Chapter 2

Processing

Drinks US Bonded Inventory Management Processing Functions

The primary stock movements within a Bonded warehouse are:

- Goods Receiving.
- Dispatch.
- Recording Stock Losses and Gains.
- Payment of Customs Duty.

Goods receiving is performed either via Drinks Inventory Management, or via Drinks Purchase Management. Despatch (Confirm Assembly) is performed via Drinks Sales Order Processing.

Transfers are performed via Drinks Distribution Requirements Planning (DRP) or Drinks Bonded Inventory transfers.

Recording of stock losses, or gains, and payment of Customs duty are performed via Drinks US Bonded Inventory Management.

When Drinks US Bonded Inventory Management is in operation for a company, certain restrictions are enabled if the Stockroom is defined as Bonded. In these circumstances the following functions are **not** available:

Inventory Management

- Customer Order Issue.
- Sundry Issue.
- Adjust Physical Stock.
- Adjust Allocated Stock.
- Transfer Out and In.
- Record Purchase Order.
- Cycle Counting Automatic Adjustments.
- Expense Account Adjustments.

Sales Order Processing

- Allocation of Stock in excess of physical.
- Sundry Credit/Invoice with stock update.
- Sourcing of Duty Paid Stock for a Duty Free Customer.

Stock counting, and the reporting of stock variances, is performed via Drinks US Bonded Inventory Management.

All stock movements are logged within Drinks Inventory Management, and all bond stock movements are also in a separate movement file for inquiries and audit reports.

Mark Rotation As Free Circulation

1...
2...

1/DNP

This procedure is for paying Customs duty for the current stock balance of a Rotation where the Rotation has been received into Bond as 'Not in Free Circulation'.

This procedure produces a Customs Report and logs the change made in an audit file for subsequent inquiry and further reporting.

Mark Rotation As Free Circulation Selection Screen

Select the Mark Rotation As Free Circulation from the Maintenance Screen.

This screen enables the selection of a Rotation.

BW054		ZM - Multi-Currency Company		USER GALBRAIJ		3/03/96	
						13:33:48	
Mark Rotation as Free Circulation							
Bond number	NSBOND01						
Rotation number	96NS000030						
Delivery Type	12						
Item	A12345						
F3=Exit							
12-25	SE	MW	KS	IM	II	PLYM400A	PED171S1

Fields:

Bond Number

Enter up to 10 characters for the Bond number.

Rotation Number

Enter 10 alphanumeric characters for the Rotation number.

Delivery Type

Enter up to two alphanumeric characters to specify Delivery Type. This must conform to Delivery Types under Major Type 'DTYP' in the Descriptions file.

If the item is not owned by the proprietor, use a Delivery Type assigned to Home Use with deferment. Otherwise, use normal To Home Use code. Where the Rotation was wrongly received as Not in Free Circulation and no further Customs duties are due, use Delivery Type applying to another Bond.

Item

Enter the specific Item Code (since Rotations can be unique by Item). This field is mandatory.

Press **Enter** to continue to the Mark Rotation As Free Circulation Details Screen.

Mark Rotation As Free Circulation Details Screen

This screen is displayed when you have entered valid selection criteria into the Mark Rotation As Free Circulation Selection Screen and displays the current details for the associated item.

Enter details as explained for the previous screen.

Narrative and Movement Reason

Enter details as explained for the previous screen.

Once the required entries have been made, press **Enter** to display the supplying stockroom details.

Pressing **Enter** again displays the receiving stockroom details.

Pressing **F12** displays the Transfer Selection screen and provides a batch control total of

transfers, based on two movements per transfer.

Stock Adjustments

1... 3/DNP
2...

1... 5/DNP
2...

This procedure is for writing off, or adding, stock. Stock write-offs are usually performed as a result of a stock check, or a breakage.

There are two separate options:

- Case Write Offs and Gains in Storage.
- Bottle Write Offs.

Note: This procedure cannot be used for Duty Paid goods.

When writing off stock, it is possible to either write off the stock to Home Use (Duty Paid), to Losses Allowed In Storage (No Duty), or to Authorized Destructions (No Duty).

When adding stock, the Rotation to be increased must already have a stock balance. If the Rotation is closed, the additional stock must be re-warehoused through the normal receipt process.

This procedure is logged in a transaction log file and recorded in an audit file for subsequent inquiry and further reporting.

Stock Adjustment Selection Screen

Select the either Stock Write Offs / Gains in Storage, or Stock Write Off (Bottles Only) option, depending on what you want to record.

This screen enables selection of the Stockroom.

Movt Type

Enter up to 3 character Movement Reference Type, conforming to major type 'TRAN' in the Descriptions file.

Note: If gains have been made, the Rotation Receipt screen is displayed as an Own Production.

Once the required entries have been made, press **F8=Update** to update the details.

You will be returned to the original screen, with previous movements displayed at the bottom, where you can enter more details for processing.

Record Return of W81 Documents

4/DNP

Each time a dispatch is made to another Bond, the Inter Warehouse Transfer document, called a W81, is logged by Drinks US Bonded Inventory Management. Each W81 is given a unique document number.

Receiving Bonds can return a copy of the W81 to the supplying warehouse, as confirmation of receipt.

This procedure is for logging the return of W81s so that those not returned can be identified.

Bond Number Selection Screen

Select the Record Return of W81 Document Numbers option.

The first screen requests entry of the Bond number.

Fields:

Bond Number

Enter up to 10 alphanumeric characters for the Bond number referring to the supplying Bond.

Press **Enter** to continue to the Document Entry screen.

Document Number Entry Screen

This screen is displayed when you have entered a bond number into the Bond Number Selection Screen and pressed **Enter**.

This screen enables the entry of the W81 numbers.

[illegible]

Fields:

Document

Enter six digit document numbers for the W81s confirmed as returned.

To accept the required entries and to display the customer's name(s) (confirming that the entries are correct), press **Enter**.

To update, press **F8=Update**.

Delivery Exceptions Clearance

1... 6/DNP
2...

This option is used to confirm action taken for delivery exceptions.

Delivery Exceptions Clearance Selection Screen

Select the Delivery Exceptions Clearance option.
The system displays the Delivery Exceptions Clearance Screen.

Enter the Code Number for a Bond which has already been set-up.

Audit Reference Number

This is the number of the report generated when the Bond Exceptions Report is printed.

Type in valid codes for each field and press
Enter.

Delivery Exceptions Clearance Detail Screen

This screen is displayed when you have made valid entries into the Delivery Exceptions Clearance Selection Screen.

Fields:

Rotation

Enter the rotation number into which the cleared stock is to be returned.

Transfer to Stockroom

Enter the stockroom into which the cleared stock is to be returned.

Return Reason

Enter a two character return reason, which is validated against major type 'SMCA' in the Descriptions file.

Narrative

Enter 20 characters or leave blank. This is a memo field.

Press **F8=Update** to save the details to file.

Stock Counting

In order that the accuracy of the stock levels can be checked and corrected, it is necessary to perform stock counts. The procedures produce count documentation and a report of stock variances.

The counting process consists of the following steps:

- Request Stock Count - printing stock count sheets. Printing the count sheets causes the Rotation / item / location stocks to be recorded for comparison against the counted stocks.
- Enter Stock Counts.
- Request Stock Count Variance Report.

Warning: This module does not prevent movements during the counting process. It is therefore vital that movements do not occur during the count process.

Count sheets and the variance report can be printed in either location or Rotation sequence with the facility to specify From and To ranges.

The variance report compares the original physical stock with the count stock. Adjustments should be made via Stock Adjustment.

Note: Inventory stock counting and Warehouse stock counting provide an alternative procedure to Bond stock counting. Bond is included in both these functions. This provides the facility to stock count in warehouse defined stockrooms that are also bonded. Inventory stock counting and Warehouse stock counting are the recommended functions for stock counting.

Note: If adjustments are required as a result of the stock count, then the adjustments are to be made using Bond Stock Write Offs / Gains in storage and Bond Stock Write Off (Bottles Only). This provides a greater flexibility for recording the reasons for the adjustment.

Request Stock Count

10/DNP

Select the Request Stock Count option.

This procedure enables the request of stock count sheets.

BW640 ZM - Multi-Currency Company USER GALBRAIJ 3/03/96

Fields:

Stockroom

Output only if Stockroom is Bonded. If Stockroom is not Bonded, you can enter a different Duty Paid Stockroom. But, you cannot switch from Duty Paid to Bonded without returning to the first screen by pressing **F12=Previous**.

Item Variant

Leave blank for default Item Variant. Enter three character code for any other variants.

Movement qty

Quantity must not contain decimals. If receiving bottles, quantity must be less than a case size.

Note: Bottles can only be received when using the 'bottles receipt' option.

Lot

This field will not appear for a Bonded Stockroom. Lot number, otherwise known as Rotation is displayed later on in the receipt process.

Cost/unit

Costs given by the supplier / importer for Customs and VAT purposes should not be entered here. These costs are entered on the next screen (Rotation Receipt).

Movement Reason

If entered, code must conform to Description file codes assigned to Major Type 'RCPT'. If code was left blank on the first screen, this field will be mandatory.

Note: If the Stockroom is not Bonded, the Rotation Receipt screen will not be displayed.

On pressing **Enter**, details will be re-displayed until no more changes have been made.

Pressing **Enter** one more time displays the Rotation Receipt screen. This screen is explained in the next section.

After completing the Rotation Receipt, the process can be repeated for the next individual receipt.

Entry of Rotation Receipt Details

This process involves the entry of specific details relating to Duty Free goods.

The entries required, and therefore the format of the screen, are determined by the type of receipt. For example, an import will require Customs Entry details.

Shown below is a table of variable entries based on the type of receipt.

	Import	From Bond	Own Production	Stock Gain
Production Item		O	O	O
Production Variant		O	O	O
Production Rotation		O	O	O
Production Batch No.		O	O	O

- Freight	12.00			Frt USD US Dollars			
- Insurance	10.00			Ins USD US Dollars			
F3=Exit F4=Prompt F12=Previous F20=Update as Suspended							
00-65 SF MW KS IM II PLYM400A PED171S1							

Fields:

Rotation Number

Enter 10 digit Rotation number, for either an existing or a new rotation. the latest received rotation for the item variant is displayed as a default. If Rotation numbers are allocated automatically, this field will not be displayed.

Free Circ

This defaults to the Item Variant setting. If Free Circulation defaults to '1', meaning Customs duty has been paid, you cannot change it to '0'. On an exception basis, you can change Free Circulation from '0' to '1'.

S/Rsn.?

Suspension Reason will be displayed when the Company Profile has been set to allow all receipts to be put away without maintaining the Rotation. The option to suspend a receipt only applies when **F20=Update as Suspended** is pressed and a reason code has been entered.

Suspension reason codes must be in the Descriptions file under Major Type of 'ROTS'.

Commodity Code

Enter 22 character Commodity Code. The code must agree with the primary code defined against the Item Variant.

Date of Receipt

Defaults to current date. If necessary, an earlier date can be entered.

2 Litre C/Code

Not applicable in the US. Enter Commodity Code for goods originally supplied in over 2 litre containers but due to be stocked in under 2 litre containers. This code must be defined against the Item Variant.

Volume per Stock Unit

This is the volume of liquid per stock unit. Enter case size in gallons if receiving cases. Key bottle size in gallons if receiving bottles. The gallon size must agree with the gallons defined for the item.

Production Item, Variant, Rotation, Batch No

These fields are for information only and do not perform any function within the standard Drinks Bonded Inventory module. However, the details are logged in a Rotation file for ad-hoc reporting if required.

Strength

If item is a spirit, enter percentage alcoholic strength. If non spirit, leave as zero. Strength must be the same as that defined for the Item Variant.

Lit / Gal of Liq. / Alc

If item is a spirit, enter total gallons of alcohol for the full quantity received. If non spirit, key the total gallons of liquid. If the combination of quantity, volume per UOM and strength do not agree based on the total entered, you will not be able to receive the item.

W81 Number

Not applicable in the US. Enter up to 7 digits for the supplier's W81 number. If stock is re-warehoused due to a stock gain, caused by extra stock identified by a stock count, then the entry of a W81 number will make the receipt process regard the original stock as having originated from another Bond.

VA/VI Number

(Optional.) If the Item is neither a Spirit nor a Beer (i.e. a Wine), the VA/VI Number is displayed.

Tariff ID

Enter Tariff Rate Identifier as applicable. Codes entered must conform to Description File codes.

FAF Price OK

0 - No. The Default.

1 - Yes.

Duty Paid at Port

0 - No. The Default.

1 - Yes.

Line Cost - Goods

Enter total goods cost. If stock is re-warehoused due to a stock gain identified by a stock count, a zero Line Cost will result in the receipt process regarding the stock as an 'Own Produced' item.

Line Cost - Freight

Enter total freight cost. If freight cost is included in the goods cost, leave this field as zero.

Line Cost - Insurance

Enter total insurance cost. Leave insurance cost as zero if value is included in goods cost.

Currency Code - Gds, Frt, Ins

These currency codes default to 'USD' and refer to their associated goods, freight and insurance cost values. Enter revised currency codes as necessary.

If a currency code record does not exist for the current business week, then the receipt will be rejected. Where successive item receipts are made, the Currency Codes will be re-displayed to avoid having to re-key the same information.

After each item receipt is confirmed, an audit report is produced.

Functions:

F20

Update as Suspended - requires entry of a Suspension Reason Code.

Once the required entries have been made, the following steps should be taken:

To check details on the Rotation receipt screen, press **Enter**.

To suspend, press **F20=Update as Suspended**.

To update the receipt for the item, and return to the original display ready for the next receipt, press **Enter** again.

Goods Receiving Via Drinks Purchase Management

This procedure is for receiving stock against purchase orders and the production of a 'Landing Report'.

The Drinks Purchase Management Product Information gives full details on how to perform the receipt process when receiving into a Duty Paid stockroom. The instructions that follow detail, by exception, the processes relevant to a receipt into a Bonded Stockroom.

Purchase Order Receipt Selection Screen

Select the Goods Receiving option.

The illustrations that follow assume the receipt refers to a Bonded Stockroom.

07-37	<u>Sf</u>	MW	KS IM II PLYM400A PED171S1

Fields:

Stockroom

Enter the stockroom code.

Receipt Point

Enter the receipt point code:

1 - Goods Inwards.

2 - Inspection.

3 - Stores.

Receipt Date

Enter the receipt date.

Note: Receipts into a Bonded Stockroom can only be direct to Stores. Receiving and transferring stock between Goods Inwards and Inspection is not supported.

Press **Enter** to display the Receipt Into Stores Selection Screen.

Receipt Into Stores Selection Screen

This screen is displayed when you have made valid entries and pressed **Enter** on the Purchase Order Receipt Selection Screen.

This screen enables you to select the Purchase Order, Item or Supplier against which receipts are to be made.

Note: If you are not authorized to the Stockroom assigned to the order, you will be denied access to the order.

Fields:

Ref.

Line Reference Number.

Qty

Quantity being received.

UOM

Unit of Measure (if different to the Issue UOM).

Complete

Use this field if the ordered quantity is to be altered, and the balance of the line is to be cancelled, thus deeming the order line complete.

No. Labels

Number of labels required, if label printing is used.

Int. Trace

Internal Trace (can be a lot number for lot controlled items).

Ext. Trace

External Trace.

Expiry Date

The date after which the order can no longer be received. If there is no specific requirement, set this field to all 9s.

Amend Landed Costs

Set to '1' to show Landed Costs Screen for amendment.

Functions:

F8

Receive Whole Order

F9

Container Receipt and Return

F21

Enter Order Text

Once the required entries have been made press **F8=Receive Whole Order** to receive the details, and display the Enter Item Variant window.

Enter Item Variant Window

 This window is displayed once an order, or order line, has been received.

Fields:

Item Variant

(Optional.) Enter the three character Item Variant Code, as defined in Item Variant Maintenance.

Receipt Type

(Mandatory.) Enter a Receipt Type, conforming to the Descriptions File Major Type 'RCPT'.

 Enter the required details, then press **Enter** to proceed to the Rotation Receipt Screen.

Rotation Receipt Screen

This screen is always displayed after the Item Variant Window. The following fields are relevant to Drinks US Bonded Inventory Management.

BW550		HW - Handy Wholesalers Ltd		USER GALBRAIJ		11/03/96 16:33:25

- Insurance	.00	Ins		GBP Pounds Sterling			
09-25 SE ML KS IM 11 KENB20A PED129S1							

Fields:

Rotation Number

Enter 6 digit Rotation number, including leading zeros. The first four characters of the Rotation number cannot be changed. Rotation numbers keyed must be unique for each item receipt. If Rotation numbers are allocated automatically, this field will not be displayed.

Free Circ

This defaults to the Item Variant setting. If Free defaults to '1', meaning Customs duty has been paid, you cannot change it to '0'. On an exception basis, you can change Free Circulation from '0' to '1'.

S/Rsn?

Suspension Reason will be displayed when the Company has been set to allow all receipts to be put away without maintaining the Rotation. The option to suspend a receipt only applies when **F20=Update as Suspended** is pressed and a reason code has been entered. Suspension reason codes must be in the Description file under Major Type of 'ROTS'.

Commodity Code

Enter 22 character Commodity Code. The code must agree with the primary code defined against the Item Variant.

Date of Receipt

Defaults to current date. If necessary, an earlier date can be entered.

2 Litre C/Code

Enter Commodity Code for goods originally supplied in over 2 litre containers but due to be stocked in under 2 litre containers. This code must be defined against the Item Variant.

Volume per Stock Unit

This is the volume of liquid per stock unit. Enter case size in litres if receiving cases. Key bottle size in litres if receiving bottles. The litre size must agree with the litres defined for the item.

Production Item, Variant, Rotation, Batch No

These fields are for information only and do not perform any function within Drinks US Bonded Inventory Management. However, the details are logged in a Rotation file for ad-hoc reporting if required.

Strength

If item is a spirit, enter percentage alcoholic strength. If non spirit, leave as zero. Strength must be the same as that defined for the Item Variant.

Lit /Gal of Liq. / Alc

If item is a spirit, enter total litres of alcohol for the full quantity received. If non spirit, key the total litres of liquid. If the combination of quantity, volume per UOM and strength do not agree based on the total entered, you will not be able to receive the item.

W81 Number

Enter up to 7 digits for the supplier's W81 number. If stock is re-warehoused due to a stock gain, caused by extra stock identified by a stock count, then the entry of a W81 number will make the receipt process regard the original stock as having originated from another Bond.

Tariff ID

Enter Tariff Rate Identifier as applicable. Codes entered must conform to Description file codes.

FAF Price OK

0 - No. This is the default.

1 - Yes.

Duty Paid at Port

0 - No. This is the default.

1 - Yes.

Line Cost - Goods

Enter total goods cost. If stock is re-warehoused due to a stock gain identified by a stock count, a zero Line Cost will result in the receipt process regarding the stock as an 'Own Produced' item.

Line Cost - Freight

Enter total freight cost. If freight cost is included in the goods cost, leave this field as zero.

Line Cost - Insurance

Enter total insurance cost. Leave insurance cost as zero if value is included in goods cost.

Currency Code - Gds, Frt, Ins

These currency codes default to 'USD' and refer to their associated goods, freight and insurance cost values. Enter revised currency codes as necessary.

If a currency code record does not exist for the current business week, then the receipt will be rejected. Where successive item receipts are made, the Currency Codes will be re-displayed to avoid having to re-key the same information.

After each item receipt is confirmed, an audit report is produced.

Functions:

F20

Update as Suspended - requires entry of a Suspension Reason Code.

Once the required entries have been made, the following steps should be taken:

To check details on the Rotation receipt screen, press **Enter**.

To suspend, press **F20=Update as Suspended**.

To update the receipt for the item, and return to the original display ready for the next receipt, press **Enter** again.

Order Entry

Recording customer orders, either within Drinks Telesales , or within Drinks Sales Order Processing , is the means by which bonded goods are supplied. The 'Order Entry' route is the only way of effecting the supply of bonded goods.

Outline

The different methods of creating and amending orders are explained in the Drinks Telesales and Drinks Sales Order Processing product information. Further details are also given in the appropriate Drinks module product information.

When Drinks US Bonded Inventory Management is in operation, the order entry screens display the following additional information:

- Customer Status - Duty Free or Duty Paid.
- Customer Bond Number, if bonded.
- Delivery Type - Export, Another US Bond, Etc.

Certain restrictions are imposed by this module when using the order entry facilities. These are as follows:

- Operator must be authorized to the supplying Stockroom.
- Items assigned to specific customers, or owned by customers, cannot be supplied to other customers.
- Deliveries to a Duty Free customer can only be sourced from a Duty Free Stockroom.

In every other respect, the order entry facilities operate in the usual way, as per the standard applications.

Drinks DRP Transfers

DRP or manual order entry allows the following transfers In, Out and Between BATF, Customs and Duty Paid stockrooms:

	TO CUSTOMS		TO BATF			TO TAX PAID
	Same Bond	Different Bond	Same Bond	Different Bond		
From Customs	OK No Excise or Duty		Not Allowed			OK Excise & Duty
From BATF	OK No Excise		OK No Excise	Spirit Yes Not Allowed	No OK No Excise	OK Excise
From Tax Paid	OK Excise Credit		OK Excise Credit			OK No Excise
