Chapter 15

GL Historical Data

Historical Data Introduction

To access the facilities to enquire and report on Historical Data, select the general ledger historical data menu options.

The General Ledger module provides you with facilities to archive data no longer needed for operational use.

The Utilities menu options enable you to archive and purge historical data, and also to restore previously archived data so that it can be used. Data which has been removed in this way is placed into a specifically created library.

One library is created each time data is archived.

Data which has been saved in this way is referred to as historical data. This section describes how to enquire and report on the following types of archived data:

- Period Balances.
- Budgets and Forecasts.
- Documents.
- Transactions.
- VAT Transactions.

Note: You must ensure that the historical data you want to enquire on has been restored to the system.

Selecting Archive Libraries

Whichever enquiry or report you choose to run, the first step is to select the archive library which contains the required data. The first screen will show the available archive libraries. It is shown here, but is not repeatedly shown for the remaining enquiry and report procedures explained in this section.

Select the required General Ledger Historical Data options and you are taken to a screen listing all the archived libraries which have been restored to the system.

Select the library to be used by entering 1 against it, and press **Enter**. You are taken into the option you have selected.

Historical Enquiries And Reports

Five enquiry options are available to enquire on historical GL data:

- Period Balances.
- Budgets & Forecasts.
- Documents.
- Transactions.
- VAT Transactions.

Five reporting options are available to produce reports on historical GL data:

- Period Balances.
- Budgets & Forecasts.
- Documents.
- Transactions.
- VAT Transactions.

Period Balances Enquiry

1/...
2/... **1/GLH**

The historical data procedures enable you to enquire on Period Balances data which has been archived, based on your own selection criteria.

- ➔ Select the required General Ledger Historical Data option. From the next screen select the library on which you wish to enquire, and press **Enter**.

The Period Balance Enquiry screen displays.
