Chapter 3

Reports And Enquiries

Sales Enquiry

1/SAE

You can use the Sales History Enquiry option to create and view your own enquiries on the Sales History Database.

You create enquiries by choosing an attribute upon which to enquire, and an attribute by which to analyse. Once a combination of attributes is known to the system, it will be “remembered” for future use, providing fast response times. You can choose the format of the information shown by the enquiry - which values to display, the scale of the values and the time periods for which to display the values.

Sales History Enquiry Screen 1

Select Sales Enquiry.

This screen lists all sales analysis attributes available for enquiry from the Sales History Database. You must choose one attribute from the left hand column, to be analysed by another attribute from the right hand column. For example, you can analyse a Customer by Salesman.

F3=Exit F4=Prompt			

Fields:

Enquire on

This lists the attributes available for enquiry. Enter a valid value against the attribute you wish to enquire on. For example, enter a customer code against the customer field.

Analysed by

This lists the attributes by which to analyse. Enter 1 against the attribute you want to analyse by.

Exclusion Type

Where kitting is in use, this indicator determines how the application handles possible double counting, caused by posting both kit parent sales and kit component sales to Sales Analysis from Sales Order Processing.

1 - To exclude components from the enquiry, if both kit parents and components have been posted.

2 - To exclude parents if both have been posted.

0 - Do not exclude parents or component from the enquiry and possible double counting.

Processing varies depending on whether the enquiry (the combination of the two attributes), exists or not.

Tip: The selection criteria available on this screen depends on that chosen when you define your database.

If the enquiry already exists, the system displays the Sales History Enquiry screen 3.

If the enquiry does not exist, the system displays the Sales History Enquiry screen 2.

Press **Enter** to display the Second Sales History Enquiry screen.

Sales History Enquiry Screen 2

To display this screen, select two attributes that have not previously been used on the Sales History Enquiry screen 1 and press **Enter**.

Use this screen to create a new enquiry for an analysis of these selected attributes.

Sales History Enquiry

Enquire on : Customer **Analysed by :** Salesman

This enquiry does not exist at present. To create it press F8.

Batch/interactive 2 (1=Batch, 2=Interactive)

Note Interactive create may render your terminal inoperable for a long period of time. For this reason batch create is advised.

F3=Exit F8=Submit F12=Previous

Fields:

Batch/Interactive

Enter one of the following:

- 1 - To submit the enquiry creation to batch.
- 2 - To create the enquiry interactively.

Tip: If you are handling large amounts of sales history data, it is advisable to create the enquiry in batch.

Once you have created the enquiry you return to the Sales History Enquiry screen 1.

Select **F8=Submit** to create the enquiry. This generates summary files that provide the information for the enquiry. Once created, future Sales History Updates then update the summary files.

Sales History Enquiry Screen 3

To display this screen select a previously defined format on the Sales History Enquiry screen 1 and press **Enter**.

There are four columns showing data for your defined time periods. The current year, period and week numbers for the enquiry are indicated on the screen.

The year, period or week numbers displayed relate to the Sales Analysis calendar which you maintain in the Calendar Maintenance option.

The time period format shown by the enquiry can be changed. You can maintain these formats using the Sales History Time Period Selection option, where you define the time periods you want to use, and the values displayed.

		EDN400A	PET149S2

Fields:

(Untitled)

Enter one of the following:

- 1 - To display the Sales History Enquiry screen 4 (or the upside down option).
- 2 - To display the Sales History Enquiry screen 5.

Note: You may enter the following details:

Enquiry Attribute

Enter a value for the attribute being enquired to display an analysis for that value.

Format

Enter a format previously defined in the Sales History Time Period Selection option. This defaults to 1. Selecting another format changes the information displayed in the columns to that defined for the new format.

Note: You can view the data in a number of ways within the main enquiry screen.

Press **Enter** to step through the attribute being enquired on in sequence.

Enter an actual value for the attribute, and then press **Enter** to present a breakdown of that value by the analysis attribute.

Sales History Enquiry Screen 4 (Option 1)

To display this screen enter 1 against a line, to choose the Upside Down option, on the third Sales History Enquiry screen.

Use this screen to view the inverted data for the selected attribute.

SA100	D1 - D1 Education Company		User DD1	2/12/96
				11:41:28
Sales History Enquiry		Year.. 85	Period.. 4	Week.. 15
Salesman.....?	8	A. Parkinson		Fmt 1
Displayed values....	Goods Value			
Scaled into.....	01's	CURR WK	CURR PRD	CURR YTD

** TOTAL **		17740	48817	198291
1=Upside down 2=Graph				
F3=Exit F4=Prompt F5=Default Scaling F8=Values F12=Previous				
03-46 SF MW KS IM II EDN400A PET149S2				

Fields:

(Untitled)

Enter one of the following:

- 1 - Upside Down option inverts the sales analysis for a selected line.
- 2 - Graph option displays the sales analysis for a selected line as a bar chart.

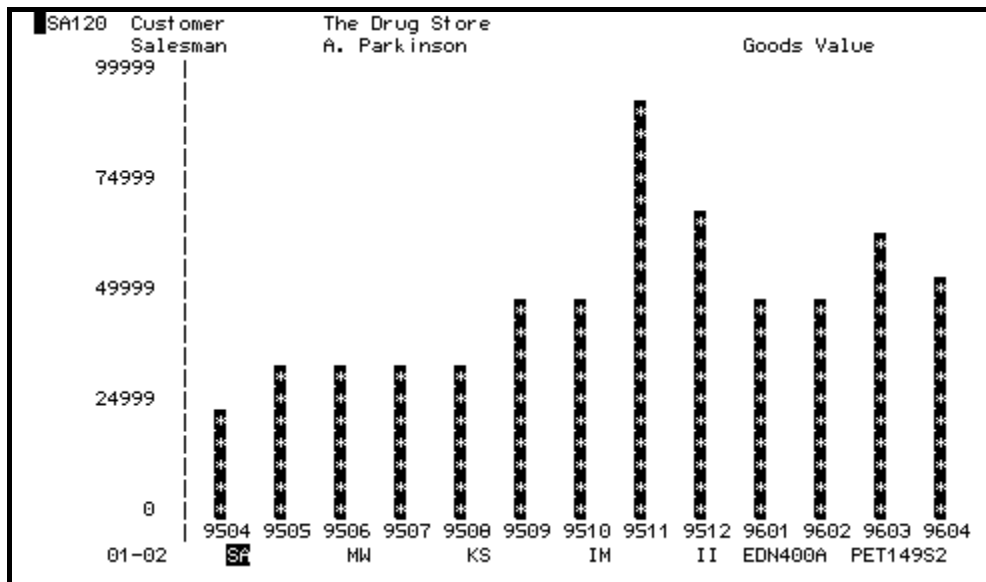

Enter 2 against a detail line, to display the Sales History Enquiry screen 5

Sales History Enquiry Screen 5 (Option 2)

To display this screen enter 2 against a line, to choose the Graph option, on either the third or fourth Sales History Enquiry screens.

Use this screen to view the data for the selected attributes as a bar chart.

Press **Enter** to return to the enquiry screen.

Sales History Display Values Selection Screen (F8)

To display this screen select **F8=Values** on either the third or fourth Sales History Enquiry screens.

Use this screen to change the values on the display, while keeping the time periods the same. The screen, shows both the values available and the scaling factors applied to these values.

SA100	Z1 - Demonstration Company	User SP1	14/09/94 15:18:49
Sales History Enquiry - Display Values Selection			
Displayed values Quantity		Scaling Key	
		01 = Units.	
		02 = Tens.	
		03 = Hundreds.	
		04 = Thousands.	
		05 = Ten thousands.	
	Scaling		
- Cost Value	01		
- Discount Value	01		
- Quantity	01		
- Goods Value	01		
- VAT	01		
- Margin	01		
1=Select			
F3=Exit			

Fields:

Select

Enter 1 against the value you want to display, and if required, change the scaling factor.

Tip: If you wish to re-set the scaling to the default, select **F5=Default Scaling** on the main enquiry screen.

Underflow and Overflow

Using scaling factors to display in thousands, for example, a value of less than 1,000 would not be shown. In this event, the field will show 0 but in reverse image, to indicate that a value is present, but too small to show using the current scaling factor. It may also be possible that a value is too large to display without scaling into larger units, in which case, the field will be highlighted, to indicate that overflow has occurred.

Press **Enter** to return to the enquiry screen. The change of the scaling factor remains in effect only for the duration of the enquiry.

Sales Reports

2/SAE

Within Sales Analysis all reports are user-defined in terms of sequence, selection and content. There are two options to handle Sales Reports.

1. The maintenance option to define or modify a report, and optionally submit it for processing.
2. The simple select and submit option to select and submit a previously defined report.

In this way, the tasks of creating reports and running reports are separated for security purposes.

The report generator produces new programs, so creating a new report takes longer than running an existing one.

Once created reports are available to run on request.

The Sales Reports option provides a means of selecting and running previously specified reports.

Request Sales Report Selection Screen

Select Sales Report.

Use this screen to enter the report reference, period, week and year.

SA040	D9 - D9 Education Company	User DD9	4/01/96 11:03:46

Select **F8=Submit** to submit the report.

Item File Print

4/SAE

Use this option to produce a listing of the items defined within Inventory Management, together with their attributes chosen for inclusion on the Sales History Database.

You can specify your own reports to produce summaries at several levels. You can create a report to run on a regular basis, perhaps at month-end, or use a report once to answer an ad-hoc enquiry.

Customer File Print

5/SAE

Use this option to produce a listing of the Customers defined within Sales Order Processing, together with their attributes chosen for inclusion on the Sales History Database.

You can specify your own reports to produce summaries at several levels. You can create a report to run on a regular basis, perhaps at month-end, or use a report once to answer an ad-hoc enquiry.

Report Specification Print

6/SAE

Use this option to provide a listing of the specifications of reports defined within Sales Analysis.

You can specify your own reports to produce summaries at several levels. You can create a report to run on a regular basis, perhaps at month-end, or use a report once to answer an ad-hoc enquiry.

Sales Totals By Period Report

1...
2... 7/SAE

Use this option to produce a listing of all sales by period.

Sales Totals By Period Selection Screen

Select Sales Totals By Period Report.

Use this screen to select the timescale for the report.

SA057	Z1 - GB Demonstration Company	22/01/98 13:07:44
Sales Totals by Period Report		
Enter year, year and period or leave blank for all.		
Year.....	97	
Period.....	12	
Exclusion Type..(0/1/2)	1	
F8=Exit		
7-27	SA	MW KS CL IM DM II EDN400A KB PET087S1

Fields

Year

Enter the year you want to consider on the report. All periods to date will be listed. Leave the year blank to list all periods and years in your Sales Analysis Database.

Period

Enter the period you want to consider on the report - only the specified period will be listed.

Exclusion Type

Where you use kits, enter one of the following:

1 - To exclude the components from the report, if you post both kit parents and components (in other words, they have both been extracted from your invoice files into the Sales Analysis Database; this is controlled by the sales analysis flag on the item master record of the kit parent).

2 - To exclude the parents if you post both.

0 - To exclude neither parents nor components and therefore have possible double counting.

Press **Enter** to check your entries. Select **F8=Update** to submit the batch job and produce the report.
