Chapter 1

Maintenance

Maintaining Telesales

As Telesales is an advanced application, much of the primary data has already been set up as part of the base system implementation. There is additional information which may be entered in order to obtain the maximum benefit from Telesales. The common features in the maintenance of this data are:

- The standard item and customer search routines are employed.
- The application makes the minimum use of codes, and where they are used you can display a list of valid codes.
- Selection is normally both from a displayed list or by the entry of a code. Additional text is generally provided.

Operator Profiles

1/TSM

You need to define a profile record for every operator who uses telesales.

The profile contains information used in the management of the operator's authority and in work planning screens.

Operator Profile Select Screen

To display this screen, select Operator Profiles.

Use this screen to create new operators or amend existing ones. You can also maintain extended text for any existing operator.

TS005	Z1 - Demonstration Company	User: SP1	9/09/94 10:26:29
-------	----------------------------	-----------	---------------------

Operator Profiles - Select

	Operator Name	Extn	Operator	User	Profile	Class
1	Sandra Williams	125	0001	SP1		3
-	Karen Smit	145	0002	SP2		2
-	Judy Brown	129	0003	SP3		1
-	Susan Tonks	145	0004	QUSER		0

Enter New or Existing Operator Code... ____

1=Select Operator, 2=Maintain Extended Text
F3=Exit F5=Refresh

Fields:

Select

Untitled field on screen. Enter one of the following:

- 1 - Select Operator. To maintain the operator using the Operator Profiles Maintain Screen.
- 2 - Maintain Extended Text. To enter extended text for the operator using the standard text screen.

Enter New Or Existing Operator Code

Enter the operator you want to maintain, or to create a new telesale operator enter a new 4 character code.

Enter the operator and press **Enter** to display the Operator Profiles Maintain Screen.

Operator Profile Maintain Screen

To display this screen, on the Operator Profile Select Screen, enter the operator and press Enter.

Use this screen to maintain the Operator Profile details for the selected operator.

TS005	Z1 - Demonstration Company	User: SP1	9/09/94 10:26:38
Operator Profiles - Maintain			
Operator Code.. 0001 Existing Operator			
Operator Name..... Sandra Williams

Call List Security Class.... 3 0=Next Call Only. 1=Any Call 2=Reschedule. 3=Reschedule/Change			
Hours in Working Day..... (mins)			
Normal Call Duration..... (mins)			
Rest Period per Hour..... (mins)			
Telesales Proficient..... 1 (0=No, 1=Yes)			
Planned Delivery Proficient.. 1 (0=No, 1=Yes)			
Tele-marketing Proficient.... 1 (0=No, 1=Yes)			
F3=Exit F5=Refresh F8=Update F11=Delete F12=Previous F21=Text			

Fields:

Operator Name

Enter the operator name using up to 32 characters.

Operator Extension Number

Enter an extension number for auto-dialling.

Associated User Profile ID

Enter the operators User ID or to use group call lists, enter *GROUP.

Call List Security Class

This defaults to the lowest authority level. Enter the authority level:

0 - Next Call Only. To specify that this operator can only take the call indicated by Telesales.

1 - Any Call. To specify that this operator can select any call in their call list.

2 - Reschedule. To specify that this operator can change the time and date of any call on their list

3 - Reschedule/Change. To specify that this operator can change the time, date and operator of any call on any call list.

Note: The rest of the fields on this screen are intended for use in work planning.

Hours In Working Day

Enter the average number of hours this operator works on Telesales, in the range 0.0 to 24.0. If you leave this field blank, the Company Profile default is used.

Normal Call Duration

Enter the average time, in minutes, taken for a customer call, in the range 0 to 999. If you leave this field blank, the default on the Company Profile is used.

Rest Period Per Hour

Enter the rest time each hour, in minutes, for this operator, in the range 0 to 15. If you leave this field blank, the default on the Company Profile is used.

Telesales Proficient

Enter one of the following:

0 - No. If the operator is not telesales proficient.

1 - Yes. If the operator is telesales proficient.

Planned Delivery Proficient

Enter one of the following:

0 - No. If the operator is not proficient in the use of planned delivery.

1 - Yes. If the operator is proficient in planned delivery.

Telemarketing Proficient

Enter one of the following:

0 - No. If the operator is not telemarketing proficient.

1 - Yes. If the operator is telemarketing proficient.

Press **Enter** to check the entered information, then select **F8=Update** save it and return to the Operator Profiles Select Screen.

Buying Lists

1... **2...** 2/TSM

You use this option to create and amend buying lists.

A buying list is a list of items which is displayed as a single screen during order taking.

To make a discussion with a customer as productive as possible, you should always try to direct the discussion towards the specified buying list.

Buying List Select Screen

 To display this screen, select Buying Lists.

Use this screen to create, amend or maintain buying lists. You can also enter extended text for buying lists.

TS015	Z1 - Demonstration Company	User: SP1	9/09/94
Buying Lists - Select			10:26:56

Fields:

Description

Enter a description of the buying list.

Item Code

Enter an item. There must be at least one item on a screen.

Buying List Item Description

Enter the item description to display on the buying list. The default is generated by concatenating the item code and the Inventory item description, using the number and position of the characters defined on the Company Profile.

Functions:

F13

Copy Panel. Use this function to copy items from an existing buying list onto the buying list you are creating. Two additional fields are displayed at the bottom of the screen. Specify the buying list you want to copy from and where, on the new list, you want to insert the items. The Buying List Copy Item Select Screen is then displayed.

Tip: If you want to add items from line one of your list, enter 0 in the Insert After field.

Tip: You cannot add items to a full screen there must be at least one free line.

F21

Text. Use this function to maintain the text for the buying list.

Press **Enter**, to check the information and generate the standard Buying List Item Description, if you have not entered a description. Then select **F8=Update** to save the details and return to the Buying List Select Screen.

Buying List Copy Item Select Screen

To display this screen, on the Buying List Maintain Screen, select **F13=Copy Panel**, specify the list you want to copy and press **Enter**.

Use this screen to specify which items you want to copy on to the new buying list.

Tip: You can page up and down the list of items.

F21=Text			

Fields:

Telephone No.

Enter the telephone number of the contact person.

Telex

Enter the customers Telex number.

Fax

Enter the customers Fax number.

Primary Contact

Select **F15=Select Contact** to select from a list of Primary Contacts. **F16=Primary Contact** allows you to create and amend data for this field. The field is optional.

Operator Code

Enter the code of the operator who will normally make this call. This field is mandatory.

Buying List

Enter the buying list that will normally be used as the basis for the telephone call.

If this is left blank, the default from the Company Profile is used.

Telesales Type

Enter one of the following to specify the type of selling call to be made:

- 1 - Telesales. The order history is displayed on the order line detail screen.
- 2 - Planned Delivery. The average order figure is displayed and the operator will enter the current stock level.
- 3 - Telemarketing. The customer's current price and discount information is displayed on order taking. Selection of the buying list is allowed at time of establishing contact.

No. Of Weeks Cover

This is used to calculate the required order quantity for planned deliveries. Using historic data the system calculates the average weeks usage, then multiplies this by the weeks of cover to calculate the required stock level. If this is less than the actual stock the difference is the recommended order quantity.

Length Of Order History

This dictates the length of order history that is available for display in order entry and calculation of planned delivery quantities.

Call Mask

Seven fields, one for each day of the week, identified by the initial letter of the day and running Monday to Sunday. To ensure a call is made on a specific day enter 1 on the required day. Up to seven calls can be planned in any week, one for each day.

Call Frequency In Weeks

Enter the number of weeks between the call mask being repeated

Note: By use of the Call Mask and Call Frequency calls can be planned from once a day to once a year.

Note: If different cyclic patterns are used for different item groups, additional call profiles can be set up.

Call Between

Four sets of two fields which determine the target time windows that can be set up for the call profile.

If the call is to be made at a specific time only the first of a pair of times need be entered. The first of a pair of times is assumed to be the start time of a call and must be earlier than the second. The 24 hour clock is used (e.g. 10am should be written as '1000'). Pairs of times may be entered in any sequence but must not overlap. If a call can be made at any time of the day no times should be entered.

Next Call Date and Next Call Time

These may be entered on the maintenance screen, automatically calculated by the next call list generation run or agreed at the end of an order taking cycle.

Press **Enter**, to validate the information you have entered. If a field has been changed the

F8=Update key is highlighted.

Select **F8=Update** to update the changed fields.

Functions:

F15

Displays a window allowing you to select the primary contact.

F16

Displays the Maintain Contacts screen so that you can create / amend and then select the primary contact.

F17

Display Maintain Contacts screen. You can create and amend the list of contacts.

F21

Create and amend additional text for the selected call profile.

Delivery Profiles

In order to win and keep customers, companies need to demonstrate that their level of service improves. Ideally a Telesales order should be followed by rapid delivery of the goods. The Telesales order can be linked to the next expected delivery in the customers area. Telesales can create information concerning the customers preferred delivery requirements.

Delivery Profile Customer Select

You can select the customer and delivery address combination to create or amend a delivery profile for using this procedure.

Promotions Maintain Screen

The Telesales application provides a way of recording and bringing to the attention of operators details of current promotions. Promotions can be recorded as covering a customer or group of customers and / or an item.

If a promotion is for a specific item you can define it as a promotion item. This promotion item is substituted for the base item if the promotion is accepted at order entry. The promotion item is automatically included in the generic item family of the base item.

There are three main areas in the screen. The first is used to name and classify the promotion, the second to define the base and promotion items and the relationship between them and the third to qualify the customer's related constraints.

If you are amending an existing promotion the words Existing Promotion are displayed.

Effective From Date

Enter the date the promotion starts. Both this and the Effective to Date are mandatory fields.

Effective To Date

Enter the date the promotion ends.

Caption

Enter the name of the promotion. This field is mandatory.

Promotion Type

You can select this from the descriptions file by using the standard prompt facility.
This field is optional.

Promotion Target

Enter the percentage amount you wish sales of this item to increase by. If it is present the target order quantity is increased by this percentage for informational purposes.

Base Item

Enter the item (or Generic Item family), which is being promoted.

Promotion Item

Enter the item that should be substituted for the Base Item.

Per Factor

Enter the number of promotion items that are sent for one base item. The default is 1.

Customer Account

Enter a customer account to limit the promotion to.

Customer Class

Enter a customer class to limit the promotion to.

Price List

Enter a price list to limit the promotion to.

Discount List

Enter a discount list to limit the promotion to.

Select **F13=More Constraints** to display the following additional constraints:

Corporation

Enter a corporation code to limit the promotion to.

Branch

Enter a branch code to limit the promotion to.

Region

Enter a region code to limit the promotion to.

State

Enter a state code to limit the promotion to.

Territory

Enter a territory code to limit the promotion to.

Division

Enter a division code to limit the promotion to.

Sub-Division

Enter a sub-division code to limit the promotion to.

Select **F8** to record the details of the promotion together with the specified constraints. If a promotion item has been defined the item family relations are checked. If no relationship exists, one is created as starting on the start date of the promotion.

Functions:

F13

Display further constraints.

F21

Maintain additional text for the promotion.

Item Families

Items are often promoted using promotion packs. As full stock control must be applied, a different item number is normally used for the promotion pack which can have a distorting effect on sales analysis.

This is particularly significant in Planned Delivery telesales; sales analysis data is used in conjunction with certain control parameters to determine the recommended stock levels for the customer. It is, therefore, necessary to link promotional items to their base items so that the total sales of an item may be considered together. This is done by creating item families.

A product family comprises one base item and any number of promotional items.

Item Families Base Item Select Screen

You use this screen to create and amend items' families.

TS036	Z1 - Demonstration Company	User: SP1	9/09/94
Product Families - Base Item Select			10:32:10
Base Item	Description		
_ 5001	Suncream Factor 4 225ml		
New or Existing Base Item Code...?... 5001			
1=Select Item, 2=Maintain Extended Text			
F3=Exit F4=Prompt F5=Refresh			

Fields:

Select

An untitled selection field. Enter one of the following:

- 1 - To select the base item for amendment
- 2 - Maintain additional text.

New Or Existing Base Item Code

Enter the item code of the base item to set up an items family for. This must be an item code that exists in Inventory. You can enter one of the codes shown or you can display a list of valid item codes.

Enter a valid item code and press **Enter** to display the Promotion Item Select screen.

Item Families Promotion Item Select

This screen displays the existing promotional items for an item family and enables selection for amendment or for the addition of new promotional items.

The base item for the item family is displayed at the top of the screen. This is followed by a list of the promotion items showing the period of time they should be included in the calculation for planned delivery.

TS036	Z1 - Demonstration Company	User: SP1	9/09/94
Product Families - Promotion Item Select			10:32:14
Base Item.. 5001		Suncream Factor 4 225ml	
Promotion Item	Description	Eff.From	Eff.To
1 5005	Suncream Factor 4 300ml	1/04/94	99/99/99
New or Existing Promotion Item Code...?.. _____			
1=Select Item			
F3=Exit F4=Prompt F5=Refresh F12=Previous F21=Text			

Fields:

Select

An untitled selection field with the following option:

- 1 - Select the item for amendment.

New Or Existing Promotion Item Code

Enter the item code of the promotion item to associate with the base item chosen. This must be an item code that exists in Inventory. You can enter one of the codes shown or display a list of valid item codes.

Enter a valid item code and press **Enter** to proceed to the Item Families Maintain screen.

Functions:

F21

Additional text.

Item Families Maintain Screen

This procedure enables you to maintain details of the relationship between the promotion item and the item family.

The base item and the promotional item are displayed followed by the current details of the relationship.

TS036	Z1 - Demonstration Company	User: SP1	9/09/94
Product Families - Maintain		10:32:27	
Base Item.....	5001	Suncream Factor 4	225ml
Promotion Item..	5005	+UPDATE	
	Suncream Factor 4	300ml	
Effective From Date..	<u>1/04/94</u>		
Effective To Date....	<u>99/99/99</u>		
Per Factor.....	<u>1.00000</u>		
F3=Exit F5=Refresh F8=Update F11=Delete F12=Previous			

Fields:

Effective From Date

Enter the first date on which the promotion item is included in the item family. This is a mandatory field.

Effective To Date

Enter the last date on which the promotion item is included in the item family. This is a mandatory field.

Per Factor

Enter the number of promotion items to make one base item. The default value is 1.

Press **Enter** to validate, any changes made. If no error condition is detected the Update key is highlighted. If an error is found the field is highlighted and a message is displayed.

Functions:

F8

If no changes have been made the Promotion Item Select screen is redisplayed.

If any amendment has been made and no errors are found the item family details are updated.

Codes and Descriptions

When an operators call is re-scheduled, aborted, or when the operator has changed, a reason code must be entered.

This is to aid evaluation of the Telesales operation.

Reason Codes Select Screen

You can create and amend reason codes. You select the reason code to create or amend from this screen.

TS040	Z1 - Demonstration Company	User: SP1	9/09/94 10:32:41
Reasons - Select			
	Reason Description	Reason Code	
1	Customer will call back	CB	
-	Customer Cancelled	CC	
-	Customer contact unavailable	CU	
-	Operator will call back	OB	
-	Reschedule call	RS	
Enter New or Existing Reason Code.. __			
1=Select Reason			
F3=Exit F5=Refresh			

Fields:

(Untitled)

Enter 1 - to select the item for amendment.

Enter New Or Existing Reason Code

Two or less characters. If the code already exists the entry is displayed for amendment, otherwise a new entry is displayed.

Tip: If you are entering a new code the cursor must be on the Enter New or Existing Reason Code field. Typing two characters may cause the cursor to move to the (Untitled) selection field. You must move it back using the tab keys.

Reason Codes Maintain Screen

This screen displays the current details of the selected reason.

TS040	Z1 - Demonstration Company	User: SP1	9/09/94 10:32:48
