Chapter 9

Inventory Reports

Item/Stockroom Report

1/INR

Select Item/Stockroom.

This option produces a hard copy listing of Items and Stockroom balances. It can be tailored by selecting ranges of items, item types, classes or groups. The following specifications are appropriate for this report:

- Frequency - On request.
- Stationery - Standard listing paper.
- Print positions - 132.
- New Page - Overflow.
- Totals - None.

Note: If Catchweight is used for this company, the secondary value, unit of measure, Catchweight type and tolerances are displayed for each item. Also, the secondary unit of measure and description, physical and in-transit stock values and descriptions for each stockroom are displayed.

I4-36	SA	MW	KS CL IM DM II MARVIN KB PET087S1

Fields:

Stockroom

Enter a range of stockrooms to be included in this report. Leave this field blank to view all stockrooms.

Enter the items to be printed by one of the following ranges:

Item

Enter the item or item range for which the report is printed.

Item Group Major/Minor

Enter the item group or range of item groups for which the report is printed.

Item Type

Enter the item type or range of item types for which the report is printed.

Item Class

Enter the item class or range of item classes for which the report is printed.

Include Kit

Enter one of the following:

- 1 - Display kit components on the report. This is the default for this field.
- 2 - Display kit headers on the report.
- 3 - Display both kit components and headers on this report.

Note: This final setting may produce misleading results on the report due to the duplicate representation of each kit in the stockroom.

Press **Enter** to send the report to print.

Descriptions File Report

2/INR

Select Descriptions File.

This option provides a printed copy of the descriptions file. The following specifications are appropriate for this report:

- Frequency - On request.
- Stationery - Standard listing paper.
- Print positions - 132.
- New Page - Overflow.
- Totals - None.

Select **F8=Submit** to process the report.

Items Flagged For Deletion Report

3/INR

Select Items Flagged For Deletion.

This report lists all items currently flagged for deletion. The effectivity end date is shown for each item in the list. The following specifications are appropriate for this report:

- Frequency - On request.
- Stationery - Standard listing paper.
- Print positions - 132.
- New Page - Overflow.
- Totals - Total number of items flagged for deletion.

Select **F8=Submit** to process the report.

Item Audit Report

11/INR

Select Item Audit.

This option provides a print out of all the changes made to the item file since this was last run. The following specifications are appropriate for this report:

- Frequency - On request. Typically as part of a day or weekend run.
- Stationery - Standard listing paper.
- Print positions - 132.
- New Page - Change of part number.
- Totals - None.

Note: If Catchweight is used for this company, the secondary value, unit of measure, Catchweight type and tolerances are displayed for each item. Also, the secondary unit of measure and description, physical and in-transit stock values and descriptions for each stockroom are displayed.

Select **F8=Submit** to process the report.

Stockroom Audit Report

12/INR

Select Stockroom Audit.

The following specifications are appropriate for this report:

- Frequency - On request - typically part of a day or weekend run.
- Stationery - Standard listing paper.
- Print positions - 132.
- New Page - Overflow.
- Totals - None.

Select **F8=Submit** to process the report.

Stock Valuation Reports

There are two reports which are concerned with Stock Valuation.

- Stock Movements Valuation Report, which lists stock availability, opening stock levels, movements and closing levels for all items that have moved during the period.
- Stock Valuation Report, which values the physical stock of items or stockrooms.

Stock Movements Valuation Report

21/INR

This report lists the stock availability of an item, or range of items over a period of time, taking into account both demand and supply orders. Two running totals of stock availability are calculated; the first allows for demand orders only, the second for both demand and supply (in other words a worst and best case).

This is the report which you will be prompted to run when you request a period end update.

Select Stock Movements Valuation.

IN056	Z1 - UK Demonstration Company	User GBJBALTW	3/06/98 11:30:58
Record Report Selection Criteria			
	From	To

OR			
Item class.....?..	—	—	
Include kits.....	1	1=Include kit components 2=Include kit headers 3=Include kit headers and components	
F3=Exit F4=Prompt			

Fields:

Stockroom From/To

Enter a range of stockrooms or leave blank to include all stockrooms.

Item From/To

Enter a range of items or leave blank to select all items.

Item Group Major/Minor

Enter a range of major or minor item codes or leave blank to include all major or minor item codes.

Item Type

Enter a range of item type codes or leave blank to include all item type codes.

Item Class

Enter a range of item class codes or leave blank to include all item class codes.

Include Kit

Enter one of the following:

- 1 - Display kit components on the report. This is the default for this field.
- 2 - Display kit headers on the report.
- 3 - Display both kit components and headers on this report.

Note: If Catchweight is used for this company, the secondary values and unit of measure are displayed.

Press **Enter** to submit the report.

Stock Valuation Report

22/INR

Select Stock Valuation.

Use this report to value the physical stock of the requested items or stockrooms. The following specifications are appropriate for this report:

- Frequency - On request. Typically as part of the month end processing stock taking problems.
- Stationery - Standard listing paper.
- Print positions - 132.
- New Page - Change of part number.

Totals - At change of stockroom and at the end of the report, a total stock value is printed.

Selections are available by a range of:

- Stockrooms and Item numbers Or:
- Item group major/minor Or:
- Item type Or:
- Item class.

You can also choose to report on kit parents, components, or both.

Tip: You can choose to include kit components, headers or both on the report.

Note: If Catchweight is used for this company, the secondary values and unit of measure are displayed.

Press **Enter** to process the report.

Movements Audit Report

31/INR

Select Movements Audit.

Note: As this report details all movements since the report was last run, it is important to run this report at regular intervals whether or not it is to be printed.

Use this report to detail all movements of all items since the report was last run. The file is then emptied. The following specifications are appropriate for this report:

- Frequency - As required, but it should normally be run as part of a day or weekend run.
- Stationery - Standard listing paper.
- Print positions - 132.
- New Page - Change of part number.
- Totals - Movement value by transaction type, for each stockroom.

This option is run straight from the menu.

Note: If Catchweight is used for this company, the secondary values and unit of measure are displayed.

Select **F8=Submit** to process the report.

Movement Reports

There are two reports which are concerned with Stock Movement.

- Movements Processed By AFI Report, which lists stock movements processed via Advanced Financial Integrator.
- Stock Movements Report, which can produce a number of user defined stock movement lists.

Movements Processed By AFI Report

32/INR

Select Movements Processed By AFI.

This program provides a hard copy print of a selection of stock movements that have been processed via the Advanced Financial Integrator (AFI) in a number of different sequences.

The selection criteria are the same as for the Stock Movements report.

Stock Movements Report

33/INR

Use this option to produce a hard copy print of a selection of stock movements in a number of different sequences.

Request Stock Movements Report Selection Screen

Select Stock Movements.

Use this screen to specify the stock movements criteria that you want to report on.

IN050	Z1 - Demonstration Company	User SP1	26/08/94 9:16:12
Request Stock Movements Report - Selection			
Stockroom.....?	01	Central Stockroom	
Item.....?	5013	Muesli Bar Honey High Fibre 50g	
Item group major....?	—		
Item group minor....?	—		
Reference date.....	200894	260894	
Movement date.....	—	—	
Movement type.....?	—		
Week no.(WWYY).....	—		
Period no.(PPYY).....	—		
F3=Exit F4=Prompt F8=Submit			

Fields:

Stockroom

Enter the stockroom on which you want to produce the report, using up to two alphanumeric characters. To print all stockrooms leave blank.

Item Number

Specify the item you wish to include on the report using up to fifteen alphanumeric characters. To print all items leave blank.

Item Group Major And Minor

Enter the item group major and item group minor for which the report is required.

For a report of movements for all item groups, leave blank.

Reference Date

Specify a reference date range for the report. To print movements for a particular reference date, enter a single date. Leave blank for all reference dates.

Movement Date

Enter up to two valid dates to specify the movements that are to be included. Any movements made between the dates specified will be printed. To print movements for a particular day enter just one date. To print all movements both entries should be blank.

Movement Type

Specify the movement type to print on the report using a one-character code, or leave blank to print all movement types.

Week Number

Specify the week number of the movements you want to print using four numeric characters, format WWYY. Leave blank if no week number selection is required. If this field is blank all movements that satisfy previous selection criteria will be printed.

Period Number

Specify the period number of the movements you want to print using four numeric characters, format PPYY. Leave blank if no period number is required. If this field is blank all movements that satisfy any of the above selection criteria will be printed.

Press **Enter** and then select **F8=Submit** to send the report to print.

Request Stock Movements Report Sequence Screen

Select Stock Movements.

Use this screen to select the reporting sequence you require for the stock movement report.

IN050	Z1 - Demonstration Company	User SP1	21/09/94 9:49:02
Request Stock Movements Report - Sequence			
1. Stock room.			
2. Item.			
3. Movement date.			
4. Movement type.			
5. Week number.			
6. Period number.			
7. Reference date.			
Major sequence		1	
Minor sequence			
F3=Exit F12=Previous			

Fields:

Major Sequence

Enter a one character code to specify the sequence in which the selected movements will be printed.

- 1 - Stockroom.
- 2 - Item Number.
- 3 - Movement Date.
- 4 - Movement Type.
- 5 - Weeks Number.
- 6 - Period Number.
- 7 - Reference Date.

Minor Sequence

Enter a one character code to specify the sequence, within the major sequence specified above, in which the selected movements will be printed.

Press **Enter** to submit.

Reporting On Negative Stock

There are two reports which are concerned with Negative Stock.

- Negative Stock Report, which lists any stock that has become negative as a result of an inventory transaction.
- Negative Stock Periodic Parameters Report, which you can use to amend the periodic parameters.

Negative Stock Report

34/INR

Select Negative Stock.

Use this option to highlight stock which has been allowed to go negative for any transaction which reduces stock levels.

0 - Report only.

1 - Produces report and deletes the item(s).

2 - Delete only.

3 - Produces a report, and delete and adjust FIFO items.

Press **F8=Update**.

Non-Moving Items Report

36/INR

This report lists the last movements of items with no movements since the selected last movement date, and items that have no movements at all.

You should run this report as part of the period end routines.

The report excludes the following:

- New items whether they have movements in the current period or not. This is because the Movement Analysis record for the current period is not created unless the stockroom had undergone a trial fiscal close.
- All items in stockrooms not under fiscal open and close control.

The report includes the following:

- Slow moving items that have moved during the current period, but whose previous movement was before the selected last movement date. Again, the items' inclusion in the report is due to the Movement Analysis record for the current period not being created.

The report can also include Miscellaneous Receipts depending on the settings on Inventory Management's Company Profile.

Movement Analysis records holds two dates of last receipt, one includes miscellaneous receipts, the other does not, so this report may include items that have a recent miscellaneous receipt.

Report On Non-Moving Items Selection Screen

Select Non-Moving Items.

Use this screen to select report criteria.

```

IN591                Z1 - GB Demonstration Company    User GBJBA1MS    3/02/98

Enter suitable range of Item codes, or leave blank to produce a report on all items.

Stockroom From And To

Enter a suitable range of stockroom codes or leave blank to produce a report on all stockrooms.

Leave both the Item and Stockroom fields blank to produce a report on all items in all stockrooms.

Do You Require Allocations To Be Printed

Enter one of the following:

0 - To not print current stock allocations.

1 - To print current stock allocations.

Do You Require Reservations To Be Printed

Enter one of the following:

0 - To not print current stock reservations.

1 - To print current stock reservations.

Press **Enter** to run the report.

Supply/Demand Exceptions Report

43/INR

Select Supply/Demand Exceptions.

Use this option to detail any changes affecting sales orders reserved against supply orders.

The report shows the sales order details listed below (and optionally the supply order details) for each purchase to order and direct delivery order for which changes have occurred. It shows all incidents since the report was last run.

- Supply order type.
- Demand order type.
- Supply reference number.
- Demand reference number supplier code and name.
- Customer code and name.
- Item code and description.
- Stockroom code and description.
- Original quantity.
- Action quantity.
- Order Due date.

The reason for the amendment is also displayed. Possible reasons are:

- Sales order amended.
- Production items master missing.
- Standard planning route not found.
- Sales order suspended, cancelled or a quotation.
- Production order quantity too small.
- Production order completion too late.
- Production order excess quantity.

Enter 1 to include details of the supply orders corresponding to the sales orders included in the report.

Include Works Orders

Enter 1 to include details of the works orders corresponding to the sales orders included in the report.

Press **F8=Submit**.

Rotation Factors Report

44/INR

Stock rotation factors are calculated for items based on their recent usage. The factor is defined as the total usage across a selected number of periods (which you select), divided by the average stock level.

An items' average stock level is calculated as the sum of the closing balances divided by the number of periods.

This calculation is performed each time you run the report. The latest rotation factor and the number of periods used in the calculation are held on the file. You can view them using the Movement Analysis Enquiry. Details for the current period are excluded as the period is incomplete.

Note: Rotation factors are calculated from the Movement Analysis records, these are created for items in stockrooms with fiscal control.

Stock Rotation Factor Report Selection Screen

Select Rotation Factors.
