Chapter 3 Payments

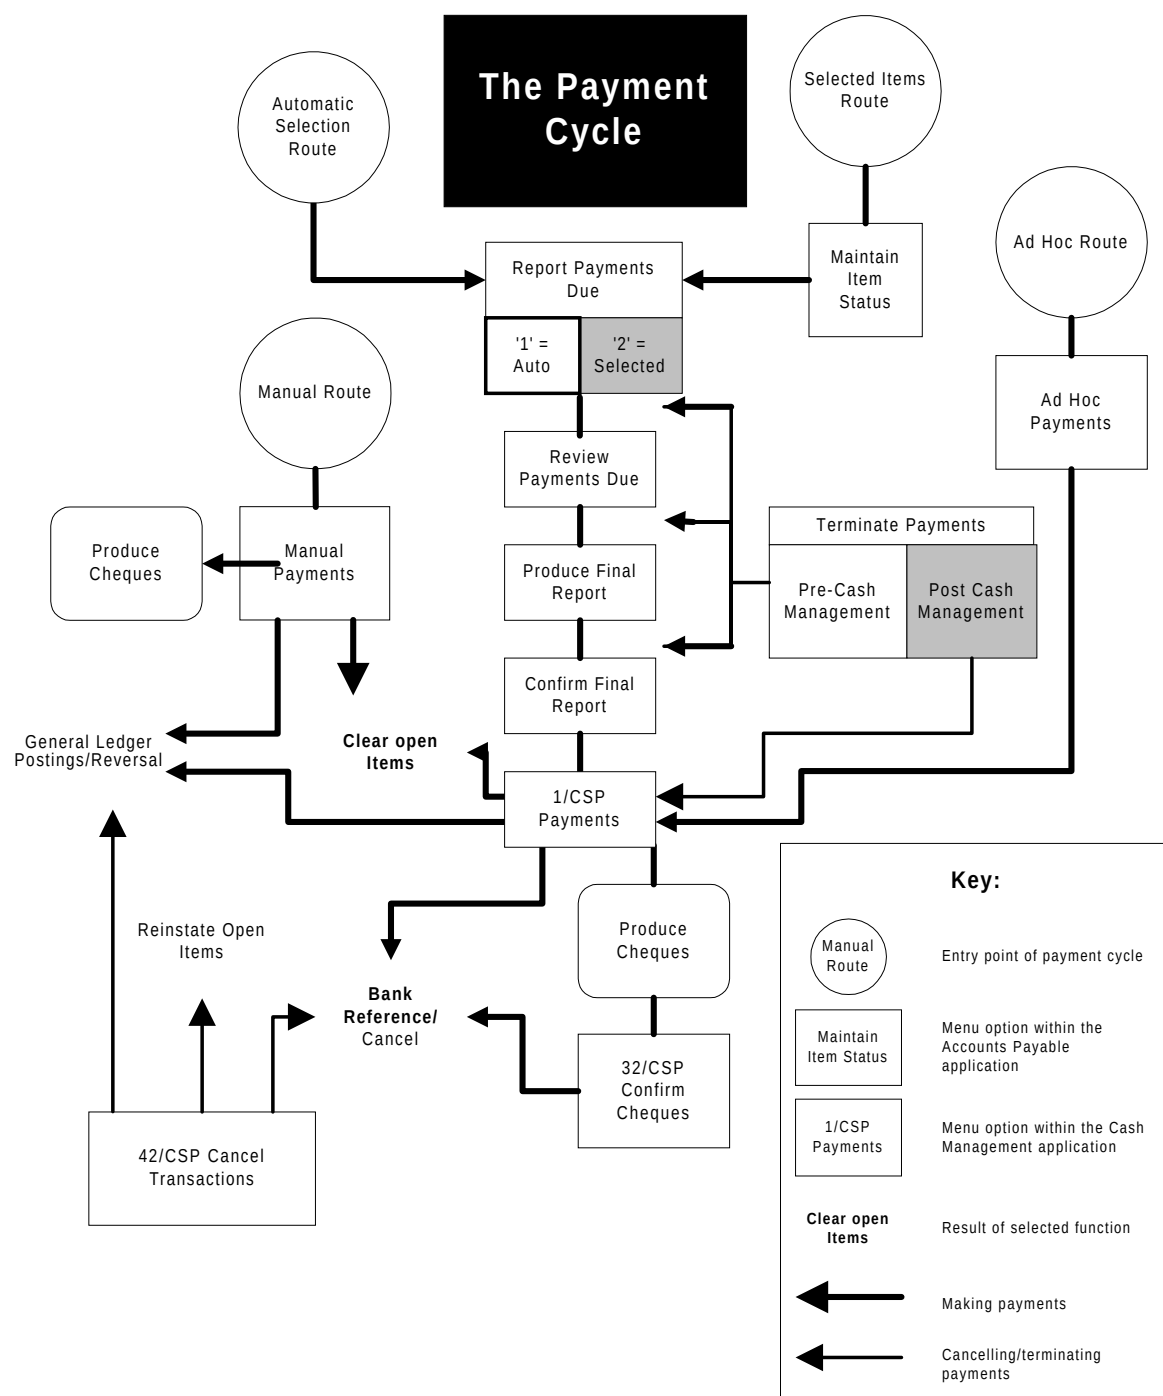

Payments Introduction

The options on the Accounts Payable Payments menu allow you to carry out all the necessary tasks relating to the payment of your suppliers.

Both the payment cycle and its variations are outlined in the Payment Cycle Diagram, and clarified in the sections dealing with each menu option.

- The Automatic Payments cycle enables supplier payments to be made automatically once a due date or a range of items has been selected
- The Sundry Payments options make non-automatic payments, with ad hoc payments producing documentation and manual payments producing a remittance advice
- The Documentation options produce remittances and cheques and confirm cheque numbers against payments
- Payments Status allows the maintenance of the status of open items. Items can be held to exclude them from a payment cycle, or released to allow inclusion in a future cycle
- The Reports section includes payments made and supplier statements

The typical sequence of options which might be followed in paying suppliers is shown in the diagram below. The Review Payments Due and Produce Final Report options can be omitted, or repeated as often as necessary in order to adjust the payment run details.

Report Payments Due

1/APY

This procedure represents the first stage of the automatic payment cycle. It produces an initial report showing the payments to be made to your suppliers. Choose how items are selected for payment:

- Automatically.
- Select items for inclusion in the payment cycle according to their due date. Items with a status of 1 (selected) or 9 (prompt pay) will also be included.
- According to selection criteria.
- Items with a status of 1 will be selected for inclusion in the payment cycle.

Note: Items posted at the Invoice Matching option which are awaiting match will be excluded from the report.

Payments Due Report Screen

This screen displays existing runs for you to select or you can select to create a new payments run.

Select the Report Payments Due option from the Payments menu. If there are no payment runs as yet, the next screen will display. If, however, runs do exist, they will display in a list, as shown in the Payments Due Report screen.

MA	a	MW							06/002	

Fields:

Selection

1 - Select a payment cycle to amend details.

*Note: To start a new payments run, press
F10=Start New Payments Run.*

If on this screen you select an existing run, then the details of that run will be displayed on the Payments Due Report screen.

Enter 1 or press **F10=Start New Payments Run** to display the Payments Due Report Run Number Screen.

Payments Due Report Run Number Screen

If on the Payments Due Report screen you select an existing run, then the details of that run will display on this screen.

If, however, you pressed **F10=Start New Payments Run** to begin a new run, the screen displays for you to enter the payments run details.

MA a	MW	16/025	

Fields:

Selection Method

1 - Items are selected for the report on the basis of payment due date. This will include 'selected' (payment status 1) items.

2 - To select only 'selected' (payment status 1) items.

Payment Group

You may select all suppliers within a given category that is defined against the supplier's name and address record as payment group or all suppliers by entering a category value of *. If a value is entered here, then the supplier must be blank.

Supplier Code

Enter the account code of a specific supplier if the payment run is to be restricted to a single supplier. In this case the supplier category must be left blank.

Payment Due Date

If method 1 is used as the selection method, all invoices with a due date on or before the date entered here will be selected for payment.

Discount Date Range

Enter a range of discount dates to include invoices for payment if the discount date is within the range entered.

Invoices are then selected either from meeting the criteria of the Payment Due Date, or being within the range of Discount Dates.

Note: The Selection Method at this screen must be 1 (Automatic) if the Take Discounts field is set to 1.

Take Discounts

0 - No selection on discount date, only invoices whose due date is within the payment due date will be selected.

1 - Invoices will be selected if the discount date is within the payment due date (even if the invoice due date is outside it).

Payment Method

You can select items for payment on the basis of their payment method by entering that method here.

1. Cash Management not installed

In this case your choice of payment method consists of:

CHQ - Cheque

TRF - Transfer

BAC - BACS

2. Cash Management installed In this case the payment methods available are user defined.

Prime Currency

Enter a currency code to restrict payments to items with this transaction currency. Leave blank to select transactions with any currency.

Details To Print

This specifies the level of reporting required for items that meet the selection criteria.

1 - Produces a full report with items listed.

2 - Produces a summary suppliers report (one line per supplier).

3 - No report.

Sequence By

This defines the primary sequence in which the report will be printed.

1 - By supplier code.

2 - By transaction currency.

3 - By base currency.

4 - By revalued base currency.

Currencies To Print

Enter 1 against the currency type to select it for printing.

Include Contra Items

Contra accounting provides the facility to link a supplier to a customer when reciprocal trading takes place. If 1 is entered, then the Accounts Receivable open items are considered when calculating the payment value.

Press **F8=Submit Report** to select the items and produce a report. To select or override bank account numbers, press **F14=Bank Account**.

If you wish to select suppliers according to their default bank accounts, or wish to override the bank account of any selected suppliers, press **F14=Bank Account**. The Bank Account window will then appear.

Bank Account Window (F14)

If you wish to select suppliers according to their default bank accounts, or wish to override the bank account of any selected suppliers, press **F14=Bank Account**. The Bank Account window will then appear.

Fields:

Select Bank Account

An entry into this field will restrict the selection of suppliers to those with a default bank account which matches the one specified here. Leave this blank to select suppliers regardless of bank account.

This field can be used in conjunction with the 'override' field below it.

Override Bank Account

An entry here will override the default bank account of any supplier selected for the payment cycle.

Review, Produce and Confirm Automatic Payments

Three menu options are available:

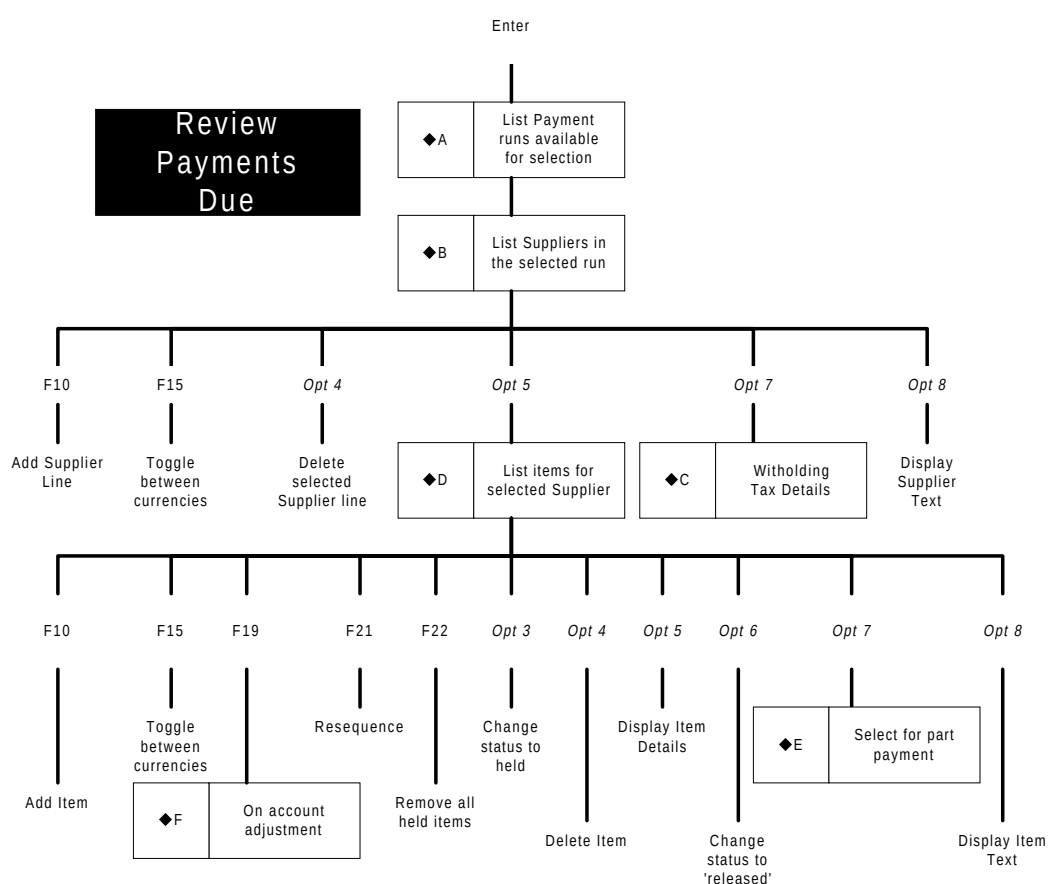

- Review Payments Due
- Produce Final Report
- Confirm Final Report

Review Payments Due

1...
2... **2/APY**

This single menu option leads to an extended series of screens which display, and allow some maintenance of, payment details at both supplier and item level. The following diagram will guide you to the information you require.

The use of a letter in some boxes indicates that the relevant screen is displayed. Where the function is straightforward, the screen is not displayed.

The main screens in this option are shown on the diagram with a letter.

Review Payments Due Screen

This screen displays existing payment runs.

To display this screen select the Review Payments Due option.

F3=Exit F10=Add supplier F12=Previous F15=Alternate values F21=Position to			
MA	a	MW	08/002

Fields:

Selection

Select supplier payments as follows:

4 - Delete. Remove this supplier/currency from the payments run. The list is redisplayed with the supplier to be removed in reverse image. Press **F11=Confirm Delete** to confirm removal of the selected supplier/currency, or press **Enter** to cancel the request. To remove several supplier/currency combinations, each is confirmed separately.

5 - Items. Display all the items selected for payment for this supplier/currency, for individual review.

8 - Text. Display the text associated with this supplier. (An asterisk in the * column indicates that there is text available for this supplier.)

Select a supplier with option 4, 5, or 8 and press **Enter**.

Withholding Tax Details Screen

Note: This option displays when the supplier is subject to withholding tax to be paid directly to the Government.

This screen displays the withholding tax for all items for the selected supplier. Each item's details are displayed over two lines, with a double line of column headings at the top of the list.

Fields:

References

Displays the item type and reference number.

Report

Shows whether the item has yet been included on the withholding tax report sent to the government.

Doc Date

The date on the item itself.

Goods Value

The total value of goods on the item.

Exempt Value

The goods value exempt from withholding tax.

Subject To

The goods value subject to withholding tax.

Not Subject To

The goods value not subject to withholding tax.

Tax Value

The total value of the withheld tax.

Calculation Percentage

This shows the percentage of the invoice gross total which is to be taxed.

6 - Release a previously held item. Changes an item with status 3 or 7 to include the total value of the item in this run.

7 - Part Pay. The items details will display with the option to enter the value of the part payment and discount being taken values.

8 - Display the text associated with this supplier. (An asterisk in the * column indicates that there is text available for this supplier.)

Review payment details by selecting a line with option 3, 4, 5, 6, 7 or 8 and press **Enter**.

Review Payments Part Pay Item Screen

At this screen you can part-pay an item and take discounts where appropriate.

To display this screen select an item with 7=Part Pay in the Review Payments For Payment Run Screen (Option 5).

Fields:

Payment On Account

Enter the amount to pay, in the payment currency, and press Enter.

Functions:

F10

Add. The option to add a supplier to the Payments Run. A window displays for you to add Supplier Code, Currency Code and the Payment Method.

F15

Alternative Value. Revalued currency values display.

F19

On Account. Post an adjustment to a selected item. The option to override the exchange rate will be available where that is appropriate.

F21

Resequence. Select to rearrange the order that the items are presented. A small window displays for you to select to sort by Due Date, Invoice Reference, Gross Value Outstanding, or by discounts available. Select just one type of resequencing.

F22

Remove All Held. All held items will be released.

F23

Discount Date. Due Date. Press **F23=Due Date** to change date values in the column headed Doc/Disc Date.

This option toggles between the Document Date with the Due Date displayed below it and the Document Date with the Discount Date displayed below that. The column heading changes to match your selection.

On returning to the main screen, the amount entered will be shown at the bottom of the screen.

Produce Final Report

3/APY

This option will produce a report combining the original selections made at the initial payment report stage with the amendments made at the review stage. Further amendments or additions may be made after the printing of the final report, which would then be reprinted. These two options - Review Payments Due and Produce Final Report - can be repeated as often as necessary.

Select the Produce Final Report option from the Payments menu, and the Final Report screen is displayed.

Final Report Screen

Select the Produce Final Report option from the Payments menu, and the Final Report screen is displayed.

Fields:

Details To Print

This specifies the level of reporting required for items which meet the selection criteria.

- 1 - Produces a full report with items listed.
- 2 - Produces a summary suppliers report (one line per supplier).
- 3 - No report.

Sequence By

This defines the primary sequence in which the report will be printed.

- 1 - By supplier code.
- 2 - By transaction currency.
- 3 - By base currency.
- 4 - By revalued base currency.

Currencies To Print

Enter 1 against the currency type to select it for printing.

Confirm Final Report

1...
2... **4/APY**

Confirming the final report completes the payment cycle in Accounts Payable and passes the selection information across to the linked Cash Management company for subsequent release using the supplier payments option on the cash management processing menu. This is followed by the confirm cheque numbers option from the cash management processing menu.

If Cash Management is not installed, the confirmation of payments routine will generate updates to the supplier accounts, creating references against each supplier payment made using the reference range pre-set in the company profile, and will post values to appropriate General Ledger accounts this will then need to be followed by the payments and remittances option and the confirm cheque numbers option on the AP payments menu.

This option also enables you to specify the amounts to be taken from individual bank accounts to make the payments, and/or change the payment according to a threshold value.

If a payment run with a status of 3 is selected, a window will open on this screen advising you that no final report has yet been produced for this run. To proceed with the confirmation without producing a final report press **F19**.

If the run status is not 3, the Confirm Final Report screen will be displayed.

```

Enter the value at which you wish the new payment method to be used.

Cut-Off Rule

Enter 1 if you wish the new 'to' payment method specified above to be used when a payment is over a certain value.

Enter 2 if you wish the new 'to' payment method specified above to be used when a payment is below a certain value.

If you attempt to enter your apportionment's and go on to the next currency without having apportioned the exact value displayed at the top of the screen, a message will be displayed.

Press **F12** if you want to return to the first screen and change your entries. If you wish to apportion the cash using ratios, however, press **F8**.

Continuing the Payment Cycle

If you have the Cash Management application installed, the next stage in the payment cycle is to take the Payments option from the Cash Management Processing menu in order to maintain and then release the run for payment.

Refer to the Payments section of the Cash Management product information for more details on this option.

Refer to the Introduction to see a diagram showing the route through the payments cycle using the Cash Management options.

Ad Hoc Payment

11/APY

Within Accounts Payable the facility exists for making supplier payments quickly using either the Ad Hoc or the Manual payments option. Both options bypass the full payment cycle procedure; but an item cannot be selected using the ad hoc or the manual option if it is already part of an automatic payment cycle run.

The difference between ad hoc and manual payments is that an ad hoc payment is passed to Cash Management for processing. The supplier payments option may be taken to generate cheques etc. and cheque numbers can be assigned to the transaction.

The Manual option updates AP immediately to tag invoices as historical. No further processing is required in Cash Management. It is possible to generate remittance advices.

Manual payments can be used to process manual payments of invoices and can also be used to clear credit notes against invoices. It should be noted that even though manual payments do not require any Cash Management processing, records are written to the bank account involved in Cash Management.

Take the Ad Hoc payment option, and enter the supplier to whom the payment is to be made.
Press **Enter**.

The Ad Hoc Payments screen will be displayed to allow you to specify payment details. The defaults set up for the supplier in question will be shown but may be changed.

Ad Hoc Payments Screen 1

The Ad Hoc Payments screen allows you to specify payment details. The defaults set up for the supplier in question will be shown but may be changed.

Fields:

Discount Being Taken

The value of the discount taken, if different from the discount available.

Part Payment Amount

Enter the amount to pay in the transaction currency. This amount must not be greater than the item balance. On pressing Enter the outstanding balance is added to the total 'Held'.

If you are using payment analysis, or if the supplier whose payment is being part paid is a 1099 supplier a window will be displayed to enable you to enter the payment analysis/1099 value.

If you press **F19** to pay an item on account, a window allows you to specify the amount to pay.

Press **F17** if you wish to override the conversion rate, **Enter** to confirm the on-account adjustment and return to the details screen.

Supplier Receipts

When a payment is received from a supplier, this must be recorded against the bank account and allocated to the supplier.

Warning: This is done using the Receipts option from the Cash Management Processing menu. Refer to the Receipts section of the Cash Management product information for more details regarding this option.

Cancel Payments

Warning: This is done using the Cancel Transactions option from the Cash Management Processing menu. Refer to the Cancel Transactions section of the Cash Management product information for more details regarding this option.

Terminate Payments

14/APY

If you select the Terminate Payments option the screen displayed offers you two methods of termination. The difference between them is as follows:

Using option 1

This option will terminate a complete payment run as long as it has not yet been confirmed using option 4 from the Accounts Payable Payments menu, and will reinstate all items in the run as released, open items.

Using option 2

This option will terminate a payment for a particular supplier when the run has already been confirmed. Note that, unlike the above option which terminates the complete run, this option is based on the supplier and will terminate payments within a supplier.

Payments can only be terminated as long as it hasn't been processed via the supplier payments option in cash management. If it has then the cash management cancel payments option can be used.

Take the Terminate Payments option from the Payments menu, and on the first screen decide whether you are terminating a payment run or payments released to Cash Management:

Fields:

Option

If you wish to cancel an entire run which has not yet been confirmed (option 4 on the Accounts Payable Processing menu), enter 1 in this field. The next screen will then display all runs in progress, and you may select the run or runs you wish to terminate.

If you have confirmed the run, enter 2 in this field.

Both of these options result in the payments involved being reinstated as open items.

Using option 1

Taking this option indicates that you wish to terminate an as yet unconfirmed payments run. A list of runs will be displayed. Enter 1 against the payment cycle with which you wish to work.

When you have selected the run(s) to be terminated a window will be displayed to enable you to confirm or abandon the termination:

Press **F11** to terminate the payment run selected, otherwise press **Enter**.

Using option 2

Taking this option means that you wish to terminate a payment that has already been confirmed. A screen will be displayed, allowing you to select the payment to be terminated.

Once your selection has been made a window will be displayed to enable you to confirm or abandon the termination:

Enter **F11** to terminate the selected supplier payments, otherwise press **Enter**.

Status Maintenance

1...
2... **31/APY**

This procedure enables you to adjust payment status codes by selectively holding or releasing items for payment. This governs the inclusion or exclusion of an item in any subsequent automatic payments cycle.

Take the Status Maintenance option from the Payments menu to see the following fields:

Fields:

Supplier Code

Enter the valid supplier code for the payments that are to be processed.

Currency Code

The currency code defaults to the supplier's normal trading currency, but it may be changed.

Press **Enter** to see a list of the items satisfying the selection criteria.

This screen displays all open items not already included in a payment run. You can maintain the status codes either by using the option numbers or by function key.

F20=Release all F21=Prompt pay all F22=Select all F23=Hold all			
10-03 SF MW KS IM II EDN400A PCET0263			

Fields:

Select Status

Enter a code to change the payment status.

The codes available are:

1 - Select in payment cycle.

2 - Change due date or payment method.

3 - Hold.

6 - Release.

9 - Prompt pay.

The current status of each item is shown just to the right of the select field.

Any item marked with an asterisk in the 'Spd' column of the screen has an extended terms code defined to it, and if you enter option 2 against this item a screen will be displayed allowing you to maintain the extended payment terms of the item.

A more detailed explanation of these options is provided in the following table:

Maintaining Status Codes	
Option/ Function	Result
Blank	The default value. The item will be selected for payment when its due date is reached & its supplier is included in the run.
'1'	The item will be selected for payment into the next run, if the run uses selection method '2', which includes items regardless of supplier and due date.
'2'	Allows maintenance of the item due date, payment method, and extended terms if defined (see panels below).
'3'	The item is held - i.e. it will not be paid until it is released using option '6'.
'6'	The item status is set back to blank, the default value.
'9'	The item will be included in the next payment run, regardless of due date, if the supplier is included.
F8	The newly maintained items are updated.
F15	This is a three way toggle which displays all values, in sequence, in the original and revalues base currency, and in the transaction currency.
F20	Releases all items (equivalent to selecting status code '6').
F21	Prompt pays all items (equivalent to selecting code '9').
F22	Selects all items for payment (equivalent to selecting status code '1').
F23	Holds all items (equivalent to selecting status code '3').

If you enter option 2 against an item, and that item has no extended terms, you will see the Amendment window.

Payments Being Processed Report

41/APY

This report produces a list of outstanding payments awaiting processing, showing suppliers and payment values involved.

Select the Payments Being Processed option from the Payments menu, and a window will ask you to press **F8** to submit a job to produce the report.

Manual Payments Report

42/APY

This option will produce a report listing all manual payments made on a specific bank account, for each payment method, since the latest transaction 'purge'. It includes the payee, the cheque number, and values in transaction and base currencies.

Take the appropriate option, and you will see the following fields:

Fields:

Bank Account

Enter the payment bank account code for which manual payments are to be listed. The bank account code defaults to the code defined as the default upon the company profile. This may be overridden to any other valid bank account code.

Period

This field defaults to the current period from the company profile, but may be changed.

Press **Enter**, and the function key **F8** will appear at the foot of the screen. Press **F8** to produce the report.

Statements

1... **43/APY**
2...

Supplier statements are provided to help with the reconciliation of a supplier's account. These statements show the movements for the current month, and the period balances.

Print Statements in Prime? . . . : <u>1</u> (0=No, 1=Yes)			
F3=Exit			
06-38	SF	MW	KS IM II EDN400A PCET0283

Fields:

Statement Date

Enter the date that is to appear on the statement.

Cut-Off Date Or Period

Enter either the date or the period (YYPP) up to which transactions are to be printed. If the period is entered, the date used is the end date of that period in the period calendar file.

From Supplier Code

State the range of supplier account codes for which statements are to be produced. Leave blank to select all accounts.

To Supplier Code

State the range of supplier account codes for which statements are to be produced. Leave blank to select all accounts.

Suppress Payment Item Details

1 - Omit payment details from the statement.

0 - Include payment details on the statement.

Update Cleared Items.

Enter 1 to indicate that items have been printed on the statement. This means that cleared items printed during this run will not subsequently appear. To retain details for subsequent statements, enter 0.

Print Statements In Prime

Enter 1 to print statement values in the transaction currency (one statement per currency). Enter 0 to print statements in base currency.

Press **Enter** to submit a job to produce the statements.

Create Recurring Payments

51/APY

When you run this option the system checks all recurring payments and recommends those now due for payment. When the job has completed, each payment is available for review, edit and release.

This process also produces:

- An error report
- A report of recommended constant payments
- A report of recommended standing payments
- A report of recommended spread payments

A recurring payments definition is specified using the recurring profiles option on the maintenance menu. Take the *Create* option from the Recurring Payments section of the Payments menu to display a window asking you to press **F8** to run the job to create recurring payment recommendations.

Edit Recurring Payments

52/APY

This option enables you to:

- Review the runs, recommended payments and dissections
- Enter the dissection values for standing and spread payments
- Enter 1099 or withholding tax details for standing and spread payments, where relevant

Take the Edit option from the Recurring Payments section of the Processing menu to see a list of payment runs:

Fields:

X (Select)

- 1 - Select a run for processing
- 5 - Review the payments in the run
- 6 - Print a report of the payments for the run.

The payments recommended for processing are sorted so that a run will consist of payments of one type (for example, constant payments) for one date.

The runs are displayed on the Recurring Payments screen, and each can be selected for processing, editing or printing. The runs of the standing or spread type can not be processed until they have been edited, as values must first be entered.

Each run has a status displayed for it. This will change as you edit and process a run, and the status's you may meet are:

- INITIAL - The run has not yet been edited
- IN USE - The run is being maintained by another user
- EDITED - The run has been edited, but has not yet been submitted for processing
- PROCESS - The run has been submitted for processing
- ACTIVE - The run update is in progress
- PARTIAL - The update has finished but some records are still unprocessed

To edit a run, select with 5 and press **Enter**.

Fields:

X

Enter 1 to select a payment to be paid when the run is processed.

Enter 2 and 3 to select a range of payments to be paid, deselecting any unwanted payment within the range with 4.

Enter 5 to see the dissections for a payment.

Enter 9 to delete a payment.

External Reference

This displays the reference entered when the recurring payment terms were defined. If they were left blank, a default is displayed instead. This can be maintained here.

Due Date

Amend the due date as required.

(The due date displayed may be calculated to exclude weekends and holidays - depending on how your Country Specific Parameters are set up.)

Position To

Enter the supplier to which you want to reposition the list.

This screen enables you to select payments for processing, deletion or editing. To see the supplier name and the recurring profile description, press **F22**. Otherwise, to edit a payment, or simply to review its dissections, select with 5 and press **Enter**.

When you select a payment with 5, the payment details are displayed. For a constant payment the values are already available for each dissection, because these are set up when the recurring payment itself is defined. For standing and spread payments, however, the values must be entered.

Maintaining Dissections Constant Payment

Fields:

X

Enter 1 to amend a dissection, 4 to delete it.

Account Code

Enter the relevant GL account.

Value

Enter the dissection value for this payment.

Account Code

Enter the General Ledger account code for the dissection concerned.

VAT (Unnamed)

Enter the VAT value/code, unless the system is to calculate it.

Desc

Enter a dissection description. If left blank, this will default to the account code description from the General Ledger.

The dissections can be amended and new ones added as required. When the editing is complete, press **F8**.

Maintaining Dissections Standing Payment

Fields:

X

Enter 1 to amend a dissection, 4 to delete it.

Control Value

Enter the total value of payments.

Value

Enter the dissection value for this payment.

Maintaining Dissections Spread Payment

Fields:

X

Enter 1 to amend a dissection, 4 to delete it.

Control Value

Enter the total value of payments. Press F10 to see the spread payments calculated.

Value

Enter the dissection value for this payment. For spread payments this is done automatically once you have entered the control value and pressed F10.

Override Currency Rate Window (F17)

If you press **F17** from one of the dissection screens, a window is displayed.

To override the current rate you may:

- Enter a predefined rate code
- Enter a rate by which the value is to be multiplied or divided
- Enter the target value. The rate will be calculated by the system

Functions:

F18

This key toggles between allowing maintenance of the dissection entry fields at the bottom of the screen and allowing maintenance of the value fields attached to dissections already entered. The effect is shown on a screen.

When you have edited the dissections as required, press **F8** to update.

Withholding Tax Window

If the supplier you are paying is a withholding tax supplier and you have specified that you want to be able to maintain the withholding tax options for the recurring payment, the withholding tax window will be displayed.

Fields:

Type

This field will default to the tax code set up for the supplier, but may be amended.

Calculation %

Enter the percentage of the goods or service value which is subject to withholding tax.

This field defaults to the value set for the supplier, but may be amended.

Tax %

Enter the withholding tax percentage which is to be charged against the amount subject to withholding tax.

This field defaults to the value set up for the supplier, but may be amended.

Excluded Goods Value

Enter the value of goods not taxed.

This field will default to zero.

When you have completed the fields with the withholding tax details, press **Enter** to see the values displayed.

Press **F8** to confirm the details.

Payment Analysis (1099) Window

If you are using payment analysis, or if the supplier is a 1099 supplier, the following fields will be displayed:

Fields:

Code

Enter the analysis group code for the entered value.

Amount

Enter the value for the corresponding analysis group code.

Enter the values and analysis codes as appropriate and press **F8** to update.

Payment Analysis Codes

Code	Description
FISH	Fishing Proceeds
RENT	Rent
ROYA	Royalties
PRIZ	Prizes
NEC	Non-employee Compensation
SUBP	Substitute Payments
CINS	Crop Insurance
MHCP	Medical/Health Care Payments

Process Recurring Payments

53/APY

This procedure takes each recurring payment which has been released for payment by the edit procedure, and checks the setting of the Autopay field in the Recurring Payments option of the Maintenance menu.

It will create a log item, a ledger item, or a payment, according to the status indicated by the Autopay setting.

Take the Process option from the Recurring Payments section of the Payments menu, enter the posting period and press **F8** to submit a job to process the payments according to the setting of the 'Autopay' field in Recurring Payments Maintenance.
