Chapter 3

Reports

Supply/Demand Exceptions Report

1/AOR

Select the Supply/Demand Exceptions Report option.

This option is used to generate a report that details any changes that affect buy to order, make to order or direct delivery orders. The report can be configured to show sales orders against supply orders (purchase or works) or supply orders against sales orders. In addition you can select purchase orders, works orders or both for inclusion.

Exception messages include:

- WO Qty reduced on active order, to inform you that reservations have been adjusted to match a new WO quantity for a single sales active works order.
- WO Qty reduced on active order - Reservations out of balance, to inform you that an active WO had reservations relating to several sales orders.

Fields:

Report to be Sequenced By:

- 1 - Supply Sequence.
- 2 - Sales Sequence.
- 3 - Both.

Include Purchase Orders

- 0 - No.
- 1 - Yes.

Include Works Order

- 0 - No.
- 1 - Yes.

Press **F8=Submit** to send the job to the print queue. You will need to press **Enter** to validate the report configuration.

Quotation Print/Reprint

2/AOR

Select the Quotation Print/Reprint option.

You use this option to print a report that details any quotations held on the system.

Any order can be taken as a quotation by keying in a valid Quotation Type at order entry.
