Chapter 12

Enquiries And Reports

Introduction To GL Enquiries And Reports

A comprehensive and highly detailed enquiry facility is available for you to obtain immediate information on accounts, posted transactions and balances set up within the system.

The enquiries are structured so that you can work your way through a series of screens by entering options against individual details displayed on the screen, and display a subsequent screen, or alternatively, press function keys, thereby electing to view further information applicable to all details present on the screen.

In the following sections are descriptions of each detail screen present within the structure of each enquiry facility and a diagram showing the paths taken to reach them.

A full range of financial reports likely to be used in the accounting control of the company's General Ledger is also explained in this section. The reports fall into two categories:

- Transaction reports - Printing lists or summaries of transactions, based on application-defined or user-defined criteria.
- Account balance reports - Printing the values held against specified accounts, either for the selected period or cumulatively. The Trial Balance and Management Reports are in this category.

Note: Sample reports are not included in this product information. It is suggested that you print a set of reports, which you can keep for reference, using your own General Ledger application.

The Zoom Facility

The user-defined views have previously been set up from the Chart Of Accounts menu options. Within enquiries they offer you the ability to view a wide range of balances by combinations of level codes (group codes). Therefore, period balances can be ascertained by placing emphasis on any level or levels of the account code.

You can set up user-defined views with few level codes within their structure, or with many. Those with few will access a wide range of balances; views with many level codes within their structure will necessarily restrict the number of balances which adhere to the correct level codes and produce a more limited range on which to view balances.

The zoom facility enables you to move up or down from one view to another. Thus, by deciding to zoom up from a view, you are presented with a selection window of all those views with fewer allocated level codes within their structure. By zooming down, the selection contains views with more level codes to their structure.

Note: From the highest level view you only have the option to zoom down, from the lowest level view to zoom up.

Account

1/GLE

Use this enquiry to display all relevant details about an account.

Screens available in this option are:

A - Entry. Allows you to enter a suitable account or ledger on which to enquire. You can specify budgets/forecasts which have been set up for the purpose of making comparisons.

B - Account Summary. Displays the summary details of the account you have selected, including net movement and balance year to date. Other accounts may be selected and displayed from this screen.

C - Period History. Displays the balances of a period back to the earliest period still held on the system, including net movement, budget and cumulative balance details.

D - Posting Detail for Period. Displays all transactions posted during the selected period with the oldest first.

E - Bar Chart. Displays actual and budget details within a range of periods. Fields and scale may be changed.

F - Hierarchy details. Displays a list of hierarchy control accounts or sub accounts. A comparison of posted values against budget is also available.

G - Individual Posting Detail for Period. Displays posting detail against an individual journal.

H - Text Entry. Allows you to enter text against various screens within the enquiry structure.

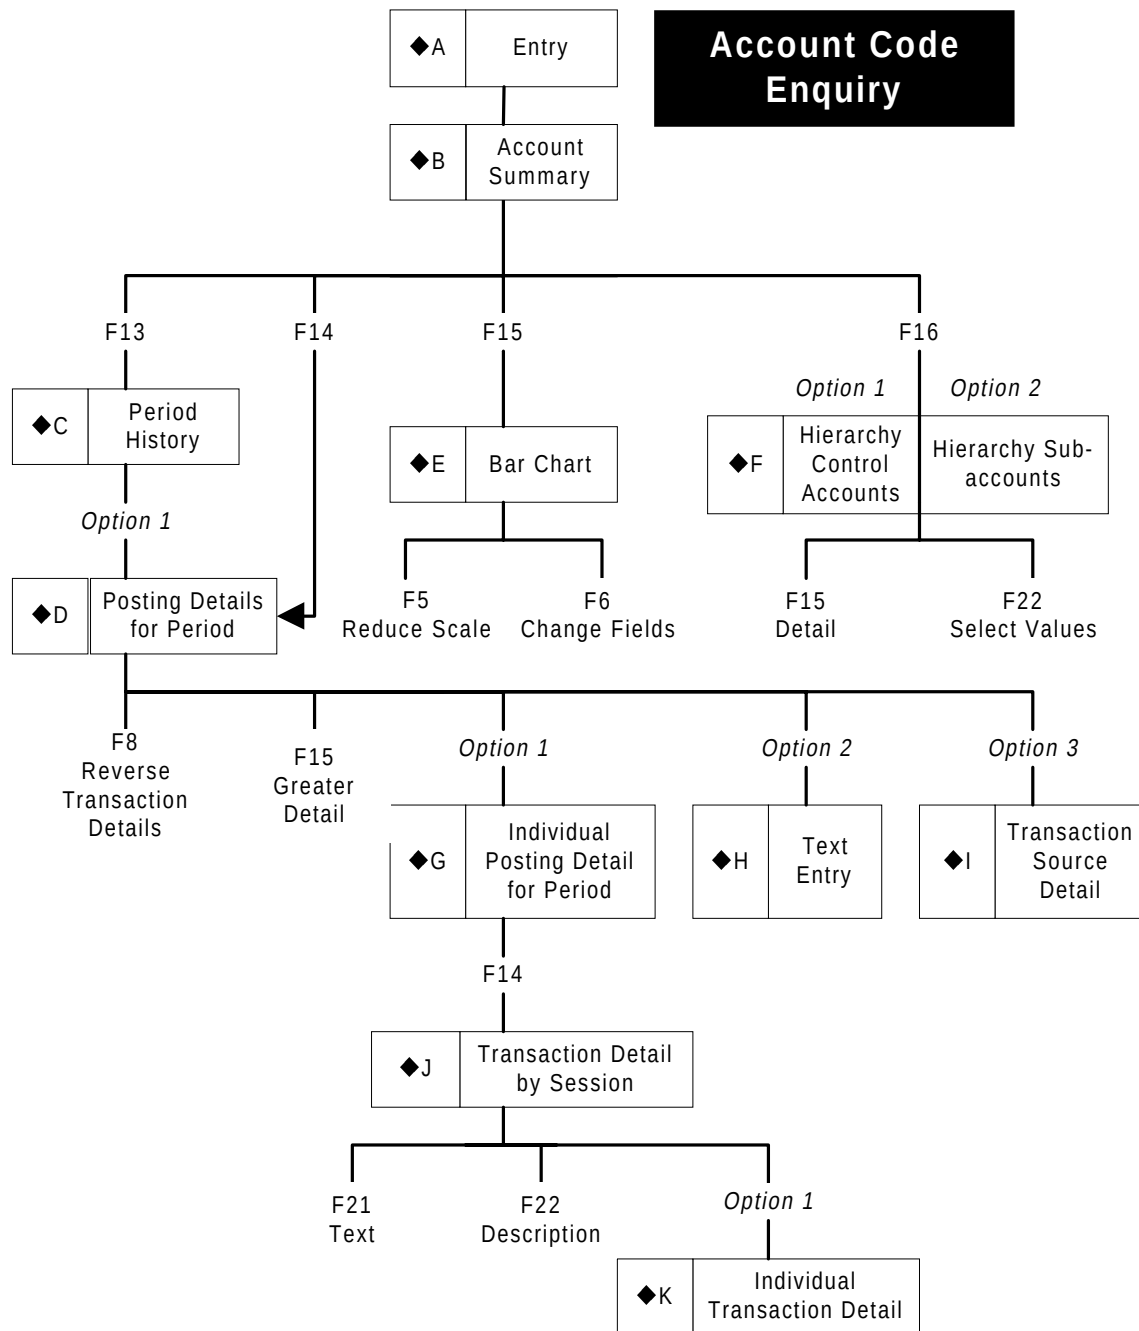

I - Transaction Source Detail. Accesses the source application of the chosen transaction to view in depth analysis from the Accounts Receivable or Accounts Payable applications. A second enquiry structure can be accessed from this screen.

J - Transaction Detail by Session. Displays a list of all journals posted in the chosen session. They may be selected for further analysis.

K - Individual Transaction Detail for Period. Displays a more detailed analysis of a posted transaction, including source system company, and source system session.

Note: Consult the following diagram to locate the enquiry stages within the enquiry structure.

Account Code Enquiry Screen 1

Select the ledger or account level for the enquiry. Select the period to be reported on and a range of budget codes to include for either a fiscal or alternative year end.

Select the GL enquiry option Account to display the first enquiry selection screen.

GL134	Y9 - Education Company - Y9	USER FFV9	27/06/95

05-32 SF MM KS IM II EDN400A PCET02S3			

Fields:

Account

This is the account which is the subject of the enquiry.

To enquire on a different account, enter an account code of up to 12 characters in length. It must be a valid account set up on the chart of accounts and must exist in the relevant ledger.

Ledger

Enter a ledger code of up to 3 characters in length.

Period

The period selected for the enquiry displays, but you can overtype it to display details of another period.

Budget Code 1

Enter the default codes and type of the budget or forecast records which are to appear on Account Balance and Period History displays, in addition to the actual posting values. These default to the budget and forecast codes on the company profile.

Type

Enter the type for the budget code.

0 - For a forecast.

1 - For a budget.

Budget Code 2

Enter the default codes and type of the budget or forecast records which are to appear on Account Balance and Period History displays, in addition to the actual posting values. These default to the budget and forecast codes on the company profile.

Type

Enter the type for the budget code.

0 - For a forecast.

1 - For a budget.

Year End

The default is FIS for the fiscal year. Overtyping this with ALT for the alternative year.

It is necessary to let the system obtain the appropriate period number from the company profile record.

Having entered the relevant details, press **Enter** to display the Account Code Enquiry Summary screen of the enquiry.

Note: If you do not enter the code of an account and only enter a ledger code, an account code search and select window displays, from which you can select the appropriate account.

Account Code Enquiry Screen 2

You may change parameters entered on the selection screen in order to view different account details.

To display this screen, press **Enter** at the Account Code Enquiry screen 1.

Select an individual period balance by entering 1
against the appropriate line to display the posting
detail for the period.

Bar Chart Screen (F15)

The screen displays actual details (indicated by A in the bars of the bar chart) and budget details (indicated by B) for the period selected.

Press **F15=Bar Chart** at Account Code Enquiry screen 2.

You may modify the bar chart in the following ways:

- 1 - To reduce the scale (to allow for increases), press **F5**.
- 2 - To change the fields used in the bar chart, and the latest period to be shown, press **F6**.
- 3 - To change the values in the right hand column of any period for this enquiry only, and only if they are budget records, position the cursor over the column at the desired value and press **Enter**.

Return to the screen B Account Summary by pressing **F12=Previous**, and press **F16=Hierarchy Details** to enquire on hierarchies.

Account Hierarchy Enquiry Screen (F16)

Hierarchy enquiries are of two types, dictated by which option you enter in the Enquiry Type field

Press **F16=Hierarchy Details** at the Account Code Enquiry (Option 1) screen.

Fields:

Order (1-5)

Enter the order of the field by keying numbers 1 to 5 against them. Each field then has a priority when sequencing the selected transactions. If this field is left blank, the transactions will be displayed in the sequence in which they were entered.

Ascending/Descending

A - To have the transactions listed in ascending order.

D - To have the transactions listed in descending order.

Ledger

Enter the range of ledgers you want to enquire on. Leave blank to enquire on all ledgers.

Account

Enter the range of account codes you want to enquire on. Leave blank to enquire on all accounts.

Account Type

Enter one of the following account types to enquire on:

F - Or blank for fiscal accounts only.

M - For memorandum accounts.

B - For both fiscal and memorandum accounts.

Account Level (5 To 9 Range)

If you have already specified a ledger for this enquiry, and if that ledger has extension codes attached to it, that ledger's extension code parameters are displayed on the screen. If any of those extension codes are global and are not required by the ledger, the global levels are not displayed.

If no ledger has been specified, the system displays parameters for only those global levels which exist for this company.

Enter the range of extension levels you want to enquire on. Leave blank for all extension levels.

Period

Enter the range of periods you want to enquire on in the format YYPP. Leave blank to enquire on all periods.

Accounting Date

Enter the range of accounting dates you want to enquire on.

Leave blank to enquire on all dates.

Source

Enter the range of origins you want to enquire on. The origins are:

G - General Ledger.

A - Accounts Payable.

S - Accounts Receivable.

Other feeder systems will have similar one character source codes.

Type

Enter the range of transaction types you want to enquire on. Leave blank for all transaction types.

Reference

Enter the range of transactions you want to enquire on. Leave blank to enquire on all document references.

Use the Page Up and Page Down keys to roll up and display further parameters.

Transaction Search Screen 2

Use the Page Up/Page Down keys (roll up/down) at the first Transaction Search screen.

Make any further entries in the following range parameters:

Balances

4/GLE

Select the GL enquiry option Balances to display the first enquiry selection screen.

This procedure allows you to enquire on different balances across a range of accounts and within a specified ledger and period.

Fields:

Ledger

Enter the three character code of a valid ledger as set up on the chart of accounts, or leave blank to accept all ledgers.

Select Range Of Accounts

0 - You do not wish to select a specified range of accounts on which to display details.

1 - You wish to specify a range of accounts within this ledger, in which case you will be taken to a further screen requiring you to input necessary parameters for that range.

Period

Enter a valid period on which to enquire, in the format YYPP. The period must be set up on the system's calendar.

If you enter 1 to select a range of accounts, you will be given the opportunity to specify a range of accounts on a screen with the following fields:

Fields:

Search Criteria From

Enter the first account level code for the range of accounts you wish to view in this enquiry. It must be a valid level code as set up in chart of accounts.

Leave blank to accept all level codes.

Search Criteria To

Enter the last account level code for the range of accounts you wish to view in this enquiry. It must be a valid level code as set up in chart of accounts.

Leave blank to accept all level codes.

Note: A range of report level codes may also be specified within this enquiry.

Press **Enter** to accept the parameters you have entered.

Account Balance Enquiry Screen 2

Make a selection at the first Account Balance Enquiry screen and **Enter** to display this screen.

This screen displays accounts with debits and credits for the selected period. Select an account to display greater detail including year to date balances, actual, budget and variance values.

Fields:

Select

1 - Select another balance from the list of those set up on the system by entering 1 against the appropriate line.

Note: If you enter 1 against a budget, a window requiring details of the budget and budget type displays.

Budget

Enter a valid budget code of up to 3 characters in length. The default will be the code set up in company profile.

Budget Type

Enter the appropriate type of the budget or forecast.

- 0 - Base forecast.
- 1 - Base budget.
- 2 - Quantity forecast.
- 3 - Quantity budget.

4 - Currency forecast.

5 - Currency budget.

Press **Enter** to accept, and the balances for accounts against that budget will be displayed.

User-Defined Balances

5/GLE

Select the GL enquiry option User-Defined Balances to display the first enquiry selection screen.

This procedure allows you to enquire on balances and transaction details by the use of user-defined balances, thereby enabling you to arrive at a more detailed and more specific analysis of transactions with greater speed and accuracy.

There is also a facility controlling the user-defined balances, which can be used to zoom up to a user-defined balance with fewer level codes in its structure, and zoom down to a user-defined balance with more level codes. You can also zoom across ledgers. In so doing, a broad range of account code combinations may be selected and their details displayed for enquiry.

This is a list of screens within this enquiry:

Select User-Defined View. Allows you to enter the period and ledger in which you wish to view balance details. X-ledger balances may also be accessed.

Select User-Defined View Window. A list of the user-defined views from which to select to proceed further into the enquiry function.

User-Defined View Enquiry Screen 2. Displays the group codes structured according to the view selected, and the period balances held against them.

Select Figure to Display Window. Allows you to select one or two balances.

User-Defined View Enquiry Screen 3. Displays the full descriptions of the group codes structured according to the view selected, and the period balances held against them.

User-Defined View Enquiry Screen 4. Displays the full details of a selected group balance.

User-Defined View Enquiry Screen 5. A list of the transactions falling within the scope of the selected group and period.

User-Defined View Enquiry Screen 6. A list of transactions by group and period including full extension codes.

Enquire on User-Defined Period Balances Window. Full details of a single transaction.

Item Enquiry - Ledger Item Details. A list of all transactions posted within a session. They may be selected for further analysis.

A list of the X-ledger views is also available on the system for you to select.

The following four sections take you through the elements of this enquiry facility. The stages are:

- Those screens and functions up to (and emanating from) screen User-Defined View Enquiry Screen 2.

- Those screens and functions from User-Defined View Enquiry Screen 2 - which appears half way through the procedure.
- The selection of X-ledger user-defined views.
- The use of the zoom facility.

User-Defined View Enquiry Selection Screen

Select the GL enquiry option User-Defined View Enquiry.

Select a ledger and period to display for the user-defined view.

To view the source details of a single transaction, return to the previous screen and enter option 3 against a line.

Item Enquiry Ledger Item Details (Option 3)

Enter 3 against a line on the User Defined View Enquiry Screen (F15)

The source details of any transaction originating from an external application such as Accounts Receivable or Accounts Payable are displayed on the screen. You can enquire further from here. For more details consult the appropriate product information.

Return to the menu, then select User-defined Balances again. On the first screen leave the ledger field blank and you are presented with a window requiring the selection of a X-ledger user-defined view.

Select Cross-Ledger User-Defined View Window

Return to the menu, then select User-Defined Balances again. On the first screen leave the ledger field blank and you are presented with a window requiring the selection of a X-ledger user-defined view:

GL381 Y8 - Education Company - Y8 USER FFV8 27/06/95 17:28:07

User-Defined View Enquiry

Select Cross-ledger User-defined key.

Key	Key description	More
123456789	Standard key description	
-	Asset Type	
-	Asset Type/Nominal	
-	Cost Centre	
-	Cost Centre/Employee

F12=Previous

F3=Exit F4=Prompt

10-00 SF MW KS IM II EDN400A PCET02S3

Select the X-ledger view in the same way as you would a normal view.

Note: Neither the ledger nor the level sequence is defined because since the levels of the views cross different ledgers they may also exist at different levels within those ledgers.

Tip: If no X-ledger views have been set up, the X-ledger view selection window is not displayed, and you are taken straight into the enquiry with group codes beneath the standard view.

Select User-Defined View Window (Option 7)

 Select the GL enquiry option to enquire on User-defined Balances. Enter an appropriate period and ledger, and you will be presented with a window requiring the selection of a user-defined view. Select a view, and the second User-Defined View Enquiry screen appears.

 Opt to zoom down (**7=Zoom Down**) and to select the user defined key.

Details relevant to the view are displayed on the screen.

 Select a view with 1 to display the view details screen.

User-Defined View Enquiry Screen

To display this screen select a view with 1 at the Select User-Defined View Window (Option 7=Zoom Down)

Details of the view group codes with values posted for the selected period display.

Fields:

X (Select)

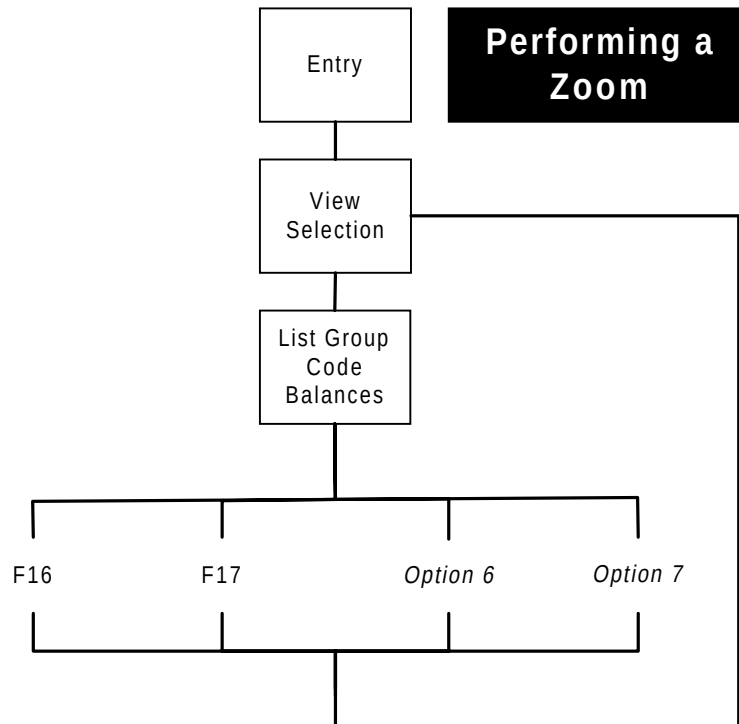

Only views with more level codes within their structure than the previous view may be selected. Had the window to zoom up been chosen, only views with fewer codes would have been available for selection.

Exit from the enquiry with **F12=Previous** or **F3=Exit**.

Zooming Up And Down

Note: If there is just one single view further down (or further up in the case of zooming up) in the system, you will not display a selection window but will be taken to the remaining view automatically.

Source Reference Enquiry

6/GLE

Select the GL enquiry option Source Reference.
The enquiry selection screen displays.

This option enables you to enquire on a range of documents by their reference and type, and to enter several of the transaction enquiry screens.

Note: This enquiry is currently available only for collection documents.

Fields:

Source Document Reference Range

Enter the range of collection documents you wish to enquire on. All documents within the range will be listed on the next screen.

If you leave the To field blank, the system will list all documents from the From field onwards.

You cannot leave the From field blank.

Transaction Type

This enquiry is currently available only for collection documents, so you must enter CD in this field.

Press **Enter**, and a list of collection documents will be displayed.

1 (Select)

Enter 1 against the document you wish to enquire on.

Press **Enter** to go to the General Ledger transaction enquiry screen, which will lead in turn to the transaction detail enquiry.

Extract Enquiry

1... **2...** 9/GLE

This enquiry option should be used regularly, usually daily, to quickly identify balance data problems with fiscal accounts. Only imbalances (between General Ledger, Accounts Receivable and Accounts Payable) will be included.

Individual control accounts in error can be displayed to allow further enquiry and correction to be made.

Reconciliation Enquiry

Select the GL enquiry option Extract Enquiry from the menu to display the first Reconciliation Enquiry selection screen.

The top half of the screen shows general ledger extracted totals and the bottom half shows the Accounts Receivable/Accounts Payable errors and their values.

F3=Exit						
12-03		SF		ML		KS IM II EDN400A PET16SS2

Fields:

Period

The period in which the extraction was made. If the GL period is earlier than the AR/AP period then the GL period will be advanced to include GL transactions posted for the period.

Run Date

The date the last reconciliation extract was run.

Run Time

The time the last reconciliation extract was run.

Total Debits

Total debits are only displayed if there is a problem; for example, there is an imbalance with General Ledger total credits.

Note: The total debits, total credits and any difference calculated will only display if the difference between the two totals is non-zero.

Total Credits

Total credits are only displayed if there is a problem; for example, there is an imbalance with General Ledger total debits.

Note: The total debits, total credits and any difference calculated will only display if the difference between the two is non-zero.

Difference

This item will only display with values if there is a difference between the General Ledger total debits and credits.

Rounding A/C

The Rounding A/C field is only displayed if the balance is non-zero.

(Untitled)

You can enter the following option:

1 - Select More Details. If you wish to display further details of the error. See Reconciliation Enquiry Details screen.

Description

An example description of ARZ19704 Debit would be explained as:

- AR - Accounts Receivable is the source application.
- Z1 - Source Company.
- 9704 - 4th accounting period in 1997.
- Credit/Debit - Shows whether the error is a credit or debit value.

Note: Credits and debits are only displayed if your company profile item Separate DR & CR is set to 1. If this item is set to 0 then Debit/Credit will not display and the value displayed at the top of the screen will be the sum of the debits and credits.

Source Value

The value of the credit or debit discrepancy.

Note: If your company profile item Separate DR & CR is set to 0 then the value here will be the sum of the debits and credits.

GL Value

The value of the transaction posted to a general ledger account.

Difference

The source value (AP/AR) less the General Ledger value.

Enter 1 against the error line (Do not press **Enter**) to display the Details screen.

Reconciliation Enquiry Screen

Enter 1 (Do not press Enter) against the error line at the first Reconciliation Enquiry Screen to display this screen.

Details of the reconciliation display. Control accounts in error are listed with source, general ledger and any difference in values.

Fields:

Rep. No.

Enter the number of the report you want to print from the list displayed on the screen.

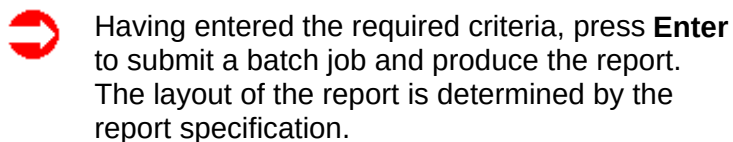

Period

Enter the period for which you want the report to be printed. The default is the current period, but this may be overtyped. Use the format YYPP.

Year

Enter FIS for the fiscal year, or ALT for the alternative year.

The appropriate period number is obtained from the company profile.

Create Format

12/GLE

Select the management reporting option Create Format. The first enquiry selection screen displays.

This procedure allows you to create pre-defined formats from which Management Reports will be produced.

On the selection screen enter the ledger for which you want to create a management report format. Only those displayed in high intensity may be changed.

Press **Enter** to display the next screen. Enter the report number to be changed, or a new number if a format is to be added. Press **Enter** again.

Management Reports Screen 1

This screen displays when the ledger was selected at the Management Reports selection screen.

Select the title and format and content of the report. Enter the sequence of the report based on the account and report levels displayed. Enter up to 6 levels in descending order of importance and select account codes 1 to 4 and report control codes A to E.

Account Class . . :	1 (1-4)		
F3=Exit			
17-21	SF	MM	KS IM II EDN400A PE0079S1

Fields:

Account Class

Enter one of the account levels 1 to 4 or report control codes A to E as shown on the screen. This is the secondary sequence for the report.

The account level and report level descriptions for the balance sheet ledger are displayed. Enter the secondary sequencing level and press **Enter** to create the format record.

Profit And Loss Options

Two options are available to report profit and loss in the General Ledger:

- Profit and Loss Maintain Report.
- Profit and Loss Financial Report.

Profit And Loss Maintain Report

22/GLE

Select the GL enquiry option Profit And Loss.
The selection screen displays.

This procedure allows you to print a detailed profit and loss report in accordance with the format already established.

Enter one of the account levels 1 to 4 or report control codes A to E as shown on the screen. This is the secondary sequence for the report.

The account level and report level descriptions for the profit and loss ledger are displayed. Enter the secondary sequencing level and press **Enter** to create the format record.

Profit And Loss Financial Report

42/GLE

Select the GL enquiry option Profit And Loss to display the enquiry selection screen.

This procedure allows you to print a detailed profit and loss report in accordance with the format already established.

Fields:

Period-End Date

Enter the end-period you want for the profit & loss report. Use the format YYPP.

The default is the current period, but you can overwrite it.

Fis Or Alt

Enter FIS for the fiscal year end, or ALT for the alternative year end.

This enables the period number for the selected year end to be obtained from the company profile.

Totals are printed in the set up defined in the Total Descriptions Maintenance option.

Press **Enter** to submit a batch job and generate a report.

Transaction Postings

31/GLE

Select the GL report option Transaction Postings from the menu. The first enquiry selection screen displays.

This report uses selection criteria to print transactions by ledger, period and account range in summary or detailed format.

GL130	V9 - Education Company - V9	USER FFV9	27/07/95 17:13:17

Print Currency Posting Details?	: 0	(0=No, 1=Yes)	
F3=Exit F4=Prompt			
05-23 SF MK KS IM II EDN400A PCET02S3			

Fields:

Ledger

Enter the ledger code of the ledger to which the report is to be limited.

Leave this field blank to include all ledgers in the report.

Period Range

Enter the range of periods from which transactions are to be selected for the report, in the format YYPP. Leave blank to begin from the earliest period.

The default is the current period.

Account Range

Enter the range of accounts you want to have printed in the report. Leave the field blank to start from the first available account.

Leave blank to report on all accounts.

Sequence

Enter the number of the account level or character of the report level you want to use as the prime sequence for this report.

Summary Or Detail

0 - If you want only summary information to be printed. The report includes balance brought forward, total debits, total credits and balance carried forward only.

1 - If you want to print all summary information and have all detailed transactions listed as well.

Account Types

Enter one of the following account types to be printed in the report:

F - For fiscal accounts only.

M - For memorandum accounts only.

B - For both fiscal and memorandum accounts.

Suppress Accounts With No Transactions

0 - To print all accounts whether or not transactions have been posted in the selected period.

1 - To print only those accounts for which there have been transactions posted in the selected periods.

Include Matched/Unmatched/Both

Enter one of the following options to determine which transactions you want to appear in the report.

B - To include both matched and unmatched transactions.

M - To include fully matched transactions.

U - To include unmatched transactions.

Print Currency Posting Details

0 - To print base currency values only.

1 - To print both transaction currency and base currency details.

Press **Enter** and a batch job is submitted to produce the report.

Session Controls

32/GLE

This report lists all transactions for a range of session numbers, in the required level of detail. This provides an audit trail of postings into the General Ledger.

Warning: This report needs to be run regularly - preferably daily - and the results reconciled to the General Ledger control account. Any discrepancies should be investigated and resolved immediately - it will be much more difficult to do so in a month's time.

This report could be scheduled to run automatically every day.

Session Report Screen

Select the transaction report option Session Controls. The first enquiry selection screen displays.

Select sessions, application (for example, CS module) and level of detail for the audit. A batch job is submitted to generate the report.

GL132	Y9 - Education Company - Y9	USER FFV9	27/07/95 17:14:02
Session Report			
From session . . . :	_____	(Leave blank for earliest)	
To session :	_____	(Leave blank for latest)	
Application. . . . ?	_	(Blank=all)	
Company. :	__	(Blank=GL company code)	
Level of detail . :	1	(1=Session details only, 2=Session details and document headers, 3=Session details, document headers and document dissections)	
F3=Exit			
05-24	SF	ML	KS IM II EDN400A PCET02S3

Fields:

From Session

Enter the first session number in the range of session numbers you want to appear in the report.

Leave the field blank to start at the first session number.

Leave the this and the To Session field blank to print out details of all sessions.

To Session

Enter the last session number in the range of session numbers you want to appear in the report.

Leave the field blank to end at the last session number.

Leave both the To and the From Session fields blank to print out details of all sessions.

Application

Select your system application for the audit trail. Leave blank to include all relevant systems.

Company

If a company other than the current company is to be reported on enter the company code.

Level Of Detail

Enter one of the following options to specify which sort of session details you want to appear in the report:

- 1 - Session summary details only.
- 2 - Session summary and document header details.
- 3 - Session summary, document header and analysis details.

Press **Enter** to accept the details, and then
F8=Update to confirm.

Trial Balance

41/GLE

Select the GL enquiry option Trial Balance to display the enquiry selection screen.

This procedure produces a trial balance report for the company, for top level accounts only; sub-ledger detail accounts are not included.

Fields:

Period

Enter the period you want for the trial balance report, in the format YYPP.

The default is the current period, but you can overtype it.

Year End

Enter FIS for the fiscal year end, or ALT for the alternative year end.

This enables the period number for the selected year end to be obtained from the company profile.

Type Of Report

1 - For a structured report to be printed in the sequence of report control code A. Sub-totals are reported at each change of report control code.

2 - Print in strict level code sequence in detail form.

Print Debits & Credits Separately

0 - Print the net value posted for the period in either the debit or credit column.

1 - Print the total debits and credits posted in the period in each debit and credit column.

Press **Enter** to accept the entries, then **F8=Submit** to submit a batch job to generate the report.

Balance Sheet

43/GLE

Select the GL enquiry option Balance Sheet to display the enquiry selection screen.

This procedure allows you to print a detailed balance sheet in accordance with the format already established.

Fields:

Period-End Date

Enter the end-period you want for the balance sheet report. In the format YYPP.

The default is the current period, but you can overwrite it.

Tip: The totals are printed in the set-up defined in the Total Descriptions Maintenance option.

Press **Enter** and a batch job is submitted to generate a report.

Final Accounts

44/GLE

Select the GL enquiry option Final Accounts to display the enquiry selection screen.

This procedure allows you to print a full set of final accounts, (balance sheet, profit and loss) in summary form. This report is normally requested after the final period close.

Fields:

Period-End Date

Enter the end-period you want for the final accounts report. In the format YYPP.

The default is the current period, but you can overwrite it.

Fis Or Alt

Enter FIS for the fiscal year end, or ALT for the alternative year end.

This enables the period number for the selected year end to be obtained from the company profile.

Accounts will be summarised by report level A.

Tip: Totals are printed in the set up specified in the Total Descriptions Maintenance option.

Press **Enter** and a batch job is submitted to generate a report.
