.

At the detail level, the dates displayed are the start dates for each period. All figures are in terms of quantity rather than value. The overdue column includes only orders which are still considered as outstanding supply or demand. Forecasts are not included here. The length of the overdue period, i.e. the number of days prior to the plan date, is defined in 'Overdue days' when the processing run was requested.

Sales Order

Total sales demand on item for the selected period at this centre, extracted from Drinks Sales Order Processing.

Forecast

Total quantity forecasted (Sales not Stock Level forecast) of the item in this period. Includes all forecasts, maintained in DRP, which have start dates falling into this period.

Dist. Orders

Total Distribution order demand on item for the selected period at this DC. Extracted from Drinks Sales Order Processing.

Demand

This is a calculation of the predicted demand for this period, based on actual, forecast and distribution order demand quantities. If consumption of forecast is not required, the demand for the period is simply the greater of actual and forecast plus the distribution order demand. If consumption is used, refer to Processing - Evaluate DC Demand, for further details.

Available

Actual available stock at this time. Calculated as:-

Previous available + Supply - Demand

Supply

Total supply quantity due for delivery in this period. For locally purchased items, this supply will be purchase orders. For centrally supplied items, it will be distribution orders (from a supply centre).

Net Req(uire)ment

Calculated difference between supply and demand, i.e.

Demand + Stock Level Forecast + Safety Stock - Previous Planned Available - Supply.

If the result is positive, there is a short fall. Otherwise there is sufficient or excess stock and the output is blank.

Plan Orders

The planned supply quantity, if the DRP action suggestions are implemented, for this period. Includes any new supply orders, and rescheduled existing orders, whose due dates will now fall in this period.

Plan Avail

Planned available stock, if the DRP action suggestions are implemented.

Calculated as:-

Previous Planned Available + Plan Orders - Demand.

Distribution Item Master Enquiry

1... **2...** 3/DDE

This option is used to view the fixed DRP details for a selected item, within a centre or DC.

These are the parameters which control how the item is planned and from where it should be sourced as a default.

Distribution Item Master Enquiry Selection Screen

Select the Distribution Item Master Enquiry option.

The initial screen is used to select the required Centre / DC and Item for the details entered on the Distribution Item Master.

Fields:

Centre/DC

A valid centre or DC, i.e. one with periods and stockrooms defined.

Item

A valid item defined to Drinks Inventory Management and DRP applications.

Press **Enter** to display the Distribution Item Master Enquiry Item Details Screen.

Distribution Item Master Enquiry Item Details Screen

This screen is displayed when you have entered a valid Centre and item into the Distribution Item Master Enquiry Selection Screen.

It shows all details entered for the selected Centre/DC and Item under Drinks
DRP Distributed Item Master Maintenance.

Note: The details are displayed for information only - any alterations required must be carried out via Drinks DRP Maintenance.

Fields:

Item

From previous screen.

Item Description

From inventory item details.

Centre / DC

From previous screen.

Centre / DC Description

From DRP network details.

Source of Supply

1 - If Locally purchased.

2 - If Centrally supplied.

Planner

Code of the person responsible for the control of the item within DRP.

DRP Forecast

- 1 - Sales forecasts are to be maintained.
- 2 - Stock level forecasts are to be used for this item.
- 3 - Both sales and stock levels are used for this item.
- 0 - None used. In this case, the only demand considered is actual demand.

Forecast Error Tolerance % (Absolute)

Displays the default percentage difference by which sales forecast quantities may be greater than actual sales quantities or vice versa without causing a net change trigger to be written for the item concerned. If zero, the tolerance will default to the value set up for this company in Company Profile Maintenance. This is known as the Mean Absolute Percentage Error (MAPE) in statistical terms.

Order Policy

A code representing how the item is to be replenished. Valid codes are:

A - Discrete. DRP suggests an order for the exact quantity required.

B - Discrete above minimum. Suggests an order for the required quantity if greater than the minimum. Otherwise, suggests the minimum order quantity.

D - Fixed Quantity. Multiple orders of the fixed quantity will be suggested until the demand is satisfied.

G - Number of days supply. Accumulates the requirements over the specified number of calendar days and suggests an order quantity to satisfy this demand.

H - Fixed Quantity Above Minimum. Suggested order quantity will be greater than the minimum quantity and divisible by the multiple quantity.

OR

Use Inventory Order Qty

The use of one or other of these specifies the minimum re-order quantity for the Item. Such a quantity may have been entered directly into the Min Order Qty field.

Alternatively, a value of 1 in Use Inventory order Qty indicates that the inventory economic order quantity is to be used as the DRP minimum order quantity.

Similarly, a value of 2 indicates usage of inventory re-order quantity.

These quantities are employed for order policies B and H.

Max Order Qty

The maximum quantity that a supply order should be raised for this Item, if greater than zero. If this quantity is exceeded, a warning is output against it on the Planner Action Report. This applies to all order policies.

Fixed Order Qty

All supply orders for this item will be for this fixed quantity if it is greater than zero. Applies only to order policy D and is mandatory for it.

Mult Order Qty

Any supply order quantity must be a multiple of this, if greater than zero. Applies only to order policy H, and is mandatory for it.

Safety Stock

Fixed quantity reserved for each period within DRP run.

Days Supply

The number of days for which the demand requirement is calculated. For order policy G this must be greater than zero and a supply order is suggested for this calculated requirement.

Local Stockroom

The primary stockroom for the item at this centre or DC, i.e. the one where it is normally stored.

Centre

Only shown if the item is centrally supplied, i.e. the source of supply is 2. The DRP supply Centre for this item at this centre or DC.

Central Stockroom

Only shown for centrally supplied items. The primary stockroom for the item at the supply centre.

Note: All Distribution orders for the Item are raised against this stockroom(as a default) for supply to the DC.

Item details are displayed on entry to the screen, and held until a function key is used.

Press **F3=Exit**.

Shipments In-transit Enquiry

11/DDE

This option is used to enquire on distribution order lines in-transit between two selected stockrooms.

These items have been confirmed as despatched from the 'from' stockroom (via Drinks Sales Order Processing or Warehousing), but not yet confirmed as received at the 'to' stockroom (via Drinks Distribution Requirements Planning).

Shipments In-Transit Enquiry Selection Screen

 Select the Shipment In-Transit option.

The initial screen enables you to select all distribution order lines in-transit between two selected stockrooms, or to display details of lines for one specific order known to be in-transit.
