## Chapter 8

### Inventory Enquiries

# Inventory Enquiries Introduction

Enquiries in the Inventory Management application are designed to allow a layered approach to the review of an item. This includes:

- Balances at stockrooms.
- Movements.
- History.
- Descriptions and codes from the Descriptions File.

## Kit List Item Where Used Enquiry

1/INE

Use this option to view the parent items of the selected kit component.

## Descriptions Enquiry

2/INE

Use this option to view entries on the Descriptions File. The screens are the same as those used for maintenance except you cannot amend any fields.

## Descriptions File Enquiry Screen 1

Select Descriptions.

Use this screen to view records in the Descriptions file, but not to maintain them. This screen displays the major types for selection.

| F3=Exit F12=Previous F15=Description code details |                              |              |                     |

### Fields:

#### Major Type

Enter a major type. If you press **Enter** having only entered the major type, its description will be displayed.

#### Description Code

If the details of a single description code are to be displayed it should be entered. Leave this field blank if you wish to display the description of the major type.

Use page up and page down to display the major types.

### Functions:

#### F15

Description Code Details. The second Descriptions File Enquiry screen is displayed.

To display all description codes for a major type, enter the major type and select **F15=Description Code Details**. This displays the second Descriptions File Enquiry screen.

## Descriptions File Enquiry Screen 2 (F15)

To display this screen select **F15=Description Code Details** on the Descriptions File Enquiry screen 1.

All the descriptions and the associated code and rate, if appropriate, are displayed.

Select **F3=Exit** to exit the enquiry.

## Item/Stockroom Enquiry

### 3/INE

Use this option to view all of the data from the item master and the stockroom balance. You can display static data for the item, a summary of the company stock position for the item, or the individual stockroom balances. For stockrooms, both batch and FIFO cost records can be displayed, where this level of detail is supported.

## Item/Stockroom Enquiry Screen 1

Select Item/Stockroom.

Use this screen to select the item for enquiry, and the required level of entry.

### Fields:

#### Item

To view the static information associated with the item, enter the item number only and press **Enter**. See Item/Stockroom Enquiry screen 5 for details.

#### Stockroom

To view the stockholding of an item in a single stockroom, enter the item and stockroom code and press **Enter**.

### Functions:

#### F13

Stock Summary. Select this function to display the fourth Item/Stockroom Enquiry screen.

Select an item and press **Enter** to display the second Item/Stockroom Enquiry screen.

## Item/Stockroom Enquiry Screen 2

To display this screen press **Enter** on the first Item/Stockroom Enquiry screen.

Use this screen to view the static descriptive information for the item. The fields in this screen are the same as the fields in the first Item Maintenance screen.

### Functions:

#### F9

Sec Vals. If there are entries in both the Secondary Value and Secondary UOM fields, when you select **F9=Sec Vals**, the Secondary Value Details window is displayed. The fields in the window are displayed for your information only and cannot be amended.

*Note: This function is only displayed if Catchweight can be used in this company, and the item has a secondary value. For more information see Company Profile Maintenance.*

#### F10

Group Valuation. Use this to view the group valuation for the selected item.

#### F20

Movement And Cost Analysis. Use this to view the movement and cost analysis for the selected item.

#### F21

Text Entry. This displays the Maintain Text window where you enter or select a Usage Code and a Language Code for multi-lingual text entry. When you press **Enter**, the Item Text window is displayed. This is where you can enter text in the

selected language to be displayed or printed on external documentation, for example, despatch notes, according to the usage code selected.

## F22

Item Packaging Details. To display the Country Item Packaging Details Enquiry, if you are using Packaging Requirements.

Tip: You specify your customer's default language in Customer Details Maintenance in Sales Order Processing. You can override this default language by entering a different language code when **F16=Additional Overrides** function key is available.

*Note: Language codes do not need to be selected in order to print text in the native language.*

Press **Enter** to display the third Item/Stockroom Enquiry screen.

This is the stock balance for this item/stockroom combination and the associated value at the start of the period.

**Receipts**

This is the total stock of this item you have received and the associated value for those receipts for this period.

**Issues**

This is the total stock of this item you have issued and the associated value for those issues for this period.

**Adjustments**

This is the total stock of this item you have adjusted and the associated value for those adjustments for this period.

**Transfers**

This is the total stock of this item you have transferred and the associated value for those transfers for this period.

**Closing**

This is the stock balance for this item/stockroom combination and the associated value at the end of the period

**Latest Receipt**

This is the date of the latest receipt of this item in this stockroom.

**Latest Issue**

This is the date of the latest issue of this item in this stockroom.

**Functions:**

**F13**

Year To Date Details. Use this to toggle between Period and Year to Date details for this item and stockroom combination.

**F14**

Cost Analysis. Use this to toggle between the Cost or Movement Analysis details.

## Cost Analysis Toggle Window (F14)

To display this screen select **F14=Cost Analysis** on Movement Analysis Window (F20).

Use this window to view cost analysis details for your selected item in both period and year to date format. The system displays the reference number and description, issue unit and current period details for your selected item.

### Fields:

#### Usage

Usage figures for the company in issue units of measure.

#### Total Physical Stock

Physical stock figure for the company in issue units of measure.

*Note: If Catchweight is used for this company and the item has a secondary value, select **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

#### Total Physical Stock In Stock Units

Physical stock figure for the company in issue units of measure.

### Functions:

## F9

Quantity/(Short Description). This is a toggle function which is available only when Catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Total Physical Stock field in the primary unit of measure.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the nine character description of the secondary unit of measure, select **F9** to display the quantity of the item in the Total Physical Stock field in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

Press **Enter** to display the display of the first stockroom balance for this item.

Press **Enter** again to display the fifth Item/Stockroom Enquiry screen.

## Item/Stockroom Enquiry Screen 5

To display this screen press **Enter** on the fourth Item/Stockroom Enquiry screen.

Or: Enter both the item code and stockroom code on the first Item/Stockroom Enquiry screen and press **Enter**.

*Note: If the selected item is stocked in more than one stockroom then the stock balances will be displayed sequentially. Press **Enter** to display the details for the next stockroom.*

This screen displays stockroom information under the following headings:

- Stock balances in issue units.
- Usage and stock management details.
- Costing and valuation.
- Preferred suppliers.
- Units of measure.
- Actioned dates.
- Standard bin locations.

The item and stockroom codes, with their associated descriptions are displayed at the top of the screen.

All the balances displayed are in the issue units of the item/stockroom. Stock is valued using the item's costing method indicated in the right hand column.

### Fields:

*Note: (XX) indicates the Unit of Measure code, for example, Stock Balances could be in Boxes, Eaches, Pallets and so on.*

### **Stock Balances (XX)**

This contains all the stock balances for this item/stockroom combination in the issue unit of measure.

The number of items physically held in this stockroom is displayed as well as the quantity of currently on order and those already allocated to orders.

Any goods frozen in this stockroom or currently in transit to this stockroom also appear in this section. As is the quantity available to be issued.

### **Usage /Reorder Data (XX)**

This indicates the amount of the item that has been issued from this stockroom over specified periods. Firstly on a weekly, monthly and annual basis and then the average usage, as calculated by the application.

#### **ROP**

The reorder point for this item stockroom combination.

#### **Maximum**

The maximum stock level that should ever be held in this stockroom. This quantity is used in the reorder policy Up To Max.

#### **EOQ**

The Economic Order Quantity for this item/stockroom combination.

#### **Reorder**

The quantity to be reordered.

#### **Reorder Factor**

The number of lead times worth of average usage that should be reordered.

*Note: Reorder and Reorder factor are only used if Reorder Policy 2 - ROP/ROQ is specified.*

Below this is the lead time in weeks, indicating the time between placing an order for a particular item and receiving it at the stockroom.

Details from the stock weeks matrix are displayed immediately below the usage data. You can view the number of weeks cover for this item along with the minimum and maximum weeks of stock held on the company profile for this item/stockroom combination.

There are also details of the current system assigned ABC Classification, again from the stock weeks matrix. If an ABC classification override has been specified on the item master file then this is the last field in this section.

### **Costs (XX)**

This section of the screen contains the most recent item cost according to the method of costing displayed next to the heading Cost At. If there is a base list price for the item this will be displayed under the costing method.

### **Miscellaneous**

These detail whether there is a stock count in progress for this item in this stockroom.

Whether the item is defined to Packaging Reporting.

The purchase unit of measure for the item.

And limited location details for this item in this stockroom.

### **Dates**

This details the date that this item/stockroom combination was changed. The most recent receipt and issue of this item from this stockroom. The date of the last stock count, and the date of the next planned stock count.

### **Suppliers**

This final section displays the preferred supplier for this item and the stockroom bin where this item is located. Both of these are specified on the Item Master file.

Press **Enter** to scroll through a series of similar screens for each stockroom that stocks this item, in stockroom code order.

### **Functions:**

#### **F9**

Quantity/(Short Description). This is a toggle which is only displayed when Catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to remove the Phys. (Abbreviation) and Secondary UOM fields from the screen.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the nine character description of the secondary unit of measure, select **F9** to display the Phys. (Abbreviation) and Secondary UOM fields on the screen.

#### **F13**

Lot Details. If the item is batch, lot or serial controlled, this function gives a further break down of stock balances by batch number. A list of lots is displayed showing lot balance information. For more information see Item/Stockroom Enquiry screen 6.

#### **F19**

FIFO Cost Details. Use this to view FIFO costs for the selected item if applicable.

#### **F20**

Movement Cost Analysis. Use this to view the movement and cost analysis details for the selected item. See Movement Analysis Window (F20) for more details.

#### **F21**

Potency. To view potency details for items that are subject to lot, serial or batch control.

## Item/Stockroom Lot Details Screen (F13)

To display this screen select **F13=Lot Details** on the fifth Item/Stockroom Enquiry screen, if the item is batch, lot or serial controlled.

Use this screen to view a further break down of stock balances by batch number. A list of lots is displayed showing lot balance information.

### Fields:

#### Item

This field displays the name of the item.

#### Stockroom

This field displays the name of the stockroom.

#### Issue Units

This field displays the name of the primary unit of measure.

*Note: If this company uses Catchweight, and the item has a secondary value, when **F9=(Short Description)** is selected the Issue Units field is not displayed.*

#### 1

Select. Depending on whether changes have been made to the grade/potency profile of the lot, some or all of the following selections are possible. For each lot balance, you can enter one of the following:

1 - Receipt Costs. The cost of the items either transferred from a stockroom or received from a supplier are displayed. For more information see the seventh Item/Stockroom Enquiry screen.

2 - Lot Header. To display the lot header details for this lot. For more information see the Lot Header Details window.

3 - Lot Trace. To perform a lot trace enquiry. For more information see Lot Trace Enquiry screen 3.

4 - Potency History. To display the potency history of a particular lot. For more information see Potency History Enquiry window (Option 1).

5 - Grade History. To view the grade history of this lot. For more information see Grade History Enquiry.

6 - Allocations. To view any allocations that have been made against this lot. The Allocations Enquiry window is displayed.

## Lot

For each lot balance, the name of the lot is displayed.

## Physical/Frozen

For each lot balance, the physical and frozen quantities of the item are displayed.

*Note: If this company uses Catchweight and the item has a secondary value, when **F9=(Short Description)** is selected, this field is removed from the screen.*

## Physical

If this company uses Catchweight, and **F9=(Short Description)** is selected, this field is displayed. For each lot balance, the physical quantity of the item is displayed in the secondary unit of measure.

## Allocated/On Order

For each lot balance, the allocated and on order quantities of the item are displayed.

## Available

For each lot balance, the available quantity of the item is displayed.

## Secondary UOM

If this company uses Catchweight, and the item has a secondary value, when **F9=(Short Description)** is selected, this field displays the abbreviation of the secondary unit of measure.

## Functions:

### F9

Quantity/(Short Description). This is a toggle function which is only available when Catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to remove the Secondary UOM field from the screen and to display the Issue Units field. Also, the Physical field displays quantity of the item in the primary unit of measure.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the nine character description of the secondary unit of measure, select **F9** to remove the Issue Units field from the screen and display the

Secondary UOM field. Also, the Physical field displays quantity of the item in the secondary unit of measure.

**F13**

Include Zero Lots. Use this to include zero lots for this item - and to return to the original details.

## Item/Stockroom Enquiry Screen (Option 1)

To display this screen enter 1 in the 1 field on the Item/Stockroom Lot Details screen (F13).

### Fields:

#### Item

This field displays the name of the item.

#### Stockroom

This field displays the name of the stockroom.

#### Issue Units

This field displays the name of the primary unit of measure.

*Note: If this company uses Catchweight and the item has a secondary value, when **F9=(Short Description)** is selected, the Issue Units field is not displayed.*

#### Secondary UOM

If this company uses Catchweight and the item has a secondary value, when **F9=(Short Description)** is selected this field is displayed instead of the Issue Units field containing the abbreviation of the secondary unit of measure.

#### Lot

This field displays the name of the lot.

#### Date/Time Received

For each lot balance, the date and time it was received.

### Original Quantity

For each lot balance, the quantity of the item received, expressed in the primary unit of measure, is displayed in this field.

*Note: If this company uses Catchweight and the item has a secondary value, when **F9=(Short Description)** is selected, this field is removed from the screen.*

### Original (Short Description)

This field is displayed if Catchweight is being used for this company and **F9=(Short Description)** is selected. For each lot balance, the quantity of the item received, expressed in the secondary unit of measure, is displayed in this field.

### From Supplier/Stockroom

For each lot balance, the name of the supplier or stockroom is displayed in this field.

### Cost/Unit

For each lot balance, the cost per unit is displayed in this field.

### Balance

For each lot balance, the date and time it was received is displayed in this field.

### Functions:

#### F9

Quantity/(Short Description). This is a toggle function which is only available when Catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Original Quantity field in the primary unit of measure.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the nine character description of the secondary unit of measure, select **F9** to display the quantity of the item in the Original (Short Description) field in the secondary unit of measure.

When you have finished displaying the receipt costs select **F12=Previous** to display the sixth Item/Stockroom Enquiry screen.

## Lot Header Details Window (Option 2)

To display this screen enter 2 in the 1 field on the Item/Stockroom Lot Details screen (F13).

### Fields:

#### Item Number

This field displays the name of the item.

#### Lot Number

This field displays the name of the lot.

#### Stockroom

This field displays the name of the stockroom.

#### Physical

This field displays the physical number of items.

If Catchweight is used for this company and the item has a secondary value, the number of items can be displayed in either the primary unit of measure by selecting **F9=Quantity**, or the secondary unit of measure by selecting **F9=(Short Description)**.

#### Allocated

This field displays the allocated number of items.

If Catchweight is used for this company, and **F9=(Short Description)** is selected, this field is removed from the screen.

#### Available

This field displays the available number of items.

If Catchweight is used for this company and the item has a secondary value, when **F9=(Short Description)** is selected, this field is removed from the screen.

### Issue Units

This field displays the unit of measure used when items are issued.

*Note: If Catchweight is used for this company and the item has a secondary value, when **F9=(Short Description)** is selected, this field is removed from the screen.*

### Secondary UOM

If this company uses Catchweight and the item has a secondary value, when **F9=(Short Description)** is selected, this field is displayed instead of the Issue Units field, containing the abbreviation of the secondary unit of measure.

### Receipt Date

This field displays the date that the items are received into the stockroom.

### First Avail Date

This field displays the first date that the items are available to leave the stockroom.

### Last Avail Date

This field displays the last date that the items are available to leave the stockroom.

### Expiry Date

This field displays the expiry date of the items.

### Stock Status

This field displays the current status of the items in the stockroom.

### Supplier Lot Ref

This field displays a specific reference name.

## Functions:

### F9

Quantity/(Short Description). This is a toggle function which is available only when Catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to remove the Physical and Secondary UOM fields for the secondary unit of measure, and display the Physical, Allocated, Available and Issue Units fields for the primary unit of measure.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the nine character description of the secondary unit of measure, select **F9** to remove the Physical, Allocated, Available and Issue Units fields for the primary unit of measure, and display the Physical and Secondary UOM fields for the secondary unit of measure.

When you have finished displaying the lot header details, select **F12=Previous** to remove the window from the screen and display the seventh

Item/Stockroom Enquiry screen.

## Item/Stockroom Enquiry FIFO Cost Details Screen (F19)

To display this screen select **F19=FIFO Cost Details** on the fifth Item/Stockroom Enquiry screen if the item is FIFO costed.

This screen displays the opening and current position of the unused FIFO batches for an item/stockroom. Both date and time are displayed. The list of batches is displayed.

This screen indicates both the quantity received from another stockroom or supplier, and the balance of this batch remaining in the stockroom, with the associated cost per unit.

*Note: To adjust FIFO records use the FIFO Costs option.*

If the chosen item is lot, batch or serial controlled, this screen will be available for consultation, using the **F19** function on the fifth screen, even if the item is not FIFO costed. Then details displayed will be the received costs, calculated according to the costing method specified on the second Item Maintenance screen.

This screen can also be accessed for lot, batch, serial controlled items by entering 1 against a lot for receipt costs from the Lot Details screen. In this case the costs displayed will only refer to the selected lot.

### Fields:

#### Item

The item for which the enquiry is to be made. The movement enquiry is always for a particular item.

The following selection criteria can also be specified to reduce the scope of the subsequent display:

#### Stockroom

Select a stockroom or leave blank to include all stockrooms in the enquiry.

#### Lot

Select a lot or leave blank for all lots.

#### From Date/To Date

Specify a range of dates or leave blank for all dates.

#### Movement Type

Specify a particular movement type or leave blank for all. The valid movement types are displayed in the lower half of the screen. Use page up and page down to display more valid movement types.

#### Summary/Detail

Enter 1 to select a summary list with many movements on one screen, or 2 for a detailed enquiry with one movement per screen.

Press **Enter** to confirm the selections and display the screen selected in the Summary/Detail field.

## Inventory Movements Summary Screen

To display this screen enter 1 on the Summary/Detail field on the Inventory Movements Enquiry screen.

Use this screen to view a list of the selected movements in a summary form - one line per movement. The most recent movement is displayed first. Use page up and page down to display more movements.

### Fields:

#### Untitled

Select. Enter 1 against the movement you wish to view.

### Functions:

#### F9

Quantity/(Short Description). This is a toggle function which is available only when Catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to remove the (Short Description) field for the secondary unit of measure, and display the Quantity field for the primary unit of measure.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the nine character description of the secondary unit of measure, select **F9** to remove the Quantity field for the primary unit of measure, and display the (Short Description) field for the secondary unit of measure.

Select a movement and press **Enter**.

## Inventory Movements Detail Screen

To display this screen enter 2 on the Summary/Detail field on the Inventory Movements Enquiry screen.

Or: Enter 1 in the Untitled field on the Inventory Movements Summary screen.

Use this screen to view the full details of an individual stock movement. There are three groups of data:

- Identification of the movement: Item, stockroom, references and date.
- Movement quantity, the resulting balance after the movement was recorded, and the movement value.
- Further control information: Lot number, third party (supplier, customer and so on), date, time, terminal, user and the full display of production and lot transformation references, and so on.

*If Detail was selected, use page up and page down to view other movements.*

### Fields:

#### Narrative

The content varies according to the source of the transaction.

For example, if you are processing a Physical Stock Adjustment, you can use the narrative to add key narrative text to the transaction. Other system generated transactions, for example, Production Issues, use the narrative to store additional information relating to the transaction. So production movements relating to works orders would include the works order, operation, route and work in progress lot number. For repetitive production movements the narrative would contain the parent

item operation, route and work in progress lot number. If the transaction is not related to the works order, then it splits into the item and route.

### **Movement Qty/(Abbreviation)**

This field displays the amount of the item moved and the unit of measure.

If Catchweight is used for this company and the item has a secondary value, you can select **F9=Quantity/(Short Description)** to toggle between the Movement Qty field for the primary unit of measure and the Movement (Abbreviation) field for the secondary unit of measure.

### **Resulting Balance/(Abbreviation) Bal**

This field displays the amount of the item left after the movement and the unit of measure.

If Catchweight is used for this company and the item has a secondary value, you can select **F9=Quantity/(Short Description)** to toggle between the Resulting Balance field for the primary unit of measure and the Resulting (Abbreviation) Bal field for the secondary unit of measure.

## **Functions:**

### **F9**

Quantity/(Short Description). This is a toggle function which is available only when Catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to remove the Movement (Abbreviation) and Resulting (Abbreviation) Bal fields for the secondary unit of measure, and display the Movement Qty and Resulting Balance fields for the primary unit of measure.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the nine character description of the secondary unit of measure, select **F9** to remove the Movement Qty and Resulting Balance fields for the primary unit of measure, and display the Movement (Abbreviation) and Resulting (Abbreviation) Bal fields for the secondary unit of measure.

Select **F3=Exit** to exit from the enquiry.

# All Stockrooms For An Item Enquiry

**5/INE**

Select All Stockrooms For An Item.

This procedure displays the disposition of the stock of an item throughout the company at summary level. It then provides access to the standard stockroom enquiry.

To display this screen select an item on the All Stockrooms For An Item Enquiry Selection screen and press **Enter**.

Use this screen to view the summary balance data for each stockroom where the item is stocked. It includes frozen, allocated, on order, in transit, physical and available stock balances.

## Fields:

### Untitled

Select. Enter 1 against the stockroom for a more detailed display of an individual stockroom. This will display stock balance, costing and valuation, supplier and usage/stock management information.

See the fifth Item/Stockroom Enquiry screen for more information on this screen and the options available from it.

## Functions:

### F9

Quantity/(Short Description). This is a toggle function which is available only when Catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to remove the Physical/In Transit fields for the secondary unit of measure, and display the Frozen/Allocated, On Order/In Transit and Physical/Available fields for the primary unit of measure.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the nine character description of the secondary unit of measure, select **F9** to remove the Frozen/Allocated, On Order/In Transit and Physical/Available fields for the primary unit of measure, and display the Physical/In Transit fields for the secondary unit of measure.

Select **F3=Exit** to exit from the enquiry.

# Stock History Enquiry

6/INE

The Stock History records are summaries of the stock movements by week or period depending on the choice of usage cycle in the company profile.

## Stock History Enquiry Screen 1

Select Stock History.

Use this screen to select the item and stockroom combination for the history that you wish to view.

### Fields:

#### Item

Enter the reference number associated with the item upon which you wish to enquire.

#### Stockroom

Enter a two character stockroom code where the item is located.

Press **Enter** to display the second Stock History Enquiry screen.

## Stock History Enquiry Screen 2

- ➡ To display this screen select and item and stockroom on the first Stock History Enquiry screen and press **Enter**.

At the top of the screen the average usage of the item in this stockroom is displayed.

This is followed by a list of the activity of the item for each week or period. A period or week is only displayed if a movement has been recorded.

|                              |                               |                                |                     |

- ⏮ *Note: Use page up and page down to view more movements.*

- ➡ Select **F3=Exit** to exit from the enquiry.

## Stock In-Transit Enquiry

**7/INE**

Use this option to carry out enquiries on Distribution Order lines in-transit between a selected Centre and DC.

These items have been confirmed as despatched from the Centre (via Sales Order Processing or Warehousing), but not yet confirmed as received at the DC (via Distribution Requirements Planning).

## Shipments In Transit Enquiry Screen 1

Select Stock In-Transit.

Use this screen to select all the Distribution Order lines in-transit between a supply Centre and a selected DC, or to display details of lines for one specific order in-transit.

You can select a list of all DCs and a list of all Centres.

|                                                             |                               |              |                      |

### Fields:

#### From Stockroom

Enter a DC code, this must be defined, to at least one Network within DRP.

#### To Stockroom

Enter a Centre Code, this must be defined to at least one Network within DRP.

#### Distribution Order Number

Enter a valid distribution order, in other words, one confirmed as despatched at the Centre and not yet confirmed as fully received at the DC.

*Note: An order may be selected without specifying its relevant Centre or DC.*

Enter a valid DC/Centre combination and/or order number, to display the second Shipments In Transit Enquiry screen.

## Shipments In Transit Enquiry Screen 2

To automatically display this screen enter a valid DC/Centre combination and/or order number on the first Shipments In Transit Enquiry screen

The screen displays the Distribution Order line details.

### Fields:

#### From/To Stockroom

Default entries from previous screen.

#### Date

Date of despatch from Centre.

#### Order

Distribution Order Number.

#### Lin

Distribution Order Line Number.

#### Item

The code for the Item within Inventory Management.

#### SR

Local stockroom for the Item at the DC.

#### Quantity

This field displays the amount of the item presently in-transit between the selected stockrooms. This amount is expressed using the primary unit of measure.

#### Secondary Val

This field displays the amount of the item presently in-transit between the selected stockrooms. This amount is expressed using the secondary unit of measure.

If Catchweight is used for the company and the item has a secondary value, you can select **F9=Quantity/(Short Description)** to remove the Quantity field and display the Secondary Val field.

#### UOM

This field displays the unit of measure. If Catchweight is used for the company and the item has a secondary value, you can select **F9=Quantity/(Short Description)** to toggle between the primary and secondary unit of measure.

#### Lot Number

If the Item is lot, batch or serial controlled, the lot number is displayed.

Where appropriate the stockroom, pack, lot number and rotation date may be amended when confirming receipt of the shipment (via the DRP Processing Option).

Use page up and page down to view any further pages of lines meeting the selection criteria.

## Functions:

### F9

Quantity/(Short Description). This is a toggle function which is available only when Catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to remove the Secondary Val field for the secondary unit of measure, and display the Quantity field for the primary unit of measure.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the nine character description of the secondary unit of measure, select **F9** to remove the Quantity field for the primary unit of measure, and display the Secondary Val field for the secondary unit of measure.

Select **F3=Exit** to exit from the enquiry.
