Chapter 9

Application Interface

Set Up Requirements For EDI Financials

To use the EDI Financial options effectively it is recommended that you set up the following:

In Cash Management

- Parameters file. Add your EDI payment classes to parameter type PCLS.
- Parameters file. Add your EDI payment methods to parameter type EBDR.
- Payment Methods Maintenance. To send payment details to your bank via EDI add your EDI Payment Methods. These must be of payment type 7. Only one electronic payment method can be defined for a bank.

In Accounts Payable

- Supplier Maintenance. Payment Method should be set to an EDI payment method (Payment Type '7') if payment advice is to be made via EDI.
- Supplier Maintenance. Bank Details Window. Ensure that suppliers who are to receive cheques separately from remittances are defined as Cheque Type 'L' for separate cheque and remittance.

In EDI Maintenance

- Maintain Documents. Ensure that document type Payment Order/Remittance Advice is defined.
- Maintain Documents. Ensure that document type Lockbox is defined.
- Maintain Trading Partners. Set 'Payment Order/Remittance Advice' to active for those of your suppliers who are to receive Payments Remittance advices via EDI.
- Maintain Trading Partners. Set 'Lockboxes' to active to receive payment advice notes (customers' payments) from your bank.
- Maintain Trading Partners. Define Bank to EDI by defining your Cash Management Company and your Cash Management Bank Account as Internal Trading Partners. Define the bank as a trading partner in the EDI Enabler. Do not define the Bank as a trading partner in System 21 EDI.

Payment Advice / Remittance

1... 2... 1/CSAI

This function is used to allow your customers to let you know, electronically, that they have instructed their bank to make payment. Payment advice notes or remittances (type ANSI 820) will be received from your customers. This option will validate payment advices and produce a control listing.

Optionally, advice notes/remittances in error may be listed in an exception report.

Note: For more information, see Set Up Requirements For Financials.

Select the Cash Management Application Interface option Payment Advice/Remittance to receive transactions.

-------	-------------------------------	----------------	----------------------

Receive Payment Advice/Remittances via EDI

Control list inclusion..... 1 (1=All, 2=Exceptions only)

F3=Exit F8=Update

9-33	SA	AW	KS	CL	IN	DM	II	EDN400A	KB	PET178S1
------	----	----	----	----	----	----	----	---------	----	----------

Fields:

Control List Inclusion

1 - All. Produce a listing of all payment advice and remittances received since the last batch was processed.

2 - Exceptions only. Select and list payments and remittances received which are in error (cannot be matched).

Press **F8=Update**. The batch will be processed, a listing produced and you will be returned to the menu.

Lockbox

2/CSAI

Lockbox offers you electronic notification from your bank that a customer's payment has been made into your account. This option will validate Lockbox payment advices/remittances (type ANSI 823) and produce a control listing.

Note: For 'bank' read 'financial institution' or lockbox service provider.

Optionally, unmatched or advice notes in error may be listed in an exception report.

Note: For more information, see Set Up Requirements For EDI in Financials.

Note: Your existing Cash Management lockbox option, AR Interface Posting, is unchanged and may, if required, continue to be used as a non-EDI lockbox function.

Select the Cash Management Application Interface option Lockbox to receive transactions.

Receive Lockboxes via EDI

Control list inclusion..... **1** (1=All, 2=Exceptions only)

F3=Exit F8=Update

9-33	SA	MW	KS	CL	IM	DM	II	KENB20A	KB	PET178S1
------	----	----	----	----	----	----	----	---------	----	----------

Fields:

Control List Inclusion

1 - All. Receive all lockbox payment advice and remittances.

2 - Exceptions only. Receive only those lockbox payments and remittances which are unmatched or in error.

Press **F8=Update**. The batch will be processed and you will be returned to the menu.

Payment Advice/Remittance

11/CSAI

This option is used to inform your suppliers, electronically, as follows:

- As an instruction to your bank to make a payment.
- As a payment advice (which may include remittance details) to your supplier. Note: For this to happen the supplier's payment method should be a non-EDI (payment method type 1-6) and Payment Advice/Remittance should be active (at the Trading Partner Maintenance option).
- Both of the above. That is, instruct your bank and inform your supplier.

This option will validate payment advice notes or remittances (type ANSI 820) and produce reports for the supplier and bank account.

Optionally, advice notes/remittances in error may be listed in an exception report.

Note: Payments made to suppliers set up with a payment method of payment type '7' will be selected.

Note: If EDI remittances are active for the supplier selected, the bank account from which the payments are made should have separate cheque and remittance stationery otherwise the remittance information will continue to be sent in hard copy format and not electronically as expected. (Stationery type is added at Supplier bank details).

Warning. If in this instance separate cheque/remittance stationery is not used EDI transmission will be ignored and processing will continue as if no EDI is attached.

Note: For more information, see Set Up Requirements For Financials.

Select the Cash Management Application Interface option Payment Advice/Remittance to send transactions.
