Chapter 6

Packaging Requirements

Introduction to Packaging Requirements

Packaging Requirements provides a complete set of facilities for analysing and reporting of packaging information. This information will help you to produce the packaging statistics that need to be submitted to the appropriate authority. You use the information produced to complete the standard documentation provided by the authorities.

You use Packaging Requirements to enter information about how much of each type of packaging is used when a product is shipped to a domestic customer over a specified period.

Setting up Packaging Requirements

Before you can track the packaging used you need to set up the following:

For each inventory company you need to:

- on the Company Profile, set the Packaging Reporting Flag.
- set up the Packaging Reporting Country.
- in Item Maintenance, set the Packaging Reporting Flag on each item you need to track the packaging details.

For each Packaging Reporting Country you need to set up:

- packaging categories.
- packaging codes.
- average packaging details per despatch.
- default responsibilities.

You also need to set up the packaging details for each item that you are tracking.

Country Details Maintenance

1/DIK

You use this procedure to maintain the data and reporting parameters for each country where a packaging report will be submitted. The information you can enter includes:

- Packaging Responsibilities - the proportion of the responsibility for each member of the supply chain.
- Default Responsibilities - when you are tracking responsibilities, this function allows % responsibilities to be defined.

Note: If track responsibilities is not set, the responsibilities can be defined but are not effective until Track responsibilities Processing is switched on.

- Packaging Categories - used to define summary groups for the packaging used so totals can be provided by surface area, weight, volume or any other classification.
- Packaging Codes - these could relate to:
 - packaging materials, for example, glass, cardboard, wood.
 - individual packaging, for example, glass bottle (25cl), glass bottle (33cl).

Before you can set up any of the reporting parameters, you must set the Packaging Reporting Flag on the Maintain Company Profile Screen.

Maintain Packaging Reporting Countries Selection Screen

Select Country Details (Maintenance) to display the Maintain Packaging Reporting Countries Selection Screen.

You use this screen to select the Packaging Reporting Country you want to maintain.

			STUD140 KB ST0672S1

Fields:

(Untitled)

Enter one of the following:

2 - Amend. Enter this option to alter the details for the reporting country.

4 - Delete. Enter this option to delete the details for the country.

Functions:

F10

Add Country. Displays the Maintain Packaging Reporting Country Screen. Use this function to define a new reporting country for the current inventory company.

Note: You can only define one reporting country if you do not have the World Trade module active.

F19

Position to. Use this function to position the screen display to the country selected.

Enter '2' in the (Untitled) field and press **Enter** to display the Maintain Packaging Reporting

Country Screen.

Press **F10=Add** to display the Maintain
Packaging Reporting Country Screen.

Maintain Packaging Reporting Country Screen (Option 2)

Enter 2 in the untitled field on the Maintain Packaging Reporting Countries Selection Screen to display the Maintain Packaging Reporting Country Screen.

Select **F10=Add Country** on the Maintain Packaging Reporting Countries Selection Screen to display the Maintain Packaging Reporting Country Screen.

You use this screen to enter new details and change existing details for the selected packaging reporting country.

IN345	DK - QA Drinks	User: GBJBA1MS	12/01/98 15:36:39
Maintain Packaging Reporting Country

7-31	SA	MW	KS CL IM DM II STUD140 KB ST0672S1

Fields:

Country

Enter the country code.

When you are amending country details, this field is for your information only and cannot be amended.

Note: You can only set up one set of packaging reporting details for each country.

Reporting Frequency

Enter how often the report needs to be produced:

1 - Monthly

2 - Quarterly.

The default value is monthly.

Reporting Format

Enter a valid report format or leave this field blank to use the standard report format.

Note: You can define a report format using the descriptions file code GDFT.

Track Responsibilities

Enter one of the following:

1 - to track responsibilities throughout the supply chain.

0 - if you have total responsibility for the packaging.

Note: If you are using the German "Duales" report format, you must set the Track Responsibilities to 0.

Calendar Code

Enter the code for the calendar used by this reporting country.

Current Year

Enter the current year. This defaults to the current year for the inventory company.

When you are amending the country details this field is for information only.

Current Period

Enter the current period. This defaults to the first period of the current year.

When you are amending the country details this field is for information only.

Reporting Currency

You must enter a reporting currency that is valid within General Ledger.

If you are using the World Trade module, this field defaults to the reporting currency specified for this country.

Reporting VAT Code

You must enter a valid Vat Code.

Reporting Address

Enter the address where your packaging data needs to be submitted. This field is mandatory.

Target Recovery and Target Recycling

Enter the Target Recovery and Target Recycling Percentage.

These fields are used when tracking responsibilities to compound with the derived responsibility. For example, if the amount of packaging you must recover is 25Kg, if Recovery is set to 40% and recycling is set to 8%, you must recover 10Kg of packaging and recycle 2Kg of packaging in this period.

Functions:

F13

Responsibilities. Display the Maintain Responsibilities Window. Use this function to maintain the packaging responsibilities incurred by the members of the supply chain.

Note: Responsibilities are only effective if you have set Track Responsibilities to 1.

F14

Packaging codes. Display the Packaging Details Window. Use this function to define the packaging codes applicable in this country.

F15

Average Packaging. Display the Average Packaging details per despatch Screen. Use this function to maintain the average packaging details to be included on each despatch line.

F16

Packaging categories. Use this function to maintain the packaging categories used by the countries to whom the report will be submitted.

Tip: If all the functions are not available, select **F8=Update** to save the information. The rest of the functions will then be available.

Select **F8=Update** to validate and save the information entered. Then select **F12=Previous** to return to the Maintain Packaging Reporting Country Selection Screen.

Maintain Responsibilities Window (F13)

Select **F13=Responsibilities** on the Maintain Packaging Reporting Country Screen to display the Maintain Responsibilities Window.

You use this window to change the packaging responsibilities for the members of the supply chain.

```

Fields:

(Untitled)

Enter one of the following:

1 - Select, to select the item. The item is transferred to the fields at the bottom of the window so you can change the Responsibility % and default.

4 - Delete, to remove the current item. You cannot delete the item if you have set responsibility overrides, using the Customer/Item Overrides option.

Responsibility %

Enter the percentage responsibility for each member of the supply channel.

The total responsibility cannot exceed 100% for either recycling or recovery.

*Note: If the total responsibility does not equal 100%, when you select **F8=Update**, you get a warning message. Clear the message and then select **F8=Update** again to validate and save the changes.*

DFT

Enter one of the following:

1 - to include this responsibility code in calculations.

0 - to exclude this responsibility code from calculations.

Select **F8=Update** to validate and save the information entered. Then select **F12=Previous** to return to the Maintain Packaging Reporting Country Screen.

Packaging Details Screen (F14)

-  Select **F14=Packaging Codes** on the Maintain Packaging Reporting Country Screen to display the Packaging Details Screen.

You use this screen to define the packaging codes used for the current country.

- ➔ To add a new packaging category, at the bottom left of the window, enter a new unique Category Code. Then enter a Description and Unit. To accept and validate the information press **Enter**.

Item Details Maintenance

2/DIK

You use this procedure to define country specific information about the packaging required for each item. You can condition the packaging definition for an item dependant on the quantity despatched. For example:

Beer:

Per litre = 50 grams aluminium

Per 12 litres = 50 grams aluminium + 2 grams plastic + 4 grams cardboard

Per 100 litres = 50 grams aluminium + 2 grams plastic + 4 grams cardboard + 1 kg wood pallet.

Note: Before you can define the packaging information for an item you need to set the Packaging Reporting Flag for that item in the Item Maintenance Screen.

Country Item Packing Details Selection Screen

Select Item Details (Maintenance) to display the Country Item Packing Details Selection Screen.

You use this screen to select the item whose packing details you want to maintain.

5-43	SA	MW KS CL IM DM II	STUD140 KB ST0672S1

Fields:

Reporting country

Enter the packaging reporting country.

Advance Period

Enter either:

1 - Close the current period and open a new period.

0 - Keep the current period open.

Note: If you are producing the yearly report and you set the Advance Period flag, the year is also advanced, as long as an Inventory Data Extract has been run for every period of the year.

Select **F8=Submit Job** to run the report, and where relevant advance the period.

Managing Historical Data

Use these options to create and delete historical data for the Packaging Extract file.

Delete Historical Data

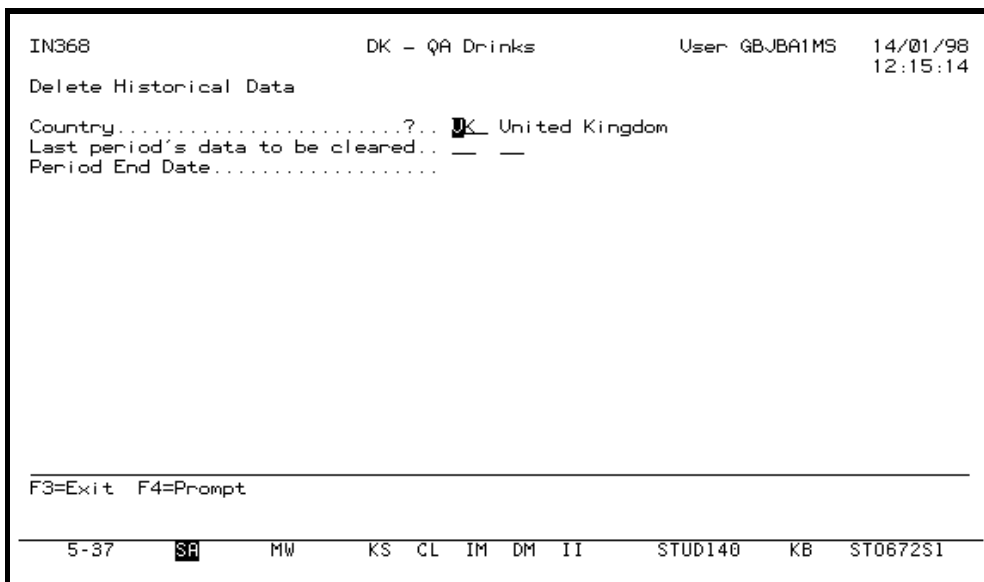

42/DIK

You use this procedure to delete the historical data from the Packaging Extract file. Historical data is data from previous periods and years, that remains on the system. The Packaging Extract file is produced when you run Extract Data from Inventory. For more information, see Extract Data From Inventory.

Delete Historical Data Screen

 Select Delete Historical Data to display the Delete Historical Data Screen.

You use this screen to select the country and period of the data you are deleting.

The screenshot shows a terminal window with the following text:

```
IN368                      DK - QA Drinks                      User GBJBA1MS    14/01/98
