Chapter 4

Collection Documents Processing

Collection Documents Processing Overview

Collection documents (formerly known as bills of exchange) are guaranteed negotiable instruments which may be issued:

- to the company by its customers,
- by the company to its suppliers,
- as a promissory payment of an outstanding debt.

When a document is accepted or issued, it is posted to the customer / supplier account to reduce the outstanding debt. It may be sold to a bank before maturity, or exchanged for cash when it has matured. Discounts may be calculated and taken at different stages of the collection document process.

Note: This depends on the setting of Post Discount on Collection Docs. at Maturity in Country Specific Parameters in the GL Utilities options.

While documents vary in certain ways from country to country, and even within a country, certain features are recognised internationally. The following are examples of types of collection documents:

- The supplier prints the document and sends it to the customer, who signs and returns it.
- The customer prints, signs and sends the document.
- The supplier sends the bank notice of payments to be debited from the customer's account (a direct debit).

The system offers three ways of generating collection documents:

- The Sales Order Processing invoicing procedure can create collection documents. This is a common way of producing the documents.
- The Accounts Payable module will produce documents to be released within Cash Management.
- Cash Management can create documents as required.

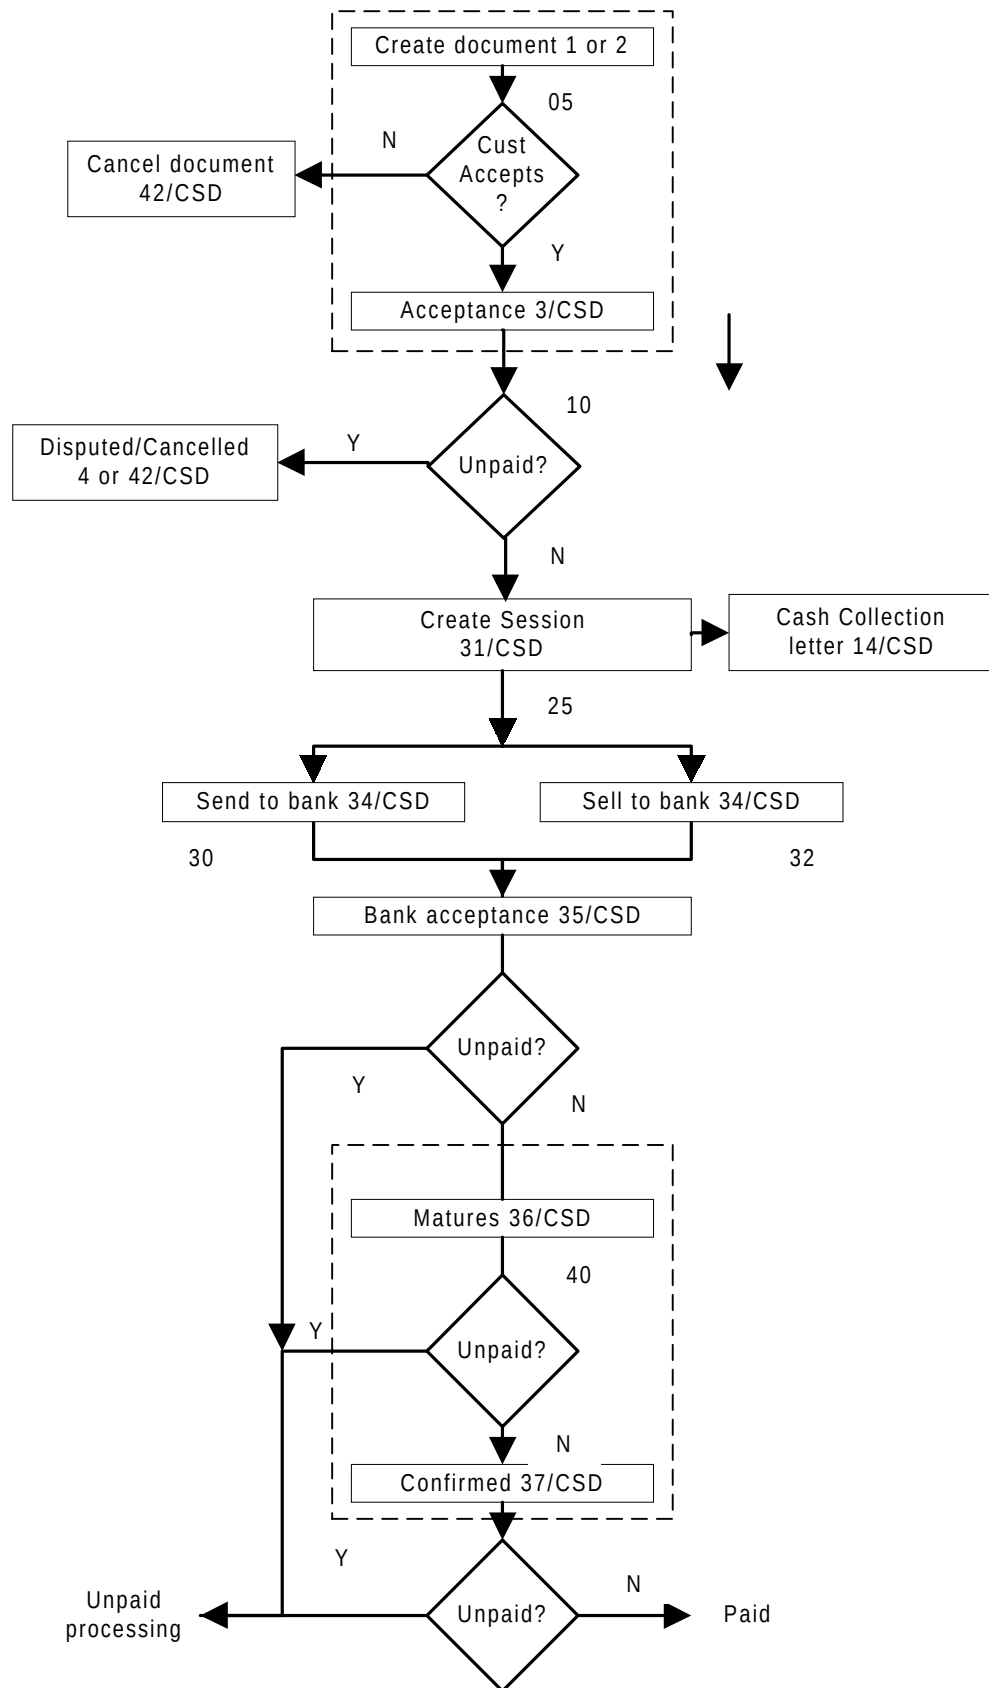

The Collection Document Cycle

A collection document passes through several stages in its lifetime. The cycle follows the pattern shown below:

- Creation
- Acceptance
- Sent to bank
- Sold to bank
- Maturity
- Confirmation

Collection Document Sequence Diagram

The following diagram shows the sequence of events and the actual options.

Also included in the diagram is the status of the document as it proceeds through the system. The status code indicates the point in the life cycle that the document has reached, and is commonly shown on enquiries, etc.

Collection Document Status Codes

Status codes applied to collection documents.

Status	Code	Status	Code
Statement	02	Matured	40
Unaccepted	05	Confirmed	90
Accepted	10	Written off	95
Disputed	15	Replaced	96
Included in session	25	Part open	97
Sent to bank	30	Part open/written off	98
Sold to bank (at discount)	32	Cancelled	99
Unpaid	39		

Using Review Codes

Attach a review code to documents that you are processing, but which need to be reviewed, for instance by a manager.

Review codes are set up in the Cash Management parameter file under the major code PDUS, and are of two types:

User-Defined Codes

You set up the codes you wish to use, with an appropriate description against them.

Special Codes

Although no review codes are set up on the system when you install it, the system will recognise certain codes when you enter them. These codes, with their suggested functions, are listed below:

Review Code	Reason	Where Tested
81	Low value collection document.	Manual create and part acceptance.
82	Transferred Item. Indicated that the document includes an AR item that was previously attached to another unaccepted document.	Manual create and part acceptance.
83	Manually created, not automatically created	Manual create.
84	Linked credit. This document was either created or replaced as the result of a credit link.	The document creation function within Sales Order Processing.
85	Terms changed. The value or maturity date of the document was changed after creation.	Document maintenance.
86	Unpaid document.	Unpaid processing.

Note: It is recommended that you avoid using the special codes for any other reasons than those assigned to them in the table above.

Whether you decide to use these special review codes or whether you prefer to define your own, there is one important feature available when you set up the codes. If you enter 1 in the Sequence field of the review code, then the system will prevent any collection document with that code assigned to it from being released and sent to bank until it has been reviewed. Neither can the review code be amended during this time.

Any document with this kind of review code is referred to throughout the system as a held document, and you can enquire on, or produce a report of, held documents.

Note that a hold code can, if you want, remain

attached to the document after review and release, as the code can still be useful for information and enquiry purposes.

Review codes which are not flagged as hold codes are simply for information.

Automatic Creation

1/CSD

This option will create collection documents for all the statement group codes specified, and can be used instead of creating documents in the Sales Order Processing module.

If the customer is set up to consolidate by due date, then this option will create a separate document for each due date. Otherwise, it will create a separate document for each individual invoice.

Settlement discount can be taken up to the discount date, depending on the setting of Post Discount on Collection Docs. at Maturity in Country Specific Parameters in the GL Utilities.

Select the Automatic Creation option to display the selection screen.

Document / Statement Creation Screen

This screen displays when you select the Automatic Creation option.

Select customer and document details for the automatic creation of documents or statements.

CS250	Z1 - GB Demonstration Company	User PRODSUPP	19/08/96 9:34:34
Document/Statement Creation			
Receivables company Z1			
Doc. statement group codes . . A _ _ _ _ _

F3=Exit F4=Prompt F8=Continue 07-35 SF MW KS IM II KENB20A PET16SS2			

Fields:

Receivables Company

This field defaults to the company code of the Cash Management company. Only change this field if the documents are to be created from a different Accounts Receivables company (linked to this module).

Doc. Statement Group Codes

Use these codes to group together customers that are to have statements or documents produced at this session. Specify up to six groups here.

Note: The codes are set up in Names and Addresses using the Accounts Receivable Maintenance options.

Document Date

Today's date will display and the discount date (if used) will be calculated from this.

You may change this date to a new date - as an independent date for the automatic creation start date.

Discount Date

The date displayed is the document date plus any days before the maturity discount date (set up in the company profile against Document Creation Days). You may change this to a different date to be used for calculating if discount is allowable.

Use this field only if you are using settlement discounts (e.g. the Post Discount on Collection Docs at Maturity is set to 1 in Country-Specific Parameters in the General Ledger).

The field is applicable only to collection documents and not to direct debits.

Cut Off Document Days

Enter the number of days from today before which you intend to create documents.

The system will select any Accounts Receivable items with a creation date less than or equal to the final date given by the number of days entered above.

Note: You may enter only one of the four cut-off days / date options.

Cut Off Document Date

As for Cut Off Document Days above - but enter the final document date to be selected.

Cut Off Due Days

The number of days entered in the company profile against Document Creation Days display here.

You may overwrite with a different number of days. Discount will be allowed if calculated as due, up to and including, the last of these days.

Cut Off Due Date

As for Cut Off Due Days above - but enter the actual due date.

Payment Method

If you enter a payment method, Accounts Receivable items with the same payment method will be selected.

Leave blank for items to be selected irrespective of customer payment method.

Customer Code

Enter a valid customer. Accounts Receivable items for this customer only are selected.

Currency Code

Enter a valid code. Accounts Receivable items of this currency are selected.

Include Disputed Items

1 - Include for selection those items currently in dispute.

0 - Exclude from selection those items currently in dispute.

Complete the screen details, press **F8=Continue** to create a collection document according to these specifications.

Manual Creation

2/CSD

This option enables you to manually create a collection document for a selected customer.

Select the *Manual Creation* option to see the first Document Creation screen.

Fields:

Receivables Company

This field defaults to the company code of the Cash Management company. The field need not be changed unless the documents are to be created from a different Accounts Receivables company linked to this module.

Customer Code

Enter the code of the customer for whom the document is to be created.

Enter the company and customer codes and press **Enter** to see the second Document Creation screen.

Document Creation Screen 2

This screen displays when you have entered the company and customer codes in the Manual Creation initial screen and pressed **Enter**.

Select a payment method and currency for the document, add an external reference and optionally include attached accounts receivable items.

09-43		SF		MW		KS IM II KENB20A PET16SS2	

Fields:

O/S Value

The outstanding value displayed is the gross value.

Att

Is the item attached.

C (Clear)

1 - To pay the outstanding value displayed for the item.

T (Transactions)

1 - To view the transaction details on the Accounts Receivable enquiry screen.

Part Payment

If you wish to include only part of an item's value in the document, enter that part here.

Discount

If allowed, the settlement discount value will display. If the discount value is highlighted then the discount date has passed.

You may overwrite the value in the Discount column.

If you enter 1 in the C column, this means you are selecting the item for inclusion in the new document. Select as many items as you wish in this way.

To part pay an item, enter the value to be paid in the part pay column, if this is displayed.

Functions:

F8

Create a document according to the selections made.

F14

Enter items. See more details below.

F19

To make an adjustment to the line against a reason code.

Select the items and press **F8=Create Document** to display the Maintain Document Details screen to create the document.

Maintain Document Details Screen

This screen displays when you have selected the items you want and pressed **F8=Create Document** in Document Creation Screen 3.

This screen enables you to create the document.

11-32	SF	MW	KS IM II KENB20A PET16SS2

Fields:

Payment Method

Enter the payment method of the document you wish to create.

Maturity Date

Enter the date on which the document will mature.

This field defaults to the earliest due date of the invoices included in the payment, as long as the earliest due date is not less than the system date. If it is, the system date will be used instead.

Review Code

If you wish this document to be reviewed, enter an appropriate code.

Depending on how the code is set up in the Cash Management Parameters file, it may prevent the document from being sent to the bank until the review takes place. Other review codes may be simply for information and reporting purposes.

Document Date

Enter the creation date of the document. This defaults to the system date.

External Reference

Enter the customer's own reference on the document, if the document was generated by the customer. Otherwise, use this field as you wish.

Period

This field defaults to the current period, but this may be amended.

Letter Code

If you wish to send the customer a letter, enter the code of that letter here. The letter will be printed at the next letter run.

Bank Details

Enter the customer bank details. Press **F10=Add** on the bank accounts prompt window, to add new bank accounts.

User Reference

Enter your reference for the collection document.

Type Of Account

Enter your BACs system account type code, or leave at 0 if not applicable.

Note: The format of the bank details requested above will vary depending on the country.

Before pressing **F8=Update** on the earlier screen to start the creation process, other options are available to you.

If your selected customer has an extensive list of items, and you would prefer to enter them by hand than to roll through the items, press **F14=Enter Items**.

Enter AR Items Window (F14)

This window displays if you pressed **F14=Enter Items** in the Maintain Document Details Screen.

If your selected customer has an extensive list of items. This window enables you to enter the items manually, and also displays any items already selected. It keeps a running total of the selections you have made, and in effect this list will be like the remittance advice:

Fields:

Tt

Enter the transaction type of the item you wish to include in the document.

Reference

Enter the reference number of the item to be included in the document.

Payment Amount

Enter the item value.

Discount

If allowed, the settlement discount value will display. If the discount value is highlighted then the discount date is passed.

You may overwrite the value in the Discount column or enter a value if none is shown.

Press **F8=Update** to confirm.

Enter Adjustments Window (F19)

Another option available to you in creating a document is the **F19=Adjustments** key, for entering adjustments. The Enter Adjustments window displays.

Make an adjustment to a customer's account - enter reason(s) and value(s) to be written off.

Acceptance

3/CSD

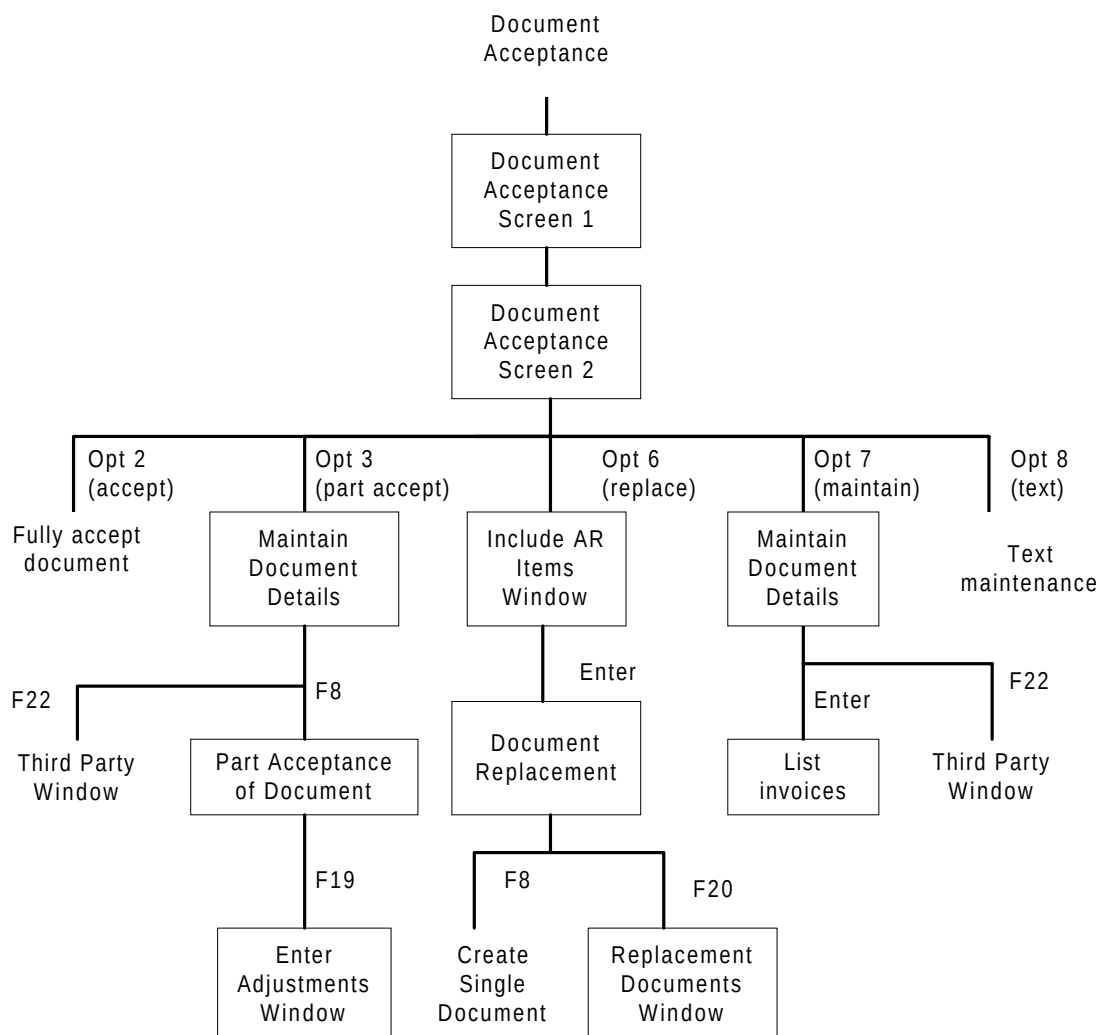

Certain types of collection document require the customer's signature of acceptance before sending to the bank.

Accept the document, select the Acceptance option to register that the document is now available for sending to the bank. The option also allows documents to be maintained prior to acceptance.

The Maintenance option enables you to maintain or cancel documents which have either not previously required customer acceptance, or which have already been accepted.

The Acceptance option deals with documents of status 05, while the Maintenance option deals with documents of status 10 or 15.

The options available are outlined in the following diagram:

Document Acceptance Screen 1

Select the CS collection documents processing option *Acceptance*.

Enter document details for the customer whose documents are to be accepted / maintained.

F8

Create Documents. The total value of these documents will be calculated, and you can then press **F8=Create Documents** to create a single document for this total.

Select the document(s) you wish to replace, and press **F8=Create Documents** to see the standard Maintain Document Details screen. Enter the details as required, and press **F8=Update** to update. The system will take you back to the list of documents, where you will see your new document, with a status of 10 (accepted).

For single replacement not including Accounts Receivable items, the new document will be a copy of the original document, including any discount value.

If Accounts Receivable items are included, the discount of the new document will be a consolidation of all documents, and will include discounts.

Select the document(s) you wish to replace, and press **F20=Create Multiple Documents**. The Replacement Documents window will be displayed.

F20

Create Multiple Documents. The total value of these documents will be calculated, and you can then press **F20=Create Multiple Documents** to create several documents for the total.

Press **F20=Create Multiple Documents** in the Document Replacement Screen

Replacement Documents Window (F20)

This window displays when you press
F20=Create Multiple Documents in the
Document Replacement Screen

Several documents are created for the total calculated on the previous screen.

Each line in the window can be used to enter details of a new document to be created. Enter the details as required, pressing **Enter** to update the totals at the bottom of the window, and ensuring that the final total equals the value of the original document.

Fields:

Payment Method

Enter the payment method of the document you wish to create.

Maturity Date

Enter the date on which the document will mature.

This field defaults to the earliest due date of the invoices included in the payment, as long as the earliest due date is not less than the system date. If it is, the system date will be used instead.

Review Code

If you wish this document to be reviewed, enter an appropriate code.

Depending on how the code is set up in the Cash Management Parameters file, it may prevent the document from being sent to bank until the review takes place. Other review codes may be simply for information and reporting purposes.

Document Date

Enter the creation date of the document. This defaults to the system date.

External Reference

Enter the customer's own reference, if there is one. Otherwise, this field may be used as desired.

Period

This field defaults to the current period, but this may be amended.

Letter Code

If you wish to send the customer a letter, enter the code of that letter here. The letter will be printed at the next letter run.

Bank Details

Enter the customer bank details.

Note: The format of the bank details requested above will vary depending on the country.

If you press **F22=Third Party** from the maintenance screen, a window displays to enable you to enter third party processing details.

Third Party Window (F22)

Press **F22=Third Party** on the maintenance screen to display this window

Enter details to identify the third party for processing.

Fields:

Third Party

Enter the relevant third party.

Third Party Reference

Enter the reference for the third party.

Bank Account

The default third party account displays.

Press **F8** to display the Document Maintenance screen. The screen displays the invoices included on the selected document.

F13

Amend. Return to the maintenance screen to amend.

Maintain the document as required, press **F8** to update, then **F12** to return to the original document list.

Maintenance

1...
2... **4/CSD**

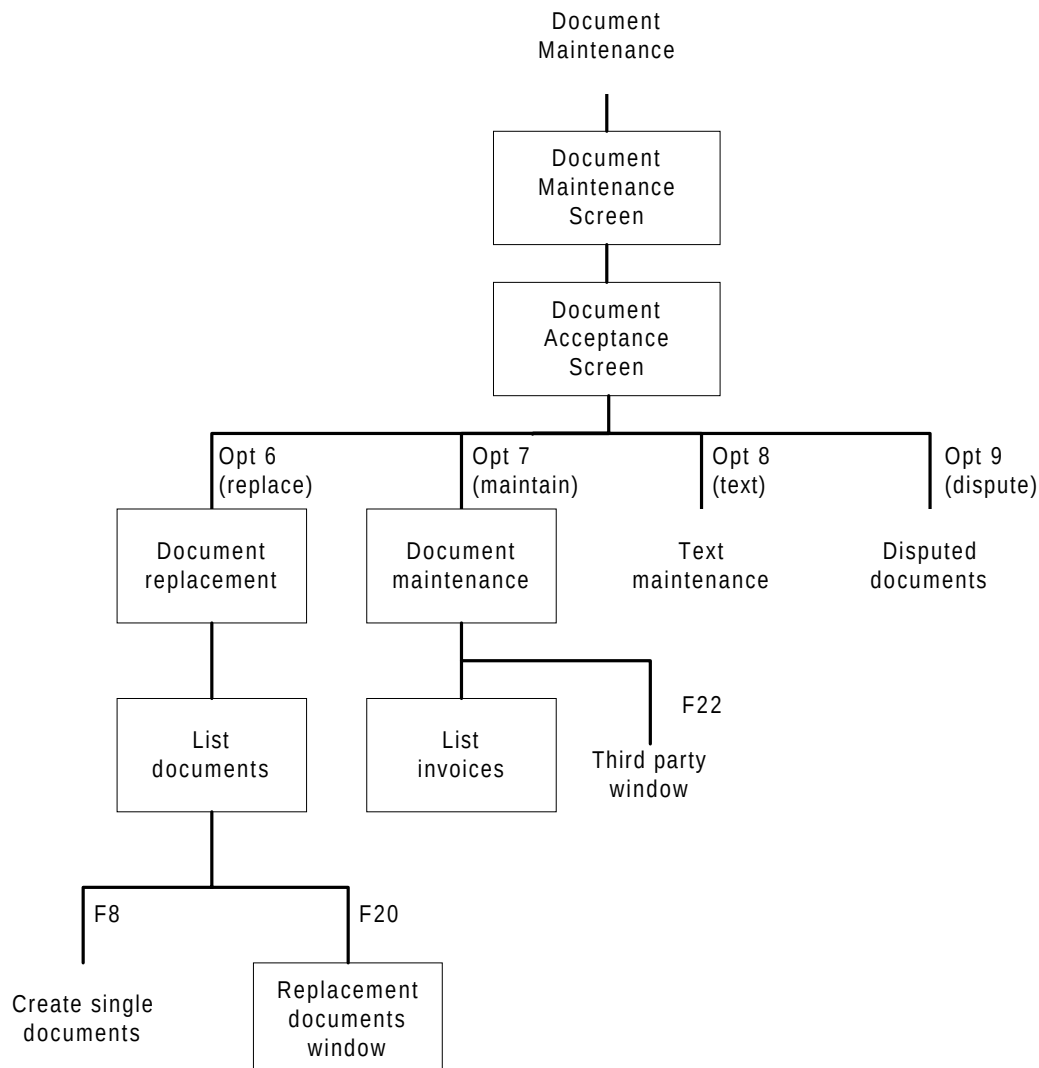

Certain types of collection document require the customer's signature of acceptance before sending to the bank.

Accept the document and select the Acceptance option to register that the document is now available for sending to the bank. At this option you can maintain documents prior to acceptance.

The Maintenance option enables you to maintain or cancel documents which have either not previously required customer acceptance, or which have already been accepted.

The Acceptance option deals with documents of status 05, while the Maintenance option deals with documents of status 10 or 15.

The options available are outlined in the following diagram:

Document Maintenance Screen

This screen displays if you select the *Maintenance* option to display the Document Maintenance screen.

Enter either an invoice number, or a document reference or a customer account of the document you want to accept or maintain.

1=Select
F3=Exit F12=Previous

Fields:

Review Code

Now that this document has been reviewed, its review code is set to blank, and the document can be released.

If you wish to enter another (or the same) review code, for informational and reporting purposes, you can now do so. Even if the code you enter is a holding code, it will not hold this document if you release it now.

This field may be left blank.

Letter Code

Enter the code of the letter you wish to send to this customer at the next letter run. This field may be left blank.

Press **F8=Release** to release the document. Simultaneously, attach the entered review code and letter code. Even if the review code entered is one which would normally hold a document, it will now act as an information review code only.

Documents

11/CSD

This option will print previously unprinted statements or collection documents according to the selection criteria entered on the initial screen.

Select the *Documents* option to display the following fields:

Fields:

Receivables Company

Enter the Accounts Receivable company for which the documentation is to be printed.

Customer No

To print documentation for a particular customer, enter the customer code here. Leave blank to print all customer documentation.

Due Date Range

Enter a range of dates for the selection of documentation to be printed. Leave both these fields blank to print all documentation regardless of date.

Press **F8** to produce the printouts.

Reprint Documents

12/CSD

This option enables you to reprint statements and documents which have already been printed. A reprint audit report is also available. The format of the document will depend on the specified payment method.

Documents which have not previously been printed are not valid for reprinting.

Select the *Reprint Documents* option, and on the selection screen enter the number of the document to be reprinted.

Press **Enter** to display the document details.

Functions:

F8=Reprint

Produce the document reprint.

F10

Review the bank details.

F15

Display the discount, commission and charges details.

Return to the previous screen with **F12=Previous** or exit with **F3=Exit**.

Document Letters

13/CSD

This option will print the letters of the documents you select. Only documents which have a letter code attached can have a letter printed.

Once the letter has been printed, the letter code for that document is set to blank.

Select the *Document Letters* option to see the selection screen.

F3=Exit F4=Prompt			

Fields:

Receivables Company

Enter the Accounts Receivable company for the customer(s) whose letters are to be printed.

Letter Code

Enter the range of letter codes you want printed.

Only valid codes can be entered. To select one code only, enter that code in the 'From' field and leave the 'To' field blank.

Leave blank to select all codes.

Maturity Date

Enter the range of maturity dates for which letters are to be printed.

Leave blank to select regardless of maturity date.

Creation Date

Enter the range of creation dates for which letters are to be printed.

Leave blank to select regardless of creation date.

Print Document Details

0 - Print only the document details with the letter.

1 - Print the Accounts Receivable item details as well as the document details themselves.

Note: You can use the Review option to set the letter code for a document.

Press **Enter**. If the entries you have made are accepted.

Press **F8** to submit a job to print the letters.

Cash Collection Letters

14/CSD

This option prepares a letter informing the customer that a collection document, or more than one document, is about to be sent to the bank.

Select the *Cash Collection Letters* option to see the selection screen.

Fields:

Accounts Receivable Company

Enter the Accounts Receivable company of the customers to whom letters are to be sent.

Letter Code

Enter the code of the letter to be printed.

Payment Class

Enter the payment class for which letters are to be printed.

Maturity Days

Enter the number of days before the documents mature.

Maturity Date

Enter the date on which the documents will mature.

Customer Code

To produce a letter for a particular customer, enter the customer code here. Leave blank to select all customers.

Include Docs In Review

0 - The default - do not produce letters in review.

1 - Produce letters for customers whose documents still need reviewing.

Currency

Enter the currency for which you wish letters to be produced.

This field defaults to the base currency.

Press **F8** to submit a job to produce a letter for each selected customer. A flag will be set to ensure that a document included in a letter will not be included in any future letter.

Chase Unaccepted Documents

15/CSD

If a customer does not accept a document, it may be necessary to send a Dunning (chase) letter. This option will send a standard letter whose format and wording will depend on the code you select. The letter will include a list of documents which were created before the specified cut-off date but have not yet been accepted.

The document value is shown net of any discount.

The report is designed to be printed on pre-printed stationery.

Select the *Chase Unaccepted Documents* option to display the selection screen.

F3=Exit F4=Prompt			

Fields:

Receivables Company

Enter the Accounts Receivable company of the customers to whom letters are to be sent.

Dunning Letter Code

Enter the code of the Dunning letter you wish to send. The code must be a valid code set up in the Accounts Receivable module.

Cut Off Days Since Creation

Enter the number of days since creation of documents to be included in the selection.

Creation Date Range

All customers with outstanding documents created between the dates entered here will receive a letter, as long as all other selection criteria are satisfied.

Maturity Date Range

All customers with outstanding documents which matured between the dates entered here will receive a letter, as long as all other selection criteria are satisfied.

Press **Enter** and a job will be submitted to print the letter.

Payment Reminders

16/CSD

This option enables you to list details of any documents that are currently being held for review. Document values are shown net of any discount.

Select the *Payment Reminders* option to display the screen.

Fields:

Receivables Company

Enter the Accounts Receivable company of the customers to whom reminders are to be sent.

Dunning Ltr Code

Enter the code of the Dunning letter you wish to send.

Cut Off Days To Due Date

Enter the number of days to due date of documents to be included in the selection.

Cut Off Due Date

Enter the latest due date of documents to be included.

Payment Method

Enter the selected payment method.

Include Disputed Items

1 - Include reference to disputed items in the reminder.

Press **Enter** to submit a job to print the payment reminders.

List Documents for Review

17/CSD

This option enables you to produce a report of documents according to their review code (see the Introduction to this section for an explanation of the use of review codes).

You can also specify whether you wish to review only those documents whose review codes are preventing them from being released.

Select the *List Documents for Review* option to see the selection screen.

F3=Exit F4=Prompt			

Fields:

Review Code Range

Enter the range of review codes to be included in the review.

Leave both fields blank to select all review codes.

Document Status Range

Enter the range of statuses to be included in the review.

Maturity Date Range

Enter the range of maturity dates of documents which are to be included in the report.

Held Documents Only

Any review code can be set up as a holding review code. This is a code which prevents any document to which it is attached from being released and sent to bank. Such a document is said to be a held document.

0 - To include documents whether held or not.

1 - Only held documents are to be included in the review.

Press **Enter** to submit a job to produce the listing.
