Glossary

Glossary

Barcode Printer

A dedicated barcode printer is a specialist printer used for printing shipping labels. The shipping labels may have different layouts, and these are stored in the printer's memory. Label printing is used by the Advanced Shipping module.

Data Stream

A data stream is the term for the information that is sent by the printer driver program to your dedicated barcode printer. The data stream is merged with the label layout stored in the printer's memory and complete shipping labels are printed. Label printing is used by the Advanced Shipping module.

Descriptions File

This is a file maintained within the Inventory Management module which defines a number of parameter codes and their descriptions.

Formats

The layout design for shipping labels is often referred to as a Format.

Printer Driver Program

This is a specialist program for label layout that is controlled by a dedicated barcode printer. The label layouts are stored in the printer's memory. Label printing is used by the Advanced Shipping module.

Stockroom

A discrete area of a company where stock is recorded and controlled separately from other company stocks.
