Glossary

Glossary

Exemption Certificate

If a customer should be charged sales tax but is exempt, for example, for being a charitable organization, an exemption certificate, with number and date, is required and is issued by the taxing body.

Sales Tax Code

If an item is sold to an end-user, it usually attracts tax for the tax bodies defined at customer level. However, some items such as fresh food or clothes can be non-taxable or only taxable at state or city level. Thus each item or miscellaneous charge is defined with one of the following codes:

0 - Never apply tax.

1 - Always apply tax for the Order/Customer tax body rates.

2 - Only apply tax if the item/charge is taxed by particular tax bodies. The assumption here is that the item is non-taxable unless an entry exists for it on the item/tax body override file.

Tax Body

A legislative body enabled to charge and collect tax paid on the sale of goods sold to an end user.

Vendor Contribution

The amount of the invoice tax value to be paid by the vendor.
