Chapter 4

Utilities

Utilities Introduction

The United States Sales Tax Utilities provide assistance with data set-up and housekeeping. In general, these functions require exclusive use of the company.

Maintain Company Profile

1/USU

Select Company Profile.

You use this function to enter and maintain attributes which determine whether sales tax and vendor contribution to tax is calculated.

You use this screen to maintain the company currently in use.

US005	Z1 - UK Demonstration Company	User GBJBANB4	9/02/98 10:29:04
Maintain Company Profile: VM - Z1 Sample Test Company			
Sales tax active 1 0=No, 1=Yes			
Apply tax default 1 0=No, 1=Yes			
Enable vendor contribution. . 1 0=No, 1=Yes			
F8=Update F12=Previous			
6-46 SA MW KS CL IM DM II MARVIN KB PET087S1			

Fields:

Sales Tax Active

Enter one of the following:

- 0 - If standard VAT processing is required.
- 1 - If United States Sales Tax processing, calculation and update is required for this company.

Apply Tax Default

Enter one of the following:

- 0 - If the majority of invoices are exempt from sales tax, for example, company sells to customers for re-sale. This default is used if no apply tax flag is defined for the customer or order tax body.
- 1 - If the majority of invoices for this company are subject to sales tax.

Enable Vendor Contribution

Enter one of the following:

0 - For no vendors contribution to sales tax. The vendor contribution amount is calculated as a percentage of the item or charge value. This calculated value is held for each invoice detail but is not applied to invoice values.

1 - If a percentage of the total sales tax amount is to be contributed by this company. Percentages to be defined for the customer or order tax body.

Functions:

F8

Update the changes made to your company profile.

Copy Company

1...
2...

2/USU

Use this option to create a new United States Sales Tax company. The company profile, tax body details and rates data are copied from the nominated company. You can use the standard maintenance procedures to enter any differences for the new company.

US905	User SP1	1/09/94 12:09:01
Copy Company		
From Company		__
To Company		__
F3=Exit F8=Update		

From Company

Enter an existing United States Sales Tax company.

To Company

Enter an existing Sales Order Processing and Accounts Receivable company. If this company also exists for United States Sales Tax, the existing data is overwritten.

Purge Sales Tax Audit Files

21/USU

Use this function to reduce the size of United States Sales Tax database. Any master file updates write an audit record of the changes made. These should be reviewed and cleared when necessary. When you select this option, a batch job is submitted which deletes all but the last audit record for a customer tax body, tax body, rate, remit address or override.
