Glossary

Glossary

Allocated (Stock)

The quantity of an item which has been committed to a customer, distribution or production order. It is held as a balance at item/stockroom level.

Alternative (Item)

An item that can be offered as an alternative to another in a sales situation.

Available (Stock)

The quantity of an item which is available for issue and has no allocation or reservation made for it. It is usually held as a balance at item/stockroom level.

Back Order

The quantity of an item which is required for customer orders which are due or overdue for delivery and for which there is no stock. It is held as a balance at item/stockroom level.

Balance

This may be used either to signify a database record holding summary information such as a stockroom balance, or a single calculated quantity field on a record, such as allocated stock or outstanding order balance.

Base Value

The order value according to the Accounts Receivable currency code. The currency code used in the Accounts Receivable has an associated rate which is used to evaluate the order total value.

Batch Allocation

A batch job which considers all orders which are due for delivery and matches them against the available stock. Where there is a match the stock is allocated to the order so that picking and despatch may continue.

Batch Control

This is a level of stock control. A stock balance can be broken down to a lower level (i.e. batch), against which individual balances can be maintained.

Batch/Lot Traceability

Where stock recording is specified at batch or lot level, this refers to the ability to trace the movement of stock, including sales to customers, at this detailed level.

Cash Discount

The amount of discount given to a customer for paying on time.

Conversational Order Entry

A method of order entry which is designed to support a conversation with the customer so that stock availability, prices and alternatives may be checked and promises made.

Credit Control

The control of the credit exposure to customers such that the amount owed is added to the stock allocated to the customer and compared with the commercial credit limit held for the customer.

Customer Code

The customer code is used to identify the data held for the customer. Multiple sets of data can be held to reflect complex customer organisations. This includes statement, invoice and delivery information.

D/Dn

Despatch note sequence number is a 2 digit reference number suffix to order number, when a despatch note is generated.

Depot

A depot is a stockroom which has been set up in Inventory Management and authorised for making despatches for sales orders.

Delivery Address

The customer will receive their orders at the delivery address.

Descriptions File

This is a file set up within Inventory Management, but is also maintained from Sales Order Processing, which defines a number of parameters, codes and their descriptions.

Discount List

A list of discounts that enable discounts to be given as a percentage or value and with discount level breaks based on quantity or value. The discounts may also apply to an item, a discount group or an order. Customers are assigned a default discount list.

EC Movement

If the customer requires their goods to be moved across borders the order should be flagged by the EC Movement field.

Expected (Stock)

The quantity of an item which is expected will be available, assuming both sales and supply orders mature, for issues on a given date. This is usually expressed as a quantity for an item/stockroom.

Extra Charges

Charges to be made on an invoice for which no corresponding stock movement will occur. They may be added at any time from order entry to confirmation of despatch. Three extra charges may be made on an invoice.

Fast Batch

The name given to the data entry style of confirmation of despatch. Data is entered in a batch and submitted to a batch queue for subsequent processing. This minimises operator screen time.

Frozen (Stock)

The quantity of an item which has been removed from 'available to issue' for such reasons as Q.A. It is held as a balance quantity at item/stockroom level.

Gross Margin

The difference between the cost of the item and the net sales price. This is often expressed as a percentage of either the cost or the sales price.

Item

The single term used to describe an element of stock identified by a unique product code.

Invoice Address

The customer will receive the invoice for their order at the invoice address.

Kit

A group of items which can be sold as a set. It is maintained in Inventory Management as a single level list.

Lead Time

The standard amount of time, in weeks, from a decision to order an item for a stockroom, to the item being received in the stockroom.

Lot Control

This a level of stock control. A stock balance can be broken down to a lower level (i.e. lot), against which individual balances can be maintained.

Manual Allocation

The explicit allocation or de-allocation of stock at a depot to a nominated order or order line.

Miscellaneous Invoice/Credit Note

A manually raised invoice or credit note which can include or exclude inventory movements.

Nett Total

Value of the order including adjustments such as discounts, VAT and charges.

On Order

The quantity of an item for which outstanding purchase, distribution, or works orders exist. It is held as a balance quantity at item/stockroom level.

On-Pick

Quantity of an order that has been identified to a picking note, for a particular item.

Order Number

The sales order number assigned to the customer's order by the system.

Order Value

The order value displayed in the order currency.

Order

The record of the agreement to supply items to a customer on a date at agreed commercial terms.

Outstanding

The quantity of an item that has not been allocated due to stock exceptions. This can also refer to orders that have not been met.

Payment Terms

The terms are used to evaluate the payment date starting from the date the invoice was sent out.

Payment Methods

The form in which the payment is to be made e.g. cash, cheque.

Physical (Stock)

The total quantity of an item in a stockroom. It is held as a balance quantity at item/stockroom level.

Picking Note

A document on which is listed all the items for an order which have been allocated for despatch. Used as authority to pick and despatch items for an order.

Price List

A list of prices to be charged for items. A price list may be in any currency set up for Accounts Receivable. Customers are assigned a default price list.

Priority

The orders are given a priority number which is used to identify the urgency of allocation. The higher the number the more important the order. These are used in batch allocation.

Proforma

A special invoice sent to a customer as they have paid for the order before despatch.

Reason

The reason for the document to be raised or stopped

Settlement Discount

The amount of discount given to a customer for paying before a certain date. The settlement discount allows for the definition of date ranges for which different discount rates apply.

Staged Discount

The amount of discount given to a customer for paying within a particular duration.

Statement Address

The customer's main address is held in the statement account.

Status

Identifies the status of the order.

Stockroom

An area, physical or conceptual, at which stock is to be recorded and counted.

Suspended Orders

Orders are suspended automatically for credit and pricing exception conditions. Suspended orders are not presented for allocation.

Time Fence

A period of time, in days, which when added to the current date gives a date in the future. This future date can be used as the limit for allowing stock allocation and printing acknowledgements.

Transaction/Trans.Type/Type

Identifies whether the document is either an invoice or credit note.

Transcriptional Order Entry

A method of order entry which is designed to enable the rapid entry of information, with allocation (and optionally pricing) deferred to later batch processing runs.

Type (Stock Availability Enquiry)

Type of order e.g. purchase order, sales order.

Unit of Measure

The unit in which an item is expressed for the purpose of buying, selling, stocking or valuing.

VAT Code

Refers to the VAT rate that should be used to calculate the order's VAT charge.

Warehouse

A warehouse is a stockroom which has been both set up in Inventory Management and authorised for location recording in the Warehousing applications. It may also be authorised as a depot.
