Chapter 3

Enquiries

Telesales Enquiries Introduction

There are three enquiries available in Telesales. They are designed to provide rapid and complete access to the data contained within the system and to display it in an efficient and ergonomic manner. The enquiries are as follows:

- Call List
- Whole Orders
- Stock Availability

The Whole Order and Stock Availability enquiries are common to the standard Sales Order Processing and Inventory Management applications and provide a view of the order bank and the stock position.

You should refer to the product information for Sales Order Processing or Inventory for further details of these enquiries.

The Call List enquiry displays details of call list entries and shows details of any actions taken.

Call Lists Enquiry

You use this task to display details for a selected range of calls.

Call Enquiry Select Screen

You use this screen to enter the selection criteria for Call Enquiry.

TS500	Z1 - Demonstration Company	User: SP1	9/09/94
Call Enquiry - Select			16:13:08
Operator.....?.. <u>*ALL</u> *ALL for all operators			
Call Statuses Required.. - 0=Call waiting to be taken			
	-	1=Call in progress	
	-	2=Reschedule in progress	
	-	3=Operator change in progress	
	-	4=Call time has expired	
	-	5=Call has been taken	
	-	6=Close in progress	
	-	7=Call has been closed	
	-	8=Abort in progress	
	-	9=Call has been Aborted	
F3=Exit F4=Prompt			

Fields:

Operator

Select the operator(s) you wish to review calls for. You can enter *ALL for the calls of all operators or an individual operator's code.

Select

Untitled. Enter one of the following:

1 - Select the associated call status to report on

Blank - Ignore the associated call status.

Note: If you select no status then all are included in the enquiry

An open query is launched which runs over the call list to select the operator(s) and status(es) required.

Call Enquiry Call Select Screen

On the Call Enquiry Select Screen Enter an operator and select the call status you want to report on.

This displays the calls that meet the selection criteria and enables selection for the display of details.
