Chapter 3

Enquiries

Master File Enquiries

Master file enquiries allow the display of the carrier and delivery profile defaults which are used in the creation and processing of transport requirements.

Carrier Enquiry

1... **25/DTM**

This function allows the selection and enquiry of carrier codes and associated information. All carriers, whether internal or external, must have been defined to the module.

Carrier Enquiry Selection Screen

Select the Carrier option.

Fields:

Carrier

Enter the reference code for either an internal or external carrier that will be associated with the handling of transport requirements.

Press **Enter** to display the Carrier Enquiry
Details Screen.

Carrier Enquiry Details Screen

This screen is displayed when you have entered a valid carrier code into the Carrier Enquiry Selection Screen and pressed **Enter**.

The details of the selected carrier are displayed.

Payables account ..	CD01		
F3=Exit F12=Previous F13=Routes F21=Text			
01-02	SP	MW	KS IM II KENB20A PED171S1

Fields:

Name / Address

Carrier name and address details, normally printed on the bill of lading as the consignee.

Carrier Type

Carrier type code. Carrier types are maintained on the Inventory Descriptions file under major type 'TPCT'. May be used for future analysis or to condition the GL posting in AFI.

Contact Name

Carrier contact name.

Phone Number

Carrier telephone number.

FAX Number

Carrier FAX number.

Rating Required

Indicates if automatic rating (calculation of transport charges) is appropriate for carrier.

1 - If rating is required.

0 - If not.

Rate Method

Method of automatic rating that is associated with the rate code. Rate methods are defined to the Inventory Descriptions file under major type 'TPRM', as follows:

01 - Load and rate table. Charges are calculated based on the loads gross weight, volume or number of containers according to a rating table.

02 - Drop and rate table. Charges are calculated based on each drops gross weight, volume or number of containers according to a rating table.

03 - Fixed rate per area. Charges are calculated based on the gross weight, volume or number of containers dropped into each area.

04 - Area and rate table. Charges are calculated based on the gross weight, volume or number of containers for each area according to a capacity table.

Rate Code

Rate code that is associated with the rating method defining rating criteria that are effective on a given date. This may be overridden by rates specified on the Carrier Route screen.

Payables Account

Payables account (supplier code) associated with the carrier.

Note: This must be a valid supplier defined to Accounts Payable if it is attached.

Functions:

F13

Display routes.

F21

Display internal text maintained for the carrier for planning purposes.

*Note: **F13=Routes** or **F21=Text** will be highlighted if route restrictions or text exist, respectively.*

Select a function key or press **F3=Exit**.

Carrier Enquiry Routes Window (F13)

 This window is displayed when you press **F13=Routes** on the Carrier Enquiry Detail Screen.

The routes to which the carrier is restricted are displayed here. If none appear, the assumption is that the carrier serves all routes for the transport company and that the default rate method and code apply to all routes for this carrier.

20-23	ST	MM	KS IM II KENB20A PED171S1

Fields:

Route

Code for the journey between two geographical locations or transport nodes A customer delivery point is assigned this particular default route which may be overridden whilst building loads.

Drop

Drop sequence assigned to a delivery point along a particular route.

Carrier

Reference code for either an internal or external carrier that will be associated with the handling of transport requirements.

Area

Area code associated for rating and analysis purposes.

Customer Exclusive Loads

If set to '1' this indicates that transport requirements for this customer delivery point must always be assigned to a load that is exclusive to this customer i.e. the load must contain only drops for this customer delivery point (based on his eight character account code and three character delivery sequence).

Confirmation Delivery Time Slot

Indicates to the planner that the delivery point requires the confirmation of an appropriate delivery time slot at the customers depot. If this flag is set to '1' the build load function highlights the customer name and delivery point with a flashing asterisk so that the planner can review the delivery profile if required and contact the customer to book a time slot.

Deliveries Allowed

Days on which deliveries can take place ('1') or not ('0'). The cursor should be on the appropriate day in order to enter time slot restrictions. These are used for memo purposes only.

Note: The field position is highlighted if delivery time slots exist for a given day.

Functions:

F13

Display delivery time slots.

F21

Display internal customer text which contains details to assist the transport planner, e.g. delivery restrictions, customer requirements.

*Note: **F21=Text** will be highlighted if text exist.*

Press a function key to display the information you want to view, or press **F12=Previous**.

Delivery Time Slots Window (F13)

This window is displayed when you press **F13=Delivery Time Slots** from the Delivery Profile Enquiry Details Screen, and displays the times available for delivery of the goods.

Process Enquiries

Processing enquiries are concerned with the display of outstanding order requirements that are to be assigned to loads and the display of loads i.e. header details, drops and orders that are currently assigned to specific loads.

Outstanding Orders Enquiry

14/DTP

The Outstanding Orders Enquiry, allows the planner to review pending transport requirements that are awaiting assignment to specific loads. The details are presented in the same manner as those for the build loads function.

The planner is able to control the number of requirements presented via a range of ship dates together with one of the following criteria:

- Route/drop range *or*
- Particular carrier *or*
- Origin and optionally destination.

Outstanding Orders Enquiry Selection Screen

Select the Outstanding Orders option.

Use the criteria displayed on the screen to select outstanding orders.

Ship date from which loads are to be reviewed - defaults to the current date plus the planner's time fence days for planning. It must be less than or equal to the 'to' date.

Ship Date To

Ship date up to which loads are to be reviewed - defaults to the current date plus the planner's time fence days for planning. It must be greater than or equal to the 'from' date.

Load Status From and To

Enter a range of transport load statuses for enquiry. The following statuses are maintained as the load is processed through the system and are defined to the Inventory descriptions file major type 'TPLS'.

- 10 - Pending (pending release, i.e. still in planning).
- 20 - Released (awaiting printing).
- 30 - Allocated (not used).
- 40 - On pick (not used).
- 50 - Picked (not used).
- 60 - Await Load Sheet.

70 - Awaiting COD (awaiting confirmation of load despatch).

80 - Await Auth. pay (awaiting payment authorisation).

90 - Rated and Authorised (completed).

95 - Awaiting Drop to history.

99 - Cancelled (load cancelled).

Note: Statuses '30', '40' and '50' are not currently supported.

Route From

Enter the route from which loads are to be reviewed.

Drop

Drop sequence assigned to a delivery point along a particular route.

Route To

Enter the route up to which loads are to be reviewed.

Drop

Drop sequence assigned to a delivery point along a particular route.

Or

Carrier

Enter the carrier for which loads are to be reviewed.

Origin

Enter the origin (start point) for which loads are to be reviewed.

Or

Destination

Enter the destination or end point for which loads are to be reviewed.

Load Number

Enter a particular (existing) load reference which is to be reviewed.

Press **Enter** to display the Load Details Enquiry
Load Selection Screen.

Load Details Enquiry Load Selection Screen

This Screen is displayed where there is more than one load which match the selection criteria.
