Chapter 6

Reports

Drinks Warehousing Reports

As part of the general policy of the application, selection and sequencing parameters are available before a report is run. In general, standard reports are printed on standard listing paper with 132 print positions and 6 lines to the inch. All reports are printed with the procedure or program number in the top left and the page number and date of the run in the top right of the report.

The Drinks Warehousing application contains four standard reports.

- A general report which provides a comprehensive set of selection and reporting criteria.
- An unconfirmed action lists report, which is used to check on outstanding work.
- A movements report, that provides historical warehouse movement information.
- A serious errors report, detailing all the serious errors that have occurred since the report was last requested.

These reports are selected from the Drinks Warehousing Reports menu.

Item detail..... 1	2=Detail		
From item.....?.. 5001	To item.....?.. 5010		
From lot.....?..	To lot.....?..		
Max.locations.....	(0=All locations)		
F3=Exit F4=Prompt			

Fields:

Report By

1 - Pick Location. This option produces a report displaying the status and contents of the pick locations for the items selected.

2 - Fixed locations. This option produces a report displaying the status and contents of the fixed locations for the items selected.

3 - Location rule by item. This option produces a report displaying, for each item selected, the status and contents of the locations identified using an item rule. The datum location for the item rule is either explicitly stated in the rule itself, or is taken as the picking locations of the selected items. On pressing **Enter** a prompt window of item rules is displayed allowing the desired rule to be selected.

4 - Location rule by area. This option produces a report displaying the status and contents of the locations identified using an area rule. On pressing **Enter** a prompt window of area rules is displayed allowing the desired rule to be selected.

5 - Warehouse. This option produces a report displaying the status and contents of all the locations within the warehouse.

6 - Area. This option produces a report displaying the status and contents of all the locations within a selected area. On pressing **Enter** a prompt window of areas is displayed allowing the desired area to be selected.

7 - Range of locations. This option produces a report displaying the status and contents of a range of locations. On pressing **Enter** you will be prompted for a 'from' and 'to' location code to define the limits of the range.

8 - Empty locations. This option produces a report displaying the all the empty locations within the warehouse.

Item/Location Seq

This field determines whether the report is sequenced by either the item code of the item within the location, or the location code.

1 - Item. If appropriate, the report will be sequenced by the item codes involved. Only non-empty locations will be included in the report. The 'Empty locations' report cannot be sequenced by item.

2 - Location. The report will be sequenced by the location codes. This setting will report on both empty and non-empty locations.

Location Detail

This field determines the level of information that is provided on the report in relation to locations.

1 - Summary. Only the location code and status are displayed on the report.

2 - Detail. All the details for the selected locations are displayed, together with statistical information, such as number of receipts, date last counted, etc.

Item Detail

This field determines the level of information that is provided on the report in relation to items.

1 - Summary. Only the basic item details are provided, such as lot number, rotation date, pack type, physical stock in the location and available stock in the location.

2 - Detail. Further details are provided about the current stock status in the location, such as physical stock, committed to sales, committed to production, committed to transfer, frozen, available and planned in.

From Item/To Item

To focus the report a range of items may be selected. The 'From item' and 'To item' fields are used to specify the limits of the item range. The items specified must exist on the item master file, as set up in Drinks Inventory Management.

From lot / To lot

In order to concentrate on specific lot numbers for an item, a range of lots to report upon may be selected. This option is applicable if only one item has been selected, i.e. the 'From item' and 'To item' fields are the same. The lot numbers specified in the 'From lot' and 'To lot' fields are used to specify the limits of range, and must exist for the selected item.

Max. Locations

This field determines the maximum number of locations that will processed for the report. This option can be used to limit the size of potentially large reports. To report on all locations set the value to '0' or leave it blank.

Press **Enter** to send the report to print.

Unconfirmed Action List Report

1...
2...

21/DWR

It is vital that all of the work requested in the warehouse is complete. This report lists all unconfirmed action lists up to the nominated date. Any of the three types of action lists may be included in the report.

Frequency

At least daily.

Stationery

Standard listing, paper.

Item.....?	_____	_____	
Lot.....?	_____	_____	
Label.....?	_____	_____	
Reason.....?	_____	_____	
Date.....	0/00/00	0/00/00	
Time.....	_____	_____	
F3=Exit F4=Prompt			

Fields:

Select Sequence

Specify the order in which the report is to be sequenced. Up to four levels can be specified, with '1' representing the major sequence and '4' the minor sequence. Available criteria are:

- Movement type.
- Item / lot.
- Label number.
- Reason.
- Date / time.

Selection Criteria

The range of movements to be reported can be limited by specifying range limits on the criteria provided. Any range left blank indicates that all of that range should be included. Available selection criteria are:

- Movement type.
- Item.
- Lot.
- Label.

- Reason.
- Date.
- Time.

Press **Enter** to submit the report to print.

Serious Error Report

23/DWR

This report will list all serious errors logged by the application. The errors will be listed with the most recent first. All errors reported will be deleted after the run.

Frequency

As required.

Stationery

Standard listing paper.
