Chapter 8

Global Item Price Uplift

Global Item Price Uplift Overview

Global Item Price Uplift, accessed from the Sales Order Processing Main Menu, enables a price uplift to be defined for one or more items and, under user control, for this to be applied globally to any of the price lists on which they appear.

Global Duty Uplift Maintenance provides function for global uplift of an item's price due to the duty element being changed - say because of a tariff amendment. The Drinks Inventory Budget Duty charge function is used to generate the data for this option.

Global Item Uplift Maintenance

1/DOG

This function enables you to select items and apply price changes to any of the price lists on which they appear.

Global Item Uplift Maintenance Selection Screen

Select Global Item Uplift Maintenance option.

The initial screen is displayed to enable the items whose prices are to change and other parameters to be defined.

08356	HM - Handy Wholesalers Ltd	USER GALBRAIJ	2/08/95 17:00:37
Global Price Uplift Maintenance			
Default Start Date 2/08/95 Currency code for Price Uplift GBP			
Item (?)	Price Change	Description	Start
XB01	1.25000	Deposit Bottle B/Tulip 500ml	
			+
F3=Exit F4=Prompt F8=Update F12=Previous			

Fields:

Default Start Date

The start date to be applied if one is not specified at line level.

Currency Code For Price Uplift

Currency code - there will a check that the combination of item and currency code exists on at least one price list.

Item

Item number.

Price Change

The price uplift - a numeric value.

Description

This field is updated by the system when the other item details have been validated.

Start

The date at which the price uplift should be started. If blank then the default will be used.

Note: The price breakdown from the original price will be duplicated, but must be amended to reflect the uplift.

Type in the required Price Changes and press **Enter** to update the screen with the associated description.

Global Item Uplift Maintenance Records

If you Select the Global Item Uplift Maintenance option when records have previously been entered the screen will display a choice of adding extra records or deleting the old ones.

08356	HW - Handy Wholesalers Ltd	USER GALBRAIJ	2/08/95 17:12:46
Global Price Uplift Maintenance			
Records have previously been set up in work file			
F3=Exit F11=Delete existing records - ENTER - To add records			

Press **Enter** to display a blank screen to add new records as described earlier.

Press **F11=Delete existing records** to delete any records entered earlier.

Global Item Uplift Report

2/DOG

Select the Global Item Uplift Report option. A confirmation will be displayed.

Press **F8=Submit**, this submits a batch job to produce the report.

The report shows all the Price Lists which would be affected by the uplift. The details shown are :

- Price type.
- Currency.
- Start date.
- End date.
- New start date.
- Prevent update flag.
- Breakpoint.
- Current price.
- New price.

This option generates a work file containing the records to be amended for subsequent review and module. Records will be set to prevent update if there is a problem. For example, multiple records with start dates that conflict with the start date for the module at the uplift.

Note: The current price breakdown is shown.

Global Item Uplift Review

3/DOG

This function enables a review of the uplifts currently in progress for a combination of Item number and Currency code.

Select the Global Item Uplift Review option.

```

Fields:

Prevent Update

Enter a flag to determine whether you now wish to prevent update of the prices.

0 - No.

1 - Yes.

Start Date

Amend the start date.

New Price

The new price after the proposed uplift.

Note: Price breakdowns must be amended before the uplift can be updated.

Press **F8=Update** to save the changes.

Global Item Uplift Update

4/DOG

This function will carry out the actual uplift as defined and possibly amended in the previous options. The work file is cleared by this process. Any records flagged to prevent update will not be actioned.

Note: The new price breakdown is copied to the live file and audited.

Select the Global Item Uplift Update option.

A Drinks Inventory Management process is used to amend Duty Rates by Tariff code. This calculates a proposed uplift in the Duty element of cost for an item. After review, the Item master details may be amended - Duty Value and Standard Cost. As a result of amending the cost by this uplift, there is a corresponding option to uplift price lists globally by the same amount.
