Chapter 6

Further Report Maintenance

Report Management Facilities Overview

This section covers the report management facilities which are available to you within Financial Manager and details the grouping of reports, the allocation of authorities and ownership, and the definition of defaults.

Report Groups Maintenance

This procedure allows you to set up report groups which are designed to generate groups of reports together as a single selection. You might use them to group together all the reports normally produced at a period close to avoid a lengthy selection of each report.

You are authorised to maintain or run these groups in the same way as with single reports.

Select the option to maintain Report Groups and the next screen is displayed.

RW110	E1 - Demonstration Company	USER ED3	6/01/94 14:15:51
-------	----------------------------	----------	---------------------

Maintain Report Groups.

'1'	Group Name	Description	Maint Auth?
-----	------------	-------------	----------------

No Groups have yet been defined for this Company.

Enter name of new group to be added. DEMOGROUP

1=Select
F3=Exit

If any report groups have already been defined they are displayed on the screen and can be maintained by entering a 1 against them.

- Maint Auth? - indicates whether or not you have authority to maintain the group

To add a new group enter a group name in the field at the base of the screen and press **Enter** to be taken to the next screen.

Maintain Report Group Selection Screen

RM110	E1 - Demonstration Company	USER ED3	6/01/94 14:16:18
Maintain Report.			
Group Name.... DEMOGROUP			
Description... <u>Demonstration Group</u>			
F12=Previous			

Fields:

Description

Enter the description of the report group. You can enter up to 50 characters

Press **Enter** to proceed to the next maintenance screen.

screen.

If you opt to modify a report by entering a 1 in the User Group Modifier field, the Maintain Report Groups window is displayed.

Specify Sector Modifier Window

```

RW110                      E1 - Demonstration Company      USER ED3      6/01/94
                                           14:38:42

Maintain Report Groups.
Specify Sector Modifier
Report.... DEMO
Ledger.... P/L PROFIT & LOSS LEDGER
View..... 1--- -- Standard key description

Level  Description                      Modifier
  1    Account Type.....?  001000

F4=Prompt  F8=Confirm  F12=Previous
Report name...? DEMO      User Group Modifier.- 1 (0 = No, 1 = Yes)
No. of copies.- 1

1=Select
F12=Previous
  
```

The window displays a list of the levels belonging to the view, the descriptions given to each of those levels and input fields tailored to the particular length of each level.

Warning: It is advisable to ensure that the structure and number of your 'standard' accounts is the same as that of your modified accounts. If there are modified accounts which do not exist in the standard account code's structure, they will not be printed.

Note: You can enter partial level modifiers, whereby you can modify one or more of the characters in a specific level while leaving the other characters as asterisks.

Note: You can enter modifications to more than one level.

Note: You can go back and maintain a report modifier at any time. The modified levels will still retain the changes you have made.

Enter a modification value in one of the level fields and press **F8=Confirm** to confirm your entry. The system takes you back to the Maintain Report Groups screen and the report is displayed in the list of specified group reports and any modified levels displayed beneath each report description.

Note: You can run a report group by selecting it in the same way as you would a single report.

Once you have defined all the reports for the group, press **F12** to confirm and you are returned to the Maintain Report Groups selection screen.

The details of the new report group are displayed on the screen, and the authority flag indicates Yes.

Report Authorities Maintenance

The user who first created a report is regarded as its owner. The owner is the only person allowed to authorise other users to a report. This procedure allows the owner to authorise other users to maintain report specifications, to generate the report or both.

Note: Ownership of a report can also be changed.

Select the option to maintain *Report Authorities* to display the selection screen.

```
RW120                      E1 - Demonstration Company      USER ED3      6/01/94
                                           14:39:52

Maintain Report Authorities.
  Report/Group
  '1'  Name      Description
  1    DEMO      Demonstration Report
  -    DEMOGROUP Demonstration Group
  -    PLREPORT  Profit & Loss Report
  -    PLVIEW    Profit & Loss by View Div/CC/Account

Enter name of report to be maintained.....
Name of report on which to base authorities..

1=Select
F3=Exit
```

On the screen is a list of those reports which you own. Either enter a 1 against one of the reports in order to maintain it, or key in details in the following input fields:

Fields:

Enter The Name Of Report To Maintain

Enter the name of the report you want to maintain.

Press Enter to maintain its authority from scratch, or base it on another report by using the Name of Report To Base Authorities field.

Name Of Report To Base Authorities

Enter the name of a report which has existing authorities set up for it. The report you are maintaining will take the same authority list as this 'base on' report.

Select one of the reports by entering a 1 against it and the system automatically brings up the next screen.

Maintain Authorities for Report Screen 2

[illegible]**Fields:**

User Name

Enter the User ID of any user you want to be allowed to generate and/or maintain the report. The User ID must be known to the AS/400 and must be authorised under Application Manager to the relevant company and options.

To remove an existing user blank out the name.

Mnt.

Leave as 0 if you do not want the user to maintain the report. Enter a 1 if you do want to give the user authority to maintain the report.

Run

Enter a 0 if you do not want the user to generate the report. Leave a 1 if you do want to give the user authority to generate the report.

Make the entries and press **Enter** to accept. The system returns you to the previous screen where you can maintain further reports.

User Authorities Maintenance

This option allows the owner of a report to create and modify the authorisation of any other user for one or more of his/her reports.

Select the option to maintain *User Authorities* to display the selection screen.

RW130	E1 - Demonstration Company	USER ED3	6/01/94 14:44:28
-------	----------------------------	----------	---------------------

Maintain User Authorities

User : ED3

Base on user . . : _____

F3=Exit

Fields:

User

Enter the User ID of the user you want to maintain. The user ID must be known to the AS/400 and must be authorised under Application Manager to the relevant company and options. You can key in your own User ID to change your own authorities.

Base On User

Enter the User ID of a valid user and the system will allocate this user's authorities to the target user specified in the field above.

Having entered the necessary details, press **Enter** and the next screen is displayed.

Maintain User Authorities Report List

RW130	E1 - Demonstration Company	USER ED3	6/01/94 14:44:49
Maintain User Authorities			
User ED3			
Report name	Description	Allow	
		Mnt.	Run
DEMO	Demonstration Report	1	1
DEMOGROUP	Demonstration Group	1	1
PLREPORT	Profit & Loss Report	1	1
PLVIEW	Profit & Loss by View Div/CC/Account	1	1
F3=Exit F12=Previous			

The screen displays a list of reports which are owned by the user who is running this procedure (not necessarily the user chosen for maintenance purposes). You can now authorise these reports to the selected user.

Fields:

Mnt.

Leave as 0 if you do not want the user to maintain the report. Enter a 1 if you do want to give the user authority to maintain the report.

Run

Enter a 0 if you do not want the user to generate the report. Leave a 1 if you do want to give the user authority to generate the report.

Make the entries and press **Enter** to accept. The system returns you to the previous screen where you can maintain the authorities of further users.

Format/Output Defaults Maintenance

This option allows you to set up default values for Financial Manager at company level.

Select the option to maintain Format/Output Defaults to display the selection screen.

RM170	E1 - Demonstration Company	USER ED3	6/01/94 14:45:46
Maintain Company Defaults			
Format Defaults			
Report headings ?	_____		
Report details ?	_____		
Report totals ?	_____		
Output Defaults			
Forms type :	_____		
Number of copies :	00		
Compressed printing? . . . :	0 (0=No, 1=Yes)		
Landscape printing? . . . :	0 (0=No, 1=Yes)		
Lines per page :	000		
Start new page after line :	_____		
Save generated source? . . :	- (0=No, 1=Yes)		
F3=Exit F4=Prompt			

Fields:

Report Headings

Enter the Heading format most commonly used in reports produced for this Company. This is an optional field.

Report Details

Enter the Details format most commonly used in reports produced for this Company. This is an optional field.

Report Totals

Enter the Totals format most commonly used in reports produced for this Company. This is an optional field.

Forms Type

To print your reports on special stationery, or high quality listing paper, enter a Forms Type. This will prompt the operator to load special stationery before the reports may be printed. The forms type entered here will be the default type for reports in this company.

Number Of Copies

Enter the number of copies you need if you require more than one copy.

Compressed Printing?

Enter a 0 if you so not want the reports to be printed with compressed printing, or enter a 1 if reports are to be printed with compressed print. Obviously, the printer must have this capability.

Landscape Printing

Enter a 0 if you so not want the reports to be printed with landscape printing, or enter a 1 if reports are to be printed with landscape print. Obviously, the printer must have this capability.

Lines Per Page

Enter the number of lines per page required on reports to be printed. Standard listing paper is 66 lines deep, of which 50-60 are normally used for printing.

Start New Page After Line

Enter the line number at which a page change is forced. (Page changes are usually controlled by the Format, as in 'Account Groups.')

Save Generated Source?

The report specifications are converted into computer programs. Enter a 0 if you do not want the generated source to be saved on the system. Enter a 1 if you do want to save it.

Press **Enter** to accept the new or amended default data.

Change Report Owner

This option allows the owner of a report to transfer ownership to another user. The new user is then empowered to carry out the tasks of the original owner.

Note: The new owner is not automatically given maintenance and run authorities. If they have not already been granted, the new owner must grant them himself.

Select the option Change Report Owner and enter the name of the report for which you want to change the ownership

Note: Before changing ownership you should check that the new owner has been given authority to maintain the report.

Press **Enter** and a second field is displayed:

Fields:

New Owner

Enter the unique user identifier of the new owner of this report. The new owner must exist, and must be authorised to the appropriate Financial Manager options.

Press **Enter** and all ownership rights are transferred to the new owner.
