Chapter 5

Utilities

Company Profile

1/CRU

This procedure specifies the environment in which the Customer Returns application operates. You must take care when you amend existing profiles due to the effect that the amendment may have on data already in the application.

Maintain Profile Selection Screen

Select Company Profile.

This screen provides a list of companies available, from which you can select the one you want to maintain. You can also add a new company.

CR003	Customer Returns Company Profile	User SP1	25/08/94 16:21:17
Maintain Profile Records			
Sel	Company		
1	Z1 Demonstration Company		
Enter New Company.....			
1=Select			
F3=Exit			

Fields:

Sel

Select. Enter 1 to select the company you want to maintain.

Company

Displays the codes and description of the companies available for selection.

Note: You can define a new Customer Returns company as follows:

Enter New Company

Enter a code to define a new company to Customer Returns. You must define the code selected to Application Manager and to all applications that are prerequisite for Customer Returns.

To create a new company profile, enter the code and press **Enter** to display the Maintain Profile Defaults Screen.

OR: Select an existing company profile code.

Maintain Profile Defaults Screen

On the Maintain Profile Selection Screen, enter a company code and press **Enter**.

OR: Select an existing company code to display this screen automatically.

You use this screen to maintain the address and receipt point defaults and document printing details. The code and description of the selected company are displayed at the top of the screen.

CR003	Customer Returns Company Profile		User SP1	25/08/94 16:21:18
Maintain Profile Records				
Company Code.. Z1 Name.... Demonstration Company				
Address Defaults:				
Customer address sequence number.....				000
Receiving address customer.....				Z1
Receiving address default sequence number.....				001
Returns Defaults:				
Booking in point.....				1 1=Goods inwards 2=Inspection 3=Stores
Output Queues:

Returns.....	QPRINT	Hold 0=No,1=Yes	1	
GRNs/Labels..	QPRINT	Hold 0=No,1=Yes	1	
Reject note..	QPRINT	Hold 0=No,1=Yes	1	
F3=Exit F8=Update F12=Previous				

Fields:

Address Defaults:

Customer Address Sequence Number

Enter the Customer Address sequence number that you want displayed as the default when creating Return Notes.

Receiving Address Customer

Receiving addresses are held on the Customer file, so it is necessary to create a dummy customer to reference these addresses (see the Receiving Addresses Maintenance.) Enter the Code you want to use for this purpose.

Receiving Address Default Sequence No.

Enter the Receiving Address sequence number that you want to display as a default when creating Return Notes.

Receiving Address codes are defined in the Customer Returns Receiving Address Maintenance option.

Returns Defaults:

Booking-In Point

Enter one of the following as the default booking location for receipt of customer returns:

- 1 - Goods Inwards.
- 2 - Inspection.
- 3 - Stores.

Output Queue:

Reports

Enter the printer output queue for reports printed within the Customer Returns application.

Returns

Enter the printer output queue for Return Notes printed within the Customer Returns application.

Grns/ Labels

Enter the printer output queue for Goods Returned Notes and Labels printed within the Customer Returns application.

Reject Note

Enter the printer output queue for Reject Notes printed within the Customer Returns application.

Hold

Enter one of the following:

- 1 - Hold printed output.
- 0 - Release printed output immediately.

Library

Enter the library that contains the output queues specified for printing.

Select **F8=Update** to update the details so far maintained, or press **Enter** to display the System Tailoring screen.

Maintain Profile System Tailoring Screen

To display this screen, press **Enter** on the Maintain Profile Selection Screen.

Use this screen to define the conditions under which the Customer Returns company operates within the application. The code and description of the selected company are displayed at the top of the screen.

CR003	Customer Returns Company Profile	User GBJBANB4	11/02/98
			10:36:26
Maintain Profile Records			
Company Code.. Z1 Name.... UK Demonstration Company			
System Tailoring:			
Goods Received Notes to print.....		1	(0=No,1=Yes)
Goods Received Labels to print.....		0	(0=No,1=Yes)
Only allow credit if goods in stores.....		0	(0=No,1=Yes)

F3=Exit		F8=Update	F12=Previous
8-58	SA	MW	KS CL IM DM II MARVIN KB PET087S1

Fields:

System Tailoring:

Goods Received Notes To Print

Enter one of the following to specify whether to print GRNs when you receive Goods within the Customer Returns application:

- 1 - Print goods returned notes.
- 0 - Do not print goods returned notes.

Goods Received Labels To Print

Enter one of the following:

- 1 - Print goods received labels.
- 0 - Do not print goods received labels.

Only Allow Credit If Goods In Stores

Enter one of the following:

- 1 - Only allow crediting of returns if goods are booked into stores.
- 2 - Allow crediting of returns, whether goods are booked into goods inwards, inspection or stores.

Blank Customer After Return Entry

Enter one of the following:

- 0 - Retain customer details between each return note entered.
- 1 - Blank out customer details for the entry of successive return notes.
- 2 - Blank out all header details for the entry of successive return notes.

Transport Planning Attached?

Transport Planning does not currently interface to Customer Returns. The Transport Planning Attached flag is for a possible future enhancement and is not used by the Customer Returns application.

Allow Transfer/Adjustment Issues From Warehouses?

Enter one of the following:

- 0 - Do not allow transfer/adjustment issues from Warehouses (location details).
- 1 - Allow transfer/adjustment issues from Warehouses (location details).

Select **F8=Update** to update the details so far maintained, or press **Enter** to display the Numbering screen.

Maintain Profile Numbering Screen

To display the Numbering screen, on the Maintain Profile System Tailoring Screen, press **Enter**.

Use this screen to define the document numbering for the Customer Returns company for return notes, goods received notes (GRN) and reject notes. The code and description of the selected company are displayed at the top of the screen.

CR003	Customer Returns Company Profile	User SP1	25/08/94 16:21:20
Maintain Profile Records			
Company Code.. Z1 Name.... Demonstration Company			
Return Numbering:			
Automatic return numbering.....		1	(0=No,1=Yes)
Start number... 000000		Ending..	999999
Last return number used.....		000000	
Return number prefix.....		R	
Goods Received Note Numbering:			
Automatic Goods Received Notes numbering?.....		1	(0=No,1=Yes)
Start number... 0000000		Ending..	9999999
Last GRN number used.....		0000000	
Reject Note Numbering:			
Reject notes to print?.....		1	(0=No,1=Yes)
Start number... 00000		Ending..	99999
Last reject note number used.....		00000	
F3=Exit F8=Update F12=Previous			

Fields:

Return Numbering:

Automatic Return Numbering

Enter one of the following:

- 1 - To create return note numbers automatically.
- 0 - To force the manual definition of return note numbers.

Start Number

If you want to use automatic return note numbering, specify the first number you want to use.

Ending

If you want to use automatic return note numbering, specify the last number you want to use.

Last Return Number Used

This indicates the last return note number that has been created by the system, where the flag is set to 1 (Yes) on automatic generation. It is not advisable to amend this number as to do so could cause serious problems within the system.

Return Number Prefix

Automatically generated return note codes consist of one character followed by a six figure number. Specify the character you want to use as a prefix in the generation of return note numbers.

Goods Received Note Numbering:

Automatic Goods Received Notes Numbering?

Enter one of the following:

- 1 - Allow the system to create goods received note numbers automatically.
- 0 - Force the manual definition of goods received note numbers.

Start Number

If you want to use automatic goods received note numbering, specify the first number you want to use.

Ending

If you want to use automatic goods received note numbering, specify the last number you want to use.

Last GRN Number Used

This indicates the last GRN number that has been created by the system, where the flag is set to 1 (Yes) on automatic generation. It is not advisable to amend this number as to do so could cause serious problems within the system.

Reject Note Numbering:

Reject Notes To Print?

Enter one of the following:

- 1 - To create reject notes automatically.
- 0 - Do not print reject notes.

Start Number

If you want to use reject note printing, specify the first number you want to use.

Ending

If you want to use reject note printing, specify the last number you want to use.

Last Reject Note Number Used

This indicates the last reject note number that has been created by the system, where reject notes are set to allow printing. It is not advisable to amend this number as to do so could cause serious problems within the system.

Press **Enter** or select **F8=Update** to update company profile details for this and all previous screens.

Copy Company

2/CRU

Use this utility to create details for a new company based on an existing company within the Customer Returns application.

The existing and new companies must both be defined to Application Manager and the Inventory Management application.

Copy Company Selection Screen

Select Copy Company.

Use this screen to select the existing and new companies for the copy operation.

CR150	Customer Returns Utilities Menu	User SP1	25/08/94 17:01:06
Copy Company			
This utility will copy both company details and character definitions for a new company.			
From company.....?.. <u>Z1</u>			
To company..... <u>Z2</u>			
F3=Exit F4=Prompt			

Fields:

From Company

Enter the code of an existing Customer Returns company from which you wish to copy details.

To Company

Enter the code of a new Customer Returns company to which you want to copy for details. This company must be a valid Inventory company.

Press **Enter** to display the Copy Company Confirmation Screen.

Copy Company Confirmation Screen

To display this screen, select your copy company criteria on the Copy Company Selection Screen and press **Enter**.

Use this screen to review your criteria for the Copy Company routine and submit the batch job to processing.

CR150	Customer Returns Utilities Menu	User SP1	25/08/94 17:01:46
Copy Company			
This utility will copy both company details and character definitions for a new company.			
From company.....?.. <u>Z1</u>			
To company..... <u>Z2</u>			
F3=Exit F4=Prompt F8=Submit			

You can still change the From and To companies.

Select **F8=Submit**, to submit your job for batch processing.

Returns Purge

3/CRU

Use this utility to archive historical returns transaction data from the live application files. In this way you can remove unwanted records to keep potentially large files within the system to a manageable size.

All data removed from transaction files is written to corresponding history files. You can then save these history files may to off-line storage and clear them.

Technical Notes

The following transaction files are purged by this routine:

- CRP02 – Returns Header.
- CRP03 – Returns Lines.
- CRP09 – Returns Transactions.
- CRP11 – Return Note Text.
- CRP60 – Returns Control.

The following History files are updated with the purged data:

- CRP02H – Returns Header History.
- CRP03H – Returns Lines History.
- CRP09H – Returns Transactions History.
- CRP11H – Return Note Text History.
- CRP60H – Returns Control History.

Returns Purge Selection Screen

Select Returns Purge.

Use this screen to select criteria for the archiving of historical Returns transaction data.

CR400	Customer Returns Utilities Menu	User SP1	25/08/94 17:02:00
Returns File Purge			
Any records credited before the entered date will be eligible for deletion.			
Enter company code..... <u>Z1</u>			
Enter credited date.... <u>010194</u>			
Any records expected before the entered date will be eligible for deletion.			
Enter expected date.... <u>010194</u>			
F3=Exit			

Fields:

Company Code

Enter the company for which you want to purge details.

Credited Date

Enter the date before which you want all credited returns deleted from the customer returns files.

Expected Date

Enter the expected date of return before which you want all completed return notes deleted from the customer returns files.

Enter this date to delete Return Notes that do not need credit transactions.

Press **Enter**, to display the Returns Purge Confirmation Screen.

Returns Purge Confirmation Screen

To display this screen, select purge criteria on the Returns Purge Selection Screen and press **Enter**.

Use this screen to review your criteria for the purge routine and submit the batch job to processing.

CR400	Customer Returns Utilities Menu	User SP1	25/08/94 17:02:17
Returns File Purge			
Any records credited before the entered date will be eligible for deletion.			
Enter company code..... <u>Z1</u> Demonstration Company			
Enter credited date.... <u>10194</u>			
Any records expected before the entered date will be eligible for deletion.			
Enter expected date.... <u>10194</u>			
F3=Exit F8=Submit F12=Re-select			

The selected company, company description, and purge dates are displayed for confirmation.

Select **F8=Submit** to submit the purge routine to batch or select **F12=Previous** to re-select the purge criteria.

Character Definitions

4/CRU

Use this utility to define large format characters you want printed on return notes. This is to clearly distinguish return notes for the collection of goods, from despatch notes for the delivery of goods.

The default word to print on the return note is:

C O L L E C T I O N

Technical Note

You can change the default word by maintaining message literal CRL0063 in message file CRMSGF.

Character Definitions Selection Screen

 Select Character Definitions.

Use this screen to enter the character you want to define in large format.

CR800
