Chapter 8

Reports

Drinks Inventory Management Reports

The reports covered in this section are concerned with:

- Descriptions.
- Status.
- Audit.
- Valuation.

Descriptions Reports

You can obtain a hard copy of all the item and stockroom descriptions, with differing degrees of detail. All the parameters used in Drinks as defined in the descriptions file may be reported.

Status Reports

Status reports apply to the current disposition of stock and to the movements which brought about the current stock position.

Audit Reports

Audit reports output before and after images of the data. These are only printed when requested, and output all changes since the report was last printed.

Valuation Reports

Both the stock holding and movements can be valued.

Tip: All the reports can be accessed from the Drinks Inventory Management Reports menu.

Item / Stockroom Report

1/DIR

This report produces a hard copy listing of items and stockroom balances. It can be tailored by selecting ranges of items, item types, classes or groups.

Item/Stockroom Report Selection Screen

Select the Item / Stockroom option. The Selection Screen is displayed.

05-36	SP	HM	KS IM II KENB20A PET007S2

Fields:

Item Summary/Detail

The summarised information at item level includes purely the item code and description. However the detailed information includes other information from the Item Master File including classes, units of measure, lot defaults and costing details.

- 1 - To show summarised information for an item.
- 2 - To show detailed information.

Stockroom Summary / Detail

The summary information shows all stock balances for the item in the selected stockroom, this includes physical, allocated, available, on order, frozen, on back order.

- 1 - for the report to show summarised information for a stockroom.
- 2 - to show detailed information.

The stockroom details include the stock balances, usage and stock management details, costing and valuation data and cycle counting information. This is similar to the Stockroom Details screen from the Item/Stockroom Enquiry.

Stockroom Code

Enter a range of stockrooms to be included in the Item Stockroom report. Leave blank for all stockrooms.

You may specify the items to be printed by one of the following ranges:

Item

Specify the item or item range for which the report is to be produced. The **F4=Prompt** is available.

Item Group Major/Minor

Specify the item group or range of item groups for which the report is to be printed.

Item Type

Specify the item type or range of item types for which the report is to be printed.

Item Class

Specify the item class or range of item classes for which the report is to be printed.

Press **Enter** to send the report to print. The report is produced in item sequence with stockroom details per item.

Descriptions File Report

2/DIR

This procedure provides a hard copy of the contents of the descriptions file.

This report has no selection parameters, and is run directly from the standard batch job window.

Select the Descriptions File option.

Press **F8=Submit** to submit the report to print.

Item Audit Log

3/DIR

This report produces a hard copy print of all changes made to the items file since the report was last run.

This report is submitted directly from the menu.

Select the Item Audit Log option.

Press **F8=Submit** to submit the report to print.

Stockroom Audit Log

This report produces a hard copy print of all changes made to the item/stockroom file since the report was last produced.

This report is run directly from the menu.

Select the Stockroom Audit Log option.

Press **F8=Submit** to submit the report to print.

Movements Audit Log

5/DIR

This report provides a hard copy print of all movements - including those resulting in Negative Stock Data and Control Files - since the report was last run.

This option is run directly from the menu.

The report is sequenced by stockroom, item and movement type, date and time. Total Movement type costs are given by stockroom.

Select the Movements Audit Log option.

Press **F8=Submit** to submit the report to print.

Stock Movements Valuation Report

1... **7/DIR**
2...

This procedure lists the opening stock, movements and closing stock values of all items that have moved during the period. Totals are by transaction type and stockroom. Variances between calculated and actual closing stock are highlighted.

Frequency

Normally run as part of month end processing, but may be run at anytime.

Totals

At change of stockroom, opening stock, movements and closing stock values.

Stock Movements Valuation Report Selection Screen

 Select the Stock Movements Valuation option.
The system will display a Selection Screen.

F3=Exit F4=Prompt
10-36  HW  IM II KENB20A PET007S2

Fields:

Stockroom Code

Enter a range of stockrooms to be included in the stock movements valuation report. Leave blank for all stockrooms.

 You may specify the items to be printed by one of the following ranges:

Item

Specify the item or item range for which the report is to be produced.

Item Group Major/Minor

Specify the item group or range of item groups for which the report is to be printed.

Item Type

Specify the item type or range of item types for which the report is to be printed.

Item Class

Specify the item class or range of item classes for which the report is to be printed.

 Press **Enter** to send the report to print.

How the Report Totals are Calculated

The report totals are calculated as follows:

Closing Quantity / Value = Opening + Receipts + Issues + Adjustments + Transfers.

Computer Quantity / Value = Physical - all stock movements in the next period.

Variance Value = Computer - Closing.

*Note: There should never be a quantity variance.
A value variance will arise if a standard cost has
been changed during the period.*

Stock Valuation Report

1...
2...

8/DIR

This procedure values the physical and in transit stock of the requested items or stockrooms.

Frequency

Normally run as part of month end processing, but may be run at any time.

Totals

At change of stockroom and at end of report, a total stock value is printed.

Selections are available by range of:

Stockrooms, and

Item Numbers, or

Item Group Major/Minor, or

Item Type, or

Item Class.

Stock Movements Report

9/DIR

This program provides a hard copy print of a selection of stock movements in a number of different sequences.

Frequency

On request - typically to resolve stock taking problems.

Stock Movements Report Selection Screen

-  Select the Stock Movement option. A selection screen is displayed.

You use this screen to enter the report criteria. You do not have to make entries in all of the fields. For example, if you only enter an item number, system 21 will produce a report containing all movements, in all stockrooms, for that item.

For production movements, the report displays the WIP Lot Number:

- For movements resulting from production schedules, the Narrative shows the item number and route.
- For movements resulting from production orders, the Narrative shows the works order number.

Fields:

Stockroom

Enter up to two alphanumeric characters to specify the stockroom for which the report is to be produced. To print all stockrooms leave blank

Item Number

Enter up to fifteen alphanumeric characters to specify the item number to be included in the report. To print all items leave blank.

Item Group Major And Minor

Enter the item group major and item group minor for which the report is required. For a report of movements for all item groups, leave blank.

Reference Date

Specify a reference date range for the report. To print movements for a particular reference date, enter a single date. Leave blank for all reference dates.

Movement Date

Enter up to two valid dates to specify the movements that are to be included. Any movements made between the dates specified will be printed. To print movements for a particular day enter just one date. To print all movements both entries should be blank.

Movement Type

Enter a one-character code to specify the movement type to print, or leave blank to print all movement types.

Week Number

Enter four numeric characters, in the format WWYY, to specify the week number of the movements to be printed. Leave blank if no week number selection is required (all movements that satisfy previous selection criteria are printed).

Period Number

Enter four numeric characters, in the format PPYY, to specify the period number of the movements to be printed. Leave blank if no period number is required (all movements that satisfy any of the above selection criteria are printed).

Press **Enter**, to validate the entries you have made, and then press **F8=Submit** to continue.

Stock Movements Report Sequence Screen

After making selection on the Stock Movements Report Selection Screen and pressing **F8=Submit** the Stock Movements Report Sequence Screen is displayed.

This report shows

Fields:

Major Sequence

Enter a single character code to specify the sequence in which the selected movements are printed:

- 1 - Stockroom.
- 2 - Item Number.
- 3 - Movement Date.
- 4 - Movement Type.
- 5 - Weeks Number.
- 6 - Period Number.
- 7 - Reference Date.

Minor Sequence

Enter a one character code to specify the sequence, within the major sequence specified above, in which the selected movements are printed.

Press **Enter** to send the report to print.

Negative Stock Report

10/DIR

This program provides a hard copy print of a selection of stock movements which have resulted in Negative Stock, together with the transaction which returned the Stock to a positive balance (if applicable).

You must be authorised to the stockroom to be able to run this report.

Frequency

On request - typically to resolve stock taking problems.

Negative Stock Report Selection Screen

Select the Negative Stock Report option.

The selection screen allows you to report on any Negative Availability of an Item in a particular Stockroom, for a given period, with four different levels of Control:

- Report Only.
- Report, then delete details.
- Delete details for selected Item/Stockroom / Date combination.
- Produce Report, delete details, and adjust FIFO Costing appropriately.

```
IN274              HW - Handy Wholesalers Ltd      User PGMR1      9/12/96
                                                    10:55:22

Request Negative Stock Report - Selection

Fields:

Stockroom

Enter a valid Stockroom Code, or prompt from the selection list.

Item

Enter a valid Item Code, or prompt from the selection list.

Dates: From / To

(Default to Current Date.) Set the period for which you wish to run the report.

*Note: The **To** date cannot be later than the current date.*

Control Flag

0 - Produce Report Only, retaining the Data and Control Files and thus allowing them to increase with further transactions.

1 - Produce Report & Delete Details, thus any further transactions would be saved in new files.

2 - Delete All Details for given selection criteria.

3 - Produce Report, Delete Details and Adjust FIFO Items. The negative balance is set to zero; a Value Only movement is performed; and the required quantity (the reverse of the negative balance) is issued, from one - or more - outstanding FIFO records.

Note: This report details transactions that have been processed via the Daily Movements Audit run, consequently, you must run that option first, so that this report is completely up-to-date.

Type in the appropriate details, and press **Enter** to validate, then **F8=Submit** to run the report and/or update the details, or use **F3=Exit** to cancel the request.

Negative Stock Periodic Parameters

11/DIR

This program provides the facility set up parameters for the Negative Stock Report to be run, on a regular basis, as part of the Day End processing run.

You must be authorised to the stockroom to be able to run this report.

Frequency

On request - to set parameters for regular running.

Negative Stock Periodic Parameters Report Selection Screen

Select the Negative Stock Periodic Parameters option.

The selection screen allows you to enter a Stockroom / Item combination, on which to report for negative availability, with four different levels of Control:

- Report Only.
- Report, then delete details.
- Delete details for selected Item/Stockroom/Date combination.
- Produce Report, delete details, and adjust FIFO Costing appropriately.

Fields:

Stockroom

Enter a valid Stockroom Code, or prompt from the selection list.

Item

Enter a valid Item Code, or prompt from the selection list.

Control Flag

0 - Produce Report Only, retaining the Data and Control Files and thus allowing them to increase with further transactions.

1 - Produce Report & Delete Details, thus any further transactions would be saved in new files.

2 - Delete All Details for given selection criteria.

3 - Produce Report, Delete Details and Adjust FIFO Items. The negative balance is set to zero; a Value Only movement is performed; and the required quantity (the reverse of the negative balance) is issued, from one - or more - outstanding FIFO records.

Tip: The report when run is sequenced by Item within Stockroom, and produces details for all movements resulting in a Negative Stock balance, up to and including the date the report is run.

Type in the appropriate details, and press **Enter** to validate, then **F8=Submit** to update the parameters for the regular report run, or use **F3=Exit** to cancel the request.

Re-Order / Overstock Report

21/DIR

This procedure produces a report which can be used to identify stock shortage or overstocking, according to the stock management information.

The stock position for all items is reviewed as detailed below:

- Available stock is calculated:
Physical - Frozen - Allocated = Available
- Expected stock is calculated:
Available + Order + In Transit - Back Order - Reserved = Expected
- If expected stock is greater than maximum stock, the item is reported as in Excess
- If expected stock is less than reorder point, the item is reported for Order Action
- If Order Action is required, the reorder quantity is determined. If a reorder quantity has been specified manually, it is recommended regardless of the reorder policy. If not, the reorder quantity is determined for each policy as follows:
 - ROP/MAX: the system recommends reorder up to the Maximum Stockholding
 - ROP/ROQ: the system calculates a reorder quantity based on the reorder quantity factor, the average usage and the lead time
 - Up to ROP: the system recommends reorder up to the reorder point.

Re-Order / Overstock Report Selection Screen

Select the Re-Order / Overstock option.

Fields:

Sequence

Select the report to be produced in either item within stockroom, or stockroom within item sequence, as shown below:

- 1 - Item / Stockroom
- 2 - Stockroom / Item

All Items

Choose to have all items in the report, or only those with movements since the report was last run:

- 1 - All Items
- 2 - Just those items that have moved and not yet been reported.

Press **Enter** to run the job.

Stock Availability Report

22/DIR

This report lists the stock availability of an item, or range of items over a period of time, taking into account both demand and supply orders.

Two running totals of stock availability are calculated: the first allows for demand orders only, the second for both demand and supply (in other words, a worst and best case). The details of all locations can be included.

Two reports are produced. The first showing the full details requested, and the second showing items / stockrooms where shortages exist or are expected.

This report distinguishes between production schedules and production orders and shows demand resulting from:

- Planned orders from Master Production Schedule (MPS).
- Firm orders from MPS.
- Planned orders from Materials Requirements Planning (MRP).
- Firm orders from MRP.
