Chapter 3

Enquiries

Enquiries Introduction

You can use Customer Returns Enquiries to access the status of return details by any of the following criteria:

- Item code.
- Customer code.
- Return note number.
- Job number.
- Returns officer number.

Note: You can also view details of credit notes created through Customer using the Invoice by Invoice number enquiry in Sales Order Processing, as well as the credit note enquiry within Customer Returns. Refer to Sales Order Processing for details

Returns By Item

21/CRP

Use this procedure to make an enquiry on outstanding return details for a selected Item.

Returns By Item Selection Screen

Select Returns By Item.

Use this screen to select the item you want to enquire upon.

CR112	Z1 - Demonstration Company	USER SP1	25/08/94 16:49:32

Fields:

Item

The code and description of the selected item. You can change this.

UOM

The unit of measure used for quantities of this item.

*

Select. Enter one of the following:

- 1 - Detail. Display the return note details. For kit items, select the parent line to display component details.
- 2 - Text. View the internal text for the selected return note. You can select to view both parent and component lines of kits.

Note: The following details are displayed for each return note in the list:

Customer

The customer and address code from the corresponding return note.

Return

The return note reference number.

Return Date

The request date of the return note.

Return Quantity

The quantity of the selected Item on the corresponding return note.

Expected Date

The date you expect the customer to return the goods on the return note line.

O/S Quantity

The outstanding quantity of the selected item on the corresponding return note, in other words, the amount not yet returned from the customer.

Press **Enter** to display the Returns Summary enquiry. See the *Returns by Return Number* enquiry.

Returns By Customer

22/CRP

Use this procedure to enquire on return details for a particular customer. You can enquire on returns or outstanding returns.

Returns By Customer Selection Screen

Select Returns By Customer.

Use this screen to specify the customer you want to enquire upon. You can also choose to enquire on all returns or outstanding returns.

Fields:

*

Select. Enter one of the following:

- 1 - Display the return line text. You can select to view text of both parent and component lines of kits.
- 2 - Display the current location of quantities on this return line (in other words, the quantities in goods inwards, inspection, stores, plus any quantities outstanding or scrapped). For kit items, select the parent item to display component quantities.
- 3 - Display details of receipts made on this return. For kit items, you may only select the parent line. Component details will be displayed.

Note: The following details are displayed for each return note line in the list:

Return

The reference number of the return note and allows entry of further return notes to enquire upon.

Customer

The customer code, address code, and name of the customer for this return note.

Date

The request date for the return.

Phone

The contact telephone number for the customer.

R. Officer

The returns officer responsible for this return. The full name is displayed underneath.

Original Invoice

If you have based the return on an original invoiced sales order, then this displays the relevant invoice number.

Cust Ref.

The customer's own return reference number for this return note.

Stockroom

The stockroom at which the returned goods are to be or have been received.

Collection Instructions Code

The collection instructions code for the return.

Reason

Displays a description of the reason the goods on this return note are being returned.

Line

The line number for individual return note lines.

Item

The code of the item for the return note line.

Return Qty

The quantity of the item on the return note line.

Outstanding

The outstanding quantity of the Item, in other words, the amount not yet returned from the Customer.

UOM

The unit of measure used for quantities of this item.

Price

The price of this return note line. This may be from the original sales invoice, or the defined price list and may have been manually amended during the credit note process.

Received

The quantity already received for this return note line.

Credited

The quantity on the return note line for which any credit notes have been raised.

Expected Return Date

This field is not named on the screen. Displays the date when the goods on this line are expected to be returned from the customer.

Description

This field is not named on the screen. A description of the line Item.

Reason

A code indicating the reason this line is being returned.

Functions:

F9=Quantity/Sec Vals

This toggle function is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select it to display the quantity of the item in the primary unit of measure.

When **F9=Sec Vals** is displayed at the bottom of the screen, select it to display the secondary value for the item. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

Press **Enter**.

Returns By Return Number Line Status Screen (Option 2)

To display this screen, select a line with a 2 on the Return By Return Number Detail Screen and press **Enter**.

Use this screen to view the location of quantities on the selected return line, including quantities in goods inwards, inspection, stores, plus any quantities outstanding or scrapped.

The return note reference number, return line number, customer code, customer address code, customer name, item code, unit of measure, item description and return line quantity are displayed at the top of the screen.

Fields:

Payment Terms

There are 4 parts to this field but not all of them are necessarily used at once.

Enter one of the following to create the first part of the code:

- D - Number of days from invoice date.
- M - Net monthly account.
- P - Periodic range.
- T - Extended payment terms.

The second part of the code identifies the range if you have selected a Periodic range.

You use the third part of the code to specify the payment date for monthly(M) or periodic (P) selections, or the number of days to add to the invoice date for a daily (D) selection.

You only use the fourth part if you have selected extended payment terms (T). It uses a settlement code defined by the Cash Management application that defines a payment pattern, for example, payment by instalment.

Examples:

- D __ 030 for a payment date of 30 days after the invoice date.
- M __ 210 for a payment date of the 10th of the second month after the month the invoice was sent.
- P 2019 206 will give all the invoices dated between the 20th of the next month and the 19th of the month after, a payment date of the 6th of the second month after the invoice is sent.
- P 1110 105 will give all the invoices dated between the 11th of this month and the 10th of the month after, a payment date of the 5th of the first month after the invoice is sent.
- T __ __XXX where XXX would be a code identifying a complex payment pattern, as defined in Cash Management.

Payment Method

The method of payment is a code as defined in the Cash Management application against the customer account.

Example: CHQ,STD.

Cash Discount Code

The system uses a discount code to identify the type of discount and a single cash discount percentage. These are defined in the description file.

Staged Discount Code

Multiple cash settlement discount percentages, allowing tiers of discount according to how soon the payment is received, can be defined.

Bank Details

This displays the bank account number for this credit note.

Press **Enter**.

Credit Note Enquiry Additional Overrides Window (F16)

To display this window, select **F16=Additional Overrides** on the Credit Note Enquiry Further Details Screen.

Use this window to view additional overrides that have been specified for the credit note being raised.

Fields:

Document Processing:

Invoice Language

Enter a code to represent the language you use on the invoice.

Customer Attributes:

VAT Calc Basis

This field indicates the customer's VAT status for sales invoicing:

- 1 - VAT exempt.
- 2 - Use the VAT code in the following field.
- 3 - Use the VAT code from the inventory item.

Note: If World Trade is live, this flag must be set to 3

VAT Code

Indicates the VAT code applicable. This is a mandatory field if VAT Calc Basis is set to 2 or 3

Extra Rate VAT

Determines whether an extra charge will be applicable using the VAT code defined.

VAT Country

The country code for the country in which this customer is registered for VAT. If this is a delivery address, and the same country applies to the statement address, then there is no need to re-enter the information.

Validation and prompting on this field will depend on which applications are interfaced.

Note: If World Trade is live, then the system will default to the Customer Trading Details setting.

Note: You must enter a country if you have specified a VAT registration number.

Note: You must enter a country code if you have left the VAT registration number blank.

Note: Any code entered must be valid to World Trade.

Note: If World Trade is not live, the country code will be validated against the General Ledger.

VAT Registration

The customer's VAT registration number in the specified country.

Note: If General Ledger is live, VAT registration will be validated according to a country specific format based on the VAT country code.

Fiscal Code

The classification code assigned by the government to this customer. This defaults to Customer Additional Details.

Sales Details:

Salesman

The default salesman for the customer, (Customer Maintenance, Sales Details) any code entered will be validated against the Inventory descriptions file, against major type TN.

Agent

The default agent for the customer, (Customer Maintenance, Sales Details, Additional Details) any code entered will be validated against the Inventory descriptions file, against major type AN.

Sub Agent

The default sub agent for the customer, (Customer Maintenance, Sales Details, Additional Details) any code entered will be validated against the Inventory descriptions file, against major type AN.

Region

The default sales region for the customer, (Customer Maintenance, Sales Details) any code entered will be validated against the Inventory descriptions file, against major type SN.

State

The default state for the customer, (Customer Maintenance, Sales Details) any code entered will be validated against the Inventory descriptions file, against major type ST.

Territory

The default territory for the customer, (Customer Maintenance, Sales Details) any code entered will be validated against the Inventory descriptions file, against major type TR.

Press **Enter** to continue.

Credit Note Enquiry Charges Screen (F19)

 To display this screen, select **F19=Charges** on the Credit Note Enquiry Details Screen.

Use this screen to view details of charges applied to the whole credit note.

Fields:

Usage Code

Select a valid usage code. Usage codes specify where text is displayed or printed.

Note: To enter text in multiple languages enter a valid language code, in addition to the usage code, to display the Item Text window.

Language Code

Select a valid language code, in addition to the usage code, if you want to enter multi-lingual text. The Item Text entry window is displayed where you can enter text in the language specified. This field is optional, leave it blank if you do not use multi-lingual text entry. However, you must define any code to the Application Manager.

Functions:

F13

Select existing text. This lists all currently defined usage/language code combinations for the entered text type/text reference. You can select the combination you want to use for entering multi-lingual text.

Select **F8=Update** to save details.
