Chapter 5

Collection Documents Bank and Other Options

Collection Document Processing

Introduction

The options in this section deal with sending documents to the bank, and with certain other facilities, such as unpaid documents.

When you are ready to send or sell your documents to the bank, you must create a session. This is a series of documents to be processed together. The options used in creating, amending and processing sessions are those under the heading Bank on the menu above.

The other options dealt with by this section are concerned with managing unpaid documents (Identify and Manage Unpaid Documents), creating direct debits, and processing documents from Accounts Payable.

Session Creation

31/CSD

A document must be included in a session before it can be sent to the bank. A session is a series of documents (not direct debits) grouped together to be sent to the bank, and is an important feature of the collection document processing cycle.

Discounts must have been previously taken (at Document Acceptance) on payment methods which take discounts on acceptance. Discounts cannot be taken at the 'sell to bank' collection stage. If 'sent to bank', however, discounts can be taken.

Select the cash management collection document processing option *Session Creation*.

CS141	E1 - Demonstration Company	User ED3	27/07/94 16:00:25
Session Creation			
Bank Account for Receipts.....?		512100	GBP
Cash Apportionment?.....		0	
Select documents to send or sell to the bank :			
Accounts Receivable Company..		E1	E1 Demonstration Company
Payment Class.....?		001	
Maturity Days.....		10	or Date _____
Customer Code.....?			
Document Reference.....?

Session Type.....		1	(1=Send to bank 2=Sell to bank)
Currency.....?		GBP	
Review Code.....?		From: 01 To: 02	
F3=Exit F4=Prompt F8=Process			

Fields:

Bank Account For Receipts

Enter the bank account to be used as the collector account for the documents. If the cash apportionment flag for the bank is 1 the system rules will generate the bank postings, based on the cash apportionment table for the payment method.

Cash Apportionment

1 - Cash apportionment is to be used within the session.

Accounts Receivable Company

This field defaults to the company code of the Cash Management company.

Payment Class

Enter the payment class of the documents to be included in the session.

Maturity Days

Documents will be selected for inclusion in this session if they have a maturity date of the system date PLUS the days entered.

Maturity Date

Documents will be selected for inclusion in this session if they have a maturity date less than or equal to this date.

Customer Code

Documents can be selected for a specific customer. Enter the customer as required.

Document Reference

A particular document may be included in the session.

Session Value

Documents will be selected in maturity date order up to the value entered here. The sale value is net of any discount.

The value must be 0 if the session type is 1 (send to bank).

If entered, and cash apportionment does not apply, the system will check whether this value is acceptable to the bank account selected. This will normally be determined by the approximate amount that is required to be raised. The system will then find the appropriate documents, if available, in order to meet the input value as closely as possible.

Session Type

1 - Sent to bank. The documents will be collected by the bank on their maturity date. Discount may be taken where allowed.

2 - Sold to bank. The bank agrees to accept the documents before maturity, and the balance is updated at this point. Charges are incurred for this. No discount will be taken.

Currency

The currency defaults to that specified on the Cash Management company profile.

Currencies may not be mixed within a session.

Review Code Range

Documents with a review code within this range will be selected for inclusion in this session.

Press **F8=Process** to create the session.

Review and Amend Session

32/CSD

When the bank receives a session of documents, it sends a response (bordereau) back, listing the items it has received. This option enables you to reconcile this response against the session on the system.

If the session and the bank response fail to reconcile, you can amend the system session, adding any omitted document or deleting an extra one.

The option can also be used as a standard review and amend function if you are not performing a reconciliation.

Select the *Review and Amend Session* option to display the Session Review and Change screen.

Session Review and Change Screen

This screen displays when you Select the *Review and Amend Session* option.

Select sessions for review and amendment.

Fields:

Bank Reference

When the bank receives a session of documents it will send a response listing the documents it has received. The bank reference is found on this response.

Commission

Amend the bank's commission charge for this session as desired.

VAT Code

Enter a VAT code to supply the VAT rate for commission.

This field defaults to the VAT code for this session.

Amount

Enter the VAT value for commission.

This field will default to show the VAT value calculated from the session's VAT code rate.

Interest

Amend the bank's interest charge for this session as desired.

VAT Code

Enter the VAT code to supply a VAT rate for interest.

This field defaults to the VAT code for this session.

Amount

Enter the VAT value for interest.

This field will default to show the VAT value calculated from the session's VAT code rate.

Net Value

The net value shows the session value minus commission and interest. Any amendment must maintain this calculation.

Press **Enter** to update.

Session Listing

33/CSD

This option produces a report of the details of any session selected.

Select the *Session Listing* option to display a list of sessions:

Fields:

1 (Select)

1 - Against the sessions you want included in the report.

Press **Enter** to submit a batch job which will produce a single report of all the sessions selected.

Send Session to Bank

34/CSD

This option prepares the documentation necessary to send a session of collection documents to the bank.

Select the *Send Session to Bank* option to display a list of sessions:

Fields:

1 (Select)

1 - Against each session you wish to send to the bank.

When you have selected the sessions you wish to send to the bank, press **Enter** and a job will be submitted to produce the documentation required.

Bank Acceptance

35/CSD

When a bank receives a session it sends back a response which must be registered on the system. This option enables you to register a bank's acceptance of a session, and to reconcile the system record of the session with the bank response.

Select the *Bank Acceptance* option to display a list of sessions:

Fields:

1 (Select)

1 - To review and amend a session.

2 - To register a session as accepted by the bank.

The Bank Acceptance screen displays when 1 is entered.

Bank Acceptance Screen

-  Select a session with 1, the Bank Acceptance screen displays the session header details.

Enter a bank reference, review items included in the session, or accept.

F3=Exit F10=Add Item F11=Cancel Session F12=Previous			
F15=Display Charges F17=Amend Charges			

Fields:

1 (Select)

4 - Remove a session.

Functions:

F15

Display Charges. Enquire on charges on the item.

F17

Amend Charges. Enables you to alter charges.

Note: Refer to Review and Amend Session for more information on the options available here.

When you are satisfied that the bank response and the system are reconciled, return to the initial screen where the sessions are listed, enter 2 against any sessions to be accepted, and press **Enter**. A batch job will be submitted to mark the sessions as accepted.

Maturity

36/CSD

This option submits a job which will mature all documentation due for maturing and will update the bank accounts.

Note: This job may well be run as an overnight batch job each night.

Select the Maturity option to display a message enabling you to cancel or press **F8=Submit** to submit the job.

Confirmation

37/CSD

This option submits a job which will confirm all documents at bank, and those which have matured. If you have specified a number of Caution Days on your company profile, then this will be taken into consideration when calculating which documents have matured.

If you do not use the Maturity option in your procedures then this option will also update the bank accounts.

Select the *Confirmation* option to display a message enabling you to cancel or press **F8=Submit** to submit the job.

Identify Unpaid Documents

1... **41/CSD**
2...

This option enables you to register a document as unpaid.

You can register the whole document as unpaid, certain invoices as unpaid, or part of the document value as unpaid. The unpaid value can then be written off. Bank charges can be recharged to the customer, and a letter code specified.

Discounts already taken on maturity, sent to bank, or at acceptance will be reverse posted.

A document can be unpaid if its status is sent to bank, sold to bank, matured or confirmed.

Select the *Identify Unpaid Documents* option to display the following field:

Fields:

Document Reference

Enter the reference of the document to be unpaid.

Press **Enter** to display the document details.

Unpay Documents Screen 1

This screen displays when you press **Enter** in the Identify Unpaid Documents.

This screen displays the document details with a number of processing options. Yours options here include: add values, (unpay or part unpay), reason codes, text, customer bank details or cancel a document.

CS172	E1 - Demonstration Company	User ED3	27/07/94 16:26:23

Fields:

Select

2 - Text. A screen displays with text on the document. The option to add new text, or to change the sequence of existing text entries, is available.

4 - Unpay Item. Register the item as unpaid.

Document Value

This defaults to show the value of the document. You may change this value to part unpay the document.

Charge

Enter the amount of any charge made by the bank as a result of rejecting the document.

This charge is not added to the debt owed by the customer unless the Recharge Invoice option is taken when unpaying, using the **F5=Unpay Document** key.

VAT Code

If VAT applies to the bank charges entered, enter an appropriate VAT code here.

If a VAT code is entered, a VAT value must also be entered. The value will be validated against the VAT code.

Value

Enter the VAT value applied to the bank charges.

This charge is not added to the debt owed by the customer unless the Recharge Invoice option is taken when unpaying, using the **F5=Unpay Document** key.

Unpaid Date

Enter the date that the document is to be recorded as unpaid.

This field defaults to today's date.

Unpaid Reason

Enter a reason code for any document to be unpaid or part unpaid.

Disputed Reason

Enter a disputed reason code.

Letter Code

Enter the code of the letter you wish to send to this customer at the next letter run.

Functions:

F5

Unpay a Document. Add charge made to the customer's debt.

F8

Part Unpay. This function depends on the status of the document. If the **F8** key is listed at the bottom of the screen, then you can part unpay your document. You must firstly enter the value to be unpaid in the Document Value field.

F10

Customer Bank Details. A window displays with the banks details for your information.

To exit press **F12=Previous** or **F3=Exit**.

Unpay a Document Window (F5)

Press **F5=Unpay Document** in Unpay Documents Screen 1 to unpay an item, and a window showing the following field will display:

Add charges to be invoiced.

Fields:

Recharge Invoice

1 - To specify charges that will be invoiced to the customer.

If you do not wish to enter charges, press **F5=Confirm** to update the document as unpaid. You will be returned to the first screen.

If you do wish to enter charges, enter 1 in the Recharge Invoice field, and press **F5=Confirm** (not **Enter**) to display the Recharge Invoice window.

Recharge Invoice Window

If you do wish to enter charges, enter 1 in the Recharge Invoice field of the Unpay a Document Window (F5), and press **F5=Confirm** (do not press **Enter**) to display the Recharge Invoice window.

Fields:

Item Reference

Enter a reference for the charges here.

This field is mandatory entry.

Recharge Amount

Enter the total value of bank charges to be charged back to the customer.

VAT Code

Enter the VAT code to be applied to the recharge total. This must correspond to the actual value in the Recharge VAT field.

Recharge VAT

Enter the VAT value of the recharge. This must correspond to the VAT rate of the VAT code entered.

Reason Code

Enter the relevant reason code.

This field is mandatory entry.

Enter charges, press **F8=Confirm** to confirm, and you will be returned to the entry screen.

Part Unpay a Document Window (F8)

First, you must enter the value to be unpaid in the Document Value field. A window showing the following field will display:

The availability of the Part Unpay facility depends on the status of the document. If the **F8=Part Unpay** key is listed at the bottom of the screen, you can part unpay your document. When you have part unpaid the Recharge Invoice window will then display as for fully unpaid documents.

Fields:

Recharge Invoice

1 - To specify charges that will be invoiced to the customer.

If you do not wish to enter charges, press **F8=Part Unpay** to part unpay, or **F19=Write Off** to write off the unpaid amount. A window will ask you to enter a reason code. You will then be returned to the first screen.

Manage Unpaid Documents

42/CSD

This option enables you to maintain and amend documents which are currently unpaid. You can:

- Review document details and customer bank details.
- Cancel a document.
- Reinstatement a document.
- Replace a document, either merging several documents together or creating multiple documents from a single document.
- Write off a document.

Select Payment Document Screen 1

Select the cash management collection document option *Manage Unpaid Documents*:

Fields:

Accounts Receivable Company

Enter the company of the unpaid document.

Customer Code

Enter the customer code of the unpaid document. Leave blank to see unpaids for all customers.

Press enter to see the second Select Payment Document screen displays.

Select Payment Document Screen 2

To display this screen complete the first Select Payment document Screen.

A list of all available documents will be shown:

Fields:

Select

1 - To select a document.

Select the document which you wish to maintain and the document details display.

Manage Unpaids Screen

To display this screen select the document to maintain and the document details display.

Full details of the selected document display with functions to manage the unpaid details.

F8=Create Document F12=Previous F20=Create Multiple Documents																																						

Fields:

Maturity Date

Enter the maturity date you want to apply to the document you are creating.

Type

Enter the payment method of the document you are creating.

Value

Enter the value of the new document.

Value Entered

This field displays a running total of the document values entered. It is updated every time **Enter** is pressed.

Value Remaining

This field displays a running total of the value left from the original document which is not yet allocated to a new document.

Each line in the window can be used to enter details of a new document to be created. Enter the details as required, pressing **Enter** to update the totals at the bottom of the window, and ensuring that the final total equals the value of the original document. Press **F8=Update**, and the documents will be created.

Write Off Window (F19)

Press **F19** to bring up a window asking you to enter a reason code for the write-off. Enter a code and press **Enter** to proceed with the write-off.

Direct Debit Creation

43/CSD

This option creates direct debits in the same way that Automatic Creation creates collection documents.

The main difference between the options is that Automatic Creation creates separate documents either for each due date or for each invoice, depending on a customer setting. Direct Debit Creation creates one debit for all invoices up to the cut-off due date.

In contrast to Automatic Creation, this option does not update the General Ledger until the debit has matured.

Direct Debit Creation Screen

Select *Direct Debit Creation* to display the selection screen.

CS255	Z1 - GB Demonstration Company	User PRODSUPP	19/08/96 11:07:47
Direct Debit Creation			
Receivables company <u>Z1</u>

F3=Exit F4=Prompt F8=Continue 21-33 SF MW KS IM II KENB20A PET165S2			

Fields:

Receivables Company

This field defaults to the company code of the Cash Management company. The field need not be changed unless the documents are to be created from a different Accounts Receivables company linked to this module.

Doc Statement Group Codes

These codes are used to group together customers that are to have direct debits set up. Up to six groups may be specified here.

Cut Off Maturity Days

Any number displayed will have been set up at in the company profile against Document Creation Days. Enter the number of days from today for which you want to create direct debits.

Cut Off Maturity Date

As above cut off days, but enter the date itself to be the last date to create direct debits.

Discount Date

The date displayed is the document date plus any default cut off maturity days. You may change this to an earlier or later date to be used for calculating if discount is allowable.

This field is used only if using settlement discounts (i.e. the Post Discount on Collection Docs at Maturity setting in Country-Specific Profiles in the General Ledger is set to 1).

The discount held against the invoice will be taken if the invoice discount date is less than or equal to the discount date entered here.

Where displayed, this field is mandatory.

Mature On Discount Date

0 - The payment due date (i.e. the maturity date) must override the discount date.

1 - Use the discount date as the direct debit run day and this will override any maturity date displayed. This would be important if you have amended the Cut off Maturity Days / Date.

Payment Method

Enter a valid method. To create a direct debit payment, the payment method entered here must be set up as a direct debit method on the parameter file (type DRDB).

Customer Code

Enter a valid customer. Accounts Receivable items for this customer only will be selected.

Currency Code

Enter a valid code. Accounts Receivable items of this currency will be selected.

Include Disputed Items

1 - Include in the selection those items currently in dispute.

0 - Do not include disputed items.

Press **F8=Continue** to create the direct debit.

AP Document Maintenance

44/CSD

This option enables you to amend a document due date if it has not yet been cleared or cancelled.

AP Document Maintenance Selection Screen

Select the cash management collection document processing option *AP Document Maintenance*.

Select references for maintenance.

Fields:

External Reference

Enter the external reference. This is the payment reference created by AP, and can be found using the AP enquiry system.

Internal Reference

This is the reference allocated by the collection document system, when the document is created.

Press **Enter** to display the document details.

AP Document Maintenance Screen

-  Press **Enter** on the AP Document Maintenance Selection Screen to display the document details.

View document details, and if required, amend the due date.

-  Press **Enter** to display the document details.
