Chapter 16

Statutory Reporting

Amend Journal Processing

Warning: This function is only available in Italy.

1/GLZ

This procedure allows you to retrieve and amend General Ledger journals providing that the journal has not yet been reported on the Italian General Journal Report.

Select the Amend Journal Processing option to display the following fields:

GL467	QI - Italian Base G/L Company (QJ)	User GBJBA1MS	2/12/97 11:35:26
Amend Journal			
Document type . . . ?	☐		
Journal reference . . :	_____		
New reference . . . :	_____	(Enter a new reference only if the old reference is to be changed.)	
F3=Exit F4=Prompt			
6-25	SA	MW	KS CL IM DM II STUD140 KB PKH312S1

Fields:

Document Type

Enter the two-character code of a valid transaction type.

Journal Reference

Enter the journal reference of up to eight characters in length.

New Reference

Enter the new reference name of the journal only if you intend to change the name of the amended journal.

This field is displayed only if you are using the Amend Journal menu option.

Press **Enter** to accept the entries and the system calls up the General Journal Processing. You may amend any aspect of the journal, running through the procedure as you would a general journal.

Statutory Reporting

Two report options are available for reporting on General Ledger journals. These report conform to French statutory reporting options.

Journal Listing

1...
2... **1/GLS**

This listing produces a report of journal postings.

Note: This listing option is normally used for statutory reporting in France.

For selected period(s) report on a range of either journal types or journal codes. Optionally, include a summary report by accounts.

Select the GL statutory reporting option Journal Listing.

10-30 SA MW KS CL IM DM II STUD140 KB PKH312S1

Fields:

Period

The current period displays as a default.
Enter a From and To period for the report.

Journal Type

Enter a journal type to select the listing from a range of journal types. Enter either a range of journal types or a range of Journal Codes.

Note: Journal Types are created by the system and held in the GL Parameter JTYP.

Note: This field is normally used for French statutory reporting.

Journal Code

Enter a journal code to select the listing from a range of journal codes. Enter either a range of journal types or a range of Journal Codes.

Note: Journal codes are created by the system and held in the GL Parameter JCOD.

Note: This field is used for GL reporting and French statutory reporting.

Summary By Account

0 - Print a detailed report of transactions including transaction type, session number, reference, debit, credit, currency values, with journal and period totals.

1 - Print a summary report with 1 line per account including journal description, debit, credit and totals.

Press **Enter** to validate your selection and you will be returned to the previous screen with the message that your job has been submitted for processing.

Central Journal Report

2/GLS

This listing produces a report of journal postings for selected period(s).

Note: This listing option is normally used for statutory reporting in France.

For selected periods, the report includes journal codes, transaction descriptions, debits, credits with report total and balance. Transactions are listed as sales, purchase, bank transfer, bills receivable and sales, purchase and other journals.

Select the GL statutory reporting option Central Journal Report.
