## Chapter 2

### Maintenance

# Item Maintenance

**1/SAM**

Select Items to display the first Item Maintenance screen.

You can use this option to add and amend Items. For more information see Inventory Management.

# Customer Maintenance

**2/SAM**

Select Customers to display the first Customer Maintenance screen.

You can use this option to add and amend Customers. For more information see Sales Order Processing.

# Description Maintenance

**3/SAM**

Select Descriptions to display the first  
Descriptions File Maintenance screen.

You can use this option to add and amend Descriptions. For more information see  
Inventory Management.

# Calendar Maintenance

## 4/SAM, 6/SAP

You can use a sales analysis calendar to group sales into time periods that are independent of any financial or manufacturing calendars. This calendar translates a date into a sales year, period and week.

*Note: The Sales History Update option uses the same programme to let you check that your calendar details exist before you update the Sales History Database with sales information from invoices.*

## Calendar Maintenance Selection Screen

Select Calendar.

Use the Calendar Maintenance Selection screen to select the calendar you want to change.

|                             |                            |                   |                     |
|-----------------------------|----------------------------|-------------------|---------------------|
| SA020                       | Z1 - Demonstration Company | USER SP1          | 8/09/94<br>16:27:55 |
| <b>Calendar Maintenance</b> |                            |                   |                     |
| Year... <u>94</u>           | Type... <u>1</u>           | (1=period/2=week) |                     |
| F3=Exit                     |                            |                   |                     |

### Fields:

#### Year

Enter the year for which you want to maintain a calendar.

#### Type

Enter one of the following calendar types:

- 1 - To maintain end dates for periods.
- 2 - To maintain end dates for weeks.

Press **Enter** to display the Calendar Maintenance Details screen.

## Calendar Maintenance Details Screen

To display this screen select a calendar on the Calendar Maintenance Selection screen and press **Enter**.

This screen displays the year, broken down by the number of periods or weeks in the year depending on the calendar type (the number of periods or weeks being obtained from the company profile).

| F3=Exit   F8=Update   F12=Previous          |                               |               |                     |

### Fields:

#### Period

Displays the periods in the year. If there are more than 13, you can use the Page up and Page down keys to see them all. The system highlights the current Sales Analysis period.

*Note: Enter the following fields for each period.*

#### End Date

Enter the calendar date on which the period-ends. If you enter the date for the first period and press Enter, the system generates the remaining end dates. You can either accept or edit these dates.

#### Elapsed Days

Enter the number of elapsed days. This is for your reference and is not maintained by the system.

#### Selling Days

Enter the number of selling days. This is for your reference and is not maintained by the system.

Tip: If you have chosen to access the Sales History Update option, the batch job updates the Sales History Database with details of invoices from Sales Order Processing.

*Note: This procedure may take some time to complete, depending on the volume of data being processed.*

*Note: You must enter a calendar that includes all dates you expect Sales Analysis to encounter. If holding details at weekly level, you must create a calendar for both period and week end dates.*

Select **F8=Update** to update the calendar with the details entered.

# Budget Formats Maintenance

## **1...** **2...** 5/SAM

You can define the levels at which budgets can be held. Define each budget in terms of one customer attribute and/or one item attribute and a value you want to budget. Within the Sales Analysis application, this definition is called a Format.

## Sales Budget Definition Selection Screen

Select Budget Formats.

Use this screen to select the Sales Budget Definition.

|                                |                            |          |                     |
|--------------------------------|----------------------------|----------|---------------------|
| SA130                          | Z1 - Demonstration Company | USER SP1 | 8/09/94<br>16:29:53 |
| <b>Sales Budget Definition</b> |                            |          |                     |
| Format.?. . <u>01</u>          |                            |          |                     |
| F3=Exit F4=Prompt              |                            |          |                     |

### Field Description:

#### Format

Enter a two character code for the budget format that you wish to add or edit.

Press **Enter** to display the Sales Budget Definition Budget Level Screen.

## Sales Budget Definition Budget Level Screen

To display this screen enter a Budget code and press **Enter** on the Sales Budget Definition Selection Screen.

Use this screen to select the customer and/or item attribute for which you want to maintain the budgets.

### Fields:

#### (Untitled)

Select. Enter 1 to choose up to four values you wish to use.

Press **Enter** to create the budget format and display the Sales Budget Definition screen.

# Spread Profiles

## 6/SAM

You use this procedure to maintain a profile detailing the distribution over the year of budgeted sales. The system uses the profile to spread annual budgets over the periods in the year.

## Maintain Spread Profiles Selection Screen

Select Spread Profiles.

Use this screen to select the spread profile that you wish to create or maintain.

### Fields:

#### Enter The Code Of The Profile To Be Maintained

Enter an existing profile code to maintain it, or a new code to create a new profile.

Press **Enter** to display the Maintain Spread Profiles Details screen.

## Maintain Spread Profiles Details Screen

To display this screen, enter a profile code and then press **Enter** on the Maintain Spread Profiles Selection screen.

Use this screen to maintain for each period, the percentage of the total year's budgeted sales, and a description of the profile. When you enter budget details, you can use this spread profile to spread a year's total sales over the periods according to the percentages or the spread profile.

### Fields:

#### Period %

For each period, enter the percentage of total demand sales that you wish to budget for the period.

Tip: The percentages for all the periods must total 100%.

#### Profile Description

Enter a description of the profile using up to 30 characters.

Select **F11=Delete** to delete an existing profile.

Press **Enter** to update the profile.

# Budgets

## 7/SAM

You use the Budget function to manually enter the Sales Budgets, as defined by previously created budget formats and types.

## Maintain Sales Budgets Selection Screen

 Select Budgets.

Use this screen to select the budget format and type of the budget you want to maintain.

### Fields:

#### Period Total

Enter a spread profile, and a value that you wish to spread over the year. Enter the spread profile and year total and press Enter to pre-fill the remaining entry fields.

#### OR

For each period, enter the budgeted value for that period only, leaving the spread profile and total fields at the top of the screen blank.

Enter a spread profile and year total, then press **Enter** to calculate the spread total over the periods and pre-fill the fields. Select **F8=Update** to write these values to the budget file.

Leave the spread profile and year total blank, and only enter the values for each period, then press **Enter** to calculate the total, and select **F8=Update** to write the values to the budget file.

# Report Specifications

## 8/SAM

Use this option to add and edit sales report specifications.

## Maintain Report Specifications Selection Screen

Select Report Specifications.

Use this screen to select the Report Reference.

## Fields:

### Report Name

Enter up to 50 text characters to describe the report.

### Sequence

Enter a number from 1 to 5 to specify the report sequence. 1 is the lowest level of detail. If you wish to report only on sales of items, then enter a 1 against the Item field. Totals are produced automatically. If you wish to generate a report at several levels, for example, items within customers, then place a 1 against Item and a 2 against Customer. Totals are then produced for each customer, along with a final total.

### Descend

Enter 1 to indicate that you want to print the selected field values in descending order. Leave blank for ascending sequence.

### **New Page**

Enter 1 to indicate that the report should skip to a new page when the value of the field changes. This only applies to fields selected for sequencing.

### **Budget**

Enter 1 to show budget details on the report. The budget fields must be sequence fields and a budget format must exist.

Tip: The selection criteria available on this screen depends on that chosen when you define your database.

## **Functions:**

### **F11**

Delete Specification. Use this to delete an existing specification.

Press **Enter** to display the Maintain Report Specifications Records Selection screen.

# Maintain Report Specifications Records Selection Screen

To display this screen enter the sequence details and then press **Enter** on the Maintain Report Specifications Sequence screen.

Use this screen to specify the database records you want to include in the report, based on field values. Use the Page up and Page down keys to display more fields.

### Fields:

#### Save Specification

Enter one of the following:

- 1 - To save the report specifications for use again.
- 2 - To delete the specifications after the report has run.

#### Produce At End Of

Enter 1 against the time period when you want to produce the report. The system will run the report when the appropriate period-end update is submitted.

Tip: If you do not want to run the report at regular times but on request, enter a 1 against Ad-hoc.

#### Format

Enter one of the following for the report format:

- 1 - YTD. The report displays This Period and Year To Date figures.
- 2 - PTD. The report displays This Week and Period To Date figures.
- 3 - Both. Produce two reports displaying both the above detail levels.

#### Submit Report Now

Enter one of the following:

1 - To submit the report now.

0 - To request the report later.

### **Budget Type**

This field is only available for budget reports.

### **Budget Format**

This field is only available for budget reports. It displays the associated budget format that matches the requested Customer/Item attribute.

### **Exclusion Type**

*Note: This field defaults to 1 and may be left as 1 if Sales Kiting is not being used.*

Where kiting is in use, this indicator determines how the application handles possible double counting, caused by posting both kit parent sales and kit component sales to Sales Analysis from Sales Order Processing.

Enter one of the following:

1 - To exclude components from the report, if both kit parents and components have been posted.

2 - To exclude parents if both have been posted.

0 - there are no exclusions and possible double counting.

### **Values**

Select up to four values for inclusion in the report by entering 1 to 4 against the values required.

### **Actual**

Enter 1 to print the actual sales for this year, last year or both.

If you are defining a budget report, you can also specify the following printing details:

### **Budget**

Enter 1 to print the budget for this year, last year or both.

### **Variance**

Enter 1 to print the variance between actual sales and budget for this year, last year or both.

### **Var %**

Enter 1 to print the variance as a percentage for this year, last year or both.

Press **Enter** to confirm the entries, create the report and display the first Maintain Report Specifications screen.

# Ranking Analysis Specifications

## **1...** **2...** 9/SAM

You use this procedure to create and maintain ranking analysis specifications.

Use ranking analysis reports to create sophisticated reports similar to the one described below.

A simple ranking analysis report might rank:

- All sales representatives (customer/item attribute).
- On the basis of total sales (invoice value).
- In the first six months of the year (time period).

You can also compare two time periods. If you choose this option, the selected invoice value is totalled over both time periods, then the selected customer/item attribute is ranked on the difference.

## Maintain Ranking Analysis Specifications Screen

 Select Ranking Analysis Specifications.

Use this screen to select the name of the report you want to create or maintain.

### Fields:

#### Report Reference

Enter the name of the ranking report you wish to create or maintain. A report name must start with an alphabetical character, be a maximum of eight characters long and may contain numbers after the initial letter.

### Functions:

#### F10

Based on. Use this function to display a list of reports on which to base the new report.

 Press **Enter** to display the Maintain Ranking Analysis Major and Minor Level screen.

## Maintain Ranking Analysis Major And Minor Level Screen

To display this screen select a report and press **Enter** on the Maintain Ranking Analysis Selection screen.

Use this procedure to specify the report title printed at the top of each page, the ranking field or fields, the number of records to print and any selection criteria.

### Fields:

#### Report Name

Enter text of up to 50 characters to describe the report.

*Note: You can specify the following at field level:*

#### Major Level

Enter 1 to use the field as the major level for ranking. If you enter no minor level, then the system uses the major level as the actual ranking field. If you enter a minor level, then the system ranks the minor level within each major level field.

Enter 1 to indicate which field to use as the detail for the report.

#### Minor Level

The detail level. This is the field that will be ranked within the major level.

#### No. Records To Print

The number of minor level records to print, within a major level, if you enter both; or the number of major level records to print if you only specify a major level.

#### Major Level Selection

Select a specific range of major level values by entering the upper and lower limits here. A prompt of valid values is available. Leave blank for all values.

Tip: The selection criteria available on this screen depends on that chosen when you define your database.

Press **Enter** to display the Maintain Ranking Analysis Time Period And Ranking screen.

## Maintain Ranking Analysis Time Period And Ranking Screen

To display this screen select level details and press **Enter** on the Maintain Ranking Analysis Major and Minor Level screen.

Use this screen to specify the time periods that the report is to span, and the values to be used for ranking.

### Fields:

#### Time Period

Enter the year, period (and week if you hold history at weekly level) from which you wish the report to start, and the year, period and week at which to end.

#### Compared With

If a comparison is being made between two time periods, enter the From and To values to define the time period with which to compare the above period. If no comparison is being made, leave these fields blank.

#### Asc/Dsc

Enter one of the following against the value you want to use for ranking:

- 1 - For ascending sequence ranking.
- 2 - For descending sequence.

#### Selection

Enter values for the upper and lower limits of the ranking value.

#### Difference % Or Value

If you want to make a time period comparison enter one of the following:

- 1 - To have the difference expressed as a percentage.
- 2 - To have the difference expressed as a value.

**Print**

Enter 1 against an additional value to be printed on the report (optional).

Press **Enter** to display the Maintain Ranking  
Analysis Specifications Exit screen.

## Maintain Ranking Analysis Specifications Exit Screen

To display this screen enter time period details and press **Enter** on the Maintain Ranking Analysis Time Period and Ranking screen.

Use this screen to specify when to produce a Ranking Analysis report.

### Fields:

#### Save Specification

Enter one of the following:

- 1 - To save the report specifications for use in the future.
- 2 - To delete the specification after the report has run this time.

#### Produce At End Of

Enter 1 against the time period when you want to produce the report. This is then submitted when the appropriate period-end update is run.

Tip: Enter 1 against Ad Hoc if the report is not run on a regular basis.

#### Exclusion Type

Where you use kiting, enter one of the following:

- 1 - To exclude the components from the report, if both kit parents and components have been posted.
- 2 - To exclude the parents if both have been posted.

0 - To exclude neither parents nor components and therefore have possible double counting.

**Submit Report Now**

Enter one of the following:

1 - To submit the report now.

0 - To request the report later.

Press **Enter** to save the report and return to the Select Report screen.

# Sales History Time Period Selection

## **1...** **2...** 10/SAM

To determine the details shown on the enquiry display, you must create at least one format. This determines the data shown on the display in terms of time period and value. You can create as many as 36 different enquiry formats. For example, one format may specify the four columns to be:

- Current period.
- Current period -1.
- Current Period -2.
- Current year to date.

And another may specify:

- This year to date.
- Last year to date.
- This period.
- This period last year.

The format also determines the values shown, for example, one may show quantity, whilst another may show sales value.

## Sales History Time Periods Selection Screen

Select Sales History Time Period Selection.

Use this screen to select the time period format to create or maintain.

| I Quantity                                            |                            |                 |                     |                 |
| - Goods Value                                         |                            |                 |                     |                 |
| - VAT                                                 |                            |                 |                     |                 |
| - Margin                                              |                            |                 |                     |                 |
| F3=Exit F12=Previous                                  |                            |                 |                     |                 |

### Fields:

#### Ago

Define the period lag (depending on period type) for values displayed in each column. If the period type is Period, then blank here indicates the current period, 1 indicates one period ago, 2 indicates two periods ago and so on.

#### Period Type

Enter the type of period to display values for:

1. Year.
2. Moving annual.
3. Week.
4. Period.

#### Default Value

Define the value to display as a default for this format. The value selected is displayed in the four columns according to the rules defined above.

These fields define the output of the enquiry. For example, if you wish to see quantity for the current period in the first column, then you would enter blank or space

against Ago, you would enter 4 in Period Type, and you would select Quantity as the default value.

Press **Enter** to write the information to the defined format.

# Create New Budget

## 11/SAM

You use this procedure to create new budgets based on a previously defined budget incorporating a percentage change.

Creating budgets in this way provides you with an efficient way of incorporating all the work invested on an old budget and taking this forward to the next year.

## Create New Budget Screen

Select Create New Budget.

Use this screen to define the new budget in terms of which budget it is based on, the details for the new budget and the percentage change.

|       |                            |          |                     |
|-------|----------------------------|----------|---------------------|
| SA145 | Z1 - Demonstration Company | USER SP1 | 8/09/94<br>16:33:22 |

    type..... B  
Factor (%)..... 50.00

---

F3=Exit F8=Confirm

### Fields:

#### Old Format

Enter the format of the budget on which you want to base the new budget.

#### Old Year

Enter the year of the old budget.

#### Old Type

Enter the type of the old budget.

#### New Format

Enter the format of the new budget.

#### New Budget

Enter the year of the new budget.

#### New Type

Enter the type of the new budget.

#### Percentage Factor

Enter the percentage change for the new budget.

Press **Enter** to check the information and then confirm the creation of the new budget by

selecting **F8=Update**.
