Chapter 2

Processing

Cash Management Processing Functions

The options available in Cash Management Processing manage the cash resources of the company.

Cash is posted to this module as a result of other applications, or posted directly within Cash Management itself.

Cash Postings in other Applications

Use the following processing options to post transactions to bank accounts. A requirement because bank accounts are post inhibited to GL journals. A GL account enquiry will reveal that accounts defined as bank accounts in Cash Management are post inhibit B.

Supplier Payments

When Cash Management is installed, the Accounts Payable payment cycle has distinct phases:

- The selection of items to be paid is carried out in Accounts Payable.
- Selection is confirmed.
- These items are passed to Cash Management for payment.

Customer Receipts

- Accounts Receivable cash is first posted to the bank accounts as provisional or direct cash.
- Provisional cash is confirmed.
- It is posted to the Accounts Receivable account for allocation to outstanding items.

Currency Revaluation

Bank accounts may be held in a currency other than the General Ledger base currency. You can revalue them into the base currency at today's exchange rate. Post any gain or loss into a realised currency variance account.

Cash Postings within Cash Management

Miscellaneous Creditors

Where suppliers are not paid through Accounts Payable, they may be paid through a Miscellaneous Creditors procedure.

Cash Journals

Cash journals enable you to record cash payments and receipts that are not associated with Accounts Payable or Receivable, and which are not dealt with by miscellaneous creditors.

Bank To Bank Transfer

You may transfer cash between any two bank accounts in any currency.

Item Cancellation

It is occasionally necessary to cancel a cash transaction which has previously been posted. The General Ledger accounts are adjusted accordingly.

Post Suspended Items

Cash received or payments made in a currency different from the currency of the bank account out of which it is paid is suspended.

This procedure transfers the value from suspense to the bank account, and accounts for exchange gains/losses and for bank charges.

Bank Reconciliation

This procedure is used for reconciling your cash balances with the statement supplied by your bank.

Opening Balances

Refer to the Initialise Bank Balances option from the Utilities section for an explanation of the way in which opening balances may be posted to your bank account.

Payments

1/CSP

Once a run of payments has been prepared in Accounts Payable it must be released before the payments will be made. This option enables you to release all available runs, a process which will update Accounts Payable, make postings to the General Ledger and produce the necessary documentation.

Various amendments may be made to the run before release.

Payments Balance Supplier Payments

Select the CS maintenance option Payments.

This screen displays a list of payment runs.

PL469	E1 - Demonstration Company	User ED3	14/07/94 9:35:17							
Release Supplier Payments

1=Select 2/3=Begin/end range 4=Ignore within range					
F3=Exit F4=Prompt F12=Previous F17=Select all					
F18=Override new bank to base rate F23=More options					

Fields:

Select

The options available for this field are specified at the bottom of the screen, and include different ways of selecting runs for release:

- 1 - Select a run.
- 2-3 - Select a range of runs.
- 4 - Having selected a range, enter 4 against any run within the range which is not to be released.
- 5 - Cancel any rate changes made.
- 6 - Change a payment currency.
- 7 or 8 - Change currency rates as shown on the screen.

P/M

Enter a new payment method as desired.

Date

Enter the date to be printed on the documentation produced.

This field defaults to today's date.

Post To Default Period

0 - Bring up a window which will allow you to specify a posting period.

1 - Use the default period.

Pay From

If you wish to pay from a different bank account to the default account, enter that account here.

Description

If your payments are to be made by collection document enter here a document description.

Override The Payment Date

If you wish to individually specify the payment date of payments which are not collection documents, then define the payment method as a sub-type under major type OMDT in the Cash Management Parameters option.

You will see a window enabling you to override the payment date.

This function depends on the banking software of the country in which you operate - check with your software agent if you are uncertain.

Press **Enter** then **F8= Release the payments** to release the selected payments and to effect any other updates you have chosen to make.

Functions:

F8

Release the payments. This function key does not appear until you have pressed **Enter**.

F15

Value Date. Enter a value date to take effect when the session is completed and posted. The date entered will override the date calculated by the value dates table.

This function will be available if Country Specific Parameter 'Value Dates Active' is set to 2. See Receipts for more on value date entry.

F17

Select all. Select all payments for release.

F18

Override the bank-to-base rate. Amend the currency rate.

F23

Display more of the options available.

Receipts

2/CSP

This procedure is used to record the receipt of a payment from a supplier against the bank account concerned, and to allocate it to the correct supplier in Accounts Payable.

Select the Receipts option to see the following fields:

Fields:

A/P Company

The Accounts Payable company in which the supplier is held. It defaults to the same company code as the Cash Management company.

Supplier Code

The supplier account from which payment has been requested.

Enter the company and supplier code as appropriate, and press **Enter** to see the Supplier Receipts screen.

Supplier Receipts Screen 1

This screen displays when you have entered details in the Receipts initial screen and pressed **Enter**.

CS240		E1 - Demonstration Company		User ED3	5/01/94 13:32:49

Payment method . ?	BAC				
Reason code . . ?					
F3=Exit F4=Prompt F8=Accept F12=Previous F16=Override Bank Rate					
F17=Override Receipt Rate					

Fields:

Amount

The value of the receipt, in the prime (transaction) currency.

Currency

The currency in which the supplier has made payment.

Bank Account

The General Ledger bank account into which the payment has been received. Its currency may be different from the receipt currency.

Period Number

The accounting period to which the receipt will be posted.

Charges Account

The General Ledger account to which any bank charges are debited.

Charges

The value of any bank charges in the bank account currency. The value is deducted from the converted receipt value to give a net receipt.

Bank Reference

Enter the appropriate reference. This reference is used by bank reconciliation to group receipts together on the G/L bank statement.

Date

The transaction date defaults to today's date but may be changed.

Payment Method

The default for this field is the default payment method from the Accounts Payable company profile.

This may be changed to any existing payment method.

Reason Code

You may enter any valid reason code.

Press one of the following function keys to continue.

Functions:**F15**

Value date entry window.

F16

Override bank rate. Amend currency rate.

F17

Override receipt rate. Amend currency rate.

Value Date Entry Window (F15)

This window displays when you press **F15=Value Date** in Supplier Receipts Screen 1

This window allows you to calculate the value date from the value dates table, enter the location of the bank, and overwrite any displayed date. The value date will take effect when the session is completed and posted.

Note: This window will displays if Country Specific Parameter 'Value Dates Active' is set to 2.

Fields:

Days Type

- 1 - In place. If the bank is situated locally an appropriate number of days will be added to clearing.
- 2 - Out of place. If the bank is situated in the same country but different town, an appropriate number of days will be added to clearing.
- 3 - International. The bank is in a different country. An appropriate number of days will be added to clearing.

Value Date

The system calculates a recommended date, which displays here. You can change this as required.

Functions:

F14

Value Date. Calculates the value date and adds the appropriate number of days from the value date table.

Note: The value date table is maintained via the Cash Management Partita Menu.

Press **F14** to calculate the value date.

Currency Conversion Window (F16/F17)

Press either **F16=Override Bank Rate** or **F17=Override Receipt Rate** at the supplier receipts screen.

If you have entered a currency other than the base currency, you may override the default currency conversion rate by pressing **F16/F17**, as shown at the bottom of the screen. The Currency Conversion Parameters window displays.

F3=Exit F4=Prompt F8=Accept F12=Previous F16=Override Bank Rate F17=Override Receipt Rate			

Fields:

Rate Code

Enter the rate code you wish to use for the conversion.

Rate

If no appropriate rate code exists, enter the rate which you wish to use for the conversion.

If this field is used, a value must be entered in the Multiply Or Divide field.

Multiply Or Divide

If this field is used, a value must be entered in the Rate field.

M - Multiply the values held in the source currency by the exchange rate to achieve the target currency value.

Note: For Euro conversion the system holds Euro/target fixed rates.

Note: For guidance on when to select Multiply or Divide in a Euro IN/OUT OUT/IN situation see the section Eurocurrency: Phase 1: Illustration of Conversions.

D - Divide values held in the source currency by the exchange rate to achieve the target currency values.

Target Currency Value

If you prefer to enter the target value instead of a rate, enter that value here.

On pressing **Enter** you will see the new rate applied to the converted currencies.

Enter the receipt and press **F8=Accept** to update. The initial screen redisplay with the receipt details.

Miscellaneous Payments

11/CSP

This option enables you to make a payment to a miscellaneous creditor (a supplier who is not defined to Accounts Payable).

Manual Payments Screen 1

This screen displays when you select the Miscellaneous Payments option.

Enter details of the payee, payment method and reason code. Add a narrative if required.

CS002	E1 - Demonstration Company	USER ED3	5/01/94 13:34:41

Fields:

Ref

This field is used only when you want to amend a dissection line which appears in the list on this screen. Enter the line number, which is on the left of the dissection line, in this field and press **Enter**. The dissection details will appear in the fields at the bottom of the screen.

G/L Account

If a reason code was used then the General Ledger account defined to the reason code displays. This can be changed.

Goods

This field defaults to the total value of the payment. This can be amended.

VAT Code

Select a VAT code for the dissection of the value being posted. Your entry depends on your system set-up.

- Entry of a valid code is only permitted if P or S has been entered against VAT Type.

- If the GL account has a VAT code assigned to it then that code must be used. A VAT code is assigned to a GL Account at the Accounts Maintenance option.

Note: At the utility option Post Correcting VAT Transaction option any combination of VAT code and GL Account may be entered. This option is available if GL Country Specific Parameter 031 is set to 2.

Note: A VAT code is assigned to a GL Account at the Accounts Maintenance option.

VAT Type

Enter the source of the VAT. The VAT code may be fixed for this account as blank, purchase or sales.

P - Purchases

S - Sales.

However, where the combination of GL Account Code and a specific VAT code are fixed, the VAT type may also be fixed as purchase or sales VAT.

Note: A fixed combination of GL Account with VAT and Type is created at Accounts Maintenance. Country Specific Parameter 031 also refers.

VAT

The value of VAT, in addition to the posting value.

Date

This field defaults to today's date, but may be changed to any date. The date forms the tax point for VAT analysis.

Quantity

Enter the quantity if required. This field is not mandatory, but the quantity entered will be recorded in the General Ledger.

Line Desc

The description to appear on the General Ledger transaction. It defaults to any description entered on the header screen.

Functions:

F13

Cancel this entry.

F17

Return to the payment header screen to alter the payment amount.

F22

Toggle between displaying the account extension code and the account description.

To enter another dissection, press **Enter** and the one you have just entered will display at the top of the screen, with the dissection fields left empty for new entries.

Press **F8=Update** to update the payment.

Journal Payments

12/CSP

This procedure enables you to record cash payments which are not associated with either Accounts Receivable or Accounts Payable, and which are not dealt with by miscellaneous creditors. This might include postings made to complete bank statement reconciliation, and so on.

Select the Journal Payments option to see the Journal Payments Screen 1.

Journal Payments Screen 1

Select the Journal Payments option to display this screen.

Enter full details of the journal payment including reference, payee name, payment method, reason code, values, currency, posting period, date and GL bank account.

CS002	E1 - Demonstration Company	USER ED3	5/01/94

Fields:

Payment Reference

Enter a transaction reference. (The last reference displayed is not the bank reference but the Cash Management reference assigned to the transactions).

Payee Name

Enter here any descriptive information about the transaction.

Payment Method

Specify the method by which the payment is made/received. This must not be by collection document. The field defaults to the default payment method on the company profile.

Reason Code

Enter a reason code to be attached to the journal posting. The code may have a General Ledger account defined to it.

Payment Amount

The value of the payment or receipt in the prime currency. This must be a positive value - the type of journal determines the accounting treatment.

If you are using the multi-currency function, the current rate code and rate by which this value is converted into the General Ledger base currency displays. If

you change the currency code, the new rate displays. If the transaction is not in base currency, press **F17** to change the rate.

Payment Currency

This field defaults to the currency of the default bank account on the company profile. Any other currency entered must be on the currency file.

Posting Period

This field defaults to the period on the Cash Management company profile, but any future period may be entered.

Payment Date

This field defaults to today's date, but may be amended.

Bank A/C Code

Enter the General Ledger bank account. The field defaults to the account on the company profile.

G/L Txn Description

Optionally, enter a description which will be included in the transaction posted to the General Ledger.

VAT Content Type

If the payment you are dealing with involves VAT, enter one of the following:

P - Purchase VAT

S - Sales VAT.

Inter-Company Posting

1 - If the journal is to be an inter-company posting.

Enter the payment details and press **Enter** to display the dissection entry fields in Journal Payments Screen 2.

Journal Payments Screen 2

This screen displays when you have entered the payment details in Journal Payments Screen 1 pressed **Enter**.

This screen enables you to amend a dissection line on a journal payment.

Fields:

Ref

This field is used only when you want to amend a dissection line which appears in the list on this screen. Enter the line number, which is on the left of the dissection line, in this field and press **Enter**. The dissection details will appear in the fields at the bottom of the screen.

Account

If a reason code was used then the General Ledger account defined to the reason code displays. It can be changed.

Goods

This field defaults to the total value of the payment. This can be amended.

VAT Code

Select a VAT code for the dissection.

If the GL account has a VAT code assigned to it then that code must be used.

Note: A VAT code is assigned to a GL Account at the Accounts Maintenance option.

VAT Type

Enter the source of the VAT. The VAT code may be fixed for this account as either purchase or sales.

P - Purchases

S - Sales.

Note: VAT on the GL Account is set up as purchase, sales or either in the Accounts Maintenance option.

VAT

The value of VAT, in addition to the posting value.

Date

This field defaults to today's date, but may be changed to any date. The date forms the tax point for VAT analysis.

Quantity

Enter the quantity if required. This field is not mandatory, but the quantity entered will be recorded in the General Ledger.

Line Desc

The description to appear on the General Ledger transaction. It defaults to any description entered on the header screen.

Functions:

F13

Cancel this entry.

F17

Return to the header screen to alter the payment amount.

F22

Toggle between displaying the account extension code and the account description.

To enter another dissection, press **Enter** and the one you have just entered will display at the top of the screen, with the dissection fields left empty for new entries.

Press **F8=Update** to update.

Bank to Bank Transfers

14/CSP

This option enables you to transfer money between any two bank accounts within this Cash Management company. These bank accounts need not be in the same currency.

Select the Bank to Bank Transfers option to see the Bank to Bank Transfer initial screen.

Bank to Bank Transfer Screen

Select the cash posting option Bank to Bank Transfers.

Enter full details of the bank to bank transfer.

F16=Receipt Bank to Base F18=Payment Bank to Receipt Bank					
MA	a		MW		03/027

Fields:

Transfer Ref

This is the reference used by the General Ledger for this transaction, as two transactions will be created.

Note: The 'last CJT' refers to the transfer from the issuing account, 'last CJV' to the transfer to the receiving account.

The Last Reference field displays the user input reference.

Transfer Description

Enter a description to identify this transfer.

Bank Account Code (Payment)

The General Ledger account from which the transfer is being made. The currency will display when the transaction is validated.

Net Value (Payment)

Enter the transaction value in the currency of the bank account, excluding any charges applied by the transferring bank account.

Charges (Payment)

Enter the value of any bank charges, in the currency of the bank account. The net value transferred is calculated and displayed.

G/L Conversion Rate (Payment)

The rate by which the payment value is multiplied (M) or divided (D) to convert the value to General Ledger base value.

If the bank account currency is the same as the base currency, the system forces a General Ledger rate of 1.00000.

M/D (Payment)

Enter M or D to multiply or divide the G/L conversion rate to convert the value to General Ledger base value.

If the bank account currency is the same as the base currency, the system forces a General Ledger rate of 1.00000.

Bank Account Code (Receipt)

The General Ledger bank account to receive the transfer. It cannot be the same account as the payment account

The description of the currency will also display.

Total Receipt (Receipt)

Enter the total value in the currency of the receiving bank, if known, including any charges applied by the receiving bank.

Charges (Receipt)

The value of any bank charges, in the currency of the receiving bank account.
The value transferred is calculated and displayed.

G/L Conversion Rate

The rate by which the receipt currency value is multiplied (M) or divided (D) to give the value in the base currency. (If the bank account currency is the same as the base currency, the system forces a rate of 1.00000).

The reciprocal of this value is used to calculate the total value in the receipt currency.

M/D (Receipt)

Enter M or D to multiply or divide the G/L conversion rate to convert the value to General Ledger base value.

If the bank account currency is the same as the base currency, the system forces a General Ledger rate of 1.00000.

Posting Period

This field defaults to the period on Cash Management company profile, but it can be amended.

Transaction Date

Enter the calendar date of the transfer. This field defaults to today's date.

Direct Rate

The rate by which the payment rate is multiplied (M) or divided (D) to give the value in the receiving currency. If these currencies are the same, a conversion rate of 1.00000 is required.

M/D

Enter M or D to multiply or divide the direct rate to convert the value to General Ledger base value.

Inter-Company

Enter 1 here if this is an inter-company transfer.

Payment Method

If you are using value dates (set up in Country-Specific Parameters in the General Ledger Utilities options), you must enter the payment method here.

When you press **F8=Update**, the From Bank Value Date Entry window will require you to enter the payment bank account date.

Press **Enter** and the To Bank Value Date Entry window displays for you to enter the receipt bank account date.

Functions:

F10

Select Target Cash Book. To transfer to a different company from the one you are currently in. A window listing available companies displays. Enter 1 beside the company you wish to select as the target company.

F16

Receipt Bank To Base. The Override Conversion Parameters window displays. Override the exchange rate for the displayed currency with a new rate.

F17

Payment Bank to Receipt Bank. The Override Conversion Parameters window displays. Override the exchange rate for the displayed currency with a new rate.

F18

Payment Bank to Receipt Bank. The same window opens as in F16=Receipt Bank To Base option, the Override Conversion Parameters window but the conversion is in the opposite direction.

Note: Where the source and target currencies are both Euro currencies no override is permitted.

Enter the values as required and press **F8=Update** to update.

Override Conversion Parameters Window (F16) (F17) (F18)

Override the default currency rate. To override the current rate you enter either:

- A predefined rate code specified on the General Ledger currency options.
- A new rate by which the value is to be multiplied or divided.
- The target value. The conversion rate will be calculated by the system.

Note: Where both the source and target currencies are Euro you may not override the conversion rate.

Press **F16=Receipt Bank To Base** on the Bank To Bank Transfer Screen to display this window.
The same window displays on selection of
F17=Payment Bank To Receipt Bank or
F18=Payment Bank To Receipt Bank

Fields:

Rate code?

Select a pre-defined rate code as set up in the Currency Rate code option.

Rate

Or, you may enter the new rate code to be used with up to five decimal places.

Multiply or Divide

M - Multiply the values held in the source currency by the exchange rate to achieve the target currency value.

Note: For Euro conversion the system holds

Euro/target fixed rates.

Note: For guidance on when to select Multiply or Divide in a Euro IN/OUT OUT/IN situation see the section Eurocurrency: Phase 1: Illustration Of Conversions.

D - Divide values held in the source currency by the exchange rate to achieve the target currency values.

Source to Euro

Note: This field displays when either the source or target currencies are currencies IN the Euro Zone.

The values of 0 or 1 default from the Euro Currencies Maintenance Option and decide the calculation rules.

0 - The currencies will be converted directly.

1 - Uses a triangulation currency conversion via the Euro currency.

Target Currency Value

Enter the target currency value and the system will calculate the rate.

Note: Only the variable part of the rate displays if the currencies are Euro OUT/IN or IN/OUT.

Press **Enter**, to see the rate applied to the converted currencies.

Post from Suspense

15/CSP

Any Cash Management transaction whose currency is different from the currency of the bank account to which it is posted is suspended.

Variance and charges on a transaction are not usually known at the time of making the payment. The transaction may therefore be posted to a suspense account defined on the bank account. The transaction will then be posted from suspense to the bank account, giving you the opportunity to post any charge or variance at the same time.

The transactions which may be suspended are:

- Customer receipts in Accounts Receivable.
- Supplier payments in Accounts Payable.
- Miscellaneous creditor payments.
- Bank transactions in Cash Management.

Select the Post from Suspense option to see the following fields:

Fields:

Bank Account

Enter the General Ledger bank account code. If an account is entered here, the Cash Book reference must be blank.

Cash Book Reference

Enter the Cash Management reference, if known, of the transaction which has been suspended.

If a reference is entered here, the account field must be blank.

If you enter an account number rather than a Cash Management reference, and press **Enter**, the Post from Suspense screen will display a list of postings for that account. Select those to be posted from suspense.

Post from Suspense Screen

This screen displays if you enter an account number in the Post from Suspense initial selection screen and press **Enter**.

This screen will display a list of postings for that account, from which you can select those to be posted from suspense

F8=Process selected items			F12=Previous	

Fields:

Select

1 - Select Cash Management references to be posted from suspense.

If you entered a Cash Management reference on the Post from Suspense initial selection screen, or if you select a reference from the Post from Suspense screen and press **Enter**, the Post from Accounts Screen details screen will display for each selection in turn.

This defaults to the current Cash Management period.

Make any amendments as required, then press **Enter** to review the next selection (if there is one).

Press **F12=Ignore this record** to move on to the next selection without amending.

Process External Data

1... **24/CSP**

Batches of cash receipts and payment advices with remittances (where included) received via Lockbox or other EDI transmissions are automatically posted at this option. Cash received is automatically allocated to customers/invoices.

Outstanding Lockbox transmissions with a cash deposit date up to and including the system date will be selected for processing as follows:

- Cash Receipts
- Cash Receipts with remittance details
- Payment advice
- Payment advice with remittance details

Each electronic transaction received contains your customer's bank details. The system will identify the paying customer from the customer's bank details, specifically from the bank reference. Where a customer cannot be identified cash will be posted as unassigned.

Enter an effective discount date. Discounts due on or after the selected date will be given.

Take All Discounts

0 - Leave at 0 if a discount date is entered.

1 - If the Discount date is left blank, all discounts will be given regardless of the payment due date of the items.

-  Press **Enter** to accept the discount header screen and to display the option to submit the batch.
-  Press **F8=Submit Job** to process the batch and be returned to the CS Processing Screen.

Payments, Remittances and Sundry Creditor Reports

Three menu options are available.

Payments and Remittances - produces documentation.

Payment Prelist - produces a sundry creditor report

Cancelled Payments - produce sundry creditor report.

Payments and Remittances

31/CSP

This option is used to print the necessary documentation for manual payments. The documentation produced will depend on the payment method being used. Every method will produce a proof list itemising the payments made, but the following documents will be produced according to payment type:

- BACS - Will produce a bank advice.
- Transfer - Will produce a bank transfer listing.
- Cheque - Will produce cheques.

The job will process General Ledger postings for all payment types except cheques. Postings for cheques are not made until the cheque numbers have been allocated.

Select the Payments and Remittances option to see the following fields:

Fields:

Bank Account Code

Enter the bank account code for the documentation you want to print.

Payment Method

Enter the payment method of the documentation you want to print. The method you choose must not be defined as a type of collection document.

Press **Enter**, and if your entries are valid a message will display to say that the printing can go ahead.

Press **Enter** to print, or **F3** to exit without printing.

Payment Prelist Report

61/CSP

This option produces a list of all miscellaneous payment requests for the bank account specified, for which documentation has not yet been produced.

Select the Payment Prelist Report option to see the following fields:

Fields:

Bank Account Code

Enter the bank account code for the documentation you want to print.

Payment Method

Enter the payment method of the documentation you want to print. The method you choose must not be defined as a type of collection document.

Enter the account and payment method and press **F8** to print the report.

Cancelled Payments

62/CSP

This option produces a listing of all miscellaneous payments cancelled for the bank account and payment method specified.

Select the Cancelled Payments option to see the following fields:

Fields:

Bank Account Code

Enter the bank account code for the documentation you want to print.

Payment Method

Enter the payment method of the documentation you want to print. The method you choose must not be defined as a type of collection document.

Enter the account and payment method and press **F8** to print the report.

Confirm Cheque Numbers

32/CSP

Before cheque payments are posted to the General Ledger, each cheque must be allocated a unique number. This option enables you to do this, and the job submitted will make the General Ledger postings.

Select the Confirm Cheque Numbers option to see the following field:

Fields:

Option

- 1 - To allocate cheques to accounts payable payments.
- 2 - To allocate cheques to cash management payments.

Press **Enter** to see the following field:

Fields:

Bank Account Code

Enter the bank account for which cheques are to have numbers allocated.

Once you have entered the bank account, press **Enter**. You will be presented with a list of cheques requiring numbers.

PL468	E1 - Demonstration Company	User ED3	14/01/94 10:34:09
Allocate Cheque Numbers

Select

1 - Any payment you want to review or cancel. Press **Enter**, and **F11** to confirm. The Cash Management reference number relating to the payment will be deleted from the system.

Confirm the cancellation and exit the option.

Reference Enquiry and Cancel Transactions

Three menu options are available. They are the same reference enquiry but the cancellation option enables you to delete transactions. The maintenance option enables you to amend items.

- Reference Enquiry (Enquiry)
- Cancel Transactions (Processing)
- Bank Reference on Cash Items (Maintenance)

Reference

2/CSE

Select the option *Reference*, to see a Cash Management Reference selection screen.

This enables you to review the transaction from its Cash Management reference number. Details of a particular item display using the supplier reference number as the search key.

Note: Page up and page down to scroll through available references which are displayed as item enquiries.

Fields:

Cash Mgmt Ref

Enter the Cash Management reference of the item to be enquired on.

This screen leads straight into the item screen, so refer to the Enquiry Screens section to continue.

Enter your selection, press **Enter** and the item details screen of the enquiries will display (this is the same as the **F20 Select History** screen which is included in the Enquiry Screens section).

Cancel Transactions

42/CSP

This option enables you to:

- Review an item.
- Deallocate an item. This involves restoring the item as an open item, and does not involve a posting to General Ledger.
- Cancel an item. This involves a General Ledger posting.

Select the Cancel Transactions option to see the following field:

Fields:

Cash Reference

Enter the Cash Management reference of the item to be enquired on.

If you do not know the reference you can use the page up/page down (roll) keys to display from the first item in the file.

Press **Enter** to display the details of the selected item:

Cancel Cash Item Screen

- ➡ This screen displays when you have entered a Cash Reference in the Cancel Transactions initial screen and pressed **Enter**:

This screen displays the details of the cash item selected.

1 - All payments posted with the same bank reference will display as a single item on the list of uncleared items.

0 - Each payment will display separately.

Select details and **Enter** to display the next screen.

Reconcile Bank Statements Screen 2

This screen displays when you enter details in Reconcile Bank Statements Screen 1 and press **Enter**.

Select 1 item or a range of item for reconciliation. Eliminate items from the reconciliation. You may suspend the reconciliation if unable to complete the session.

1=Select 2=Beginning of range 3=End of range 4=Ignore					
F3=Exit F5=Position F12=Previous F16=Suspend					

Fields:

Opt

1 - Clear one item.

2/3 - To clear a range of items, enter 2 against the first item of the range, and 3 against the last.

4 - Ignore items within the range of 2 and 3.

8 - Override the value date. This option is available only if you are using value dates, specified in country-specific parameters in General Ledger.

Document/Cleared Date

If you carry out your reconciliation daily, you have no need to maintain the date line by line, and the date shown here is taken from the statement date, and is not maintainable.

However, a setting on the Cash Management parameters file activates the Cleared Date function, making this date field maintainable. Enter the appropriate date.

Note: A running total of the items you select is at the top of the screen. For comparison with the statement total.

Functions:

F5

Position. Brings up a window enabling you to enter the bank reference to which the list is to be positioned.

F8

Update. This function key becomes available only when the total of your selected items balances with the statement total.

F16

Suspend. If you wish to leave the option (to make a statement posting, for example), but want to retain selections made so far, you can suspend the procedure by pressing **F16**. While a statement is suspended you cannot enter another statement for the same bank account.

Press **F8=Update** to proceed.

Bank Statement Postings And Interface Posting

Two options are available:

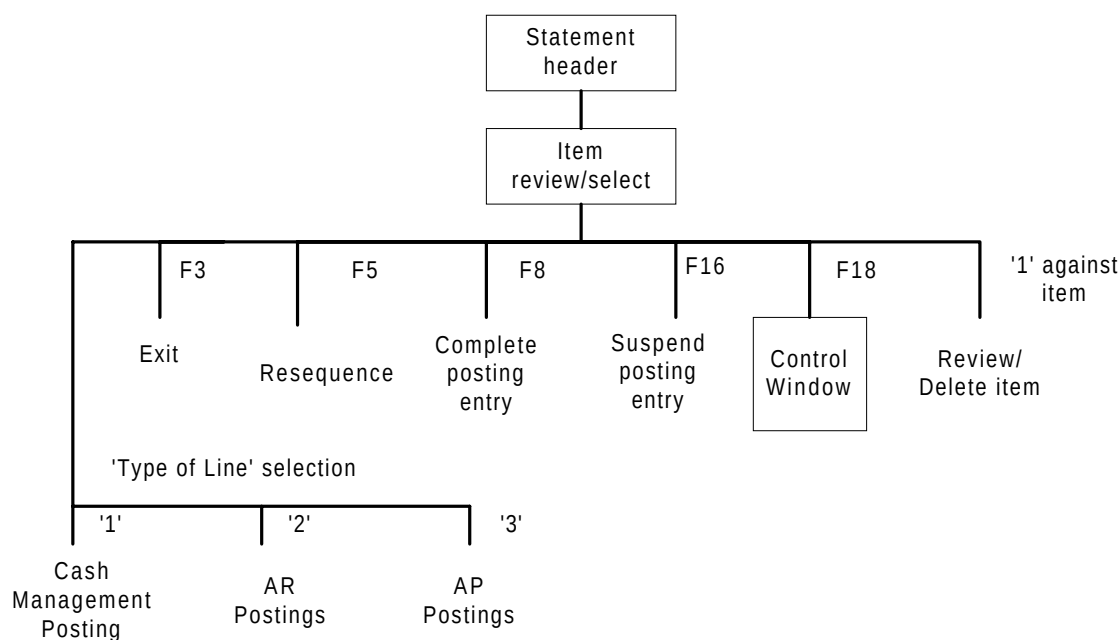

- Bank Statement Postings
- AR Interface Posting

Postings

1... 52/CSP 2...

This option enables you to enter statement details on to the system.

As this option leads to entries for Accounts Payable and Receivable as well as for Cash Management, the option is an extended one, with many screens. The following diagram shows the screen flow up to the Type of Line selection screen:

The screens which follow on from the above diagram are shown in diagrams in their relevant sub-sections.

Bank Statement Posting Screen 1

Select the Postings option to see the first Bank Statement Posting screen.

Enter details for the bank statement.

CS550	E1 - Demonstration Company	USER ED3	18/08/94 16:04:39

Bank Statement Posting	
Bank account ?	<u>512100</u>
Statement number . . ?	<u>12</u>
Statement date . . . :	<u>18/08/94</u>
Opening balance. . . :	_____
Closing balance. . . :	_____
Period :	<u>9311</u>

F3=Exit	F4=Prompt
---------	-----------

Fields:

Bank Account

Enter the General Ledger account here.

Statement Number

Enter the number on the statement provided by the bank. A new statement cannot be entered if a suspended statement is outstanding.

If the statement you enter is not accepted, use the prompt to see the suspended statement to be entered first.

Statement Date

Enter the statement date.

Opening Balance

Enter the opening balance as shown on the bank statement, in the currency of the bank account.

This should equal the closing balance on the last statement processed for the selected bank account.

Closing Balance

Enter the closing balance as shown on the bank statement.

Period

This field defaults to the current Cash Management period, and must not be less than the current General Ledger period.

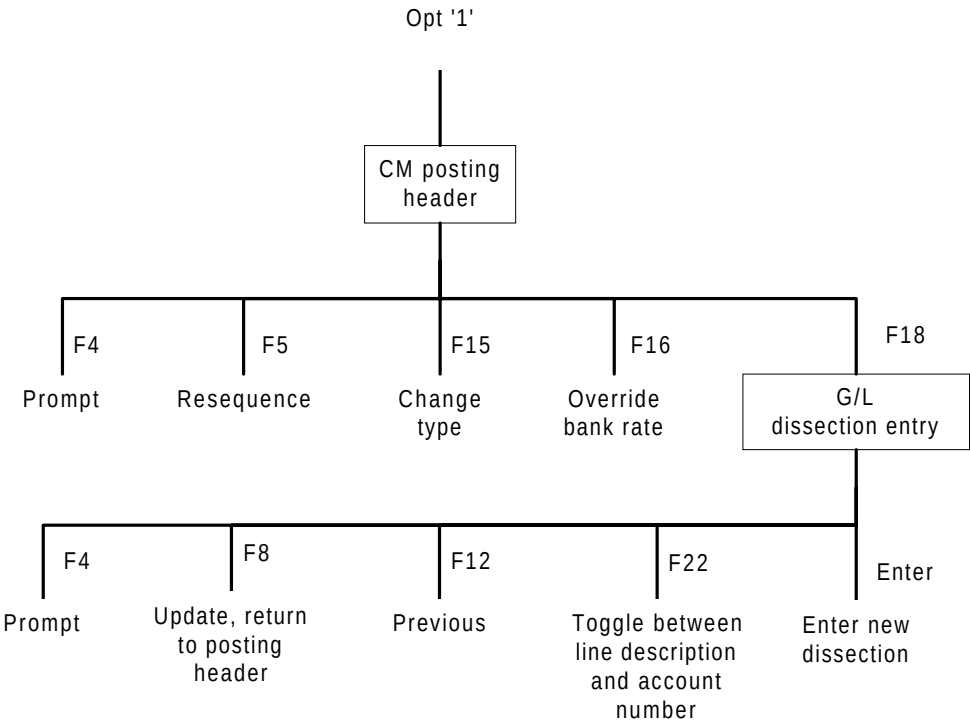

*Note: If the opening balance you have entered does not correspond to the system's record of the last closing balance for the bank account, a message will display. You can either amend your entry, or simply press **Enter** again to override the message.*

Press **Enter** to display the 2nd bank posting screen.

Cash Management Posting (Option 1)

To make a Cash Management entry posting enter Type of Line 1. The sequence of screens is as follows:

The screen you see is the third Bank Statement Posting screen.

Bank Statement Posting Screen 3

Select the type of posting and press **Enter** at the second Bank Statement Posting screen.

Post new Cash Management items from this screen and match or amend existing items. This screen also displays all the Cash Management items matched and posted for this statement so far.

For a new posting, enter all fields except Cash Management Reference.

To confirm existing items, enter only Cash Management Reference.

CS551	E1 - Demonstration Company	USER ED3	18/08/94 16:07:23
Bank Statement Posting			
Entry Sequence			
1	Bank reference	P/M	Date
			Value

Description. . : REC 002			
Reason code. . ? CV			
OR Cash management reference. . ?			
F4=Prompt			
F5=Resequene			
F15=Change type			

Fields:

Reference

To confirm an existing item, enter a valid Cash Management reference for this bank account. This must be a reference which has not already been matched against a statement.

This field should not be entered when posting a new item.

When the reference has been entered, the details of that item will display on the header screen. Note that the date and period shown are taken from the statement, not the item posting date.

The only maintainable fields are the Bank Reference, Bank Value, Date and Period. The bank value may be different from the original posting value because of currency variance. The item value will not change.

Bank Value

Enter the item value in the bank currency, as detailed on the statement.

Any payment transaction needs to have a minus sign against the value, as this cannot be determined from the item type.

Date

Enter the date assigned to the item by the statement. This field defaults to the statement date.

Item Value

If the item currency differs from the bank currency, this field becomes input capable so that the value may be entered.

Any payment transaction needs to have a minus sign against the value, as this cannot be determined from the item type.

Currency

Enter the currency code for the item. This field defaults to the bank currency.

Item Type

- 1 - Standard transaction (payment or receipt).
- 2 - Bank charges.
- 3 - Bank to bank transfer.

Reason Code

A reason code may be entered. This is optional.

Period

Enter the period which applies to the item statement date.

If you are using accounting dates and this field is left blank, the period will be derived from the calendar field using the date entered.

Description

A description may be entered for the item.

Pay Method

Enter a valid payment method.

Functions:**F5**

Resequence. Resequence the listed items

F15

Review. Return to the review screen to review items entered, or to change the type of posting to be made.

F16

Override Currency Rate. Override the bank currency rate.

Press **Enter** to display the fourth Bank Statement Posting screen displays, enabling you to enter General Ledger dissections.

Bank Statement Posting Screen 4

Press **Enter** at the third Bank Posting screen to display this screen.

This screen enables you to enter General Ledger dissections for the values entered at the previous screen.

CS551	Z1 - UK Demonstration Company	USER GBJBA1MS	4/06/98 10:52:48
Bank Statement Posting			
Reference. : MB098123	P/M . : CHQ	Item value. :	153.50
Date : 4/06/98	Period : 9803	Description :	
1 Account	Description	VAT	Value
Account . . ? 601100	Posting value . . :		153.50
VAT code. . ? 001 (P,S)	VAT value . . . :		26.86
Date. . . . : 4/06/98	Description . . :		
F4=Prompt	F8=Update	F12=Previous	F22=Line description
MA a	MW		21/056

Fields:

Account

Enter a valid General Ledger account.

If bank to bank transfer was indicated on the previous screen (item type - 3), then only bank accounts may be entered.

The currency of the item must be the same as that of this bank account.

Posting Value

This defaults to the full item value, but may be overridden if VAT or multiple dissections are being entered.

VAT Code

Select a VAT code for the posting.

If the GL account has a VAT code assigned to it then that code must be used.

Note: A VAT code is assigned to a GL Account at the Accounts Maintenance option.

You must then specify whether the VAT is for purchase or sales. This will enable you to produce a VAT reconciliation report. This VAT code for this account may be fixed as either purchase or sales VAT.

Note: VAT on the GL Account is set up as purchase, sales or either in the Accounts

Maintenance option.

VAT Value

Enter the VAT value as required.

Date

This defaults to the date of the previous screen, but may be overridden.

Description

This defaults to the description entered on the previous screen, but may be overridden.

If you are entering a new posting, then distribute the item value among the General Ledger accounts as required. Press **Enter** after each entry to see it appear in the list at the top of the screen.

Functions:

F22

Line Description. Toggle between displaying the line description and the full account code.

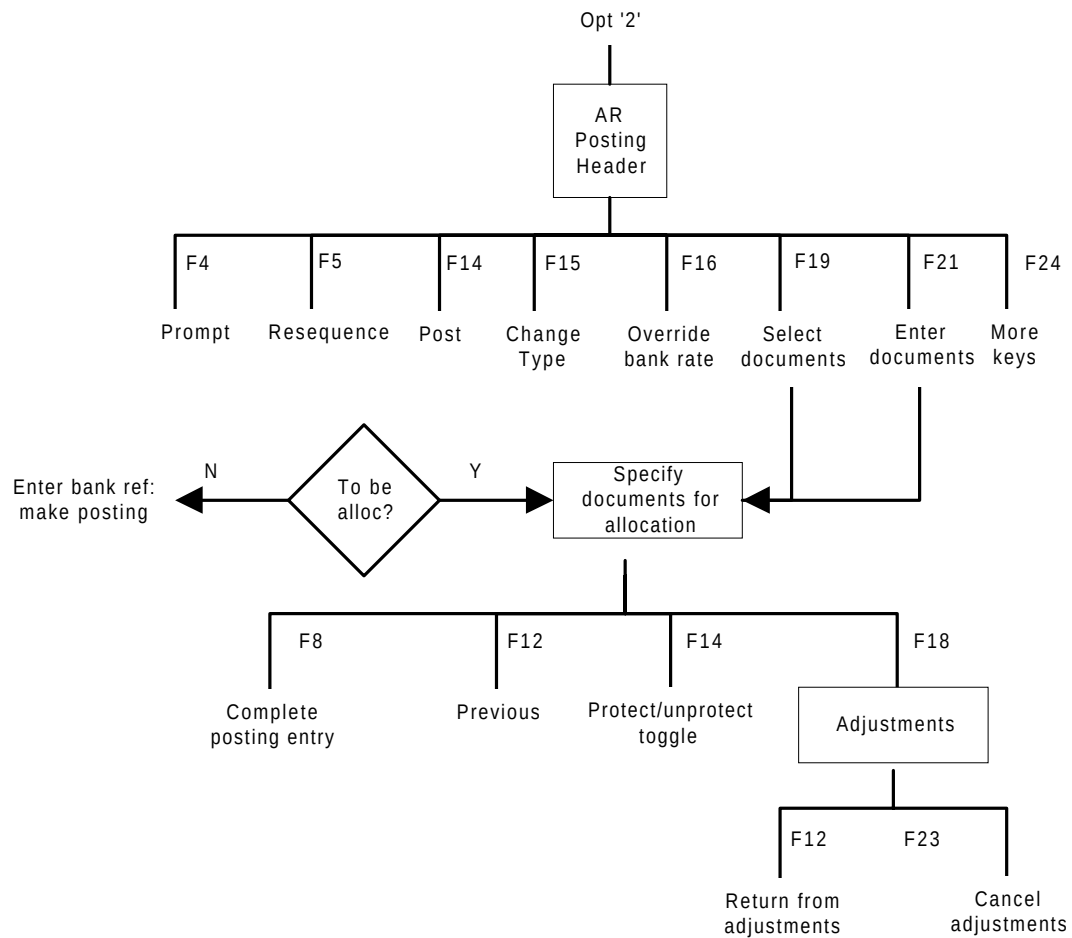

If you are confirming an existing posting, this screen will not be maintainable, and you can confirm the dissections by pressing **F8=Update**, or return to the previous screen by pressing **F12=Previous**.

Making an Accounts Receivable Posting (Option 2)

If you wish to make an Accounts Receivable entry, enter 2 for the Type of Line, as shown in the first diagram.

The sequence of screens will be as follows:

The first screen you see will be the fifth Bank Statement Posting screen.

Bank Statement Posting Screen 5

To display this screen press **Enter** at the 4th Bank Statement Posting Screen.

From this screen new receipts may be posted and allocated. Collection runs can also be confirmed. This screen also displays all the posted receipts for this statement so far.

CS552	E1 - Demonstration Company	USER ED3	18/08/94 16:10:52
Bank Statement Posting			
Entry Sequence			
1	Bank reference	Type	Date
			Value
			Cash ref
Customer. . ? FC02			
Invoice. ?		Bank value. . : 600.00	
OR Session. ?		Item value. . : 600.00	
OR Oldest item onwards. . : 1 (1=Yes)			
OR Item range. ?		to	
Date. . . . : 18/08/94		Pay method . ? CHQ	
Currency. . ? GBP		AR company. . ? ZI	
Period. . . . : 9311			
F4=Prompt		F14=Post receipt	
F15=Change type		F21=Enter invoices	
F19=Select		F24=More keys	

Fields:

Customer

This is optional, but if an invoice number is entered as well they must correspond.

Bank Value

Enter the value for the item in the bank currency as detailed on the statement.

Item Type

Enter a valid item type, for example IN or CR. You can prompt for a full list of options.

Item Reference

Enter a valid item reference.

Item Value

If the item currency differs from the bank currency, this field becomes input capable so that the value may be entered.

Session

Enter a valid session number that applies to a collection run (direct debits).

Oldest Item Onwards

1 - To display all outstanding items for selection. If 1 is entered, then a customer must also be specified.

Item Range

Enter the range of items to display for selection, entering both the item type and reference for the From and To values.

If a customer has not been specified, the customer for the first item in the range will be assumed.

Date

Enter the date for the posting. This will default to the date entered as the statement date.

Pay Method

Enter a payment method. If left blank and a customer number has been entered, the default method for that customer will be used.

Currency

Enter the currency for the item. This field defaults to the bank currency.

Period

Enter the period for this item on the statement. If you are using accounting dates and this field is left blank, the period will be derived from the calendar file using the date entered.

AR Company

Enter the Accounts Receivable company for the item.

Note: This field displays only if more than one Accounts Receivable company is attached to the Cash Management company.

The particular entries Invoice, Session, Oldest Item and Item Range enable you to specify either the exact document you want to match against (the Invoice entry), or a range from which you can select documents to allocate on the next screen.

If you use any of these entries, the **Enter**, **F14=Post Receipt**, **F19=Select** and **F21=Enter Invoices** keys become interchangeable. All will take you to the next screen for allocation.

Entering values in one of the four prevents you from using the remaining three.

If you enter a value but do not use either Invoice, Session, Oldest Item or Item Range, then the function keys behave in different ways. **F14=Post Receipt** will perform a simple posting without allocation. **F19=Select** will display all the documents available for allocation, and you can select from them as you wish. **F21=Enter Invoices** will display a screen of empty allocation fields, and you can enter the documents as you wish.

Functions:

Initially only function keys **F4=Prompt**, **F5=Resequence**, **F15=Change Type**, and **F24=More** are available. If the bank currency is different to the Cash Management company currency, **F16=Override Rate** will be available to override the bank exchange rate. On entering valid data into the screen and pressing **Enter**, function keys **F14=Post Receipt**, **F19=Select** and **F21=Enter Invoices** will be available.

F5

Resequence listed items.

F14

Post Receipt. Performs a standard posting, if no allocation fields have been completed on the header screen. If they have, then you go to the document listing screen, as with **F19=Select** and **F21=Enter Invoices**.

F15

Change Type. Cancels the current operation, and returns you to the review item screen.

F16

Override Rate. Override the bank currency rate.

F19

Select. If no allocation fields have been entered, the **F19=Select** key takes you to the document listing screen, and enables you to select the documents you wish to allocate by scrolling through the selection. If allocation fields have been completed, this key simply shows the documents selected, as with **F14=Post Receipt** and **F21=Enter Invoices**.

F21

Enter Invoices. This works the same as **F19=Select**, except that instead of displaying a list of documents available for allocation, it displays empty allocation fields for you to enter the document details yourself. This is useful if you know your document details, and wish to avoid scrolling through lists of documents. Again, this feature is not used if allocation fields were completed.

F24

Access the function keys which are not currently displayed.

*Note: If any allocating is to be done, then **F14=Post Receipt**, **F19=Select** and **F21=Enter Invoices** act as **Enter**.*

Bank Statement Posting Screen 6

Enter an invoice reference, range or oldest item flag and press **Enter**, and all the selected documents will be listed on the sixth Bank Statement Posting screen, ready for matching with the receipt. Those items posted with discount will have that value displayed in the appropriate column.

This is the allocation screen. The appearance of the screen depends on the function keys you pressed to get there. If you pressed **F21=Enter Invoices**, for example, the fields will be empty, and you must enter the details yourself.

		F21=Enter invoices	
		F24=More keys	

Fields:

Supplier

This is optional, but if an invoice number is entered as well they must correspond.

Bank Value

Enter the value for the item in the bank currency as detailed on the statement.

Item Type

Enter a valid item type, for example IN or CR. You can prompt for a full list of options.

Item Reference

Enter a valid item reference.

Item Value

If the item currency is different from the bank currency, this field becomes input capable so that the item value may be entered.

Payment Run Number

Enter the number of the payment run you wish to match.

Oldest Item Onwards

1 - To display all outstanding items for selection. If 1 is entered, then a supplier must also be specified.

Item Range

Enter the range of items to display for selection, entering both the item type and reference for the From and To values.

If a supplier has not been specified, the supplier for the first item in the range will be assumed.

Date

Enter the date for the posting. This will default to the date entered as the statement date.

Pay Method

Enter a payment method. If left blank and a supplier number has been entered, the default method for that supplier will be used.

Currency

Enter the currency for the item. This field defaults to the bank currency.

Period

Enter the period for this item on the statement. If you are using accounting dates and this field is left blank, the period will be derived from the calendar file using the date entered.

AP Company

Enter the Accounts Payable company for the item.

This field displays only if more than one Accounts Payable company is attached to the Cash Management company.

Four of the entries have a particular function. Invoice, Payment Run Number, Oldest Item and Item Range enable you to specify either the exact document you want to match against (i.e. the Invoice entry), or a range from which you can select documents to allocate on the next screen.

If you use any of these entries, the **Enter**, **F14=Post Payment**, **F19=Select** and **F21=Enter Invoice** keys become interchangeable. All will take you to the next screen for allocation.

Entering values in one of the four prevents you from using the remaining three.

If you enter a value but do not use Invoice, Session, Oldest Item and Item Range, then the function keys behave in different ways. **F14=Post Payment** will perform a simple posting without allocation. **F19=Select** will display all the documents available for allocation, and you can select from them as you wish. **F21=Enter Invoice** will display a screen of empty allocation fields, and you can enter the documents as you wish.

Functions:

F5

Resequence. Re-sort the order of listed items.

F14

Post Payment. Performs a standard posting, if no allocation fields have been completed on the header screen. If they have, then you go to the document listing screen, as with **F19=Select** and **F21=Enter Invoice**.

F15

Change type. Cancels the current operation, and returns you to the review item screen.

F16

Override. Override the bank currency rate.

F19

Select. If no allocation fields have been entered, the **F19=Select** key takes you to the document listing screen, and enables you to select the documents you wish to allocate by scrolling through the selection. If allocation fields have been completed, this key simply shows the documents selected, as with **F14=Post Payment** and **F21=Enter Invoice**.

F21

Enter Invoice. This works like **F19=Select**, except that instead of displaying a list of documents available for allocation, it displays empty allocation fields for you to enter the document details yourself. This is useful if you know your document details, and wish to avoid scrolling through lists of documents. Again, this feature is not used if allocation fields were completed.

*Note: If any allocating is to be done, then **F14=Post Payment**, **F19** and **F21=Enter Invoice** act as **Enter**.*

Bank Statement Posting Screen 8

Enter an invoice reference, range or oldest item flag and press **Enter**.

This is the allocation screen. All the selected documents will be listed on the next screen, ready for matching with the payment. Those items posted with discount display the discount value.

To exit press **Enter** and **F3=Exit**.

AR Interface Posting

53/CSP

The AR interface, also known as Lock Box, is provided to process Accounts Receivable receipts sent to you on magnetic tape, or potentially via EDI, by your bank.

The process follows the following stages:

1. Your bank sends a tape of customer receipts.
2. You load this data. Your agent will tailor a program to achieve this, and a standard batch process will validate the data, make the posting, and allocate the cash. If no error is found when validating, then the current option is not needed, and no further intervention is required.
3. If an error is found (an example might be a mistyped invoice number), then enter this option to correct the error, and to allocate the cash and make adjustments.

Warning: If errors do not occur, this option is not needed and no further intervention is required.

Select the AR Interface Posting option to see the first AR Interface Posting screen.

Fields:

Bank Account

Enter the bank account code.

Interface Reference

Enter the reference identifying the receipts to be processed. The reference is created by the batch job.

Press **Enter**, and the second screen will display.

AR Interface Posting Screen 2

This screen displays when you enter details in the AR Interface Posting initial screen and press **Enter**.

Select an accounts receivable item for amendment.

F8=Update					
F24=More keys					

Fields:

1

Select the entry you wish to maintain by entering 1 against it

Press **Enter**. The details of that entry will display on the third AR Interface Posting screen.

AR Interface Posting Screen 3

Some of these details may be changed so that the cash allocation can be made and the transaction posted. The bank value cannot, of course, be changed.

This screen displays when you enter details in AR Interface Posting Screen 2 and press **Enter**.

F8=Update		F21=Enter invoices	

Fields:

Customer

You can now change the customer.

Item Value

The item value can be amended only if the bank currency does not equal the item currency.

Date

Amend the posting date as required. This will default to the date from the interface file.

Pay Method

Amend the payment method required. This will default to the method on the interface file.

Currency

Enter the item currency if different to the bank currency.

Period

Enter the period for this item on the statement.

AR Company

Enter the Accounts Receivable company for the item. This field displays only if more than one Accounts Receivable company is attached to the Cash Management company.

Functions:

F5

Resequene listed items

F15

Change type. Cancel the current operation, and return to the review item screen.

F16

Override the bank currency rate. This function is shown only where applicable.

F21

Enter Invoice. Enter new invoices.

Press **F21=Enter Invoices** to enter a new invoice and display the AR Interface Posting screen.

AR Interface Posting Screen (F21)

This screen displays if you enter a new invoice
AR Interface Posting Screen 3 and press
F21=Enter Invoices.

The current invoice displays, but the details may be altered.

CS552		Y0 - Education Company - Y0		USER FFY0	6/04/95 15:03:17
AR Interface posting					
Customer . : N200		Auto-Manufacturing Parts

Fields:

Item Type

Amend as required.

Item Reference

Amend as required.

1

Enter 1 if the whole item is to be allocated. The alternative is to enter a part value in the next field.

Part Value

If the whole item value is not to be cleared, enter the part value here. You must first press **F14** to make the field input capable.

Discount

Enter any discount value here.

Functions:

F14

Toggle between enabling and disabling input into the Part Value and Discount fields.

F19

Adjustments.

Press **F19=Adjustments** to enter any adjustments.

Period Close

The period close procedures are carried out once you are satisfied that all transactions for the period have been processed.

This procedure carries out the following tasks:

- Creates a new period balance record for each bank account.
- Updates the calendar file with the opening date for the new period.
- Updates the company profile with the new period number.

Select the Period Close option.

The system checks that there are no outstanding procedures which should be completed, such as the allocation of cheque numbers. If there are, an appropriate message displays.

Note: Cash Management periods may be closed independently of other system 21 modules.

Period End Screen 1

This screen displays when you take the Period Close option.

```
CS080      Version 3 Demonstration Company      QAFIN1      25/07/97
Period End                                     15:39:01

Current Period . 9311
Date . . . . . 1/11/93

The current Cash Management period cannot be closed because:-
      Accounts Payable cheque numbers have still to be allocated

                                                                 ■

Please press ENTER

14-74      SA      MW      KS  CL  IM  DM  II      EDN400A      KB      PET165S2
```

The first screen displays any messages on your readiness to close the period: for example 'There are one or more incomplete statement sessions' or 'that cheque numbers have still to be allocated'.

This time, if all is well, the period close procedure can continue and the Period End Screen 2 displays.

Press **Enter** to return to the menu, and attend to the problem outlined in the system message before returning to try to close the period again.

Period End Screen 2

This screen displays when you press **Enter** in Period End Screen 1

This screen displays the current period and start date for information only. The next period number is also displayed.

The period close procedures automatically open the next period for Cash Management, and update the calendar file.
