Chapter 3

Utilities

Start And End Document Extraction Monitor

Warning: The Utilities menu option in Document Processing relates specifically to the Sales Order Processing module for printing centralised despatch and delivery notes. The label printing facility for the Advanced Shipping module is set up in the Maintenance menu option in Document Processing.

1/DYU

2/DYU

Select the Utilities option in Document Processing.

The extraction monitor is a background document preparation function which extracts all the appropriate transaction information. This is then used to enable the selection and printing of the delivery documentation to be centralised. When you select Start or End on the Document Processing Utilities screen a window is displayed requesting you to confirm the request, which is processed by a batch routine.
