Chapter 2

Processing

Introduction To Document Processing

Warning: The Processing menu option in Document Processing relates specifically to the Sales Order Processing module for printing despatch and delivery notes. The label printing facility for the Advanced Shipping module is set up in the Maintenance menu option in Document Processing.

Note: Document Processing offers a different delivery documentation printing function to the Document Preparation menu options in the Sales Order Processing module.

Note: You activate Document Processing in Inventory Company Maintenance, by selecting the F10=Extras function. This displays a window where you set up the required combination of delivery documentation to be produced by Document Processing.

This delivery documentation set-up, however, can be overridden by selecting F16=Additional Overrides in the Sales Order Processing module.

Document Processing is required by the Advanced Shipping module to print shipping labels from dedicated barcode printers. The Maintenance menu options relate specifically to printing shipping labels.

Document Processing is used by the Sales Order Processing module in order to produce combined despatch and delivery notes.

The Processing menu option in Document Processing is where you specify the documentation you want to print or reprint, and where you can reprice your delivery documentation if required. You can also specify the stockroom site for centralised documentation printing. To set up your stockrooms to be included in centralised documentation printing, refer to the Inventory Management documentation on stockroom site maintenance.

The Utilities menu option is where you activate or deactivate a background monitor, to centralise the printing of your delivery documentation.

Print Selection

1/DYP

Select Print Selection in Document Processing .

The Print Selection menu option allows you to select the documentation you want to print, and to specify the printing selection criteria.

Delivery Note Print Selection Screen 1

Select Print Selection in Document Processing.

This screen is where you specify the documentation you want to print, and select the printing selection criteria. You can select documentation to be printed by:

- Stockroom Site.
- Source - sales despatch, or supplier return, for example.
- Document Type - despatch documentation only, or combined despatch and invoice documentation.

18-26	SA	MW	KS CL IM DM II STUD140 KB PKH316S1

Fields:

Stockroom Site

Enter the code for the stockroom site where the documentation is to be printed.

*Note: You set up the stockroom site in
Stockroom Site Maintenance in the Inventory
Utilities menu option.*

Despatch Reference

This is a unique reference that is allocated to the document. When this field is blank, System 21 will allocate the next available reference number.

If you want to use a specific despatch reference number and override automatic despatch reference number allocation, press **F13=Override Despatch Reference**. The Despatch Reference field displays an input line for you to enter the despatch reference number you want to use.

Document Date

This defaults to the current system date.

Print Sequence

This is the sequence in which the delivery notes will be printed. This is defined on the Inventory Descriptions file (major Type PRSQ), as follows:

- 1 - Document Reference.
- 2 - Customer/Supplier.
- 3 - Despatch Date.
- 4 - Stockroom.
- 5 - Carrier.
- 6 - Delivery Reference.

Document Source

This is the source as defined to the Inventory Descriptions file (major Type DCSC): This determines what source type will be printed. Enter one of the following:

- 0 - All.
- 1 - Sales Despatch.
- 2 - Miscellaneous Invoice.
- 3 - Consignment.
- 4 - Supplier Return.
- 5 - Internal Transfer.
- 6 - Sub Contractor Shipment.

Document Type

This is the type of document to be printed.

Enter one of the following:

- 1 - Despatch Note only.
- 2 - Combined Despatch/Delivery Note.
- 3 - Both Despatch Note only and Combined Despatch/Delivery Note.

Note: This prints the documentation you specified to be printed on the Additional Details Window (F10) in the Sales Order Processing module, unless an override has been entered via the F16=Additional Overrides window in the Sales Order Processing module to override the documentation required to be printed.

Print Invoice Summary

Enter one of the following:

- 0 - Do not print the invoice summary.
- 1 - Print the invoice summary.

Selection Criteria

You must select at least one of the following to specify the documentation you want to print:

- Document Reference.
- Customer/supplier.
- Despatch date.
- Stockroom.
- Carrier.

You make your selection by entering one of the following:

- 1 - To specify a range of documentation numbers you want to print.
- 2 - To specify a list of specific documentation numbers you want to print.

Functions:

F13

Override Despatch Reference. This overrides the despatch reference number automatically allocated by System 21 and allows you to enter a specific despatch reference number in the Despatch Reference field.

Press **F13=Override Despatch Reference** to enter a specific despatch reference number in the Despatch Reference Field.

Press **F8=Continue** when you have made your selections. The Delivery Note Print Selection Screen 2 is displayed.

Delivery Note Print Selection Screen 2

 This screen is displayed when you press **F8=Continue** on the Delivery Note Print Selection screen 1.

This screen displays a summary of the selection criteria you specified on Delivery Note Print Selection Screen 1. For the summary information displayed, enter the list or range of document reference numbers for the delivery documentation to be printed.

From, To

Enter the delivery document print range that you want to print. This must be entered for the Document Reference selected on the previous screen.

 When you have entered the range or list of reference numbers for printing, press **F8=Submit**.

Reprint Selection

2/DYP

Select Reprint Selection in Document Processing.

This menu option is used to reprint delivery documentation that you have already specified and printed using the Print Selection menu option.

Despatch Note Reprint Selection Screen 1

Select Reprint Selection on the Document Processing menu.

Note: You can only use the reprint menu option for delivery documentation that has already been printed.

This screen allows you to specify printing criteria for delivery documentation that has already been printed using the Despatch Note Print menu option.

Fields:

Stockroom Site

The code for the stockroom site as set-up in the Stockroom Site Maintenance section within Inventory Utilities.

Print Sequence

This is the sequence that is defined on the Inventory Descriptions file (major Type PRSQ), as follows:

- 1 - Document Reference.
- 2 - Customer/Supplier.
- 3 - Despatch Date.
- 4 - Stockroom.
- 5 - Carrier.
- 6 - Delivery Reference.

Document Source

This is the source as defined to the Inventory Descriptions file (major Type DCSC):

- 0 - All.
- 1 - Sales Despatch.
- 2 - Miscellaneous Invoice.
- 3 - Consignment.
- 4 - Supplier Return.
- 5 - Internal Transfer.
- 6 - Sub Contractor Shipment.

Document Type

This is the type of document to be printed that is, despatch documentation only or combined despatch and invoice documentation.

Selection Criteria

You must enter at least one of the following selection criteria for the documentation you want to reprint:

- Despatch Reference.
- Document Reference.
- Customer/supplier.
- Despatch date.
- Stockroom.
- Carrier.

You select the required criteria by entering :

- 1 - To select a range.
- 2 - For a listing.

Functions:

F8

Continue. Proceed to the second Reprint Selection Screen.

Enter 1 against the document reference to select a range, or 2 to select a list, and then select **F8=Continue** to display the second Reprint Selection Screen.

Despatch Note Reprint Selection Screen 2

- ➡ When you press **F8=Continue** on the first Reprint Selection Screen, the second Reprint Selection Screen is displayed.

This screen displays a summary of the selection criteria you specified on Delivery Note Reprint Selection Screen 1. For the summary information displayed, enter the list or range of document reference numbers for the delivery documentation to be reprinted.
