Chapter 3

Enquiries

Purchase Management Enquiries

This section covers the enquiry facilities.

Enquiries can be grouped into four categories:

- Outstanding Order Searches
- Order Details
- Sources of Supply
- Financial

Enquiry by Item

11/PMP

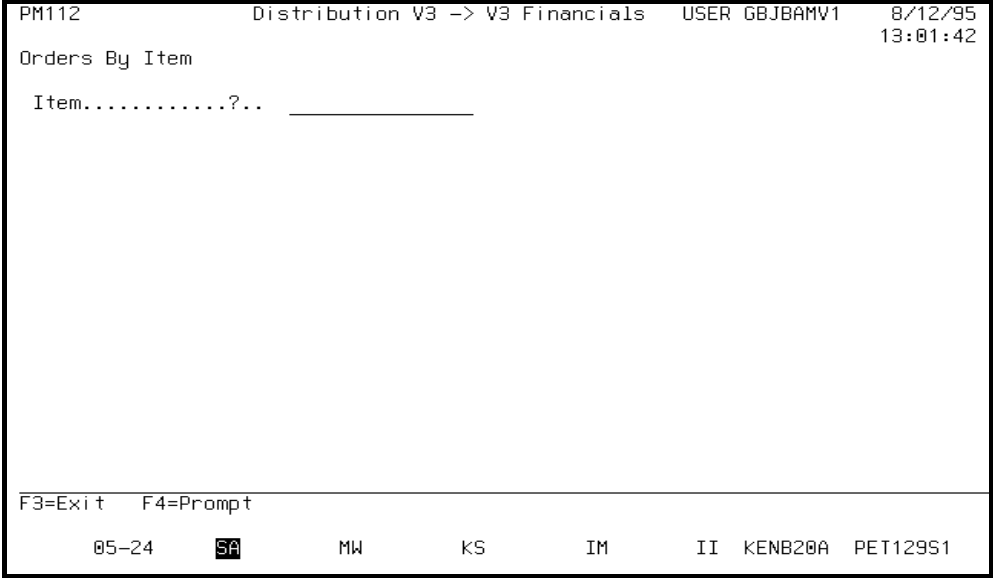

Select By Item from the Purchase Management Processing Menu.

You can view all outstanding orders for a particular stock item.

Orders By Item Select Screen

This screen allows you to enter the item number you wish to enquire upon.

PM112 Distribution V3 -> V3 Financials USER GBJBAMV1 8/12/95 13:01:42

Orders By Item

Item.....?.. _____

F3=Exit F4=Prompt

05-24  MW KS IM II KENB20A PET129S1

Fields:

Item

Enter a valid Item code, or use the standard search facility.

On entering a valid Item code and pressing **Enter** the details screen is displayed.

Orders By Item Detail Screen

This screen displays the current status of all outstanding order lines for the selected item. Detailed information may be selected for any displayed order.

PM112	Z1 - Demonstration Company	USER SP1	31/08/94 15:37:58
Orders By Item			
Item...?..	5017	Blackcurrent cordial bottle 1/2 ltr.

		31/08/94	10.000
		Flag	typ
1=Detail, 2=Text			
F3=Exit F4=Prompt			

Fields:

Item

The current item may be overwritten or prompted on, to select a new item for enquiry.

Class

Item class for the item. These classes are set up in Inventory Management Descriptions Maintenance under major type PCLS.

UOM

The issue unit of measure from the item master.

Standard Cost

The standard cost of the item from the item master.

For each order line displayed for the item, the following fields are shown. The lines are displayed in order date sequence.

Supplier

The supplier account code for the order.

Order No

Purchase order number.

Supplier Ref

The supplier's reference number or code for this order.

Asterisk (*)

An asterisk indicates that Text exists on the order.

Order Date

The date that the order was placed.

Stockroom

The stockroom to which the goods are to be delivered.

Order Quantity

The original order quantity.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Promised Date

The date that delivery of the goods is due.

O/S Quantity

The quantity yet to be delivered.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Flag

The Confirmation Flag value as entered during Order Entry/Amendment.

Typ

The type of schedule:

S - Scheduled Order

B - Blanket Order

Blank - Non-scheduled Order

Currency Order

Currency will only be displayed if the supplier's currency is different to your base currency.

*

In the selection column against an order, enter:

1 - to see further details of a particular order enter. This will take you into the Order Summary order lines screen.

2 - to see the internal text.

Note: All quantities are shown in the item issue unit of measure from the item master.

Functions:

F9

Quantity/(Short Description). This is a toggle function which is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Order Quantity and O/S Quantity fields.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the 9 character description of the secondary unit of measure, select **F9** to display the quantity of the item in these fields in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

Enquiry By Supplier

12/PMP

Select By Supplier from the Purchase Management Processing Menu.

You can monitor orders placed with a particular supplier. You can select all orders, or just those that are outstanding. Screens used in this procedure are:

- Select
- Details

Order By Supplier Select Screen

This screen is used to enter the supplier and order selection criteria for the Order by Supplier enquiry.

```
PM111      Distribution V3 -> V3 Financials   User GBJBAMV1   8/12/95

1=Detail, 2=Text
F3=Exit F4=Prompt

Fields:

Supplier

The current supplier may be changed, or prompted on, to select a new supplier for enquiry.

All/Outstanding

Selection from the previous screen but may be changed.

Phone

The telephone number of the supplier.

Name

The name of the supplier.

Supplier Currency

The currency of the supplier. Currency will only be displayed if the supplier's currency is different to your base currency.

For each displayed order, the following fields are displayed.

Order Number

The Purchase Order Number.

Flashing Asterisk (*)

A flashing asterisk indicates that internal order text exists for the order.

Adr Code

Despatch address code for the order.

Order Date

The order placement date.

Supplier Ref

The supplier's reference number or code for this order.

Ship Code

The code describing how the goods on this order are to be shipped. This is assigned in Order Entry/Amendment, on the Purchase Management Processing menu.

Cls

The order classification assigned to this order. The Order Classes are:

1,2,3 & 4 - Stocked or non-stocked items and services which require tracking via an item code.

5, 7 & 8 - Non-stocked items which do not require tracking via an item code.

6 - Service items which do not require tracking via an item code.

Typ

The schedule type for this order:

S - Scheduled Order

B - Blanket Order

Blank - non-scheduled.

Order Currency

If the order currency is different from the supplier currency, it will be displayed.

Job Number, Department

Job Number displayed only if they specified in Order Entry/Amendment.

Department

Department displayed only if they specified in Order Entry/Amendment.

*

In the selection column against an order, enter:

1 - To display the full details of the order. From here you can look at the receiving address and external order text, and you can maintain internal order text.

2 - To display the internal order text, if any, for the order.

Enquiry by Order

13/PMP

Select By Order from the Purchase Maintenance Processing Menu.

You can view orders by order number.

Order Summary Select Order Screen

This screen allows you to enter the order number that you wish to enquire upon.

```
PM109      Distribution V3 -> V3 Financials  User GBJBAMV1  8/12/95

Fields:

Order

The order number entered on the select screen. A new order may be selected from this screen by overtyping the order number.

Supplier

The supplier code and name for this order.

Date

The order placement date.

Phone

The supplier's telephone number.

Currency

The currency of the order (only displayed for a multi-currency supplier).

Purchasing Officer

The code and name of the purchasing officer responsible for this order.

Ref

The supplier's order reference or acknowledgement number for this order.

Ship Code

The ship code of the order.

Class

The description of the class of this order.

Delivery Instruction Set Code

This identifies the set of delivery instructions assigned to this order.

For each line (or each scheduled delivery for a schedule type order), the following fields are displayed:

Line

The order line number.

Item

The item code or the supplier's item reference for non-stock orders.

Cost Code

The cost code for a non-stock order item is assigned on entering the order line. For a stocked item this defaults to the COE assigned in Inventory Management.

Sr

The stockroom that the order has gone to or will go to.

Qty. Ordered

The original order quantity.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Qty. Received

The quantity received to date.

Qty. Outstanding

The quantity outstanding.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Qty. Invoiced

The quantity matched to date with invoices.

UOM

The code defining the unit of measure in which the above quantities are expressed.

Price

The price per unit, in the order currency, for this item.

Due Date

The date this line or schedule quantity is due to be received.

Select *

In the selection column against any line, enter:

- 1 - To display the order line text screen
- 2 - To display the order line status screen
- 3 - To display the line receipts screen
- 4 - To display reservations
- 5 - To display landed costs
- 6 - To display allocations
- 7 - To display GL extension code

The first line of any order line text is also shown.
Use the **Roll** keys to page through all lines on the order.

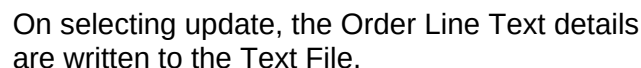

Functions:

F9=Quantity/(Short Description).

This is a toggle function which is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Order Quantity and O/S Quantity fields.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the 9 character description of the secondary unit of measure, select **F9** to display the quantity of the item in these fields in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

Order Summary Order Line Status Screen (Option2)

You can view the status of a particular order line by entering 2 against the line. The Order Line Status screen is displayed.

			.000
F3=Exit F12=Previous F21=Line Text			

Fields:

Order

The selected order number.

Ln

The selected order line.

Supplier

The supplier's code and name.

Item

The item ordered, or the supplier's reference for a non-stock order.

Stockroom

The stockroom the order has gone to or will go to.

Description

The description of the item ordered.

Order Qty

The original order quantity.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to*

display the quantity of the item in this field in either primary or secondary units of measure.

UOM

The item issue unit of measure code and its description.

Qty Rec'd To Stock

The total quantity received into stores.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

O/S Qty

The first line shows the total outstanding quantity in the above UOM. Subsequent lines detail how this quantity is to be delivered, by quantity and date for schedule/blanket orders.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Promise Date

The date the outstanding quantity is due to be delivered. In the case of returns this date will be the date of return, i.e. returns become immediately due for receipt.

Qty At Goods Inward

The quantity so far received at Goods Inwards.

This quantity is considered to be on order by Inventory Management.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Qty At Inspection

The quantity so far received at Inspection.

This quantity is considered to be on order by Inventory Management.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Quantity Scrapped

Quantity so far returned and/or scrapped.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Functions:

F9=Quantity/(Short Description).

This is a toggle function which is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Order Quantity and O/S Quantity fields.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the 9 character description of the secondary unit of measure, select **F9** to display the quantity of the item in these fields in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

Order Enquiry Line Receipts Screen

You can display the line receipts for an order by entering 3 against any order line. The Line Receipts screen is displayed.

F3=Exit F12=Previous F21=Line Text			

Fields:

Order

The selected order number.

Ln

The selected order line number.

Supplier

Code and name of supplier against whom the order was raised.

Item

The item ordered on the selected order line, or the supplier's reference for non-stock orders.

UOM

The code and description of the unit of measure of the ordered item.

Stockroom

The receiving stockroom specified for the line.

Description

The description of the ordered item.

For each receipt made against the selected order line, the following fields are displayed:

Receipt Date

The date of receipt.

Advice Note

The supplier's advice note number as entered in Goods Receiving.

GRN No

The Goods Receipt Note number assigned to this receipt.

Quantity/Unit

The receipt quantity and the associated unit of measure.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Loc

The location into which the receipt was booked:

G - Goods Inwards

I - Inspection

S - Stores.

Scrap Code

In the event of a return or scrap, the code defining the reason for the return is displayed.

Batch Lot No

The internal reference or batch/lot/serial number assigned to this receipt in goods receiving.

Order Quantity

The original order quantity.

Functions:

F9

Quantity/(Short Description). This is a toggle function which is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Quantity field.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the 9 character description of the secondary unit of measure, select **F9** to display the quantity of the item in this field in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

Order Summary Reservations Window (Option 4)

In Advanced Order Entry, you can take a sales order for an item, and then reserve quantities against purchase orders for the item.

You can display reservations made against the selected purchase order line by entering 4 against it. The Reservation Enquiry window is displayed.

Fields:

Code

From the select screen.

Supplier

The supplier against which the order was placed.

Order No

The number assigned to this order.

Order Date

The order placement date.

Order Quantity

The original order quantity for this order line.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Stockroom

The stockroom to receive this order line.

Receipt Date

The date this delivery is expected.

O/S Quantity

The quantity yet to be delivered.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Typ

The type of order:

S - Scheduled order

B - Blanket order

Blank - Line order, non-scheduled.

Flg

The confirmation flag value as set in Order Entry/Amendment.

Supplier Ref

The supplier's order reference or acknowledgement number for this order.

You can enter information in the following fields:

Cost Code

The outstanding order details for another cost code may be displayed by overtyping the cost code in this field.

*

1 - to display the Order Summary for the selected order.

2 - to display the Internal Order Text.

Functions:

F9

Quantity/(Short Description). This is a toggle function which is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Order Quantity and O/S Quantity fields.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the 9 character description of the secondary unit of measure, select **F9** to display the quantity of the item in these fields in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

Enquiry by Job Number

B - Blanket order

Blank - Line order (lines not scheduled).

*

The following options are available:

1 - to display order line detail screen.

2 - to display order line text screen

Functions:

F9

Quantity/(Short Description). This is a toggle function which is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Order Quantity and O/S Quantity fields.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the 9 character description of the secondary unit of measure, select **F9** to display the quantity of the item in these fields in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

Where Bought Enquiry

20/PMP

Select Where Bought from the Purchase Management Processing Menu.

This procedure displays a list of suppliers who can supply a selected item as set up on the item/supplier profile. It highlights the current cheapest supplier for the quantity of the selected item which you require. For any displayed supplier, a list of all receipts of the item from the selected supplier can be shown. Screens used in this enquiry are:

- Select Item
- Suppliers
- Receipts History

Where Bought Select Item Screen

This screen enables you to select the item, type of enquiry, and the quantity of the item which you require.

PM114	Z1 - Demonstration Company	User SP1	31/08/94 15:44:07
Item - Where Bought ?			
Item?.. 5017			
Enquiry Type 1 1=Summary,2=Detail			
Quantity Required.. _____			
F3=Exit F4=Prompt			

Fields:

Item

Enter a valid item code, or select one from the item search.

Enquiry Type

- 1 - Display a list of suppliers for this item.
- 2 - Display a full receipts history for all suppliers of this item. The quantity field must remain blank for this option.

Quantity Required

This field is only valid on selecting option 1 (summary details). It can be left blank, but if entered it will be used in finding the cheapest price from any item supplier price structures which exist for this item.

For example, a supplier may give significant bulk discounts, and may be identified as the cheapest supplier if a large quantity is to be ordered. However, ordering from this supplier may not be so cost effective if smaller quantities were required. So if you put a lower quantity in this field, another supplier may be identified as the cheapest.

Price structures are set up in the item supplier option on the Purchase Management Maintenance menu.

On Entering 1 in the Summary/Detail field the Suppliers screen is displayed.

On Entering 2 in the Summary/Detail field the Receipts History screen is displayed.

Where Bought Supplier Screen

A bright flashing asterisk (*) is displayed against the supplier(s) with the cheapest price. In calculating the cheapest supplier both discount and any currency are taken into account.

A flashing asterisk (*) is displayed against a supplier if item supplier text exists.

F3=Exit F4=Prompt F12=Previous			

Fields:

Item

The selected item and its description. Enter a new item or prompt to search and select an item.

Summary/Detail

The current selection may be overwritten, to re-display this summary screen for a different item, or to display the receipts history detail screen (the quantity field must be blank for this).

Item Class

The class code and description to which the selected item is assigned. This is set up in Item Maintenance in Inventory Management.

Quantity

The required quantity from the previous screen. The quantity required may be overwritten to request prices for a different quantity.

Alternative Item

Another item which may be used as an alternative to the selected item.

Purchasing UOM

The code defining the unit default in which the item is purchased.

For each supplier of the item, the following details are shown:

Supplier

The supplier code.

Name

The name of supplier.

Current Price

The current price for the selected item from this supplier. This is per purchasing unit of measure and expressed in the supplier's currency.

Cc

The currency code of the supplier is displayed if it is different from your company's base currency.

Disc %

The percentage discount given by this supplier for the selected item.

Terms

Payment method from the purchase supplier details file.

Last Change

The date of the last price change.

Supplier Item Ref

The supplier's item reference for the selected item.

Lead Time

The lead time in days for the selected item when ordered from this supplier.

*

In the selection column against an item, enter:

1 - to display item supplier text.

2 - to display the receipts history screen for this supplier only (see Where Bought - Receipts History).

Where Bought Receipts History Screen

This screen displays a list of all receipts of a selected item, or all receipts of a selected item from a selected supplier, depending on previous selections. This example shows the display for a single supplier:

PM116	Z1 - Demonstration Company	User SP1	31/08/94 15:44:22

000006	4	31/08/94	01 10.000 CA
F3=Exit F12=Previous Screen			

Fields:

Item

The item and its description.

Item Class

The Item Class as set up in Inventory Management Item Maintenance.

Alternative Item

An item that may be used as an alternative to the selected item.

UOM

The code and description of the item issue unit of measure for the item.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the UOM of the item in this field in either primary or secondary units of measure.*

Supplier

The supplier code and name are displayed at the top of the screen if a single supplier was selected.

For each receipt of the item, the following details are shown:

Supplier

The supplier of the item. This is displayed for each receipt only if receipts from all suppliers were selected.

Order

The order number against which this receipt was made.

GRN No

The Goods Receipt Number assigned to this receipt.

Date

The date on which the receipt was made.

Receipt Stockroom

The stockroom of the order line. This is displayed for each receipt, if receipts from only one supplier is selected.

Quantity

The quantity received, expressed in the item issue unit of measure.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

UOM

The order line price unit of measure. This is only displayed if you are looking at details for only one supplier.

If invoice matching has taken place for this receipt, then the following is displayed:

Invoice Price

The price paid for the item on this occasion. Expressed in the price unit of measure displayed for the line.

CC

The currency of the order.

Invoice

The invoice log reference number against which the receipt has been matched.

Further screens of receipts may be displayed by using the **Roll** keys

Functions:

F9

Quantity/(Short Description). This is a toggle function which is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Quantity field.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the 9 character description of the secondary unit of

measure, select **F9** to display the quantity of the item in this field in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

What Bought Enquiry

21/PMP

Select What Bought from the Management Processing Menu.

This procedure displays a list of items supplied by a selected supplier. Either stock or non-stock items may be displayed. For any selected item, item/supplier text or receipts history may be requested for display. Screens used in this enquiry are:

- Select Supplier
- Stock Items
- Receipts History - Stocked Items
- Receipts History-Non-stock

What Bought Select Supplier Screen

This screen enables you to select the supplier to enquire upon, and the type of enquiry you wish to make:

T=Text 2=History
F3=Exit F4=Prompt F12=Previous Screen

Fields:

Supplier

The name of the selected supplier.

This may be prompted on and overtyped to display details for another supplier.

Currency

The currency in which the supplier operates. This is only displayed if the supplier's currency is different to your company's base currency.

Enquiry Type

The type of enquiry selected, either stock or non-stock.

Phone

The telephone number of the selected supplier.

For each item supplied by the selected supplier, the following is displayed:

Item

The item bought from the supplier.

Supplier Item Ref

The supplier's reference for the item.

Lead Time

The lead time in days for this item when supplied by the selected supplier.

Price

The current price for this item when supplied from the selected supplier, per the displayed unit of measure in the supplier's currency.

Disc

The percentage discount given on this item by the supplier.

UOM

The code defining the price unit of measure for the item.

*

In the selection column against an item you can enter:

- 1 - To display item supplier text.
- 2 - To display receipts history for this item supplier combination

Note: A flashing asterisk () is displayed against an item for which item supplier text exists.*

What Bought Stock Items Receipts History Screen

This displays a history of receipts from the selected supplier, for stock items only. It is displayed by entering 2 against an item on the Stock Items screen.

PM116	Z1 - Demonstration Company	User SP1	31/08/94 15:45:16
Receipts History			
Item	5001	Suncream Factor 4 225ml	
Item class	2		
Stock UOM	BX BX	Alternative item	
Supplier	GS02	Coles Commercial Chemicals Ltd	
Phone	0375 490406		
OrderNo	GRN No	Rcpt date	SR Qty Invoice price UOM CC Invoice
000003	1	31/08/94	01 200.000 CA
000003	2	31/08/94	01 200.000 CA
F3=Exit F12=Previous Screen			

Fields:

Item Code

From the What Bought - Stock Items screen.

Item Class

Stock Unit Of Measure

Alternative Item

Supplier

Currency

Order No

The order number against which this receipt was made.

GRN No

The Goods Receipt Note number assigned to this receipt.

Rcpt. Date

The date on which receipt was made.

Sr

The stockroom allocated to this order line.

Qty

The quantity received, expressed in the item issue unit of measure.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

Invoice Price

The invoice price per unit (this is only displayed if matching has taken place).

UOM

The unit of measure in which the price is expressed.

Cc

Currency code, if different to the base currency.

Invoice

The invoice number against which this receipt has been matched (this is only displayed if matching has taken place).

Further screens of receipts may be displayed by using the **Roll** keys.

Functions:

F9

Quantity/(Short Description). This is a toggle function which is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Quantity field.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the 9 character description of the secondary unit of measure, select **F9** to display the quantity of the item in these fields in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

What Bought Non Stock Items Receipts History Screen

This displays a history of receipts from the selected supplier, for non-stocked orders only. It is displayed by entering 2 in the enquiry field on the Select Supplier screen.

F3=Exit F12=Previous Screen

Fields:

Tel

The telephone number of supplier.

Currency

Supplier's currency. This is displayed only if the supplier's currency is different to your company's base currency.

For each non-stock receipt against the selected supplier, the following is displayed:

Supplier Item Ref

The supplier's reference used to identify the item.

Order

The order number against which this receipt was made.

GRN No.

The Goods Receipt Note number assigned to this receipt.

Rcpt Date

The date on which receipt was made.

Sr

The stockroom allocated to this order line.

Quantity

The quantity received, expressed in the order unit of measure.

UOM

The unit of measure in which the quantity is expressed.

Invoice

The invoice number against which this receipt has been matched (if matching has taken place).

Further screens of receipts may be displayed by using the Roll keys.

Landed Costs Enquiry

22/PMP

Select Landed Costs from the Purchase Management Processing Menu.

You can view the landed cost values that have been attached to a purchase order.

The screens used in this enquiry are:

- Select
- Select Order
- Detail

Landed Cost Enquiry Select Screen

This screen allows you to enter the selection criteria for the Landed Costs Enquiry.

PM102Z1 - Demonstration CompanyUSER SP131/08/9411:30:08

Landed Costs Enquiry

GRN No..... 7

Line No.....

Or

Item.....?..

Receipt Date..

F3=Exit F4=Prompt

Fields:

GRN No

A valid Goods Receipt Note number. The GRN must have landed costs against it, otherwise an error message will be displayed

Line No

The line number, if known, associated with the selected GRN, upon which you wish to enquire for landed costs.

Or

Item

A valid item.

Receipt Date

A valid date.

When you have made valid selections, press **Enter**. If only one line matches the selection, the details screen is displayed. Otherwise, a list of matching lines is presented, from which you may select a line to view landed costs.

If just the product number is entered then all purchase orders (and landed cost details) are displayed for that product. If a receipt date was also entered then only purchase orders that match the receipt date, and product, will be displayed.

Press **Enter** to validate and display the Select Order screen.

Landed Cost Enquiry Select Order Screen

You can select order lines to enquire on landed costs. At the top of the screen any selection criteria entered on the previous screen are displayed.

PM102	Z1 - Demonstration Company	USER SP1	31/08/94 11:30:14

-	000009	3	4/08/94	5020	GS01	750.000
1-Select						
F3=Exit F12=Previous						

Fields:

Order

The purchase order number.

Line

The specific line number from the purchase order.

Seq

The blanket/sequence number.

Date

The receipt date.

Item

The code of the item on the purchase order line.

Supplier

The supplier of the order.

Transaction Quantity

The number of units of the item for the line.

Enter 1 beside any line and press **Enter** to display landed costs for that line.

Landed Cost Enquiry Detail Screen

This screen displays Landed cost values for the selection criteria previously entered.

Fields:

Currency

The order currency is displayed, if it is different to your company's base currency.

Code

Landed cost code with description.

Item

The item ordered, if GRN No. was selected on the previous screen.

Receipt Date

Date of receipt of the line.

UOM

Receipt unit of measure.

Landed Cost

Landed cost value for the receipt line.

Note: No amendment is possible from this screen. Amendments must be made using the Landed Costs option.

Invoice Enquiry

23/PMP

Select Invoice Enquiry from the Purchase Management Processing Menu. This procedure displays details of all receipts matched against a specified Invoice Reference Number, or returns matched against a Credit Note Reference Number.

Invoice Enquiry Select Screen

This screen allows you to enter a document type and reference for Invoice Enquiry.

PM162	Z1 - Demonstration Company	User SP1	22/09/94 18:02:20
Invoice Enquiry			
Enter document type <u>IN</u> Reference. <u>00000005</u>			
F3=Exit			

Fields:

Enter Document Type

Enter IN for invoice, CR for credit.

Reference

Enter a valid reference number associated with a matched invoice, credit note, or journal.

On entering valid values in both fields, the detail screen is displayed for the selected document.

Invoice Enquiry Detail Screen

This screen displays details for the document type and reference previously entered

F3=Exit F12=Previous Screen F21=Invoice Text			

Fields:

Ref

The selected reference number.

Type

The selected document type.

Date

The date the invoice was entered on the invoice log.

On Log

This legend is displayed if the item is still on the Accounts Payable log. This would occur prior to carrying out a log to ledger transfer.

Supplier

The name of the supplier on the selected document.

Currency

The currency of the order, if the order was carried out in a currency other than the currency of your company.

Ord. Val

The order value of the goods matched.

Adj

The value of additional dissections made at invoice matching time. This is displayed if such dissections were made.

VAT

The VAT value from the Accounts Payable log.

Gross

The total invoice value from the Accounts Payable log.

For each receipt matched to the selected document, the following is displayed:

GRN No

The Goods Receipt number assigned to this receipt.

Receipt Date

The date of the receipt.

Ord. No

The order number against which this receipt was made.

Quantity

The receipt quantity matched with this invoice.

*Note: If catchweight is used for this company and the item has a secondary value, press **F9** to display the quantity of the item in this field in either primary or secondary units of measure.*

UOM

The code defining the unit of measure relating to the above quantity.

Order

The order price of this item.

Invoice

The invoice price of this item.

UOM

The code defining the unit of measure in which the order and invoice prices are expressed.

Item

The item received.

*

Enter 1 in the selection column against any receipt to display order line text.

Further screens of matched receipts may be displayed by using the Roll keys.

Functions:

F9

Quantity/(Short Description). This is a toggle function which is only displayed when catchweight is used for this company and the item has a secondary value.

When **F9=Quantity** is displayed at the bottom of the screen, select **F9** to display the quantity of the item in the Quantity field.

When **F9=(Short Description)** is displayed at the bottom of the screen, where (Short Description) is the 9 character description of the secondary unit of measure, select **F9** to display the quantity of the item in this field in the secondary unit of measure. The abbreviation of the secondary unit of measure is displayed on the screen by the appropriate fields.

F21

Invoice text can be displayed by taking **F21=Invoice Text**.
