Chapter 4

Reports

Drinks Sales Order Processing Reports

Drinks Sales Order Processing has a full range of reports, which can be divided into three main areas - Status, Exception and Planning.

Status Reports

The status reports are lists of data from the reference files. These are specifically designed to include information for the sales functions, and cover the following reference files:

- Items.
- Customers.
- Product Summary.
- List of Orders.
- Freeloaders' Sales.

Exception Reports

There are a number of exception reports to help direct management attention to those parts of the system that require attention. These are:

- Unconfirmed Picking Notes.
- Unconfirmed Documents.
- Non-returned Tagged Goods.
- Suspended Orders.
- Suspended Order History.
- Orders with Zero Price.
- Gross Margin Exceptions.
- Price Overrides.
- Zero Value Invoice Lines.
- Confirm Delivery Amendments.
- Credits by Delivery Date.

Planning Reports

The following reports include a measure of outstanding work and can therefore be used to assist planning:

- Outstanding Orders.
- Stock versus Outstanding Orders.
- Back Orders.
- Pick Lists.
- Wanted Trailers.
- Trailer Location.
- Customer Container Tracking.
- Depot Container Movements Orders.

Unconfirmed Documents Report

1/DOR

This report will detail all delivery notes which have been assembly confirmed but not delivered. The report will detail all delivery notes requiring the confirm delivery process to be performed up to and including the entered delivery date. The report displays the following fields:

- Delivery note number.
- Customer account number and delivery sequence.
- Delivery date.

Unconfirmed Document Report Selection Screen

Select the Unconfirmed Documents option.

The date range is mandatory entry.

Container Code

The item code of the container. This is optional entry and if left blank will report all monitored containers.

Source Stockrooms

Stockrooms for which movements are to be reported. At least one valid code must be entered.

Destination Stockrooms

Enter a list of up to 30 destination locations for each source location for which the movements will be reported. At least one valid code must be entered.

 Press **Enter** to validate the details on the screen.

Product Summary Report

10/DOR

This report allows the user to specify a series of picking note and bulk pick list numbers which will be printed on a summary report.

The summary report will be given a summary number. This number is held on the Company Profile and is incremented by one each time a new report is run.

It is then possible to rerun the report by using the associated Product Summary number.

The report header page prints:

- The product summary number.
- Stockroom code.
- Stockroom description.
- Picking note numbers and bulk picking list numbers associated with the summary number.

The report detail pages print:

- Item code.
- Item size.
- Item short description.
- Total quantity.
- Total weight.

There will be one detail line per item code.

There will be a report of total weight.

Product Summary Report Selection Screen

Select the Product Summary Report option.

Fields:

Promotion Indicator -From - To

Enter Freeloader promotions types. These must be valid entries from the Descriptions file, major type F RTP.

Region

Optional entry, must be valid entry on the descriptions file, major type SN (leave blank for all).

Territory

Must be valid entry from the descriptions file, major type TR (leave blank for all).

Salesman

Must be valid, from the major type TN (leave blank for all).

Press **F8=Submit** to submit the report to print.

Items Report

21/DOR

This report is used to list all items for the company, printing the information specifically selected for the sales function:

- Item Number.
- Description.
- External and Internal Text.
- Key Analysis Codes.
 - VAT Code
 - Division
 - Sub division
 - Major Group
 - Minor Group

Sequence

Item Number.

Select the Items option.

Following selection, the standard screen to confirm processing a batch job is displayed. Press **F8=Submit** to submit the report.

Customers Report

22/DOR

This procedure is used to list all customers for the company and print the information relevant to the sales function. The customer's additional sales information is printed together with the invoice and delivery to addresses.

The following information is printed:

- Account Number.
- Currency Code.
- Invoice Address.
- Corporation.
- Delivery Address.
- Division.
- Stockroom.
- Sub Division.
- Price List.
- Region.
- Cash Discount.
- State.
- Priority.
- Salesman.
- Statement Account Code.
- Customer Class.
- Currency Rate.
- Territory.
- Customer Status.
- Outlet Code.
- Buying Group.
- Own Group.
- Own Ref.
- Minimum Order Quantity.
- Large Drop Discount.
- Trade Key.
- Sales Stream.

- Restrict Buying List.

The following information is identified as being either on or off:

- Back Order.
- Part Delivery.
- Manual Pick List.
- Order Search.
- Carriage.
- Acknowledgements.
- Order Reference.
- Default Price List.
- Special Customer.
- Invoice Consolidation.
- Booking In Delivery.

Sequence

Customer code.

Select the Customers option.

Following selection, the standard screen to confirm processing a batch job is displayed.
Press **F8=Submit** to submit the report to print.

Outstanding Orders Report

23/DOR

This procedure reports on all uncompleted orders in the order bank. The following information is printed:

- Range Description.
- Account Code.
- Customer Name.
- Item Code.
- Item Description.
- Order Number.
- Quantity Outstanding.
- Order Line.
- Priority.
- Delivery Date.
- Currency.
- Outstanding Base Value.
- Stockroom.

Totals

Quantity outstanding.

Sequence

The sequence of the reports is: stockroom, customer, order.

The Outstanding Reports Selection Screen enables report selections to be made:

Outstanding Orders Report Selection Screen

Select the Outstanding Orders option.

The report may be run for all orders or a selection of orders. The selection is made by entering the appropriate parameters.

The orders may be selected on a range of:

- Entered order dates.
- Line delivery due dates.
- Items.
- Customers.
- Sales order numbers.
- Summary or Detail Report. Detail prints the ordering method and reservations information.

The selection may apply to all stockrooms or a single stockroom and it may include:

- Allocated order lines.
- Unallocated order lines.
- Both allocated and unallocated order lines.
- Kit components may be included or excluded.

Press **Enter** to validate the procedure.

Press **F8=Submit** to submit the job to the job queue.

Pick Lists Report

24/DOR

This procedure reports on orders released for picking. This is used in a manually controlled environment to control picking. It also identifies the bin location i.e. where the item is stocked.

Pick List Summary

List by stockroom, printing totals for each item.

Pick List Detail

List by stockroom and item for all order lines requiring picking. a total to be picked for each item is produced.

The summary information and the following details are printed:

- Despatch Note & Line Number.
- Stockroom.
- Bin Number.
- Delivery Due Date.

The following information is printed:

- Stockroom.
- Stockroom Description.
- Item Code.
- Item Description.
- Quantity.
- Priority.

Frequency

As required, but these reports can be used as control documents for the supervision of warehouse staff. In this case they should be printed at least daily.

Totals

Quantity to be picked by item.

Sequence

Stockroom / item.

Select the Pick Lists option.

Following selection, the standard screen to confirm processing a batch job is displayed.
Press **F8=Submit** to submit the report to print.

Back Orders Report

25/DOR

This produces a back order exception report. This procedure compares the orders which are due to be delivered or should have been delivered against the stock available to meet the order. An order is due for delivery if its required delivery date is at or inside the timefence for its stockroom.

Pick List Summary

List by stockroom, printing totals for each item.

Pick List Detail

List by stockroom and item for all order lines requiring picking. A total to be picked for each item is produced.

The following information is printed:

- Customer Code.
- Customer Name.
- Item Code.
- Item Description.
- Order Number.
- Order Line.
- Quantity Outstanding.
- Stockroom.
- Priority.
- Delivery Due Date.
- Reason.

Frequency

Just prior to a batch allocation run to allow for any manual allocation required prior to the system action or credit control action.

Sequence

Customer and item.

Enter a selected stockroom code, or leave blank to select all stockrooms.

 Press **F8** to submit the procedure to the job queue.

Unconfirmed Pick Notes Report

26/DOR

Select the Unconfirmed Pick Notes option.

This procedure lists all picking notes which have not been confirmed as despatched or cancelled, a specified number of days after being requested. The number of days is held on the descriptions file; major type DAYS and entry BACK.

Frequency

Daily.

Sequence

Order number.

Following selection, the standard screen to confirm processing a batch job is displayed.
Press **F8=Submit** to submit the report to print.

Suspended Order Report

27/DOR

Select the Suspended Orders Select the Unconfirmed Pick Notes option.

This procedure lists all suspended orders with the reason for the suspension and details of when the order was taken and the despatch date. Orders that are suspended do not have stock allocated to them by the batch allocation procedure. Orders may be suspended by choice or by the system.

The reasons for system suspension are:

- **CS/HS** - Customer is on credit stop.
- **CL/HL** - The credit limit was exceeded by the order.
- **CT/HL** - The customer's account has been identified as litigation and hence is on hold.
- **ED** - EDI Order.
- **FP** - A manual price was entered during order entry or amendment, and requires confirmation.
- **NP** - An order line has no price.
- **SV** - State Buying List violation.

Other reason codes are set up on the descriptions file.

The following information is printed:

- Order Number.
- Customer Code.
- Customer Name.
- Customer Order Reference.
- Order Date.
- Despatch Date.
- Reason for Suspension.

Frequency

Daily, e.g. credit control.

Sequence

Controller / Order number.

Following selection, the standard screen to confirm processing a batch job is displayed. Press **F8=Submit** to submit the job to print.

Orders with Zero Price Report

28/DOR

This procedure lists all order lines with a quantity outstanding, but no value. One possible use is to ensure that price lists are properly maintained. The following information is printed:

- Customer Code & Delivery Sequence Number.
- Customer Name.
- Order Number & Line.
- Item Code & Description.
- Quantity Outstanding.
- Due Date.
- Stockroom.
- Kit Flag.

Sequence

Customer and delivery sequence.

Following selection, the standard screen to confirm processing a batch job is displayed. Press **F8=Submit** to submit the job to print.

Stock Versus Outstanding Orders Report

29/DOR

This procedure lists unallocated order lines and the current stock position. It can be used to trigger expediting or purchasing action.

Frequency

Typically weekly.

Totals

Total required by item for a stockroom.

Sequence

Item within stockroom.

Note: If the Inventory company allows back to back sales and purchasing orders, you can select either a summary or detail report. The detail report prints the ordering method and reservations information.

Select the Stock Versus Outstanding Orders option.

Following selection, the standard screen to confirm processing a batch job is displayed. Press **F8=Submit** to submit the job to print.

Gross Margin Exceptions Report

30/DOR

This procedure reports on high or low margins on sales order lines. The gross margin is the difference between sales value and the cost of item. It calculates the gross margin as a percentage:

$$\frac{\text{Sales Value} - \text{Cost Value}}{\text{Sales Value}} \times 100$$

Sales Value

Or

$$\frac{\text{Sales Value} - \text{Cost Value}}{\text{Cost Value}} \times 100$$

Cost Value

The result is then compared with two control parameters to ensure the gross margin is between the set limits. Exceptions are listed. Asterisks identify those order lines that have exceptional high differences. The control parameters are held on the descriptions file Major type MARG in the percentage field. The entries are as follows:

- **U** - Upper margin as a percentage of cost.
- **L** - Lower margin as a percentage of cost.
- **US** - Upper margin as a percentage of sales.
- **LS** - Lower margin as a percentage of sales.

The following information is printed:

- Order Number & Line.
- Item Code & Description.
- Despatch Quantity.
- Sales Value.
- Cost Value.
- Gross Margin.
- Kit Flag.

Gross Margin Exceptions Report Selection

Note: The report is sequenced by order number.

Press **Enter** to submit the job to the job queue for batch processing.

Selling Price Overrides Report

31/DOR

This procedure reports upon all order lines where the price has been overridden manually, making them fixed prices. This is useful to maintain price lists and to monitor the pricing of orders.

The following information is printed:

- Order Number & Line.
- Item Code & Description.
- Price.
- Override Price.
- Kit Flag.

Sequence

Order number.

Select the Selling Price Overrides option.

Following selection, the standard screen to confirm processing a batch job is displayed. Press **F8=Submit** to submit the job to print.

List of Orders Report

32/DOR

This is a proof list of all orders raised since the report was previously run. Printed orders are flagged. All the order details are printed.

Frequency

Daily.

Selection

All orders since previous run.

Sequence

Order number.

Select the List Of Orders option.

Following selection, the standard screen to confirm processing a batch job is displayed. Press **F8=Submit** to submit the job to print.

Zero Value Invoice Lines

33/DOR

When a sundry invoice or credit note is raised, pricing occurs but can be overridden. If no price exists in the price list and no price is entered once the invoice or credit is completed, then a line exists on the invoice with no price.

When the invoice is printed and Accounts Receivable is updated, re-pricing with the date of despatch routine is attempted. If this fails, the invoice is not printed and Accounts Receivable is not updated.

The information recorded in the exception report is

- Invoice Number.
- Order Number & Line Number.
- Customer Code.
- Despatch Sequence Number.
- Item Code & Description.
- Quantity.
- Price List.
- Kit Flag.

Frequency

Regularly - weekly or at least once a month prior to Accounts Receivable close.

Sequence

Invoice number.

Select the Zero Value Invoice Lines option.

Following selection, the standard screen to confirm processing a batch job is displayed.
Press **F8=Submit** to submit the job to print.
