Chapter 6

Utilities

Copy Company

1/DDU

This function allows data relating to one company to be duplicated across libraries and companies, thus allowing creation of backup libraries and creation or update of company data from a 'master' company.

Copy Company Select Libraries Screen

Select the Copy option.

The initial screen lists a set of selection fields allowing you to specify the required 'from' and 'to' libraries, as well as the generation details.

```
DR902CLP      DRP Copy Company Utility      User GALBRAIJ      25/10/95
                                                    15:33:00

Copy Company - Select Libraries

Library to copy from.....?.. OSLDF3
Library to copy to.....
Regenerate file list..... _ (0=No, 1=Yes)
Company number field default
start position on files..... 0000

F3=Exit  F4=Prompt  F12=Previous

05-35  SF  MK  KS  IM  II  PLYM400A PED171S1
```

Fields:

Library To Copy From

Name of the Library which is holding the 'source' DRP data. Defaults to the standard Drinks DRP Files library.

Library To Copy To

Name of the 'target' Library to which the 'source' DRP data will be copied. The library must exist on the machine.

Regenerate File List

Option which specifies whether the file list for files within the 'target' library should be refreshed; valid options are:

0 - No.

1 - Yes.

Company Number Field Default Start Position On Files

Defines company code default from which copying will start - defaults to '0000'.

Press **Enter** to display the Copy Company Details Screen.

Copy Company Details Screen

This screen is displayed when you have entered the library details into the Copy Company Selection Screen.

It allows you to enter further company details.

Fields:

From Library

Selected on initial screen file.

File identifiers for files within the selected 'source' library are displayed.

Name

Name of files within selected 'source' library.

Last Generated

Date at which file was last generated.

The following fields may be maintained:

Output Library

Defaults from initial screen.

Selection

Allows file update options to be defined. Valid entries include:

- 1 - Replace file in 'target' library
- 2 - Add file to 'target' library
- 4 - Delete records belonging to 'from' company
- 5 - Change company start position

Copy From Company

Defines which company 'master' data will be copied from. Company code must be defined within Application Manager.

Copy To Company

Defines to which company 'master' data will be copied. Company code must be defined to Application Manager.

Press **F8=Update** to save the new details to file.

Delete Confirmed Shipment Records

2/DDU

This procedure physically deletes from the database files all the shipment records which have been fully received via the appropriate option within this application.

Select the Delete Confirmed Shipment Records option.

This submits a batch job to the queue, which will delete all confirmed records for the current company and reorganise the in-transit file.

Note: This utility requires exclusive use of the application in order to execute.

Company Profile

3/DDU

This procedure enables the definition of new companies within this application and the maintenance of existing company details. The Company Code must correspond to the one defined to Drinks Inventory Management for this company.

Note: Period details are maintained in this Company Profile. Calendar Details are maintained via the Working Days Calendar option.

Company Profile Select Company Screen

 Select the Company Profile Maintenance option to display this screen.

Select a code from the list of valid Company Codes. Alternatively, a new Company Code may be entered in order to create a new company definition.

A list of valid Company Codes and names is displayed.

Fields:

Sel

Enter a '1' to select the company to be maintained.

Enter New Company

Enter a code for the new company to be added. This code must not already exist in DRP. However, it should be defined in Inventory Management.

 Press **Enter** to display the Company Profile Details Screen.

Company Profile Details Screen

This screen is displayed when you have selected a suitable company on the Company Profile Selection Screen.

It allows maintenance of company defaults i.e.:

- How forecasts will be consumed by actual demand.
- The maximum number of lines created on a distribution order.
- The forecast error tolerance used for setting net change flags if not set at item level.

All details for an existing company are displayed. The company name is displayed from the Inventory Management Company Profile.

05-21		SA	MW	KS	IM II KENB20A PED171S1

Fields:

Consume Forecast

0 - If forecast consumption is not required: Demand for a particular period will simply be the greater of the forecast or actual sales for that period.

1 - If consumption of forecast by period is required - i.e. forecast will be based on cumulative consumption of forecast and actual demand within each period defined in the calendar for DC/Centre. At period ends accumulations will be reset to zero.

Lines per Distribution Order

Enter the maximum number of lines to be included on any Distribution Order. This must be greater than zero.

Forecast Error Tolerance % (Absolute)

Specify the default percentage difference by which sales forecast quantities may be greater than actual sales quantities or vice versa without causing a Net Change trigger to be written for the item concerned. This default will be used if no tolerance has been entered at item level.

Calendar Code

Enter the default Calendar Code for the company. Any DC or Centre without a Calendar Code assigned to it via Period Maintenance will use this calendar (defined via Drinks Inventory Management - Working Days Calendar Maintenance).

Number of Periods Per Year

Must be entered in the range 1 to 13 inclusive.

Period Names

Enter a description for each period, up to the number of periods specified above.

Standard Week Template

Enter N against non-working days in a 'normal' working week. Leave blank for working days.

Note: The total number of days must equal 364 or 371. Also, the number of days in the last period must ensure that the next year begins on a Monday.

Drinks Distribution Requirements Planning provides the facility for each site, i.e. Centre or DC, to have a separate calendar. The calendars for all sites within the company are maintained within Drinks Inventory Management - Working Days Calendar Maintenance.

The calendar codes defined may then be assigned to each site via the Periods Maintenance option.

Press **Enter** to update the Company Profile record.
