Chapter 4

Retrospective Discounts

Retrospective Scheme Header

1/OED

Use this option to create or maintain the scheme headers for retrospective discount schemes. These control how and when discount schemes apply to customers, or customer groups.

Note: Once any accruals or payments have been updated by the period end option, you cannot use this option to maintain the scheme details.

Retrospective File Maintenance Screen 1

Select Retrospective Scheme Header.

Use this screen to create or maintain a Retrospective Discount Scheme.

Warning: Once any accruals or payments have been updated by the period end option, you cannot use this option to maintain the scheme details.

6-29 SF MW KS CL IM DM II STUDPROJ KB PKH316S1			

Fields:

Description

Enter a description for your Retrospective Discount Scheme using up to 34 alphanumeric characters.

Scheme Level

Enter one of the following to define to whom this scheme applies:

- 1 - Customer level.
- 2 - Customer group level.

Tip: The Scheme Level must be at the same Customer Level as your selected Price Type Code. This is set up in Pricing Type Profile Maintenance screen 2 in Advanced Pricing.

Starting Date

Enter the Start Date for the discount scheme. This is the date from which the system will extract values of all invoices generated to calculate your customers' Retrospective Discount Schemes balances.

Ending Date

Enter the End date for the discount scheme. This is the date from which the system will extract values of all invoices generated to calculate your customers' Retrospective Discount Schemes balances.

Start Period

Enter the Start Period for the scheme in the format YYPP (YY must not be less than the current year, and PP must be in the range 1-13).

Note: The period specified applies only to Retrospective Discounting, and is independent of any other System 21 period or calendar.

Scheme Duration

Enter the Duration for the scheme in months (in the range 1-99).

Price Type Code

Select the Price Type Code for the Retrospective Discount Scheme (Price function - 6).

Tip: The Price Type Code must be at the same customer level as the selected Scheme Level. The Customer Level of the Price Type is set up in Pricing Type Profile Maintenance screen 1 and 2 in Advanced Pricing.

Scheme Currency

Enter a currency code for the currency you want to use for the scheme.

Note: This must be the same as the Currency Code specified for the Pricing Type Profile set up in Pricing Type Profile Maintenance in Advanced Pricing.(Price function - 6.)

Multi-Currency Scheme

The Retrospective Discount Scheme will accumulate in the currency specified for the Price Type. Payments are made in the Price Type currency, unless they are posted to Cashbook. In this case payments are converted to the account posting currency.

Enter one of the following:

0 - Only invoices in the scheme's specified currency will be included in the discount scheme's calculations.

1 - Invoices for all relevant currencies will be included in the discount scheme's calculations.

Note: You can raise invoices in any number of currencies.

Target Type

Specify the Target Type you want to apply to the Retrospective Target

Enter one of the following:

0 - Up to and over target.

The full accumulated sales value, or quantity, is used to determine the level of discount.

1 - Over target only.

Only the amount by which the accumulated sales value, or quantity, exceeds the Retrospective Target is used to determine the level of discount.

This is specified in the Pricing Type Profile Maintenance screen 2 in Advanced Pricing. The Target Type is used for calculating the level of discount the Retrospective Discount Scheme will achieve.

Currency Rate Code

Select the currency rate code for the selected currency.

Payment Type

Enter one of the following to pay the discount that the Retrospective Discount Scheme has achieved:

0 - Cashbook Posting (Manual cheque).

1 - Sales Ledger credit.

2 - Loan ledger credit.

3 - Credit Note.

Bank Account

If you select to pay by Cashbook Posting, enter a Bank Account number.

G/L Expense Code

Enter a General Ledger Expense Account code.

G/L Accrual Code

Enter a General Ledger Accrual Account code.

Press **Enter** to validate your entries. The Select Extension Code window is displayed for each account in turn. Press **Enter** to update any changes made for each account, and return to the first Retrospective File Maintenance screen.

Retrospective Scheme Detail

2/OED

Use this option to add customer or customer group details to your Retrospective Discount Scheme.

Warning: Schemes which are set up for customer groups must have a single nominated payee for their award.

Retrospective Detail Maintenance Screen

Select Retrospective Scheme Detail.

Use this screen to select the scheme details to which you want to add customers.

Fields:

Customer Group

Enter the customer group code..

Add Multiple Payees

Enter one of the following:

0 - To pay only the customer account number specified.

1 - To add multiple payees.

Note: Select 1 to add multiple payees, the Add Customer Detail window is displayed. Enter the percentage payment split that you want each customer in the group to receive from the Retrospective Discount Scheme. There must be more than one customer in the group and the

total percentages allocated to the customers must equal 100%. A warning message will be displayed if 100% split is not achieved.

Press **Enter** to validate and update your entries, and enter another customer account number.

Retrospective Scheme Copy

3/OED

Use this option to copy details from an existing Retrospective Discount Scheme to a new scheme. This is useful, for example, if a Scheme is due to expire or you want to create a new Scheme based on the details already set up in an existing Scheme.

Retrospective File Copy Screen 1

Select Retrospective Scheme Copy.

Use this screen to enter the number of the existing Retrospective Discount Scheme that you want to duplicate, and the new name to which you want to copy the details.

OE397	Distribution V3 -> V3 Financials	User GBJBAMV1	20/11/95
			15:24:14

9-29  SR  MW  KS  CL  IM  DM  II  STUDPROJ  KB  PKH316S1
  
```

Fields

For a full description of fields for this screen see Retrospective File Maintenance screen 2.

Press **Enter** to validate your entries, then select **F8=Update**. A message will be displayed to tell you that the new scheme has been created with the new name you specified.

Retrospective Day End Processing

20/OED

Select Day End.

Run this option daily to extract invoice details for all sales invoices generated for that day for all current Retrospective Discount Schemes. Invoice details are extracted according to the field settings entered in Retrospective File Maintenance screen 2, and in the Pricing Type Profile Maintenance screens 1 and 2 in Advanced Pricing.

Invoices will be eligible for inclusion in schemes if:

- The invoice are in the date range of the Scheme.
- Kit components are ignored.
- Customer/item combination satisfy the selection criteria.

Select **F8=Confirm Submit** to submit the batch job.

Retrospective Processing Period End

21/OED

Select Period End.

Note: This period end routine closes only Retrospective Discount Scheme periods, and is independent of any other System 21 period closing routines.

Use the period end routine to close the period duration set up on Retrospective File Maintenance screen 2.

This routine processes all sales invoice data that has been extracted by the Retrospective Day End Processing routine. From the Day End data of all sales to date, it calculates a prediction of what the sales achievement value will be at the end of each current Retrospective Discount Scheme. This information is included on an automatically generated Accruals Report.

However, if this Period End routine is run to process the last period of a Retrospective Discount Scheme, the prediction calculated is included on the Payments Report together with the exact payments to be made for each scheme.

You must run the following two additional routines to correspond with Payment Types 0 and 3, if specified on Retrospective File Maintenance screen 2.

0 - Cashbook Posting (Manual cheque)

Run the Retrospective Processing Cash Book Payments routine.

3 - Credit Notes

Run the Retrospective Processing Credit Note Creation routine.

Retrospective Period End Processing Selection Screen

Fields:

Period To Be Processed

Enter the period number in the format YYPP.

Note: Payments are made if you specify the scheme's end period, or if the scheme is a loan ledger. In all other circumstances the system will make accruals.

Select **F8=Confirm Submit** to submit the batch job.

Retrospective Payments Amend Processing

22/OED

Use this option to change the matured scheme's amounts and rates that are due to be paid. When you run the last Day End and Period End routines for a Retrospective Discount Scheme, payment records are generated for the matured scheme, and are shown on the payment report.

Retrospective Payments Amendments Screen 1

Select Payments Amend.

Use this screen to enter the number of the scheme you want to amend.

Fields

Sel

Select. Enter one of the following:

- 1 - To amend the details.
- 4 - To delete the details.

When you select a line, the line values for the following fields are automatically displayed at the bottom of the screen for you to change or delete:

- Attain Qty - The quantity of sales, in the item's issue unit of measure, over the scheme duration.
- Attain Value - The value of the sales quantity.
- Attain Rate - The discount rate, which is the same as the discount Pricing Type set up in Advanced Pricing.
- Achieve Value - The amount to be paid.

*Note: If you select a line with option 4 to delete the values, a message is displayed requiring you to confirm deletion by pressing **F11=Delete**.*

When you have finished making your changes, select **F8=Update** to update the system and return to the second Payments Amendments screen.

Retrospective Cash Book Payments Processing

23/OED

Select Retrospective Cash Book Payment.

Use this option if you specified Cashbook Posting as the Payment Type field on Retrospective File Maintenance screen 2.

Once you have run the last Period End routine for a Scheme which has the Cashbook Payment Type, use this batch job to generate the cashbook posting and produce a manual cheque from the Cash Management system.

Note: The physical cheque is still produced by the Cash Management system.

Select **F8=Confirm Submit** to submit the batch job.

Retrospective Credit Note Creation

24/OED

Select Retrospective Credit Note Creation.

Once you have run the last Period End routine for a Scheme, use this option to generate a credit note for the achieved value of the discount scheme.

This option produces a report which lists all credit notes that have been generated.

Note: You print the credit note in the usual way in Sales Order Processing.

Select **F8=Confirm Submit** to submit the batch job.

Retrospective Archiving

25/OED

Select Retrospective Archiving.

Use this option to purge completed Retrospective Discount Schemes.
