Chapter 7

Maintenance Reports

Financial Manager Maintenance Reports

This section gives details of all the Financial Manager reports in the system.

Output Formats Report Print

This report is used to print details of selected output formats.

Take the option to print an Output Format report and the following fields are displayed:

Fields:

Detail List Required?

Enter a 0 if you require a summary list of formats or a 1 if you require a detailed list giving the construction of each format.

Range Of Format Names From

Enter the first format name in the range of format names you want to list. Leave this field and the 'To' field blank to accept all names.

Range Of Format Names To

Enter the last format name in the range of format names you want to list. Leave this field and the 'From' field blank to accept all names.

Press **Enter** and the job is submitted for processing.

Data Dictionary Report Print

This report provides you with a list of all data dictionary fields - including user-defined fields - and shows you how they are calculated.

Select the option to print the Data Dictionary and a confirmation window is displayed. Press **F8** to submit a batch job to generate the report.

Report Details Report Print

This report provides you with an audit list for the report you select. It includes:

- Report name, description, characteristics and page 1 text
- Full details for each of the formats used in the report
- The content of the report with description of each line and the format used

Take the option to print a Report Details report and a list of all the reports to which you are authorised is displayed on the screen.

Select one report only by entering a 1 against it and the system automatically displays a message asking you to confirm by pressing **Enter**. You can return to select a different report if you press **F12**.

Report Groups Report Print

This procedure generates a report which shows all the reports included in each group.

Select the option to print the Report Groups report and a confirmation window is displayed. Press **F8** to submit a batch job to generate the report.

Report Authorities Report Print

This report provides you with details of the owner of each report and any user who have been given authority to run and/or maintain the reports.

Select the option to print the Report Authorities report and a confirmation window is displayed. Press **F8** to submit a batch job to generate the report.

User Authorities Report Print

This report provides you with a list of user authorised to reports and whether they can run and/or maintain them.

Select the option to print the User Authorities report and a confirmation window is displayed. Press **F8** to submit a batch job to generate the report.

Defined Reports Report Print

This report provides you with a list of all reports defined to the company and shows the ID of the owner of each report.

Select the option to print the Defined Reports report and a confirmation window is displayed. Press **F8** to submit a batch job to generate the report.
