Chapter 2

Processing

Drinks Requisitioning Processing Functions

Processing within Drinks Requisitioning may be split into four stages:

- Creation of Requisitions.
- Maintenance of Requisitions.
- Authorisation of Manual Requisitions.
- Creation of supply orders from Requisitioning.

All four stages can be accessed from the Drinks Requisitioning Processing menu.

Creation of Requisitions

Requisitions may be created by any of the following:

- Inventory Reordering.
- Interface to Manufacturing (MPS/MRP) applications.
- Interface to Drinks DRP application.
- Manual entry.

Maintenance of Requisitions

Requisitions are maintained within the Requisitions Confirmation function. They may also be reported on during their existence within Drinks Requisitioning.

Manual requisitions may be created via the Requisitions Confirmation procedure.

Authorisation of Manual Requisitions

Any manually entered requisitions which require authorisation are displayed for processing by the relevant Authoriser. This Authoriser is determined by the Requisitions Confirmation procedure using the spend control data from the Authorisation file. The requisition may then be authorised, rejected or transferred to another authoriser.

Creation of Supply Orders

There are two types of supply orders handled by Drinks Requisitioning - Purchase Orders and Distribution Orders.

Purchase order lines may be created for purchased items, i.e. those defined to Drinks Purchase Management, from selected requisitions.

Distribution order lines may be created for items supplied by a Supply Centre within the company, as defined within Drinks Distribution Requirements Planning. This is created as a special type of Sales Order line, i.e. an internal order which will not create an invoice or update Drinks Sales Analysis.

Inventory Re-ordering

1/DQP

This procedure enables users of the Drinks Inventory Management application to automatically generate recommended order lines (requisitions), based on the re-order criteria set up for an item within Inventory Management.

The basic report, accessed from Drinks Inventory Management, will report on all items that require either re-ordering or are over-stocked.

When an item is selected for re-ordering, in addition to the above function, a requisition record is generated for this item.

Re-order Report Sequence Selection Screen

 Select the Inventory Re-ordering option.

This procedure enables you to select the sequence of the report before submitting the batch program to create the re-order report and requisitions.

```
RQ309                HW - Handy Wholesalers Ltd        USER GALBRAIJ    29/01/96
                                     10:07:36

Re-Order Report & Requisitions Creation

Enter required report sequence:  1      1 - Item Sequence.
                                   2 - Stockroom Sequence.

F3=Exit

06-35  [ ] MW      KS      IM      II  KENB20A  PED170S1
```

Fields:

Report Sequence

You must enter one of the following:

1 - Report in Item Code sequence.

2 - Report in Stockroom sequence.

 On selecting a valid report sequence, a confirmation message is displayed.

 Press **Enter** to submit the report to the job queue.

The batch program will output the report in the specified sequence and add the generated requisitions. These may subsequently be amended or reported on.

For details of the re-order report, and the calculations made to determine re-order quantities etc, see the relevant section of the Drinks Inventory Management Product Information.

In addition to the re-order report, two other reports are generated. They are the New Requisitions report which details all new requisitions that have been generated, and the Requisitions Deleted report which details all requisitions not

previously converted to orders, and so have been deleted to prevent duplicate requisitions by this batch program.

Note: Only requisitions sourced from Drinks Inventory Management are deleted, not those from Manufacturing, Drinks DRP or manual entry.

Data Sourced

When requisitions are generated, the data is sourced as follows:

Item

The item identified by the application as requiring re-ordering.

Supplier

The preferred supplier from the Item/Stockroom details for the item.

Purchase Officer

The Purchase Officer defined for the item.

Stockroom

The stockroom for which the application has identified a shortage of the item.

Quantity

Recommended re-order quantity, as calculated by the application.

Due Date

Due date calculated by the application by adding the lead time for the item to the requisition creation date.

Price, Discount

Price for the item, and discount allowed, when purchased from the supplier.

Release Flag

Set to the default value as defined on the Drinks Purchase Management Company Profile.

Requisition Number

A unique number allocated to this requisition based on the range defined within the Drinks Purchase Management Company Profile.

Requisition Text

If purchasing text exists for an item, it is copied to become requisition text.

If no purchasing text exists for an item, its description is copied to become the first line of requisition text.

Create Requisitions from MPS / MRP Suggested Orders

1...
2...

2/DQP - CREATE REQUISITIONS FROM MPS

1...
2...

3/DQP- CREATE REQUISITIONS FROM MRP

You use Create Requisitions From MPS to generate requisitions from suggested Purchase Order lines output by the last MPS processing run.

You use Create Requisitions From MRP to generate requisitions from suggested Purchase Order lines output by the last MRP processing run.

All requisitions that have not been converted to Purchase Orders will be deleted from the start Planner Action date onwards.

Create Requisitions Confirmation Screen

Select the Create Requisitions option.

Warning: When you select this option, the system checks that the Manufacturing application is installed for this company. If not, a message is displayed with the instruction to exit this function as it is not available.

You use this screen to confirm submission of a batch program to delete and add requisitions sourced from either MPS or MRP, selecting by Planner Action date range.

F3=Exit F8=Submit			
14-43	SA	MW KS CL IM DM II	MARVIN KB ST0672S1

Fields:

Model

The model number for which suggested orders will be selected from MPS or MRP. This is set to the value on the Manufacturing Company Profile and cannot be changed here.

From MPS Or MRP

0 - To select suggestions from MPS.

1 - To select suggestions from MRP.

Planner Action Date Range

Enter a range of valid calendar dates for which requisitions will be created if the action date falls between the dates entered.

Press **F8=Submit** to submit the program to the job queue. This will delete and create requisitions

sourced from either MPS or MRP (as selected).
A new requisitions report is also output. This details all new requisitions which have been created.

A Requisitions Deleted report is also output which details all requisitions sourced from MPS or MRP (as selected) that have not been converted to orders.

Data Sourced

When requisitions are generated, the data is sourced as follows:

Item

The item identified by MPS or MRP as requiring re-ordering.

Supplier

The preferred supplier from the Drinks Inventory Item/Stockroom details for the item.

Purchase Officer

The Purchase Officer defined for the Drinks Inventory item.

Stockroom

The stockroom for which MPS and MRP has identified a shortage of this item.

Quantity

Recommended re-order quantity as calculated by MPS or MRP.

Due Date

Due date set by MPS or MRP as the required date for the demand on this item.

Price, Discount

Price and discount for the item.

Note: If no price is found in Drinks Purchase Management, it defaults to the standard cost in the Drinks Inventory Item/Stockroom details.

Release Flag

Set to the default value as defined on the Drinks Purchase Management Company Profile.

Requisition Number

A unique number allocated to this requisition, based on the range defined to the Drinks Purchase Management company profile. No purchasing text is added by this option.

Create Requisitions from Drinks DRP

1... **2...** 4/DQP

This procedure enables you to generate requisitions from suggested order lines output by the last Drinks Distribution Requirements Planning processing run. (Selects suggestions by Planner Action date range for the specified Centre, DC or Supply Network.)

The requisitions are for externally supplied items (with a valid supplier), and internally distributed items, (where the supplier is a valid Drinks DRP Supply Centre).

Requisitions which have not been converted to orders will be deleted prior to the creation of the new requisitions. All requisitions which were previously created from the selected Drinks DRP DC, Centre or Network will be deleted from the start Planner Action date onwards.

Drinks DRP Requisition Selection Screen

Select the Create Requisitions option.

This procedure enables you to select the date range for which requisitions will be created, plus the DRP DC, Centre or Network and submit the batch program to create requisitions.

Warning: *On selecting this option, a check is made that the Drinks Distribution Requirements Planning (DRP) application is installed for this company. If it is not, a message is displayed with the instruction to exit this function as it is not available.*

RQ240	HW - Handy Wholesalers Ltd	USER GALBRAIJ	29/01/96 10:39:58
Create Requisitions From DRP Suggestions

or			
All DC's for Network code ...?.. __			
F3=Exit F4=Prompt F8=Update			
06-35   KS IM II KENB20A PED170S1			

Fields:

Planner Action Date Range

Enter a range of valid calendar dates for which requisitions will be created if their action date falls between the dates entered. The first date defaults to the Current Date.

Centre / DC Code

A valid Drinks DRP Centre or DC code, i.e. defined to at least one supply network within Drinks DRP.

Or

All DCs For Network Code

A valid Drinks DRP Network code.

Press **F8=Submit** to submit the program to the job queue. This will delete and create requisitions

sourced from the selected DRP DC, Centre or Network.

Note: If Network is selected, requisitions are created for all DCs defined to it, but not for the Supply Centre. The latter must be processed separately (after the central supply plan has been created in Drinks DRP).

A new requisitions report is output, which details all new requisitions created by the batch program.

The Requisitions Deleted report is also produced, which details all requisitions sourced from DRP (as selected) that have not been converted to orders.

Data Sourced

When requisitions are generated, the data is sourced as follows:

Item

The item identified by Drinks DRP as requiring re-ordering.

Supplier

This depends on the source of supply, defined for the item within Drinks DRP. If the item is locally purchased, at the selected Centre or DC, then the supplier is from the Drinks Inventory Management Item/Stockroom details. Alternatively, if the item is centrally supplied, the supplier is the Centre Code defined to the item in Drinks DRP.

Purchase Officer

The Purchase Officer number defined for the planner who is assigned to the item in Drinks DRP.

Stockroom

The stockroom for which Drinks DRP has identified a shortage of this item.

Quantity

Recommended re-order quantity, as calculated by Drinks DRP.

Due Date

Due date set by Drinks DRP as the required date to satisfy the demand on this item.

Price/Discount

Item price and discount is taken from the Item/Supplier details in Purchase Management. If these details are not found the price is set to the standard cost in the Drinks Inventory Management Item/Stockroom details. The discount is set to zero.

Requisitions for internal distribution are not priced.

Release Flag

Set to the default value as defined on the Drinks Purchase Management Company Profile.

Requisition Number

A unique number allocated to this requisition, based on the range defined on the Drinks Purchase Management Company Profile.

No purchasing text is added by this option.

Requisitions Confirmation

11/DQP

This procedure enables you to maintain the recommended order lines, i.e. requisitions that are generated from Drinks Inventory Management, MPS, MRP or Drinks DRP. Also enables the entry and control of Manual Requisitions for both stocked and non-stocked items (including services).

Requisitions Confirmation Selection Screen

Select the Requisitions Confirmation option.

This displays the Selection Screen which enables you to select the requisitions to be amended or deleted.

11-30	SE	MK	KS IM II KENB20A PED170S1

Fields:

Release Flag

If entered, selects only requisitions with the release flag assigned to them. Leave blank for all.

Item

If entered, must be a valid item and only requisitions for this item are selected. The item must exist in the Drinks Inventory Management Item Master file. Leave blank for all.

Supplier

If entered, the supplier must exist on the Supplier Master file within the Accounts Payable application. The only exception to this is if Drinks DRP is installed, then the supplier may be a Supply Centre code defined to Drinks DRP. If entered, only requisitions for the specified supplier are selected. Leave blank for all.

Purchase Officer

If entered, the Purchase Officer must exist on the Purchase Officer file in Drinks Purchase Management. If it does, only requisitions assigned to this officer are selected. Leave blank for all.

Order Class

If entered, order class should be in the range 1 to 8 inclusive. If so, only requisitions with that order class are selected. Leave blank for all.

Stockroom

If entered, must be a valid stockroom code defined in Drinks Inventory Management. If specified, only requisitions destined for the entered stockroom are selected. Leave blank for all.

Requisitioner

If entered, must be a valid Requisitioner User ID in the Authorisation file. If specified, only requisitions manually entered by this Requisitioner will be selected. Leave blank for all.

Department

If entered, must be defined to at least one Requisitioner in the Authorisation file. If specified, only requisitions required by this Department will be selected. Leave blank for all.

Press **Enter** to display the Details Screen, showing details of requisitions satisfying the selection.

If no selections are specified, all requisitions for this company will be displayed on the Requisitions Confirmation Details Screen.

Requisitions Confirmation Details Screen

This screen is displayed when you have entered valid selections into the Requisitions Confirmation Selections Screen.

This procedure enables you to add, change or delete requisitions whilst showing general details for the selected requisitions.

      19-07      SF      MK      KS      IM      II KENB20A PED170S1
  
```

Fields:

Rlsf

Release flag value. May be used to select requisitions for amendment, reporting or conversion to orders. This value is user-defined and each alphanumeric value can have its own meaning. The value entered is not validated. It can be used for future selections of requisitions for amendment, reporting and conversion to orders.

Item

A valid Item Master code representing the requisitioned item.

Description / Cost Code

(Shown on the upper part of the screen, for Requisitions that have already been requested). Item description for stocked orders or the Cost Code for non-stocked orders. This code is used to charge the cost for this item to the relevant G/L code.

Supplier

This code represents one of the following:

An external supplier

or

An internal supply centre (as defined to Drinks DRP)

Note: Supply Centres are in reverse colours on this screen for identification of an internal requisition within the company, rather than one relating to an external supplier.

P Off

The Purchase Officer responsible for this requisition. Defaults to the number defined on the item record. A list of valid Purchase Officers is available via the Prompt facility.

St RM

The code assigned to the stockroom for which the requisition has been raised. This must be a valid code defined to Drinks Inventory Management.

Cls

The order class for the requisition.

1 - 4 for stocked orders.

5 - 8 for non-stocked orders (including 6 for services)

Note: Non-stocked items defined to Drinks Inventory Management are ordered on normal stocked orders (i.e. order classes 1 to 4). Non-stocked orders (classes 5 to 8) are only used where no item code corresponds to the goods or services to be purchased.

A list of valid order classes is available via the Prompt facility.

Quantity / UOM

Enter the requisition quantity. Requisitions for stocked orders are always held in the issue unit of measure defined on the Item Master record in Drinks Inventory Management. This is the unit that will be assumed if the unit of measure field is left blank. However, any of the units of measure defined to the item may be entered, in which case the system will automatically convert the quantity to the item master issue unit before adding or updating the requisition. For non-stocked orders, the units of measure available are those defined in the Drinks Purchase Management Parameter file. Prompts are available on Unit of Measure fields.

Note: When Purchase Order lines are created from requisitions, they will be converted to the item master purchasing unit if this requirement has been indicated on the item/supplier profile in Drinks Purchase Management.

Due

The date that delivery of these goods is desired, as calculated by Drinks Inventory Management, Manufacturing, Drinks DRP or manually specified.

Price / UOM

Price of the requisitioned item. The price is sourced from the Item/Supplier file in Drinks Purchase Management or manually entered.

Note: Drinks DRP centrally supplied items are not priced.

For a stocked order, the price unit of measure may be expressed in any of the units defined on the Item Master details in Drinks Inventory Management. For a non-stocked order, the unit must be defined on the Purchasing Parameters file and must be the same unit code as that in which the requisition quantity is expressed.

Cur

A Currency Code may be entered if the requisition supplier is multi-currency.

Full Text

Enter a '1' here to retrieve the purchase text for an item and place this text on the requisition. The text will be passed to the order on conversion from the requisition.

Discount %

Discount percentage allowable against the displayed price. It is normally sourced from the Item/Supplier file in Drinks Purchase Management, but may be manually entered.

GL A/C Code

This must be entered on Manual Requisitions for non-stocked orders. This code is used to charge the cost for this item to the relevant General Ledger account code.

Dept

Optionally enter a Department Code. If specified, it must be valid for at least one Requisitioner in the Authorisation file.

If left blank for a Manual Requisition, it will default to the Department assigned to the Requisitioner in the Authorisation record.

Status

(Shown at the top of the screen, for Requisitions that have already been requested). The Order Status (Authorised, To Be Authorised, or Rejected). Further details can be obtained by pressing **F14=Status**.

Source

(Shown at the top of the screen, for Requisitions that have already been requested). The Order Source (Manual, Drinks Inventory Management, Manufacturing, or Drinks DRP).

Notes:

The description of the requisitioned item is displayed below the Item Code.

If any of the fields are displayed in reverse image, this indicates that the value of the field is invalid.

If the Item is displayed in reverse image, then the item does not exist in the Item Specification

within Drinks Inventory Management.

If the supplier name is displayed in reverse image, then the supplier does not exist in the Supplier Master within the Accounts Payable. This field will also be displayed in reverse image if the supply is via a Distribution order.

If the Purchase Officer's name is displayed in reverse image, then this code does not exist on the Purchase Officer file in Drinks Purchase Management.

Manual requisitions are added by entering the details in the fields at the foot of the screen.

Select

1 - To display the corresponding requisition details on the entry lines at the foot of the screen. These may be amended and the requisition is then returned to the main body of the screen. However, Manual Requisitions may only be amended, or deleted, by the original Requisitioner.

2 - To display the Text Screen for purchasing text to be maintained for the selected requisition. This may not be done for distribution requisitions, i.e. for Drinks DRP centrally supplied items, and an appropriate error message is displayed on the current screen.

4 - To display the confirm deletion screen.

Functions:

F8

Update the Requisitions and Authorisations Files.

F14

Display the Status screen.

F15

Display the Purchase 'Where Bought' Enquiry screen.

F16

Display the Spend Limit Enquiry screen.

*Note: No updates are actually made to the files until **F8=Update** is pressed.*

Select an option, or press a function key to continue.

Requisitions Confirmation Status Screen (F14)

This screen is displayed when you have pressed **F14=Status** on the Requisitions Confirmation Detail Screen.

This procedure enables you to add, change or delete requisitions whilst showing the status of the selected requisitions.

Note: This is of particular interest for Manual requisitions.

The displayed details are as per the top of the Requisitions Confirmation Detail Screen, except that Release Flag, Description, Due Date, Source and Discount are replaced by the following details.

```

```

Fields:

Requisitioner

The User ID of the person who manually entered the original requisition. This will be blank for non-manual Requisitions.

Department

The code or description of the department for which the requisitioned items are required.

Authoriser

The User ID of the person who is responsible for authorising this Requisition. This is blank for non-Manual Requisitions. For Manual Requisitions this is determined automatically when the Requisition is added. However, if the Requisitioner has sufficient spend authority (per Requisition and per Month) then he/she authorises the Requisition and the Authoriser will be blank. Otherwise, the

Authoriser is determined by searching the authorisation records until an Authoriser is found with sufficient spend authority available.

Status

The current condition of the Manual Requisition:

'To be authorised'

'Rejected'

'Authorised'.

Note: This will be blank for generated requisitions, i.e. non-manual.

Reqn No

The number assigned to the Requisition when it was originally created. This is assigned for all requisitions from the range specified on the Drinks Purchase Management Company Profile.

(All other displayed details, input details, processing and function keys are as per the Details screen, except '**F13=Display the Detail Screen**' replaces **F14**.)

*Note: If the Requisitioner has authorised himself/herself to sanction a manual requisition, then his/her Actual Spend is updated (when **F8=Update** is used) in the Requisitioners Authorisation record.*

14-33 SA MK KS IM II KENB20A PED170S1

Note: The unique number assigned to the requisition is displayed in the upper right hand corner of the requisition text screen.

Fields:

Text

Up to 45 characters may be entered on a single line, and up to 99 lines may be used. No validation is otherwise performed. Lines may be left blank between entered lines.

Position To

Must be a line number in the range 01 to 99, inclusively, if entered.

If a valid 'Position To' is entered, the text display begins at this specified line number.

Insert

Must be a number of lines in the range 01 to 99 inclusively if entered.

If 'Insert' is specified, the appropriate number of lines are inserted after the entered line number.

After

Must be a line number in the range 00 to 98, inclusively if entered.

If 'After' is specified, the appropriate number of lines are inserted after the entered line number.

Delete

Must be a number of lines in the range 01 to 99 inclusively if entered.

If 'Delete' is specified, the appropriate number of lines from the entered line number are removed from the display.

From

Must be a line number in the range 01 to 99 inclusively if entered.

If 'From' is specified, the appropriate number of lines from the entered line number are removed from the display.

Note: No amendments, insertions and deletions are actually performed in the text file until the update key is used.

Select **F8=Update** - the text entered is updated in the text file for the requisition, and you are returned to the Selection screen.

Requisitions Authorisation

21/DQP

This procedure enables the user to review and action only the Manual Requisitions which are awaiting his/her authorisation, if any.

The user must be defined as an Authoriser to at least one Requisitioner within the Authorisation File. For each displayed Requisition, the Authoriser has the choice of authorising, rejecting or transferring the Requisition to another valid Authoriser.

Note: Authorisation is not required for Requisitions generated automatically from Drinks DRP, Inventory, MPS or MRP.

Note: Manual Requisitions cannot be transferred into Orders until they have been authorised.

Requisitions Authorisation Screen

Select the Requisitions Authorisation option.

This enables the Authoriser signed on to display and action the requisitions awaiting his/her authorisation.

Note: If no requisitions exist, the screen is displayed with a message to this effect; otherwise, the field details are displayed, as per the following descriptions.

```

RQ290                               HW - Handy Wholesalers Ltd      User GALBRAIJ   21/05/96

```

Fields:

Authoriser

The User ID and name of the person signed on.

Spend Limit

Per Reqn

The maximum net value that you may authorise for a single requisition.

Spend Avail This Month

The total net value remaining this month which you may authorise.

Item

The code of the requisitioned item or service.

Supplier

The external supplier, or internal supply centre for the requisition.

P. Off

Purchase Officer number assigned to the requisition.

SR

Stockroom into which the requisitioned items will be received.

Qty/UOM

The requisitioned quantity expressed in terms of the displayed unit of measure.

Due

Due date for the requisition, i.e. the date by which the requisitions items are required.

Reqn Value

Total net value of the Requisition.

CC

Code representing the currency in which the value is expressed.

Requisitioner

User ID of the person who created the Manual Requisition.

Department

A code or description representing the requisitions department.

Reqn No

The unique Requisition Number generated by the application when the Requisition was created.

Enter any of the following against one or more Requisitions:

- 1 - Authorise
- 2 - Transfer to another Authoriser
- 3 - Reject.

The total requisition net value is accumulated for all requisitions selected for authorisation, and compared against the Spend Available This Month. Each requisition is also compared, in net value, with the Spend Limit per Requisition. If either test is failed, an appropriate message is displayed.

Press **F8=Update** to perform the following updates, provided that the validation is completed successfully:

Select - 1 (Authorise)

Update status of Requisition to 'Authorised'.

Update Actual Spend This Month, in the user's Requisitioner record with the net Requisition value.

Select - 2 (Transfer)

Update the Authoriser on the Requisition record.

Select - 3 (Reject)

Update status of Requisition to 'Rejected'.

Audit records are created for all updates.

Requisitions Authorisation Window (Option 2)

If you select option '2' (Transfer) the change Requisitions Authoriser Window is displayed with the following field:

To Authoriser

Enter a new Authoriser code. In this case the Authoriser must be defined to at least one Requisitioner and have sufficient spend limits to be able to authorise the Requisition.

Press **Enter**. The system will update the Authoriser on the Requisition record.

Create Purchase Orders from Requisitions

31/DQP

This option is used to convert selected Purchase Requisitions (manually entered or generated by Drinks Inventory Management, MPS, MRP or Drinks DRP) into Purchase Orders in Drinks Purchase Management.

Requisitions to be converted may be selected on the basis of Release Flag Value, Supplier, Purchase Officer, Order Class and Stockroom.

Note: The rules for the creation of Purchase Orders are determined from the Requisitioning options on the Drinks Purchase Management company profile.

Note: Requisitions for different Stockrooms will be consolidated on the same Purchase Order.

Detail is passed to the Drinks Purchase Management application exactly as it is held on the requisition.

Purchasing text may be transferred to the Purchase Order Line, if it has been maintained for the requisition.

Create Purchase Orders Screen

Select the Create Purchase Orders option.

This enables you to select the purchase requisitions and submit the batch programs to convert them into Purchase Orders.

RQ220	HW - Handy Wholesalers Ltd	User GALBRAIJ	29/01/96
			13:35:33
Create Purchase Orders			
Enter selection criteria (blank for all)			
Release flag..... _			
Supplier.....?.. <u>CD01</u>			
Purchase Officer...?.. <u>00009</u>			
Order class.....?.. _

Copy Text..... <u>1</u> (1=Yes/0=No)			
F3=Exit F4=Prompt			
19-25	SA	ML	KS IM II KENB20A PED170S1

Fields:

Release Flag

Optionally, enter a value to limit the conversion of requisitions to those with the release flag entered.

Supplier

(Optional.) Enter a valid supplier code to select requisitions only for this supplier.

Purchase Officer

(Optional.) Enter a valid Purchase Officer number to select for conversion only requisitions for which he/she is responsible.

Order Class

(Optional.) Enter a valid Order Class to select for conversion only requisitions for this class.

Stockroom

(Optional.) Enter a valid Drinks Inventory Stockroom code to select for conversion only requisitions for supply to this stockroom.

Copy Text

Enter one if the following:

1 - To create Order Line text from the requisition text. The system defaults to '1' on the first display of the screen.

0 - To create Order Line text from the item description text.

Once any selection entries have been validated, a confirmation message is displayed.

Press **Enter** again to submit a batch program to the job queue to convert selected requisitions to Purchase Order lines.

A new order will be set up for each Supplier / Order Class combination.

If an order already exists for the supplier, which is not fully completed, then the relevant requisitions will be added as new lines on the first such order for the supplier, unless the new order flag is set on the requisition record when the requisition was created.

Requisitions for different Purchase Officers may be combined onto a single order (subject to the previous limitation of supplier/class), or split into different orders, depending on the Drinks Purchase Management company profile parameter.

On successful conversion of the requisition into a purchase order line, the on-order quantity will be updated for the stocked items in the Drinks Inventory Management application.

Newly created orders should be audited, by running the New Orders Audit within Drinks Purchase Management.

Note: Manual Requisitions will not be transferred unless they have been authorised.

Create Distribution Orders

32/DQP

To convert selected Requisitions (manually entered or generated from Drinks DRP) into Distribution Orders in Drinks Sales Order Processing.

This includes only items that are defined within Drinks DRP as being sourced from the specified Supply Centre, which must always be entered.

A specific Stockroom at a DC supplied by the Centre, may be entered. Only requisitions created for this stockroom are then selected. This may be required where multiple stockrooms are defined to a DC within Drinks DRP.

Create Distribution Orders Screen

Select the Create Distribution Orders option.

This screen enables you to select the requisitions, and submit the batch program to convert them into Distribution Order lines on the selected Supply Centre.

Warning: Before displaying this screen for the first time, a check is made to see if Drinks DRP is installed for this company. If not, a message is displayed to exit this function as it is not available.

RQ250	HM - Handy Wholesalers Ltd	USER GALBRAIJ	29/01/96
			13:40:53

Purchase Officer .?	00005		
Lines per Order	2		
F3=Exit F4=Prompt			
19-25	SA	MK	KS IM II KENB20A PED170S1

Fields:

Release Flag

Optionally enter a value to limit the conversion of requisitions to those with the release flag entered.

Centre

A valid Drinks DRP Centre must be entered, to limit requisitions to those supplied by this Centre.

Centre Stockroom

If the Drinks DRP Centre entered has more than one Stockroom defined to it in Drinks DRP Stockroom Maintenance, then a specific Stockroom defined to this Centre must be entered to create the Distribution Orders for supply from this Stockroom.

If the Drinks DRP Centre has only one Stockroom defined to it, no entry needs to be made here.

DC Stockroom

Optionally enter an Inventory Stockroom defined to a DC within Drinks DRP. Only requisitions intended for supply to this stockroom will then be selected.

Purchase Officer

Optionally enter a valid Purchase Officer number to select for conversion only requisitions for which he/she is responsible.

Lines Per Order

Specifies the maximum number of lines to be included on a single Distribution Order. Defaults to the number specified on the Drinks DRP company profile. May be overridden, but must be greater than zero.

Note: This should be no more than 899, to allow for associated container processing.

Press **Enter** and the entered selections are validated - if all are valid, a confirmation message is displayed.

If **Enter** is pressed again, a batch program is submitted to the job queue to create the distribution order lines from the selected requisitions.

A new Distribution Order will be set up for each DC Stockroom supplied by the Centre, and also if the Lines Per Order is exceeded.

On successful conversion of the requisition into a Distribution Order line, the on-order quantity will be updated in Drinks Inventory Management for the item, (at the relevant DC stockroom).

The newly created Distribution Orders will appear as normal orders in Drinks Sales Order Processing, except that the Customer number will be one assigned specifically to the DC for which the internal order is required.

Note: Manual Requisitions will not be transferred unless they have been authorised.

Create Transfer Orders

33/DQP

You use this option to convert selected Requisitions (manually entered or generated from the Production applications) into Production Transfer Orders in Drinks Sales Order Processing.

This only includes items that are defined within Drinks DRP as being sourced from the specified Plant, which must always be entered.

Specific From and To Stockrooms, at a DC supplied by the Centre, must be entered. Only requisitions created for the From Stockroom are then selected. This is required where multiple stockrooms are defined to a DC within Drinks DRP.

Requisitions to be converted may be selected on the basis of Release Flag Value, Purchase Officer and Stockroom.

Production Transfer Orders are Distinguished from Sales Transfer Orders by the order type. This order type is stored by the system against each Transfer Order.

Create Transfer Orders Screen

Select the Create Transfer Orders option.

You use this screen to:

- Select the purchase requisitions.
- Submit a batch job which converts them into Production Transfer Orders.
