Chapter 3

Enquiries

SBU Details Enquiry

25/DOM

This option displays Strategic Business Unit details which enables different Salesmen and Negotiators to be responsible for different part types within an organisation.

SBU Details Selection Screen

Select the SBU Details option.

The system will display the SBU Details Selection Screen which allows you to enter a customer code.

Fields:

Customer Code

Enter a valid customer code for a customer whose SBU details you want to view.

Press **Enter**. The SBU Details Screen is displayed.

SBU Details Screen

When you press **Enter** on the SBU Details Selection Screen the system will display a SBU Details Screen which will display a list of SBU codes which have been set up for the customer you selected in the selection screen.

Whole Order Enquiry

1... **2...** 1/DOE

The purpose of this enquiry is to provide a multi-level display of order details. From the display of the details of the whole order a more detailed inspection of both order header and order line information is allowed.

Whole Order Enquiry Selection Screen

Select the Whole Order option.

The system will display a screen used to select the order for display. There are two ways to select the order to be displayed: either the sales order number or the customer code and the order reference may be entered:

```

OE205                HW - Handy Wholesalers Ltd        USER GALBRAIJ        7/08/95
                                                                16:25:08

Whole Order Enquiry
Order..              Customer?... C001              000  Order ref.. 0001223

```

Fields:

Order

Enter the sales order number of the required order. (The order number must be blank in order for customers and order reference to work).

Or

Customer

This must be entered in conjunction with the customer order reference. If this method is to be used, both the account code and the delivery sequence number must be entered.

Order Ref

This is mandatory if the selection is using the customer account code to view an order. If this is left blank, it will only work if the customer has orders that do not contain an order reference.

Press **Enter** to display the Whole Order Enquiry Order Summary Screen.

Whole Order Enquiry Order Summary Screen

This screen is displayed when an order is selected on the Whole Order Enquiry Selection Screen and displays in summary, details of the order.

At the top of the screen, order header information is displayed and at the bottom, a list of order lines. **Roll** keys may be used to page up and down through the order.

If the order is suspended, a reverse image message is displayed at the top of the screen giving the reason for the suspension.

Order type is displayed and will be blank if normal order. The order type may also be displayed as "Tagged" or "Uplift" for Tagged Goods Notes or Uplift Notes. This is followed by the three key dates from the order header:

- Customer's order date.
- The date the order was entered into the system.
- The delivery due date for the order.

The order value information is then displayed both in the transaction currency of the account and in the base currency of the system. The final header information is dependent on whether the invoice price will be price ruling at ORDER or DESPATCH. A list of order lines is then displayed.

```

Fields

Select

This field is untitled on the screen. Enter one of the following:

1 - To display details.

3 - To display any reservations against the order line. (Only available with back to back orders).

Ln

The line number of the item on the order.

Dn

The last picking note sequence number used on the line. If no number is listed on a line, it has not yet been printed on a despatch document.

Despatch Qty

This is the quantity last actioned. The line status code S defines the current quantity status:

Blank - order quantity.

A - allocated quantity.

M - assembled quantity

I - confirmed delivered quantity.

Description

Item description.

Susp

The Suspense Code for the order line.

Order Qty

The total ordered quantity of the item on this order line.

Due Date

The required delivery date for the item line.

S

Status of the line displayed. This indicates the most recent action taken for the line:

Blank - no action has taken place.

A - last action is an allocation.

M - last action is a confirmation of assembly.

I - last action is a confirmation of delivery.

Inv No

The invoice number of the most recent despatch.

Functions:

F6

Sort By Order Line. Toggle between sorting the order lines by line number and suspense code priority. The suspense code priority is defined in the limit field of the Inventory Description Major Type SUSP.

F13

Further detail. Further details for the whole order.

F14

Additional detail

F18

Suspension History (details of suspended orders).

F21

Control totals

To select a number of order lines for more detailed review enter a 1 against the line number and press **Enter**.

Press **F13** for yet further order information displayed on the Whole Order Enquiry Order Defaults Screen.

Whole Order Enquiry Order Defaults (F13)

By pressing **F13=Further Detail** on the Whole Order Enquiry Order Summary Screen the defaults used for processing the order are displayed.

The top part of the screen is the same as the summary detail screen, but the bottom contains the defaults used for processing the order as well as additional order data.

Fields

Last Picking Note No

The last despatch note sequence number used.

Invoice Address

The address relates to where the invoice will be sent.

Proforma No

If an order has been paid for in advance of the customer receiving the goods, the proforma invoice number associated to it would be displayed.

Priced

This field indicates how the order is priced.

- 1 - at the time of the order.
- 2 - at the time of despatch.

Cash Discount

The settlement terms code is displayed. This is used in the calculation of VAT and the allowed discount for posting to Accounts Receivable.

Stockroom

The delivery stockroom from which this order is to be shipped.

Price List

This is not used in Drinks.

Priority

The current priority of the order.

Discount List

This is not used in Drinks.

Suspend

The suspension code of the order if the order has been suspended.

Booking In Ref

The details entered if this customer requires booking in details (optional).

Booking In Time

The time associated with the booking in details (optional).

Functions:**F14**

Price breakdown

F15

Restart the enquiry

F17

Currency Details. An extra window is overlaid displaying the Currency Code, Currency Rate Code, Currency Rate, Multiply / Divide Flag and the Currency Fixed Flag.

Order Cross-Reference Enquiry

4/DOE

The purpose of this enquiry is to display all orders for a customer for a given period. The system sales order number and the customer's reference are displayed. If an order is selected the whole order enquiry facilities are available.

Order Cross-Reference Enquiry Selection Screen

Select the Order Cross-Reference option.

The Selection Screen is displayed to select the required details:

08220	HW - Handy Wholesalers Ltd	USER GALBRAIJ	8/08/95 10:03:41
Order Cross-Reference			
Customer.....?...?.. C001 000			
Orders entered between.. 240795 and..... 80895			
Omit the delivery sequence number to review all orders for the given customer number.			
F3=Exit F4=Prompt			

Fields:

Customer

- For all orders across all delivery points key in account code only.
- For all orders for one delivery point key in account code and delivery sequence number.

Orders Between ... And

Key in the time period over which you want to see orders. Defaults to the current system date.

Press **Enter** to display a two-column listing of matching orders.

Order Cross-Reference Enquiry Listing Screen

This screen is displayed when you have entered a valid customer and order date on the Order Cross-Reference Enquiry Selection Screen.

The screen lists all the orders for the selected delivery point, in customer reference order, over the selected time period. If all orders for a customer had been selected then the orders would have been listed in order reference order within delivery sequence order.

Orders by Route Enquiry / Report

7/DOE

This procedure allows you to view and report on orders due for delivery on selected routes. Customers are allocated to a route, using the Telesales Profile Maintenance.

If you are not currently using Telesales, you must:

- *Create a Telesales company to define the Inventory Description being used to define Route.*
- *Define the valid routes against the inventory description selected.*
- *Define routes against delivery profiles for each delivery point.*

Orders by Route Enquiry / Report Selection Screen

Select the Orders by Route Enquiry/Report option.

This screen enables you to select a route and display the orders scheduled for delivery on that route:

- On screen as an enquiry
- As a printed report

```

Invoice By Order Number Enquiry

10/DOE

This procedure displays details of invoices for an order and then provides access to the full invoice enquiry.

Invoice By Order Number Enquiry Selection Screen

Select the Invoice By Order Number option.

This screen enables the selection of the order for which invoices are to be displayed. There are two ways to select the order - either by the Sales Order Number or the Customer Code and the Order Reference.

OE225	HW - Handy Wholesalers Ltd	USER CALBRAITJ	8/08/95
			11:09:51
Invoice Enquiry By Order			
Order.. 0001223	Cust No..?..	Order ref..	
F3=Exit F4=Prompt			

Fields:

Order

The sales order number of the required order.

Or

Customer

This must be entered in conjunction with the customer's order reference. If this method is to be used, both the account code and the delivery sequence number must be entered.

Order Ref

This is mandatory if the selection is using the customer account code to view an order. If this is left blank, it will only work if the customer has orders that do not contain an order reference.

Press **Enter** to display a list of Invoices for the selected order.

Invoice By Order Number Enquiry List Screen

This screen is accessed by entering valid information into the Invoice By Order Number Selection Screen, and is used to list the invoices raised for an order.

At the top of the screen the Order, Currency and Default Exchange Rate are shown. A list of invoices related to the order are displayed.

Note: This screen will only display if more than one invoice exists for the order.

Fields:

Line No

Sales Order line number.

Item

The item code is displayed. If an override description is present, it is shown at the bottom of the screen.

Invoice Details

Invoiced

The date the invoice was raised.

Assembled

The date the goods were recorded as assembled.

Period

The accounting period to which the invoice was posted.

Statement

The customer account code of the posting account in Accounts Receivable.

Customer

The Customer Number (NOT including the Sequence Number).

Transaction

The type of document:

10 - Despatch

11 - Sundry

Stockroom

The stockroom from which the item was assembled.

Pricing and Discounting Details

Discount 1

Not used.

Discount 2

Not used.

Unit Price

The price in currency for the item.

Quantity

The quantity despatched and invoiced.

Entered Qty

The quantity ordered by customer.

Price List

The Promotion Discount Type for Freeloaders, if used, otherwise blank.

Discount Code

Single digit discount code (For pricing information see **F17=Price Breakdown**).

Discount List

The Promotion Discount Type for Freeloaders, if used, otherwise blank.

VAT Code

The code used to determine the VAT rate (in the Descriptions file).

Note: Values are shown in both transaction and base currency for a currency invoice.

If the General Ledger is not active, the VAT Code is validated against the Drinks Inventory Descriptions File. Cash discount will be deducted from VAT.

If the General Ledger is active, EURO VAT will be catered for. VAT details are kept and maintained in the General Ledger. The facility exists for cash discount

to be deducted at either order time, or payment time, or cash discount to be ignored.

If Extra VAT applies, e.g. as in Spain, then the extra VAT is kept against the VAT Code in General Ledger.

Discount

Not used in Drinks.

Value

The goods value of the line nett of discount.

VAT Amount

The tax amount for the line nett of cash discount.

Gross

Total of goods and tax due for the line.

Invoice by Customer Enquiry

12/DOE

This procedure enables you to display details of invoices for a customer. A list of invoices is displayed showing the total values, date and accounting period. Invoices may then be selected for more detailed scrutiny in the same format as the Invoice by Invoice Number Enquiry.

Invoice by Customer Enquiry Selection Screen

Select the Invoice By Customer option.

This screen enables the selection of the account for which the invoices are to be displayed. The application will allow you to view either consolidated invoices or the non-consolidated invoices and credit notes.

08250	HW - Handy Wholesalers Ltd	USER GALBRAIJ	8/08/95 12:35:00
Invoices By Customer			
Customer.....?.. C001 000			
F3=Exit F4=Prompt			

Fields:

Customer

Enter the customer code. If it is not known, standard customer search routines are provided. To view the consolidated invoices do not enter a delivery sequence code for the customer. If however, you wish to view non-consolidated invoices and credit notes enter a delivery sequence code as part of the customer code.

Warning: If the delivery sequence is left blank, an error message is displayed if the order has no associated consolidated invoices.

Press **Enter** to display the Invoice by Customer Enquiry List Screen.

Invoice by Customer Enquiry List Screen

This screen is displayed when you enter a valid customer code into the Invoice by Customer Enquiry Selection Screen.

This screen displays the invoices and credit notes or consolidated invoices raised for a customer. Credit notes are identified by the suffix CR following values. The invoices are listed one document on each line. If the account is in currency this is displayed. The invoices are listed in a numbered sequence.

Fields:

Line No

Sales Order line number.

Item

The item code is displayed. If an override description is present, it is shown at the bottom of the screen.

Invoice Details

Invoiced

The date the invoice was raised.

Assembled

The date the goods were recorded as assembled.

Period

The accounting period to which the invoice was posted.

Statement

The customer account code of the posting account in Accounts Receivable.

Customer

The Customer Number (NOT including the Sequence Number).

Transaction

The type of document:

10 - Despatch

11 - Sundry

Stockroom

The stockroom from which the item was assembled.

Pricing and Discounting Details

Discount 1

Not used.

Discount 2

Not used.

Unit Price

The price in currency for the item.

Quantity

The quantity despatched and invoiced.

Entered Qty

The quantity ordered by customer.

Price List

The Promotion Discount Type for Freeloaders, if used, otherwise blank.

Discount Code

Single digit discount code (For pricing information see F17)

Discount List

The Promotion Discount Type for Freeloaders, if used, otherwise blank.

VAT Code

The code used to determine the VAT rate (in the Descriptions file).

Note: Values are shown in both transaction and base currency for a currency invoice.

If General Ledger is not active, the VAT Code is validated against the Drinks Inventory Descriptions File. Cash discount will be deducted from VAT.

If General Ledger is active, EURO VAT will be catered for. VAT details are kept and maintained in the General Ledger. The facility exists for cash discount to be deducted at either order time, or payment time, or cash discount to be ignored.

If Extra VAT applies, e.g. as in Spain, then the extra VAT is kept against the VAT Code in the General Ledger.

Discount

Not used.

Value

The goods value of the line nett of discount.

VAT Amount

The tax amount for the line nett of cash discount.

Gross

Total of goods and tax due for the line.

```

Fields:

Item

Enter a valid item code.

Stockroom

Enter a stockroom code which stores the given item.

Press **Enter** to display the Stock Availability Enquiry Listing Screen.

Stock Availability Enquiry Listing Screen

This screen is displayed when you enter a valid item and stockroom into the Stock Availability Enquiry Selection Screen.

This screen will display the stock status and details of allocated and back orders.

The upper part of the screen gives the current stock situation. The lower part of the screen shows unallocated sales orders (SO) and outstanding purchase orders (PO) in due date sequence, selected for the item. The quantity outstanding column shows the quantity needed for each unallocated order.

Two numbers, calculated as running totals, are associated with each order line:-

- Allocated - This is the top number of the two, on the right hand side of the order line. It represents actual stock availability. This is calculated by considering the current available stock less the sales order quantity of the line. No purchase orders are counted.

If the value is negative, the orders will not be met without more stock being ordered before the due date.

Note: Current available stock is the stockroom available stock less sales order quantities from previous lines. Sales order quantity is the figure Qty o/s if it is a sales order line i.e. when the type is SO or SS.

- Expected - This is the lower number of the two, on the right hand side of the order line. It represents expected stock availability. This is calculated by considering the actual available stock (see above) plus outstanding supply order quantities.

Note: Outstanding supply order quantity is the figure Qty o/s if it is a supply order line i.e. when the type is PO. It represents currently unallocated and unreserved units from the supply order.

If the value is negative, the orders will not be met as the requested purchase order quantity is either not enough or the due date is too late.

The current date (including the item lead time) is shown in asterisks.

13-2	SA	MW KS CL IM DM II	MARVIN KB ST0672S1

Fields:

Press **F13** to display all orders that have been allocated for the given item in the specified stockroom.

Item

The selected item code.

Stockroom

The selected stockroom.

Stock Units

The unit of measure factor the item is stored in..

Physical Stock

Actual stock on the shelf.

Frozen Stock

Stock that has been held and is not available for allocation.

Allocated Stock

Stock allocated to orders, purchasing and sales.

Available Stock

Stock that is available for allocation. The figure has been derived by:

Available = Physical Stock - Frozen - Allocated + Negativity.

In Transit

Stock being despatched between stockrooms

On Order

Sales order demand for the item.

On Back Order

Sales orders that cannot be met due to stock shortages.

Lead Time(Weeks)

The lead time given for the item i.e. the number of weeks in which allocation must take place before the due date.

Negativity

The quantity the available is allowed to go negative by.

Order Lines

Order/Line

The order number and line number that contains the item order.

Type

The type of order. The following options are available:

DS - Distribution order.

DO - Distribution order (demand).

MPS-SS - Planned schedule from Master Production Schedule (MPS).

MPS-CS - Firm schedule from MPS.

MRP-SS - Planned schedule from Materials Requirements Planning (MRP) schedule.

MRP- CS - Firm schedule from MRP schedule.

SO - Sales order.

PI - Purchase inspection.

PO - Purchase order.

PG - Purchase receipts (goods inwards).

SQ - Sales order quotations.

SS - Suspended order.

Due Date

Delivery date of order.

Customer / Supplier

The customer's code for a sales order or a supplier's code for a purchase order.

Qty O/S

Quantity outstanding for the order.

For a sales order this figure shows the number of units yet to be allocated.

For a supply order it represents the number of units available for allocation - i.e. the number of units that do not have reservations against them.

Note: Quantity outstanding from supply orders will be displayed only if reservations have been made against it.

Available

The availability of stock is expressed with two figures. The first denotes availability taking into consideration the outstanding sales orders only. The second denotes availability taking into consideration the outstanding sales orders and purchase orders.

If there are no orders associated with the item and stockroom combination a message will appear in place of the order lines.

Functions:

F13

Allocations. Dictate how the Item is allocated to other orders.

Press **Enter** to return to the Stock Availability Enquiry Selection Screen.

To show the allocation of the stock item for other orders press **F13=Allocations**.

Stock Availability Enquiry Allocations Screen (F13)

This screen is displayed when you press
F13=Allocations on the Stock Availability
Enquiry Listing Screen.

This screen will show the picking quantities and how the item has been allocated to other orders.

The top of the screen will again show the item and stockroom description, the stock status, and the order quantity status. The difference between the Stock Availability Detail screen and the Stock Availability Allocation screen is that the qty o/s and available fields are replaced by the following fields:
