Chapter 5

Utilities

Drinks Requisitioning Utilities

The Drinks Requisitioning Utilities offers two options - a Requisitions Purge, and the Requisitioning / Advanced Financial Integrator Link.

The Drinks Requisitions purge utility enables you to maintain the file holding requisitions by deleting all inactive requisitions within a specified time period.

The Drinks Requisitioning Utilities menu, enables you to select these options.

Requisitions Purge

1... **2...** 1/DQU

This allows you to delete inactive requisitions by specifying a purge date (on or before which deletion will take place).

Requisitions Purge Selection Screen

Select the Requisitions Purge option.

This will display a screen which enables you to select what you want to purge.

```
RQ000          HW - Handy Wholesalers Ltd      User GALBRAIJ  29/01/96
                                                    15:49:53

Requisitions Purge.

This utility will permanently delete from file all inactive requisitions
dated on or before the date specified below.
An audit report will be produced detailing the deleted requisitions.

Company Code.. HW      (Blank for all)
Purge Date.... 290196  (DDMMYY)

F3=Exit  F8=Update

11-33  SP  MW  KS  IM  II  KENB20A  PED170S1
```

Fields:

Company Code

Enter the code of the company for which requisitions are to be deleted. This field defaults to the current company.

Leave this field blank to delete requisitions from all companies.

Purge Date

Specify the last day up to which all inactive requisitions will be deleted.

Specify the required parameters and press
F8=Update - the application will start a batch job
which will delete the requisitions and create the
audit report.

Install Requisitioning / AFI Link

1... **2/DQU**

Having installed the Drinks Requisitioning application and the AFI application, it is necessary to run this option (once), to copy the Requisitioning Data Dictionary and various other control files into the AFI application.

AFI is then aware that Drinks Requisitioning exists as an application.

Install Requisitioning / AFI Link Library Selection Screen

Select the Install Requisitioning/AFI Link option.

FI950	HW - Handy Wholesalers Ltd	USER GALBRAIJ	29/01/96 15:56:13
Install AFI Control Data - APPLICATION: Purchase Requisitions			
This option causes AFI Control Data to be copied from the install files in the application files library into the control files in the AFI Library. AFI will then be aware that Manufacturing is installed, and be able to support the link into the General Ledger.			
Copy From Library . .	<u>SLDQP3</u>	Only amend this, if you have renamed your Application displays library.	
Copy To Library . . .	<u>OSLFIF3</u>	Amend this library to match your Financial Integrator files library, or the Consolidated Financials files library.	
Please note that records will be copied into the file if they do not already exist. If they do exist, they will be overwritten by the new records.			
F3=Exit F8=Submit Job			
11-25	SP	MW	KS IM II KENB20A PED170S1

Fields:

Copy From Library

Enter the Application Displays Library, if necessary. Defaults to the current application display library.

Copy To Library

Enter the Financial Integrator Library, if necessary. Defaults to the current AFI library.

AFI is required to enable the derivation of Extended General Ledger codes associated with Goods and Price Variance accounts.

Note: AFI is not used for any actual postings to the GL.

To enable this retrieval of External GL codes, two dummy posting rules must be established in AFI:

- AFI rule for Goods Extended GL.
- AFI rule for Price Variance Extended GL.

To enable Drinks Requisitioning to identify these two specific rules, the rule numbers must be set up on the Drinks Inventory Management Descriptions file in two specific entries.

The rule number to be used for the derivation is defined in the parameter limit against the description code 'EGLR', minor code:

01 - AFI rule for extended GL. This is used when creating purchase orders to build the extended codes for each order line.

02 - AFI rule for price variance GL. This is used in purchase management invoice matching.
