Chapter 6

Utilities

Purchase Management Utilities

The Purchase Management application provides a number of utilities for database reorganisation and verification. The options placed on the Utilities menu are not required for the normal day to day operations of the application.

The utilities provide the following facilities:

- The copying of company data
- The purging and reorganisation of the database
- Item search rebuilding
- Supplier price update

This section deals with these utility procedures, which are found on the Utilities menu.

Note: The Maintain Company Profiles option is dealt with in the Application Set Up section.

Copy Company

1... 2/PMU

You can create a new company quickly and easily by copying an existing company. The company being copied must exist in the Purchase Management application. There is also the option to copy just the existing parameter types and parameter details from one company to another already existing company.

PM150	Purchasing System Utilities Menu	User SP1	31/08/94 17:10:52
Copy Companies			
From Company	__	? to prompt	
To Company	__		
Miscellaneous codes only? 1=Yes,0=No	0		
F3=Exit F4=Prompt			

Fields:

From/To Company

The codes of the company you wish to copy from and the company you wish to create.

If you are creating a new company. The From company must be a valid company, and the new company cannot be an existing one.

If you are copying the Company Profile and parameters from one company to another, both companies must exist in Purchase Management.

Miscellaneous Codes Only?

- 1 - The Company Profile and parameters are copied to the new company.
- 0 - All details are to be copied.

Cancelled Order Purge

1... **2...** 3/PMU

Orders are cancelled for a variety of reasons. This option exists to enable cancelled orders to be purged for a particular company, so clearing these unwanted records.

PM805	Purge Cancelled Orders Utility	User SP1	31/08/94 17:11:20
Company Code <u> </u> Enter required company code			
Order Number <u> </u>			
Enter order number to be purged, or leave blank to purge all cancelled orders for requested company			
F3=Exit			

Fields:

Company Code

The company code of the company you require the cancelled orders to be removed for. The company must exist in Purchase Management.

Order Number

You can delete all of the cancelled orders for a company by leaving this field blank.

You delete a single order by entering the order number.

When deleting a single order, the application will check that the order exists and is cancelled.

Press **Enter** to delete the order(s).

Order Clearance Select Parameters

1... 4/PMU **2...**

You can purge historical data from the Purchase Management database, enabling completed (fully received and fully invoiced) orders to be cleared from the database. A specified number of transactions can be kept for each item supplier profile.

PM400	User SP1	31/08/94 17:11:40
-------	----------	----------------------

Order Clearance - Select Parameters

Any records matched before the entered date will be eligible for deletion.

A specified number of transactions will be retained on file for each item/supplier if an entry is made to the 'retain' field.

Enter Company Code: _____

Enter Invoice Matched Date: _____

Enter number of transactions
to be retained per item/supplier: _____

F3=Exit

Fields:

Enter Company Code

The company code of the company for which you require to clear orders. The company must exist in Purchase Management.

Enter Invoice Matched Date

Orders matched with an invoice (and therefore completed) up to this date are eligible for clearance in this procedure. No orders completed after the cut-off date are deleted.

Enter Number Of Transactions To Be Retained Per Item/Supplier

If blank all orders completed up to the aforementioned cut-off date are deleted. If a number is entered in this field, then that number of transactions are retained as a minimum for each item supplier. You can retain some transactions to provide historical data for the Purchase Management report options.

Press **Enter** to purge completed orders.

Reconciliation Reports

You can print an exception report for item supplier profiles and purchase order details.

PM154	Purchase Management Utilities Menu	User SP1	31/08/94 17:15:00
Reconciliation Reports for company Z1			
1. Item/Supplier Profile validation			
3. Orders File validation			
Enter Option _			
F3=Exit			

Fields:

Enter Option

1 - Item supplier validation. This produces an exception report on the following conditions:

No records for a company.

No suppliers.

Suppliers not active.

Zero prices.

3 - Order file validation. This produces an exception report on the following conditions:

No supplier found

Supplier not active

No purchase officer

No order header

Press **Enter** to run the report.

- Where Inventory Management is installed prior to Purchase Management. In such a situation the Purchase Management index would not have been maintained on an item by item basis. This procedure will bring the index up to date with the latest Item Master data.
- Where Inventory items have been converted from another application using specially written computer programs, this facility may be used to build the index for converted items.

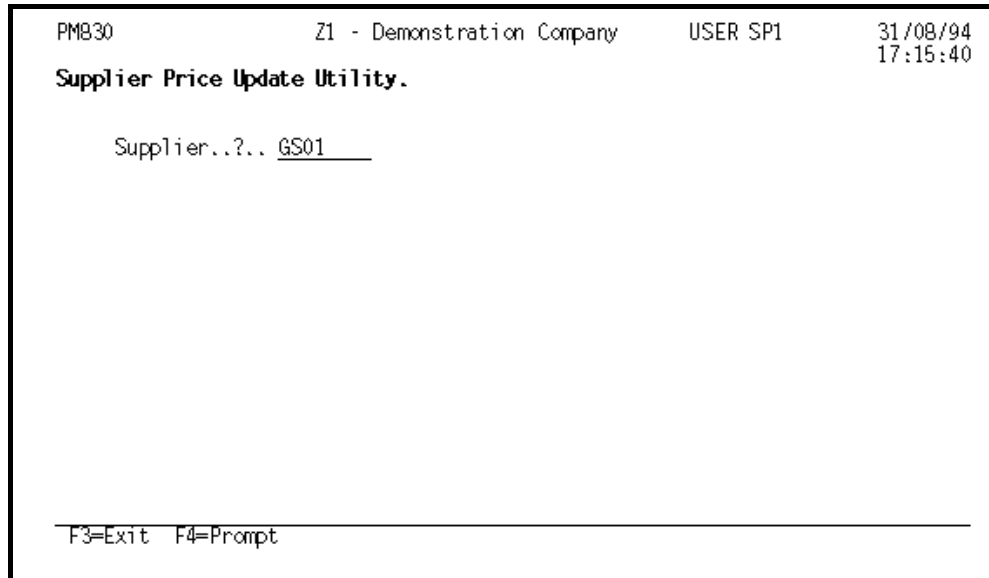

The Create Item Search Index window requests you to press **F8** to run the utility or **F3/F12** to cancel.

Supplier Price Update

You can apply a percentage increase across all price structures for a selected supplier .

Supplier Price Update Select Screen

This screen allows you to enter the selection criteria for Supplier Price Update.
