Chapter 5

Enquiries

Whole Order Enquiry

1/OEE

This enquiry provides a multi-level display of order details. From the display of the details of the whole order you can view a more detailed inspection of both order header and order line information. There are two ways to select the order you want to display; either select the sales order number or the customer and the order reference.

Whole Order Enquiry Selection Screen

Select Whole Order.

Use this screen to select the order you want to display.

OE205	Z1 - Demonstration Company	USER SP1	23/09/94 17:22:06
Whole Order Enquiry			
Order..	0000095	Customer?..	_____
		Order ref..	_____
F3=Exit F4=Prompt			

Fields:

Order

Enter the sales order number of the required order.

Tip: The order number must be blank in order for customers and order reference to work.

Customer

Enter the customer in conjunction with the customer order reference. You must enter the account code and the delivery sequence number.

Order Ref

If you choose to select the order using a customer then you must enter the order reference.

If this is left blank, it will only work if the customer has orders that do not contain an order reference.

Press **Enter** to display the Whole Order Enquiry Summary screen.

Whole Order Enquiry Summary Screen

To display this screen press **Enter** on the Whole Order Enquiry Selection screen.

This screen displays a summary of the order details. Order header information and a list of order lines are displayed. Use page up and down to scroll through the order.

There is a status code for each line on the order, these are:

Blank - No action has taken place.

A - Last action is an allocation.

I - Last action is a confirmation of despatch.

If you are running Advanced Order Entry then you can also see the following types of order line exception codes:

DD - Direct delivery.

BB - Back to back purchase order.

RS - Reservation.

NS - Non stock order line.

WO - Back to back production order.

If the order is suspended, a reverse image message is displayed at the top of the screen giving the reason for the suspension. This is followed by the three key dates from the order header:

- Order date - customer's order date.
- System order date - the date the order was entered into the system.
- Delivery required - the delivery due date for the order.

The order value information is then displayed both in the transaction currency of the account and in the base currency of the system. The final header information is dependent on whether the invoice price will be the price ruling at ORDER (code 1) or DESPATCH (code 2). A list of order lines is then displayed.

```

Fields:**Untitled**

Select. Enter one of the following:

- 1 - To display details.
- 2 - Any allocations for the order line can be viewed.
- 3 - Any reservations against the order line can be viewed.
- 4 - Any supply orders against the order line can be viewed.
- 5 - To review pricing details for Advanced Pricing only.

Functions:**F9**

Sec Value. The screen changes to display the despatch secondary value and the order secondary value. Items with no secondary values are blank.

*Note: The **F9** secondary value option is only available when catchweight is active.*

*Note: The **F9** option toggles between secondary value and **F9**-Quantity.*

F13

Further Detail. Display order defaults

F21

Text Entry. This displays the Maintain Text window where you enter or select a Usage Code and a Language Code for multi-lingual text entry. When you press **Enter**, the Item Text window is displayed. This is where you can enter text in the selected language to be displayed or printed on external documentation, for example despatch notes, according to the usage code selected.

You specify your customer's default language in Customer Details Maintenance in Sales Order Processing. You can override this default language by entering a different language code when **F16=Additional Overrides** function key is available.

Note: Language codes do not need to be selected in order to print text in the native language.

Secondary Value Details Screen (F9)

To display this screen select **F9=Sec Vals** on the Whole Order Enquiry Summary screen.

*Note: The **F9** secondary value option is available only when catchweight is active.*

*Note: The **F9** option toggles between secondary value and **F9-Quantity**.*

This screen displays order details - dates, order and base value do not change.

Invoice By Customer Enquiry

9/OEE

Use this enquiry to display details of invoices for a customer. The system displays a list of invoices, showing the total values, date and accounting period. You can select to view more details of an individual invoice in the same format as the Invoice by Invoice Number Enquiry.

Invoice By Customer Selection Screen

Select Invoice by Customer:

Use this screen to select the customer for which the invoices are to be displayed.

To view the consolidated invoices do not enter a delivery sequence code for the customer.

To view non-consolidated invoices and credit notes enter a delivery sequence code as part of the customer code.

Tip: If the delivery sequence is left blank, an error message is displayed if the customer has no associated consolidated invoices.

Press **Enter** to display the Invoices By Customer Enquiry Details screen.

Invoices By Customer Enquiry Details Screen

To display this screen select a customer on the Invoices By Customer Enquiry Selection screen and press **Enter**.

Use this screen to view the invoices and credit notes or consolidated invoices raised for a customer. Credit notes are identified by the suffix CR following values. The invoices are listed one document on each line. VAT with a cash settlement discount is indicated by an * in the right most position against the line.

Stock Availability Enquiry

22/OEE

This enquiry displays the following details for an item in a selected stockroom:

- Stock availability.
- Outstanding purchase and sales orders.
- Order lines requiring allocation of the item.
- Order lines already allocated to the item.
- Order lines with the item on pick.
- Reservations against purchase orders.

Stock Availability Enquiry Selection Screen

Select Stock Availability.

Use this screen to select the item and stockroom combination you wish to enquire upon. You must select both.

Press **Enter** to display the Stock Availability Enquiry Details screen.

Stock Availability Enquiry Details Screen

This screen displays the stock status and details of allocated and back orders.

- The upper part of the screen gives the current stock situation.
- The lower part of the screen shows both demand and supply orders in due date sequence, selected for the item. The quantity outstanding column shows the quantity needed for each unallocated order.

There are two values, calculated as running totals, associated with each order line:

- Available - This represents actual stock availability and is calculated by considering the current available stock less the sales order quantity of the line. No purchase orders are counted. If the value is negative, the orders will not be met without more stock being ordered before the due date.

Note: Current available stock is the stockroom available stock less sales order quantities from previous lines. Sales order quantity is the figure Qty Outstanding if it is a sales order line, that is, when the type is SO or SS.

- Expected - This represents expected stock availability and is calculated by considering the actual available stock (see above) plus outstanding supply order quantities. If the value is negative, the orders will not be met as the requested purchase order quantity is either not enough or the due date is too late.

Note: Outstanding supply order quantity is the figure Qty Outstanding if it is a supply order line, that is, when the type is PO. It represents currently unallocated and unreserved units from the supply order.

The current date (including the item lead time) is shown in asterisks.
