Chapter 3

Accounts Receivable Cash Allocation

Post Cash And Allocate Options:

Two options enable you to perform these processes:

- Post Cash and Allocate (Advanced)
- Allocate (Advanced)

Note: See the Post Cash (Advanced) option for information on advanced cash posting as a separate option.

Post Cash And Allocate (Advanced)

1/ARA

This option allows you to allocate cash receipts and remittances as follows:

- Items selected and available for allocation
- New cash and adjustment items

In addition you may, at the start of the process,

- Post cash and make adjustments

Note: The initial window or windows to display may have been set up for your user name - at the Cash Allocation Preferences maintenance option. Optionally, Batch Control, Session Defaults and, or Allocation Defaults windows may display.

A running total allocated will display. You may part pay, use discount maintenance, select by item references, select a range by filtering from a wide selection and where a parent in a hierarchy is chosen, select the appropriate child company to post to. Customer's default allocation method, where not already defined, may be amended or set up for the first time.

Once the allocation balances you will be prompted to update. Should you require to complete without balancing you may suspend the allocation. The reference entered against the suspended session will identify the allocation in the Resume User Session option.

Where automatic posting was used to automatically suspend an allocation you may post the cash and suspend the allocation.

Multiple Companies

The Accounts Receivable company displays only if you are authorised to make inter-company postings. The default is the host company. You may change the host company to any other Accounts Receivable company (which is attached to your current Cash Management company). Or you may change to any Accounts Receivable company linked to a General Ledger company (with an inter-company link to the host GL company).

Open Batch Window

Note: The batch control window only displays automatically if set up at the Cash Allocation Preferences maintenance option. The Batch Control Active field must also be set to 'yes' in AR Company Profile.

SL1119SB	Z1 - GB Demonstration Company	User GBJBA1MS	9/09/97 8:02:22

3-31	Sp	MW KS CL IM DM II	EDN400A KB PKH312S1

Fields:

Batch Number

Specify a unique number to identify the batch. Once entered the batch number may not be changed.

Batch Total

Enter a hash total for batch control purposes. If the batch total entered proves to be in error it may be changed later to match the calculated batch entered.

Total So Far

The accumulated value of the cash entered.

*Note: The Open Batch window is available with **F2=Open Batch** once you start entering the batch.*

Variance

The difference between the accumulated value and the batch total.

Note: Should the batch total not match the values entered, it is possible to allow this by changing the batch total to match the Total So Far.

Press **F12=Previous** to return to the previous screen or **F3=Exit** to exit the option.

Session Defaults Window

Note: The Session Defaults window only displays if set up at the Cash Allocation Preferences maintenance option.

*Note: This window may be selected with **F20=Session Defaults** even if not set to display at the start of the process.*

This window allows you to amend default posting and discount dates, the period, bank account and to set a bank reference for the posting session.

SL1119SB	Z1 - GB Demonstration Company	User GBJBA1MS	4/09/97 15:33:05

5-25 SA MW KS CL IM DM II EDN400A KB PKH312S1			

Fields:

Posting Date

The system date displays. You may change to an alternative posting date for the cash posted or allocations made.

Period

Defaults to the current period. You may change to a future period which corresponds to the posting date set.

Discount Date

If a different date is to be used for calculating if discount is allowable you may change it here.

Bank Account

The default bank account displays. If required, you may enter a different GL Bank Account code for posting cash.

Bank Reference

You may add a bank reference (this could be a paying in slip number) to be reported against the cash receipts entered.

Note: If you are not using session defaults as an initial window the bank reference field on the Cash Posting window will default to blank.

Press Enter to validate the entries and exit the session defaults window.

Allocation Defaults Window

Note: The Allocation Defaults window displays at the start of the process if set up at the Cash Allocation Preferences maintenance option.

*Note: This window may be selected with **F21=Allocation Defaults** even if not set to display at the start of the process.*

Select your first customer for cash posting and allocation. The screen to display next depends on the customer's default allocation method.

Note: Default allocation method is set up at the Customer Name and Address maintenance option.

If the customer selected has no default allocation method you will be prompted to select one. For more information, see Customer's Default Allocation Method Window.

Fields:

A/R Company

See the paragraph entitled Multiple Companies in Post Cash and Allocate (Advanced).

Customer

Select the customer to which the cash received should be allocated and press **Enter**.

Note: If an AR hierarchy customer, must not be type 4.

Allocation Currency

Select the currency of the allocation or leave blank to allocate in base currency.

Payment Method

Select the default payment method. It will be used for cash receipts and any adjustments or replacement items.

Enter to confirm the allocation defaults and to display the cash posting screen.

Functions:

F2

Batch Controls. Displays the batch controls window.

Customer's Default Allocation Method Window

This additional window displays only when the selected customer has no previous default allocation method.

Note: Default allocation method is set up at the Customer Name and Address maintenance option.

Fields:

Default Allocation Method

- 1 - Items. Use this method to display a screen of customer items from which selections can be made.
- 2 - References. Use this method to display a grid for direct entry of item references. For example, a remittance advice reference.
- 3 - Filter. Use this method to display a screen for setting selection criteria to enable you to exclude unwanted items. You may then further select from the filtered screen of items.

Enter to confirm the allocation defaults entered and to return to the cash allocation screen.

Cash Posting Window

This window displays from cash allocation when the batch controls, session defaults and allocation methods (where used) are determined.

*Note: You may also select this screen with **F19=Cash**.*

7-29 SA MW KS CL IM DM II STUD140 KB PKH31251							

Fields:

Customer

Enter the customer from which cash has been received.

Note: If an AR hierarchy customer, must not be type 4.

Value

Enter the value of the cash received.

Currency

The allocation default currency displays or, if not used, the base currency. You may change the base currency to the currency of the cash received.

*Note: Conversion rates may be overridden. See **F5=Bank to Base** and **F18=Item to Bank**.*

External Ref

Enter a unique reference for your customer. This would, most usefully, be the cheque number.

Posting Date

The system date or Session Default posting date displays. Change to a different posting date if required for the customer's cash posting.

Period

The current period displays. You can change to a future period if required.

Bank Account

Enter the General Ledger bank account which will receive the cash. It defaults to the customer / company profile bank account, but may be changed.

Bank Reference

You must enter a bank reference. It is used to help identify transactions during Bank Statement Reconciliation and would, usefully, be the paying-in slip number.

Charges

Enter the value of any bank charges applied by your bank. Charges are recorded in the currency of the bank account. The value can be negative.

Payment Method

Select the payment method by which the cash was received.

Description

Note: For reporting or enquiry purposes this will only be useful if you have a customised program storing this field in LTMC15.

You can enter a description of the cash posting transaction.

Functions:

F5

Bank ->Base. Override the bank to base conversion rate.

F6

Filter. Select items from ranges of dates, codes, document types etc. The selected items will display on the Customers Items screen to allow you to further select for allocation.

Note: See Filter Items Window for more information.

F7

Value Date. The value date is, generally, the anticipated clearing date of CS transactions. For more information, see Value Date Active? on the Country-Specific Parameters 24-32.

Note: Only available if Value Date Active is set to Yes in your GL Country Specific Parameters.

F9

Items. Displays the Post Cash and Allocate main screen with items available for allocation. See Post Cash And Allocate (Items) Screen for more information.

F13

Customer Enquiry. Allows you to access the credit manager enquiry option - for your current customers. For more information see Credit Manager Enquiry.

F14

Item Text. The standard text screen with any text on the item, displays with the option to add text for the posting.

F15

Allocation Totals. A window displays with totals posted for new and existing cash, total allocated, total discounts, total adjustments, total replacement items, and with the total allocation balance for the session.

F16

Allocation Text. Displays text entries against transactions posted for the session with the option to add more text items. For more information see Text Screen Diary Facility (Option 3).

F17.

References. A window displays to allow you to select items by references. For more information see the Items to be Allocated Window. A prompt is available. Toggles with **F17=Item Types** to allow you to select from list of existing items.

F18

Item->Bank. To override the item to bank conversion rate.

F19

Cash. The cash posting screen displays to allow you to post a cash value.

F20

Session Defaults. The session defaults window gives you the option of amending the posting and discount dates. At the start of the session you may amend the default GL bank account and add a bank reference.

Note: The Session Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

Note: When the Allocate option is selected, the bank account and bank reference are not displayed.

Note: When the Post Cash option is selected the discount date is not displayed.

F21

Allocation Defaults. Select the customer and amend or accept the allocation currency and the allocation method.

Note: The Allocation Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F22

Adjustments. A window displays to allow you to create adjustments or replacement items as part of the allocation. For more information see Post Adjustment Or Replacement Window.

F23

Cancel Allocation. If you have entered any cash or allocated any items you will be prompted to confirm the deletion.

Press **F23** again to confirm and re-enter, or
F12=Previous to return to the Item screen.

F24

More. Access the function keys not currently displayed.

Enter to confirm the cash posting values entered
and to display **F8=Update** option. Press **F8** to
update and to display the Post Cash & Allocate
Screen.

Post Cash And Allocate (Items) Screen

 This screen displays when **F8=Update** was used at the Cash Posting screen.

The item display for allocation may depend on the allocation method chosen, but the order of the display will be as follows:

New cash followed by new adjustment items, in the order posted, are shown as fully cleared. Then existing cash followed by items selected (or available for selection) for allocation:

- Existing outstanding items for the allocation customer (entered in the Allocation Defaults Window), or
- Existing outstanding items for the customer used for the first piece of cash, or
- Items selected using the Filter selection option, or
- Items selected using the References selection option

This screen displays as a backdrop behind other Post Cash & Allocate windows. Cleared items display in blue, part-cleared items in pink and disputed invoices in reverse image.

 *Note: Your AR Company Profile field Display Cash First takes effect at the post cash and allocate screen. This relates to existing cash items and not new cash posted.*

Fields:

Position to

To move to a particular item enter the full reference.

Opt

- 1 - Amend / clear. Use this option to fully allocate an outstanding item against cash. Or to amend new cash and / or new adjustments.
- 2 - Part-Pay. A window displays to allow you to part-pay existing items. For more information see Part-Pay Window (Option 2).
- 3 - Text. Amend existing text for the item or add new text. For more information see Text Screen Diary Facility (Option 3).
- 4 - Delete new cash or new adjustments or deallocate items previously selected for clearance. For more information see Delete / Deallocate (Option 4).
- 5 - Enquire on existing item details. For more information, see Items Enquiry (Option 5).

Functions:

F2

Open Batch (Batch Controls). The batch control window displays the total posted so far. The option to override the Batch Total is available.

F5

Autoallocate. Unallocated items and new cash posted items with valid due dates will be automatically allocated from the cash value entered at the cash posting screen - until that value is exhausted. No part-payments will be made.

F6

Filter. Allows you to select items for allocation by filtering out from a wide range of references, periods, values and dates etc. This filter may include the selection already made at the session and allocation defaults windows.

F7

View. Allows you to switch between different views of the allocation items.

Note: Views are set up at the Cash Allocation Preferences maintenance option.

F13

Credit Manager Enquiry. Allows you to access the credit manager enquiry option - for your current customers. This is also available on option 5 at this screen. For more information see Credit Manager Enquiry.

F15

Allocation Totals. A window displays with totals posted for new and existing cash, total allocated, total discounts, total adjustments, total replacement items, and with the total allocation balance for the session.

F16

Allocation Text. Displays text entries against transactions posted for the session with the option to add more text items. For more information see Text Screen Diary Facility (Option 3).

F17

References. A window will display to allow you to select items by references. For more information see Items to be Allocated Window. A prompt is available. Toggles with **F17=Item Types** to allow you to select from list of existing items.

F19

Cash. The cash posting screen displays to allow you to post a cash received value. See Cash Posting Window for more information.

F20

Session Defaults. The session defaults window gives you the option of amending the posting and discount dates. At the start of the session you may amend the default GL bank account and add a bank reference.

Note: The Session Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

Note: When selected from the Allocate screen the bank account and bank reference are not displayed.

Note: When selected from the Post Cash screen the discount date is not displayed.

F21

Allocation Defaults. Select the customer and amend or accept the allocation currency and the allocation method.

Note: The Allocation Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F22

Adjustments. A window displays to allow you to allocate cash to adjustment transactions. For more information see Post Adjustment Or Replacement Window.

F23

Cancel Allocation. A window displays asking you to confirm the Allocation.

Press **F23** again to confirm and re-enter, or **F12=Previous** to return to the Item screen.

F24

More. Access the function keys which are not currently displayed.

Press **F8=Update** to save the allocation and return to your first selection screen/window.

Part-Payment And/Or Discount Window (Option 2)

Select existing items to partly pay from cash received. New cash or adjustment items may not be part-paid.

The currently outstanding value and calculated discount available and the discount date display for your information.

Fields:

IN

Add the invoice (or other item type) references to be allocated against the cash received.

Or, select from existing item references by pressing **F17=Item Types**. The item types screen displays to allow you to select other item types.

Ensure you are in the **F17=References** window and press **F8=Update** Batch to allocate the items selected to the payment received - where the allocation is balanced.

Functions:

F2

Open Batch (Batch Controls). The batch control window displays the total posted so far. The option to override the Batch Total is available.

F6

Filter. Allows you to select items for allocation by filtering out from a wide range of references, periods, values and dates etc. This filter may include the selection already made at the session and allocation defaults windows.

F7

View. Allows you to switch between different views of the allocation items.

Note: Views are set up at the Cash Allocation Preferences maintenance option.

F9

Items. Displays the Post Cash and Allocate main screen with items available for allocation. See Post Cash And Allocate (Items) Screen for more information.

F13

Credit Manager Enquiry. Access the credit manager enquiry option. This is also available on option 5 at this screen. For more information see Credit Manager Enquiry.

F15

Allocation Totals. A window displays with totals posted for new and existing cash, allocations, discounts, adjustments, replacement items, and with the total allocation balance for the session.

F16

Allocation Text. Displays text entries against transactions posted for the session with the option to add text items. For more information see Text Screen Diary Facility (Option 3).

F17

Item Types. Allows you to select from the list of existing items. Toggles to F17=References (this window).

F19

Cash. The cash posting screen displays to allow you to post a cash received value. See Cash Posting Window for more information.

F20

Session Defaults. You may amend the posting and discount dates and (at the start of the session), the default GL bank account and add a bank reference.

Note: The Session Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F21

Allocation Defaults. Select the customer and amend or accept the allocation currency and the allocation method.

Note: The Allocation Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F22

Adjustments. A window displays to allow you to allocate cash to adjustment transactions. For more information see Post Adjustment Or Replacement Window.

F23

Cancel Allocation. A window displays asking you to confirm the Allocation.

Press **F23** again to confirm and re-enter, or **F12** to return to the Item screen.

F24

More. Access the function keys which are not currently displayed.

Press **F8=Update** to save the allocation and return to your first selection screen / window.

Filter Items Window (F6)

Select this window from the Post Cash & Allocate screen and from the items to be Allocated Window (F17).

This function allows you a controlled selection of available items from a wide range of dates, codes, document types etc. . You may also select the display sequence of the items selected for allocation.

+ or - is available to select a range from all available.

Fields:

Retain Existing Selection

- 0 - No. Previously filtered selection will be excluded.
- 1 - All. Previously filtered selections will be included with this filtered selection.
- 2 - Credits. Retain previously selected credit note selections with this filtered selection.
- 3 - Cash. Retain previously selected cash postings selections with this filtered selection.

Resequence

- 0 - Selected items will display at the end of the items retained from previous selections.
- 1 - Items will be presented in the order of the filtered items, including those items retained from previous selections.

Note: New cash allocations and adjustments will always be presented first.

Company

Defaults to the current company. You may change to a different AR company.

Order

1-9 Enter a number to denote column order of the output. E.g. if 2 is entered against Item type then that would be the second column heading.

Leave blank to be excluded from the output.

A/D

A - To output the selection in Ascending order.

D - To output the selection in Descending order.

Customer

Select one customer for the allocation, or

+ - Type + to be prompted for entry of more than 1 customer. A small window will display for you to enter a list of customers required for the allocation.

Page Down to enter more customers. An unlimited number may be selected.

If a Hierarchy type 4 customer is selected the **F7=Hierarchy** prompt displays to allow you to select a child account for the posting.

Note: Customers must not be hierarchy type 4.

Item Type

Select a single item type by entering the code. Or type + to be prompted for entry of more than one item type.

Reference

Select a reference or range of references for the item type shown.

Note: Reference is only available for single item type or no item type.

External Ref %/+

+ allows you to list a number of external reference ranges to be used as selection criteria.

% allows you to select external references by using % as a wild card.

Example:

%AB1% finds references including AB1

%ABI finds references ending AB1

AB1% finds references starting AB1

Also an underscore may be used to represent 'any character'. Example: A_1 would find references with any character between the A and 1.

Posting Period

Enter a posting period or range of periods. Or use + to allow entry of a list of posting periods where a range is not appropriate.

Overdue Period

Enter an overdue number of periods or a range of overdue periods. Or use + to allow entry of a list of overdue periods where a range is not appropriate.

Outstanding Value

Enter an outstanding value or range of customer's outstanding values.

Allocated Value

Enter a previously allocated value or a range of allocated values.

Filter Second Window

Document Date

Enter one document date or a range of document dates.

Due Date

Enter a calculated due date or a range of due dates.

Discount Date

Enter a date discount taken or a range of discount dates.

Reminder Level

Select on one chase letter code or a range of codes.

Reason Code

Select one reason code or use + to allow entry of a list of codes to be included.

Dispute Code

Select one invoice dispute code or use + to allow entry of a list of codes to be included.

Currency

Enter one currency or leave blank to select all currencies available.

Press Enter to activate the filtered selection.
Press **F8** to update the allocation where the balance is 0.

Functions:

F2

Open Batch (Batch Controls). The batch control window displays the total posted so far. The option to override the Batch Total is available.

F7

Hierarchy. A window displays to allow you to select a range of child accounts when the selected customer(s) is a parent account of hierarchy type 3.

F9

Items. Displays the Post Cash and Allocate main screen with items available for allocation. See Post Cash And Allocate (Items) Screen for more information.

F13

Credit Manager Enquiry. Access the credit manager enquiry option. This is also available on option 5 at this screen. For more information see Credit Manager Enquiry.

F15

Allocation Totals. A window displays with totals posted for new and existing cash, allocations, discounts, adjustments, replacement items, and with the total allocation balance for the session.

F16

Allocation Text. Displays text entries against transactions posted for the session with the option to add text items. For more information see Text Screen Diary Facility (Option 3).

F17

References. Enter item references. Toggles to **F17=Item Types** to allow you to select from existing item references.

F19

Cash. The cash posting screen displays to allow you to post a cash received value. See Cash Posting Window for more information.

F20

Session Defaults. You may amend the posting and discount dates and (at the start of the session), the default GL bank account and add a bank reference.

Note: The Session Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F21

Allocation Defaults. Select the customer and amend or accept the allocation currency and the allocation method.

Note: The Allocation Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F22

Adjustments. A window displays to allow you to allocate cash to adjustment transactions. For more information see Post Adjustment or Replacement Window.

F23

Cancel Allocation. A window displays asking you to confirm the deletion.

Press **F23** again to confirm and re-enter, or **F12** to return to the window.

F24

More. Access the function keys which are not currently displayed.

Select Child Accounts (F7)

When the customer selected for allocation is of hierarchy level three (parent) **F7=Hierarchy** will be available to allow you to select one or more child level account(s).

Fields:

Opt

1 - Select one or more child level accounts for the cash allocation.

Select an account with 1 and Enter to return to previous screen or press **F12=Previous**.

Functions:

F15

Parentage. Displays the parent account of the displayed child accounts. Toggles to **F15=Names & Addresses** to display customer details.

Post Adjustment Or Replacement Window (F22)

Create an adjustment transaction to be added to the Post Cash And Allocate Items Screen. Select the adjustment type, payment method and add a description.

The company and customer may display from the previous selection.

This window displays when you select **F22=Adjustment** on the Post Cash And Allocate Screen.

		Parameter Codes Type... ARAT More: + Desc... A/R Adjustment Type 1 Code Description - AJ Write-off - CA Cash on Account - DN Debit Note - NA Not Allowed - NT No Trace - OP Overpayment - PT Paid Twice I=Select F12=Previous					
15-40 SA RW KS CL IM DM II EDN400A KB PKH31251							

Type

Select the adjustment type for the posting.

When you select AJ for a write-off adjustment the VAT element of the write-off can be reclaimed if the following applies:

- The reason code used is linked to a GL account with a VAT code.
- The VAT code Discount Basis should be set to 2.

Note: A VAT code is assigned to a GL Account at the Account Code Maintenance option.

Note: VAT Discount Basis is set to 2 at the VAT Code Maintenance option.

Currency

Accept the displayed currency or select a new currency for the adjustment.

Note: This field may not be changed if currency was set on the Allocation Defaults Window.

Reason Code

You must select a reason code for the adjustment.

When the reason code used is attached to the write-off adjustment Type AJ, the following applies:

- 'The Reason Code Invalid' message displays when the selected Reason Code is valid, but is attached to a GL Account Code that is, in turn, attached to a VAT code that is eligible for use with input VAT only.
- The VAT element of the written off value is reclaimable. This depends on the Reason Code being linked to a GL Account with a VAT Discount Basis set to 2.

Note: A VAT code is assigned to a GL Account at the Account Code Maintenance option.

Note: VAT Discount Basis is set up in the VAT Code Maintenance option.

Payment Method

Select the payment method.

External Ref

Optionally, enter a unique reference for your customer. This would most usefully be the cheque number.

Description

You can enter a description of the adjustment transaction. This appears against the Replacement Adjustment item details in enquiry.

Note: For reporting or enquiry purposes this will only be useful if you have a customised program storing this field in LTMC15.

Press **F8=Update** to save the allocation where the balance is 0.

Press **Enter** to save the Adjustment and return to the Allocate Items screen.

Functions:

F2

Open Batch (Batch Controls). The batch control window displays the total posted so far. The option to override the Batch Total is available.

F6

Filter. Select items from ranges of dates, codes, document types etc. The selected items will display on the Item Types window to allow you to further select for allocation.

Note: See Filter Items Window for more information.

F9

Items. Displays the Post Cash and Allocate main screen with items available for allocation. See Post Cash And Allocate (Items) Screen for more information.

F13

Credit Manager Enquiry. Access the credit manager enquiry option. This is also available on option 5 at this screen. For more information see Credit Manager Enquiry.

F14

Item Text. The standard text screen with any text on the item displays with the option to add text for the posting.

F15

Allocation Totals. A window displays with totals posted for new and existing cash, allocations, discounts, adjustments, replacement items, and with the total allocation balance for the session.

F16

Allocation Text. Displays text entries against transactions posted for the session with the option to add text items. For more information see Text Screen Diary Facility (Option 3).

F17

References. Enter item references. Toggles to **F17=Item Types** to allow you to select from existing item references.

F18

Direct Rate. Overrides the direct conversion rate.

F19

Cash. The cash posting screen displays to allow you to post a cash received value. See Cash Posting Window for more information.

F20

Session Defaults. You may amend the posting and discount dates and (at the start of the session), the default GL bank account and add a bank reference.

Note: The Session Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F21

Allocation Defaults. Select the customer and amend or accept the allocation currency and the allocation method.

Note: The Allocation Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F23

Cancel Allocation. A window displays asking you to confirm the deletion.

Press **F23** again to confirm and re-enter, or **F12=Previous** to return to the window.

F24

More. Access the function keys which are not currently displayed.

Allocate (Advanced)

3/ARA

Use this option to allocate existing items. There is no facility to post cash but existing cash can be allocated.

Note: The initial window or windows to display may have been set up for your user name - at the Cash Allocation Preferences maintenance option. Optionally, Session Defaults and, or Allocation Defaults windows may display.

A running total allocated will display. You may part pay, select by item references, select a range by filtering from a wide selection and where a parent in a hierarchy is chosen, select the appropriate child company to post to. Customer's default allocation method may be amended or set up for the first time.

Once the allocation balances you will be prompted to update. Should you require to complete without balancing you may suspend the allocation. The reference entered will identify the suspended allocation in the Resume User Session option.

Session Defaults

The Session Defaults window only displays if set up at the Cash Allocation Preferences maintenance option. It allows you to amend default posting and discount dates.

For more information see Session Defaults Window

*Note: Session Defaults may be selected with **F20=Session Defaults** even if not set to display at the start of the process.*

Note: Bank Account and Bank Reference are not available in this case.

Allocation Defaults

*Note: This window may be selected with **F21=Allocation Defaults** even if not set to display at the start of the process.*

If the customer selected has no default allocation method you will be prompted to select one. For more information, see Customer's Default Allocation Method Window.

Select the Accounts Receivable company, customer, currency and payment method for the items to be allocated.

Enter to confirm the allocation defaults and to display the screen appropriate to the Customer's Default Allocation method. If Items, the Items screen displays.

Fields:

Position to

To move to a particular item enter the full reference.

Opt

- 1 - Amend / clear. Use this option to select an item for clearance or to amend new adjustment items.
- 2 - Part-Pay. A window displays to allow you to part-pay existing items. For more information see Part-Pay Window.
- 3 - Text. Amend existing text on the item or add new text. For more information see Text Screen Diary Facility.
- 4 - Delete or deallocate. To deallocate items previously selected for clearance. Or to request deletion of new adjustment items. Deletion is confirmed with **F11=Delete**.
- For more information see Delete / Deallocate.
- 5 - Enquire on the item details. For more information, see Items Enquiry.

When the allocation balances use **F8=Update**. If the allocation does not balance, a warning window will appear allowing the allocation to be suspended or discarded.

Press **F8=Update** to post the balanced allocation and return to your first selection screen/window.

Functions:

F2

Batch Controls. This window displays the total posted so far. The option to override the Batch Total is available.

F5

Autoallocate. Unallocated cash will be automatically allocated - until that value is exhausted. No part payments will be made.

F6

Filter. Allows you to select items for allocation by filtering out from a wide range of references, periods, values and dates etc. This filter may include the selection already made at the session and allocation defaults windows.

F7

View. Allows you to switch between different views within the items screen.

Note: Views are set up at the Cash Allocation Preferences maintenance option.

F9

Review. Groups selected items and moves the cursor to the Position To field.

F13

Credit Manager Enquiry. Access the credit manager enquiry option for your customers. This is also available on option 5 at this screen. For more information see Credit Manager Enquiry.

F15

Totals. A window displays with total allocated, adjustments, total replacement items, and with the total allocation balance for the session.

F16

Allocation Text. Displays text entries against transactions posted for the session with the option to add more text items. For more information see Text Screen Diary Facility (Option 3).

F17

References. A window displays to allow you to select items by entering item references. For more information see Items to be Allocated Window. A prompt is available. Toggles with **F17=Item Types** to allow you to select from list of existing items.

F20

Session Defaults. The session defaults window gives you the option of amending the posting and discount dates. .

F21

Allocation Defaults. Select the customer and amend or accept the allocation currency and the allocation method.

Note: The Allocation Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F22

Adjustments. A window displays to allow you to allocate cash to adjustment transactions. For more information see Post Adjustment or Replacement Window.

F23

Cancel Allocation. A window displays asking you to confirm the cancellation.

Press **F23** again to confirm and re-enter, or **F12** to return to the Item screen.

F24

More. Access the function keys which are not currently displayed.

Post Cash (Advanced)

1...
2...

2/ARA

Use this option when you wish to post cash received from a customer without allocating it. This is the advanced method of direct cash posting.

Multiple pieces of cash may be posted to customer account(s) as unallocated cash. General Ledger postings will be made. Postings do not require confirmation.

The initial window or windows to display may have been set up for your user name - at the Cash Allocation Preferences maintenance option.

Batch Control

The Batch Control window displays if used.

For more information see Open Batch Window

Session Defaults

The Session Defaults window only displays if set up at the Cash Allocation Preferences maintenance option. This window allows you to amend default posting date, bank account and bank reference for the session.

Note: Discount date is not available in this case.

For more information see Session Defaults Window

Session Control may be selected with **F20=Session Defaults** even if not set to display at the start of the process.

Cash Posting Window

This window also displays from within Cash Posting and Allocation after the Batch Controls and Session Defaults windows (where used) have been processed.

- ➡ Display the Cash Posting items screen by pressing **F9=Items**.

Fields:

A/R Company

See the paragraph entitled Multiple Companies in Post Cash and Allocate (Advanced).

Customer

Enter the customer from which cash has been received.

Note: If an AR hierarchy customer, must not be level 4.

Value

Enter the value of the cash received.

Currency

The base currency displays. Change, if required, to the currency of the cash received.

*Note: Conversion rates may be overridden. See **F5=Bank to base** and **F18=Item to bank**.*

External Ref

Enter a unique reference for your customer. This would, most usefully, be the cheque number.

Posting Date

The system date or batch posting date displays as a default. Change to a different posting date if required for the customer's cash posting.

Period

The current period displays. Change to a future period if required.

Bank Account

Enter the General Ledger bank account which will receive the cash. It defaults to the customer / company profile bank account, but may be changed.

Bank Reference

You must enter a bank reference. It is used to help identify transactions during Bank Statement Reconciliation and would, usefully, be the paying-in slip number.

Charges

Enter the value of any bank charges applied by your bank. Charges are recorded in the currency of the bank account. The value can be negative.

Payment Method

Select the payment method by which the cash was received.

Description

Note: For reporting or enquiry purposes this will only be useful if you have a customised program storing this field in LTMC15.

You can enter a description of the cash posting transaction.

Functions:**F5**

Bank ->Base. Override the bank to base conversion rate.

F9

Items. Displays the Post Cash main screen with cash items posted this session in the order posted. See Post Cash (Items) Screen for more information.

F13

Customer Enquiry. Allows you to access the credit manager enquiry option - for your current customers. For more information see Credit Manager Enquiry.

F14

Item Text. The standard text screen with any text on the item displays with the option to add text for the posting.

F18

Item->Bank. To override the item conversion rate to the bank conversion rate.

F20

Session Defaults. The session defaults window gives you the option of amending the posting dates. At the start of the session you may amend the default GL bank account and add a bank reference.

Note: The Session Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F23

Cancel Batch. If you have saved any transactions you will be prompted to confirm the deletion.

Press **F23** again to confirm and re-enter, or **F12=Previous** to return to the Item screen.

F24

More. Access the function keys not currently displayed.

Enter to confirm the cash posting values and to add the transaction to the Cash Posting items screen. You will be returned to the cash posting window to enter further cash receipts.

Complete the posting with **F8=Update**.

Post Cash (Items) Screen

 Select at Cash Posting with **F9=Items**, or **F12=Return**.

Displays cash items posted at this session in the order posted. Allows you to amend or delete items. New text may be added and amended. This screen displays behind other Post Cash functions and windows and redisplayes when each cash item is posted.

The batch value, posted value and any difference between the two is shown as a variance at the top right of the screen.

To move to a particular item enter the full reference.

Opt

1 - Amend. Use this option to amend the cash payment.

3 - Text. New text may be added and amended. For more information see Text Screen Diary Facility (Option 3).

4 - Delete. Allows deletion of cash items entered in this session. For more information see Delete / Deallocate (Option 4).

 **F3=Exit** will display the Cash Has Been Posted window with a message giving the option to post the batch or to suspend the cash posting session.

 You may suspend cash posting sessions. Enter a reference to identify the session in the Resume

User Session option.

Press **F8=Update Batch** to save and return to the menu.

Functions:

F2

Open Batch (Batch Controls). The batch control window displays the total posted so far. You may override the Batch Total if required. See Open Batch Window for more information.

F19

Cash. The cash posting screen displays to allow you to post a cash value. See Cash Posting Window for more information.

F20

Session Defaults. The session defaults window gives you the option of amending the posting dates. At the start of the session you may amend the default GL bank account and add a bank reference.

Note: The Session Defaults window only displays automatically if set up at the Cash Allocation Preferences maintenance option.

F23

Cancel Batch. A window displays asking you to confirm the deletion.

Press **F23** again to confirm and re-enter, or **F12=Previous** to return to the Item screen.

F24

More. Access the function keys which are not currently displayed.

Press **F3=Exit** when posting is completed. The Batch Completion window may display with the option to complete or suspend the batch. **F8** will update and return to the menu.

Resume User And System Sessions

Two similar options enable you to carry on using sessions which were stopped, abandoned or otherwise not completed.

- Resume User Session
- Resume System Session

Resume User Session

1... **4/ARA**

Use this option to resume sessions which failed or were suspended at the following advanced menu options:

- Post Cash
- Post Cash and Allocate
- Allocate

Note: Sessions suspended via an external interface at auto cash processing are not included - use Resume System Session for this.

Each line displays identifying information about user suspended or failed cash posting and / or allocation session.

Opt

1 - Select a session to be resumed. The originating menu option will display at the point of suspension.

4 - Delete. Select a session for deletion and then **F11=Delete** Selected Allocation to confirm the deletion. At the confirm deletion stage **Enter** is available to retain the session and cancel the deletion request.

Batch Ref

Displays the reference or the User Id entered when the session was suspended.

External Ref.

The external reference entered for cash postings - this may be the cheque number.

Co

The Company used in the session. The list is sequenced by company and then by customer.

Customer

The customer being processed in the session.

Date

Displays the date the session was suspended or failed.

User

The session user name.

RECOVERED/

The final column shows the status of the session.

Blank - You may select to resume the session.

*Deleted - **F5=Refresh** will remove the deleted sessions.

*Recovered - You may select sessions recovered by the system, following session failure.

*Processed - Sessions resumed and fully processed may not again be selected.

Note: An allocation suspended by a user during Advanced Cash Posting and / or Allocation options can be repeatedly re-suspended within this option - not from the Resume System Session menu option.

Press **F3=Exit** and to return to the menu.

Resume System Session

1...
2...

5/ARA

Use this option to resume lockbox / EDI sessions which were suspended at the Cash Management auto cash processing option (24/CSP) - Process External Data. Validation at Auto Cash Posting will suspend unbalanced allocations or cash receipts for which no customer details can be derived.

Batch Controls and Session defaults will not be available. See Post Cash and Allocate for further information.

An additional function allows unassigned cash to be assigned to a customer. For more information see Assign Customer.

Note: Unassigned cash is cash with no customer against it.

Each line displays identifying information about a suspended lockbox receipt.

Fields:

Opt

1 - Select a session to be resumed.

The Post Cash and Allocate Items Screen then displays, listing items at the point of suspension. Items already allocated are shown as highlighted. Batch Controls and Session defaults will not be available. Please see Post Cash and Allocate for more information.

4 - Delete. Select a session for deletion and then **F11=Delete** Selected Allocation to confirm the deletion. At the confirm point **Enter** is available to retain the session.

Note: You may not delete sessions containing

unassigned cash.

Batch Ref

Displays the lockbox reference for each suspended allocation.

External Ref.

The customer's cash receipt reference which links cash receipts and remittance details received independently. Cash Receipts and remittance details are matched by this reference in auto cash posting (Process External Data in Cash Management).

Co

The Accounts Receivable Company used in the session. The list is sequenced by company and then by customer.

Note: If the Company and Customer entries are blank then the suspended allocation contains unassigned cash.

Customer

The customer being processed in the session.

Date

Displays the date the session was suspended or failed.

User

The session user name.

RECOVERED/

The final column shows the status of the session.

Blank - You may select to resume the session.

*Deleted - **F5=Refresh** will remove the deleted sessions.

*Recovered - You may select recovered sessions.

*Processed - Sessions resumed and fully processed may not again be selected.

Note: A suspended allocation session selected here must always be resumed from this option and not from the Resume User session.

Press **F3=Exit** and to return to the menu.

Assign Customer

At this option select a suspended session containing an unassigned cash transaction (JR item).

Select Option 1 against transaction type JR in the Post Cash and Allocate Items Screen - after a session is selected from Resume System Session.

Use this window for cash received via EDI or lockbox which was posted as unassigned. Unassigned posting means that it was not possible (during the validation routines within the Process External Data option (24/CSP)) to derive a customer for the cash receipt.

Fields:

Bank Details

Enter the valid bank details of the customer to whom the cash is to be assigned (or amend any errors in any bank details already displayed) and press Enter to display the customer details.

Alternatively, enter the customer details.- AR company and customer account code.

Customer

Enter the customer details directly, or allow these to be derived from the bank details entered.

Note: A customer of hierarchy type 4 may not be entered for posting.

Enter to validate the screen entries and then
F3=Exit to post and exit.

Functions:

F7

Value Date. The value date is, generally, the anticipated clearing date of Cash Management transactions. For more information, see Value Date Active, GL Country-Specific Parameters 24-32.

Note: Only available if Value Date Active is set to Yes in your GL Country Specific Parameters.

F13

Customer Enquiry. Allows you to access the credit manager enquiry option - for your current customers. For more information see Credit Manager Enquiry.

F14

Item Text. The standard text screen with any text on the item displays with the option to add text for the posting.

F24

More. Access the function keys not currently displayed.

Enter to confirm the Assign customer details.
And return to the Post Cash & Allocate Screen.

Allocate (Classic)

31/ARA

This section details how to allocate cash which has been posted to the customer's account. There are three ways of allocating cash:

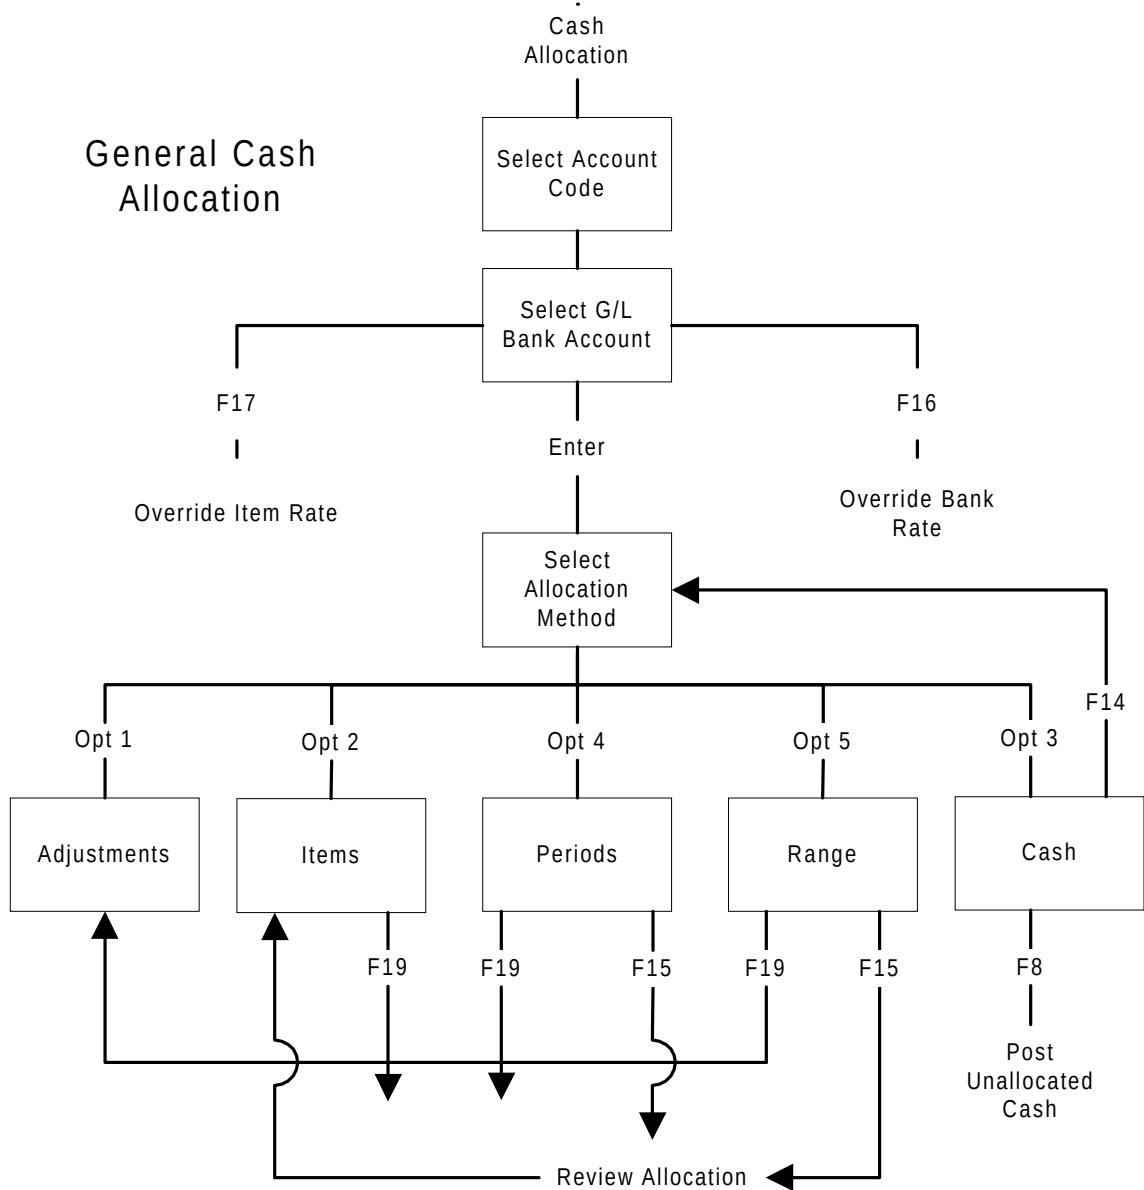

- Item Allocation - This enables you to allocate against individual items (invoices, credit notes, adjustments etc.).
- Period Allocation - This enables you to allocate against items within one or more financial periods.
- Range Allocation - This enables you to allocate against items within a particular range of references, or by date.

This facility can also be used to post cash to a customer account, or to allocate other transactions - for example, to match a credit note to an invoice.

Note: Where allocation is to be made to a customer account in a currency other than the base currency, an allocation currency can be entered, and only transactions (invoices, cash etc.) in that currency will be displayed for allocation. If the allocation currency is left blank, all outstanding transactions will be displayed in base currency, and may be allocated.

Main Steps In Performing Cash Allocation

Cash Allocation Customer Selection Screen

-  Select the AR processing option Allocate, and enter the customer for whom allocations are to be made.
-  Press **Enter** to display the Customer Selection screen.

SL130	E1 - Demonstration Company	User ED3	22/03/94 11:33:47
Cash Allocation			Session 270
Account Code.. FC01	La Parfumerie Agnes	Text.. _ (1=Yes)	
Posting Period 9312

G/L Bank Acct? 512400	Bank Rate.... D	8.61800	Rate Code.. PERD
	Bank Currency FRF		
A/R Ctl.Acct.. 411300			
F3=Exit	F4=Prompt	F12=Previous	
F16=Override bank rate	F17=Override item rate		

Fields:

Customer Text

Optional entry. If text is required to be stored against this entry, enter a 1 in this field. If a 1 is currently displayed this signifies that there is text already in existence for the account.

Posting Period

This defaults to the current period from the company profile, depending on the use of the G/L accounting calendar. You can enter a future period.

Alloc. Cur.

If you are operating a multi-currency company this field displays. You can enter a currency code to allocate transactions only in a selected currency. Leave blank to allocate any transactions in base currency.

General Ledger Bank Account

The default bank account in the General Ledger defined against the customer or the company profile displays. This may be overridden.

-  If a currency is entered, cash and adjustments may only be posted in this currency or in base. If the currency is blank, cash and adjustments may

be posted in any valid currency.

Functions:

F16

Enables you to amend the conversion rate between the bank currency and the base currency.

F17

Enables you to amend the conversion rate between the transaction currency and the base currency.

Cash Allocation Override Conversion Parameters Window (F17)

Press F17 to display the Override Conversion
Parameters window.

Include disputed invoices?....: 1 (1=Yes)			
Date to be used for discount.: 220394			
F3=Exit F12=Previous			

Fields:

Payment Type

This defaults to the payment type set up previously. You can amend it.

Allocation Method

The default allocation method displays and may be changed if required. The available methods of allocation are displayed. Several methods may be combined within the allocations made:

1 - Adjustments

This method is available only if cash has been posted within the allocation procedure. It is allocated by posting adjustments. No other items, (e.g. outstanding invoices) are allocated by this option.

Adjustments may also be posted directly from allocation methods 2, 4 and 5. Once you have selected one of these methods, you cannot select method 1. You must use method 2, 4 or 5 to make any adjustments necessary.

2 - Items

This method allows you to allocate cash against individual ledger items.

3 - Post Cash

This method allows you to post cash which may be left as unallocated cash or may be allocated within this procedure.

4 - Periods

This method allows you to allocate items within one or more periods.

5 - Range

This method allows you to allocate items within a range of reference codes or by date.

Include Disputed Invoices?

If you want to include invoices which are subject to dispute, enter a 1. To exclude disputed invoices, enter a 0.

Date To Be Used For Discount

You can enter the date to be used for calculating if discount is allowable. The system displays the current date as a default.

If discount is not allowed because the invoice discount date is beyond the date specified, the discount value displays highlighted.

Note: The values displayed at the top of the screen are in allocation currency, or in base if the allocation currency was left blank (at the customer Selection Screen). These fields show values as follows:

Fields:

Allocated

The value so far allocated for this customer.

Cash Posted

The total cash posted to this customer's account within this allocation cycle.

Discount

Any discount taken or allowed in allocation.

Adjustments

Any adjustments so far made.

Balance

The total of other values to be accounted for.

When all allocations have been completed, the balance must be zero. Press **Enter** to continue when you have completed the fields on this screen, or press **F12** to cancel.

Cash Allocation Entry Of Cash Screen

This screen displays if you selected method 3. Note that the posting of cash can also be performed from within the Cash Management application, and the procedure is the same:

SL130	E1 - Demonstration Company	User ED3	22/03/94
			12:13:10
Cash Allocation - Entry of Cash			Session 270
Account Code.. FC01	La Perfumerie Agnes		
Alloc.curr.... FRF Francs	Item Rate.... D	8.61800	Rate Code.. PERD
Allocated	Cash Posted	Discounts	Adjustmt./Balance
.00	.00	.00	24.00
			24.00
Reference.....			
Value.....	Currency....	Override Rate.: _ (1=Yes)	
Date.....	Rate.....		
Bank Reference: _____	Rate Code...		
Charges Value.: _____	Bank Curr...	Override Rate.: _ (1=Yes)	
Charges Acct..? _____	Bank Rate...		
	Rate Code...		
Text.....	_ (1=Yes)		
Press ROLLUP for next cash item			
F3=Exit	F8=Post cash without allocating	F14=Alloc.method	

Fields:

Reference

If the Accounts Receivable company profile assigns cash references automatically, this field is not displayed. Otherwise, enter an internal reference appropriate to this transaction.

Value

Enter the value of the cash received in the designated currency.

Date

This defaults to today's date if left blank.

Bank Reference

Any reference assigned to this transaction - most often a paying in slip number. If this is left blank, it defaults to the document date and is recorded on the item in YYMMDD format.

It is used to help identify transactions during Bank Statement Reconciliation.

When performing Bank Reconciliation in Cash Book, Cash items for different customers can be grouped together as if they were one banking transaction.

Charges Value

You can enter the value of any bank charges applied by your bank. Charges are recorded in the currency of the bank account. The value can be negative.

Charges Acct.

The General Ledger account to which the charges are to be debited. This defaults to the account on the bank record or Cash Management company profile, but may be changed.

Text

Enter a 1 if text is to be entered against this transaction.

When you have completed the necessary fields press **Enter** to validate the data. The system displays any defaults and exchange rates. You now have the following options available:

- Enter another cash item. Use the roll up key to display another entry screen. (To remove an entry, blank out the displayed fields and press **Enter**).
- Complete without allocating the cash. Press **F8**. A confirmation message displays, and you are returned to the customer selection screen. If you have made allocations, this key is not available.
- Allocate the entered cash items. Press **F14** to return to the allocation method selection screen, and select an allocation option from there.

Cash Allocation Items Method Screen

You can allocate cash against individual items for a selected customer either by selecting the Item allocation method directly, or from the cash posting screen. The procedure is the same in both cases. When you select the Item allocation method (method 2), the Cash Allocation - Items Method screen displays.

F3=Exit		F11=Restart	F12=Reselect
F20=More detail		F21=Text	F19=Adjustments

Fields:

C(Lear)

If the entire balance of an item is to be cleared, enter a 1 in this field. When the allocation session is completed, and the totals balance, the outstanding value of the item will be updated to zero.

Part-Pay

If you do not want to clear an item completely, enter the value you want to allocate here.

Discount

Any discount displays. You may delete, insert, or amend the discount value (it could be used, for example, to write off a small underpayment instead of making an adjustment). Any discount not allowed because the invoice is beyond its discount date is highlighted.

Item Text

Enter 1 to enter text for an item. If text already exists, this field will default to 1.

The individual items are sequenced by document date within period, unless a company profile flag requires all cash to be displayed before all other items.

Functions:

F11

This key returns you to the cash allocation method selection screen. Any allocations you have made but have not updated are not retained, while updated allocations are posted normally.

F12

This option retains any allocations you have made, and returns to the cash allocation method selection screen.

F19

This option enables you to perform an adjustment to balance the allocations.

F20

This key toggles between displaying expanded details of each line, and displaying one item per line.

F21

Enter allocation text against the customer. This is independent of customer text.

Cash Allocation Extra Details Screen (F20)

Press **F20** at the Cash Allocation Details screen to display the extra detail screen displays.

1=Clear 5=Review			
F3=Exit F11=Restart F12=Reselect F15=Review F19=Adjustments F21=Text			

Fields:

Clear Or Review.

Select the operation that is to be performed upon the data displayed.

1 - to clear the entire period value.

5 - to review the items that make up the balance displayed.

The screen displays values for the current period and for the four previous periods. The current period includes all future period values, and the oldest period includes all prior period values.

You can allocate items within a selected period either collectively or individually, and the following paragraphs explain how to do this:

Allocating Items Collectively

Enter 1 in the Clear/Review field against the period. All outstanding items are cleared, with no individual discounts. If a bulk discount is to be given, this is performed as an adjustment.

Press **Enter**. The results of the allocation are displayed above the list of items. If the allocation balances, a confirmation message displays. (If it

does not balance, you must perform an adjustment before you can complete the allocations).

Press **F8**. You are returned to the customer selection screen.

Allocating Items Individually

Enter 5=Review in the Clear/Review field against the selected period. All outstanding items within all the periods selected are displayed for individual allocation.

Press **F15** to allocate across all outstanding items. All items will be displayed, and allocation can be performed.

Functions:

F11

This key returns you to the cash allocation method selection screen. Any allocations you have made but have not updated are not retained, while updated allocations are posted normally.

F12

This option retains any allocations you have made, and returns to the cash allocation method selection screen.

F19

This option enables you to perform an adjustment to balance the allocations.

F21

Enter allocation text against the customer. This is independent of customer text.

Allocation Method Range Screen (Option 5)

Enter 5 as your allocation method to allocate cash items against a known list of outstanding items in an efficient way.

SL130	Z1 - Z1 TSS	User GBJBANB1	22/03/94

Select cash items to be used?....: _ (1=Yes)			
F3=Exit F11=Restart F12=Reselect F15=Review F19=Adjustments F21=Text			

Fields:

Item Type

Any valid item type can be entered here e.g. IN, CR, etc. For a full list of valid item types a prompt is available.

Action

- 1 - to clear the selected items.
- 5 - to display a list of selected items, which may then be allocated.

Oldest Item Onwards

Enter 1 if all outstanding items of the selected type are to be cleared or displayed in date sequence (oldest first).

Item Range

Enter the start and end of the range of item references. If you leave the fields blank all items will be selected.

Cash Items To Be Used

Enter 1 to select outstanding unallocated cash for allocation to the outstanding items.

Functions:

F11

This key returns you to the cash allocation method selection screen. Any allocations you have made but have not updated are not retained, while updated allocations are posted normally.

F12

This option retains any allocations you have made, and returns to the cash allocation method selection screen.

F19

This option enables you to perform an adjustment to balance the allocations.

F21

Enter allocation text against the customer. This is independent of customer text.

Cash Allocation Adjustments Method Screen (Option 1)

Enter 1 as your allocation method if you need to make an adjustment to make your allocation balance. You cannot use this facility until some cash has been posted.

The system allows you to access the facility from within any of the allocation methods using **F19**.

When you select this facility the Cash Allocation - Adjustments Method screen is display.

SL131		E1 - Demonstration Company		User ED3	22/03/94	
					11:53:26	
Cash Allocation					Session 270	
Account Code.. FC01		La Perfumerie Agnes				
Alloc.curr.... FRF Francs		Item Rate.... D		8.61800	Rate Code.. PERD	
Allocated	.00	Cash Posted	.00	Discounts	.00	Adjustmt./Balance
						24.00
						24.00
Type	Ref.	Description	Value	Cur	Rsn	0'ride Rate
AJ	A0000035	ADJUST	24.00	FRF	AJ	- D 8.61800
—						-
—						-
—						-
—						-
—						-
						+
F19=Return from adjustments F23=Cancel Adjustments						

Fields:

Type

Enter the adjustment transaction type. This is a mandatory entry. The valid codes are as follows:

AJ - Adjustments. Sign reversed.

This code writes off the value to the nominated General Ledger account associated with the reason code used. None of the other types affect the General Ledger, instead they hold the value as an outstanding item on the account. The system checks that the AJ value does not exceed the Accounts Receivable maximum adjustment value.

This maximum amount can alternatively be controlled at user level utilising the user defined security options on the General Ledger Utilities options.

CA - Cash on account. Sign reversed.

DN - Debit notes. As balance.

NA - Not allowed. As balance.

NT - No trace. As balance.

OP - Overpayment. As balance.

PT - Paid twice. As balance.

RG - Rogue payment. As balance.

UP - Underpayment. As balance.

Reference

This can be system-generated. If it is not, enter a reference.

Description

You can enter a description for report or enquiry purposes.

Value

Enter the value of the adjustment. Whether this is recorded as positive or negative depends on the transaction type that you specified.

Cur

Enter the currency code.

Rsn

This field defaults to the adjustment type. The adjustment type must be a defined reason code. This is a mandatory field so for non write off adjustments (AJ) it is recommended that reason codes CA / DN / NA / NT / OP / RG / PT / UP are created on the reason codes file (see Accounts Receivable Maintenance options). The reason codes will need a General Ledger Account Number attached but their corresponding adjustment types will not post to the General Ledger.

Txt

1 - To enter text for an item. If text already exists, this field will default to 1.

O'ride Rate

Enter 1 and press **Enter** to display a window enabling you to override the current currency rate.

If you accessed the adjustment facility from the cash allocation method selection screen and the system accepts all your entries, press **F8** to complete the cash postings with the adjustments, without further allocation. A message displays, and you will be returned to the customer selection screen..

If you accessed the adjustment facility from within an allocation method and you have made all the adjustments required, press **F19** to return to the screen from which the adjustment was requested.

Currency Variance

For a multi-currency customer, an allocation will often produce a currency variance. Although the allocation currency values must balance, their base currency equivalents may not, as several currency rates may be involved.

If the net postings in base currency do not balance, a base currency variance screen displays. Initially, the whole value displays in base currency against the appropriate currency gains and losses account in the linked General Ledger.

If you wish to amend the data displayed, complete either or both of the following fields:

G/L Account

Enter any valid General Ledger account.

Value

Enter the amount in base currency to be posted to this account.

The values entered must add up to the total variance value displayed. Press **F8** to adjust the base currency balance for the customer and to post a currency variance journal to your General Ledger.

VAT Accounting

There are two situations in which cash allocation can affect VAT accounting:

- Where VAT liability is based on cash receipt, not on invoicing. The original VAT liability was posted to VAT suspense. Where payment has been made in full, the VAT value is transferred from suspense to the VAT sales account (or to the extra rate accounts if these apply). Part payments are transferred proportionately.

Where collection documents have been allocated, the tax date is set to the maturity date of the first document allocated.

- Where a discount is taken and the VAT liability depends on the value of discount taken. In this case, additional calculations are made. The VAT on the discount is calculated at the original rate. This value is debited to the VAT account and credited to the discount account. The same principle applies to part paid items.

The VAT details are also written to a VAT analysis field for use in VAT reports and enquiries.

Allocate By Item

32/ARA

This facility allows you to allocate cash against an entered list of customer invoices.

You can select unallocated cash already in the system, or enter a receipt, or a combination of both. You can enter item reference numbers directly for invoices which are to be cleared. This facility is suitable for processing remittance advice notes sent with the payment, which indicate items the customer is paying.

Note: Typically, this is used for entering details directly from remittance advice notes from customers.

Cash Allocation by Item Starting a Session Screen

Select the AR processing option Allocate by Item to see the following fields:

Fields:

Batch No.

Enter a batch number. If the number has previously been used, a warning message displays. To override the warning, press **F19**.

Control Total

Enter a hash total for batch control purposes. At end-of-batch, the value of all cash entered is checked against this value. Any discrepancy is highlighted.

When you have completed these fields press **Enter**.

Cash Allocation By Item Customer Selection Screen

Cash Allocation by Item			
Customer.....?	FC02		
Reference.....			
Value.....		100	
Date.....	240394		
Posting Period..	9312		
F3=Exit F4=Prompt			

Fields:

Customer

Enter the customer code to allocate cash.

Reference

Enter the reference for this allocation. This field is inhibited if automatic cash references is specified on the company profile and the next automatic cash book reference is used.

Value

Enter the value of the receipt. If you want to use unallocated cash already on the system, leave this field blank.

Date

This defaults to today's date, but you can enter a different date for the allocation.

Posting Period

This defaults to the current period from the company profile, depending on the use of the G/L accounting calendar. You can amend this period.

Cash Allocation By Item Details Screen

When you have completed the fields press **Enter**. The system validates your entries and adds the following entry fields.

SL135	E1 - Demonstration Company	User ED3	24/03/94 14:48:18
Cash Allocation by Item			Session 301
Customer.....	FC02		
Reference.....	20000232

Currency.....?	FRF	Allocate in Base... 1	(0/1)
Currency Code...	PERD		
or			
Item Rate.....		D (M/D)	
F3=Exit F4=Prompt F12=Previous F16=Cash			

Fields:

Bank Reference

This field is optional. You can enter a reference for the receipt, if required. This is used to help identify the transaction - often a paying-in slip number.

Bank Account

The system displays the default bank account code of the customer/Accounts Receivable company. You can enter another bank account, if required.

Currency

The system displays the customer currency code. You can enter a currency code to allocate transactions in a selected currency.

Allocate In Base

If you want to allocate in base currency, enter a 1. To allocate in a specified currency, enter a 0.

Item Rate

If you wish to change the rate, enter the new rate here, and in the adjoining field enter D or M depending on whether the new rate is multiply or divide.

Currency Code

The system displays the default currency conversion code for the base currency. You can select another currency conversion code. Leave blank if you want to enter a specific rate.

M/D

If you wish to change the rate, enter the new rate here, and in the adjoining field enter D or M depending on whether the new rate is to multiply or divide.

Functions:

F15

To enter a value date to take effect when the session is completed and posted. The date entered will override the date calculated by the value dates table in Cash Management.

F16

To display a selection screen of unallocated cash, otherwise, If you do not want to select unallocated cash already on the system, then press **Enter** to proceed to the allocation screen.

Cash Allocation By Item Posting Screen

Press ENTER for validation

F8=Proceed F12=Previous F14=Trans types F17=Values F21=Adjustments

F3=Exit F4=Prompt F16=Cash

Fields:

Tt

Enter the transaction type. For example, IN for invoices.

Reference

Enter the reference code for the item you require.

Functions:

F14

This key will duplicate the entry of the first transaction type field in all the other transaction type fields, and requires only references to be entered.

F17

This key enables you to enter part values and discounts for selected items.

F21

This key enables you to enter any adjustment values required to balance the allocations.

Allocating Part Values (F17)

If you wish to enter a part value or a discount value, for selected items, press **F17**. The following details for each item are shown:

Fields:

Date

The transaction date for each item.

Description

The item type and reference entered.

Value

The outstanding value of each item.

The items are all flagged in the 1 column for total allocation. To allocate a part value or discount, clear these fields. You can now complete one or both of the following fields:

Part Value

Enter a part of the total allocation value.

Discount

Enter any discounts allowed in allocation.

Functions:

F8

Post the allocations, and return to customer selection screen.

F19

Position yourself at a specific item line.

Cash Allocation By Item Adjustment Screen

You can enter adjustments to balance the allocations if, for example, the customer has overpaid, or you want to write off the difference, providing it is within the authorised limits. When you select the adjustment facility the system displays the cash allocation adjustment screen shown.

SL135	E1 - Demonstration Company	User ED3	24/03/94
			14:48:41
Cash Allocation by Item			Session 301

IN	_____	IN	_____	IN	_____	IN	_____	IN	_____

TT	Reference	Value	Description	Rsn
OP	A0000039	13.92-	AUTO ADJUSTMENT	OP

F8=Confirm F12=Previous F22=Auto adjust F23=Auto write off

F3=Exit F4=Prompt F16=Cash

Fields:

Tt

Enter the adjustment type. This is mandatory and must be one of the following:

AJ - Adjustments (write-offs). Sign reversed.

Transaction type AJ writes off the value to the nominated General Ledger account associated with the reason code used. All other types have no effect on the General Ledger, and hold the adjustment value as an outstanding item on the account.

The system checks that the AJ Value does not exceed the Accounts Receivable maximum adjustment value. The maximum amount can alternatively be controlled at user level utilising the user defined security options on the General Ledger Utilities options.

CA - Cash-on-account. Sign reversed.

DN - Debit notes. As balance.

NA - Not allowed. As balance.

NT - No trace. As balance.

OP - Overpayments. As balance.

PT - Paid twice. As balance.

RG - Rogue payments. As balance.

UP - Underpayments. As balance.

Reference

Enter the reference code for the item you require.

Value

Enter a value for this item in the allocation adjustment. Whether this is recorded as a positive or negative adjustment depends on the transaction type specified.

This is a mandatory field, so for non write off adjustments (AJ), it is recommended that reason codes CA, DN, NA, NT, OP, PT, RG, UP are created on the reason codes file (see Accounts Receivable Maintenance options). The reason codes will need a General Ledger Account Number attached but their corresponding adjustment types will not post to the General Ledger.

Description

Enter text which describes this item adjustment.

Rsn

If left blank, this defaults to the adjustment type. The adjustment type must be a defined reason code. The reason code determines the General Ledger account to which the adjustment value AJ will be posted.

You can either enter adjustments manually, or you can use one of the automatic adjustment facilities:

Functions:

F22

Creates an automatic adjustment and completes all the adjustment fields except the reference. You can then amend values manually as required.

F23

Creates an automatic adjustment by writing off the variance, provided it is within the system limits.

Customer Receipts Cash Allocations

Three menu options are available as classic cash allocation options:

- Provisional Cash
- Confirmed Cash
- Direct Cash

Note: These three options may also be available from your Cash Management module as Provisional, Confirmed and Direct customer receipts processing.

Provisional, Confirmed And Direct Cash Options

Three AR Classic Cash Allocation menu options are available:

- Provisional Cash ()
- Confirmed Cash
- Direct Cash

Provisional

1...
2...

33/ARA

Note: This facility is available only if the Cash Management application is installed.

This procedure enables you to record the receipt of cash from a customer. The receipt is not passed to the customer account or to the General Ledger until it is confirmed using the Confirmed option from the Processing options. For example, a provisional receipt facility enables you to record payments received in a different currency to the base currency. This allows you to record the receipt in the currency's bank account until the currency rate is confirmed by the bank.

Provisional Cash cannot be cancelled, the cash must first be confirmed then cancelled from the Cash Management processing option Cancel Payments.

This options is available from your Cash Management module as Provisional customer receipts processing.

Select the AR allocation processing option Provisional, the Provisional Cash Notifications - Selection screen displays.

Provisional Cash Notifications Selection Screen

Select the AR processing option Provisional to display the Provisional Cash Notifications - Selection screen.

F4=Prompt F12=Previous F23=Cancel batch F20=Curr.val			

Fields:

Period

This defaults to the current period from the company profile, depending on the use of the G/L accounting calendar. You can enter a future period.

Document Date

This defaults to today's date.

Receipt Value

Enter the value paid by the customer in the designated prime (transaction) currency (this will default to the customer account currency).

Bank Account

Enter here the General Ledger bank account which will receive the cash. It defaults to the customer/company profile bank account, but may be changed.

Bank Reference

Enter here a bank reference code, as required. It is used to help identify transactions during Bank Statement Reconciliation

Currency

You may enter a base currency customer's cash into a bank account of another currency, if required.

The receipt may be recorded in any currency. It defaults to the customer account currency. The rate code and rate are displayed (redisplayed if the default currency is changed).

To override the transaction rate, press **F17**.

Bank Currency

The currency code, rate code and rate (bank to base) of the default bank account are displayed. If the bank account is changed, they are redisplayed.

To override the bank rate, press **F16**.

Text

Enter 1 if text is to be entered against this transaction.

Direct Rate

The rate code and rate (Transaction to Bank) are displayed. If the Receipt currency or Bank Account is changed, they are redisplayed.

To override the direct rate, press **F18**.

If no conversion rate is defined between the Receipt and Bank currencies, then this rate is calculated via the conversion rates defined for the Receipt and Bank currencies (to base).

Functions:

F16

To override the conversion rate between the bank currency and the base currency.

F17

To override the conversion rate between the prime currency and the base currency.

F18

To override the conversion rate between the prime currency and the bank currency.

F20

To display the currency values.

Provisional Cash Notifications Override Conversion Parameters Window (F18)

When **F18** is selected on the Provisional Cash Notifications - Entering Receipts screen, the Provisional Cash Notifications - Override Conversion Parameters window displays.

Fields:

Batch Total

This field displays only if batch totals are being used.

The system displays the original total entered, compares it to the actual total entered, and displays any discrepancy. You can alter the batch total required.

Functions:

F8

Updates and completes the session. This can be done whether or not a discrepancy shows on the screen.

F15

Takes you to a screen which lists all the transactions entered for the session and allows you to review each one, and also to delete unwanted items.

F19

Enables you to enter more items in this batch.

F23

Cancels the batch completely. Everything entered in the batch is deleted.

You can either enter another customer and continue to enter items, or you can press **F8** to end the batch.

Confirmed

34/ARA

Note: This facility is available only if the Cash Management application is installed.

This facility enables you to confirm the actual receipt of provisionally entered payments, updating the bank account, crediting the control and customer account. If you have used the Provisional option to record your receipts, then the receipts must be confirmed in order to post the transaction to the customer's account and the General Ledger.

Select the AR processing option Confirmed to display the Receipt of Voucher - Starting A Confirmed Session screen.

Receipt of Voucher Starting A Confirmed Session Screen

Select the SL processing option Confirmed to display the Receipt of Voucher - Starting A Confirmed Session screen.

Fields:

Batch Number

This must be specified and, if the batch number has previously been used, a warning message displays. To override the warning, press **F19**.

Batch Total

Enter a hash total for batch control purposes.

When **Enter** is pressed, the Receipt Of Voucher - Selection screen displays containing a list of all provisional receipts recorded against that bank account.

Receipt Of Voucher Selection Screen

The next screen enables you to select an account. Enter the General Ledger bank account to which the cash to be confirmed has been posted.

- ➡ When **Enter** is pressed on the Receipt Of Voucher - Starting A Confirmed Session screen, the Receipt Of Voucher - Selection screen displays containing a list of all provisional receipts recorded against that bank account.

Enables you to enter more items in this batch.

F23

Cancels the batch completely. Everything entered in the batch or session is deleted.

Direct

35/ARA

The Direct option is an alternative to using the Provisional and Confirmed cash receipt and allocation options.

This procedure enables you to record the receipt of cash from a customer. The receipt is immediately posted to the customer's account as unallocated cash, and to the General Ledger. There is no need to confirm the posting.

Note: If you have the Cash Management application installed you may use the Direct option from the Cash Management Processing options to record the receipt of cash.

Negative cash (customer payment) may be extended via this option.

Note: That negative Cash cannot be entered by any other method

Bank Reconciliation in Cash Management allows you to group cash transactions together as one item for Statement Reconciliation, if you wish to do this it is advisable to use this option to enter your cash here and allocate it later.

Unallocated Cash Postings Starting a Session Screen

Select the processing option Direct to see the following fields:

Fields:

Batch Number

This must be specified and, if the batch number has previously been used, a warning message displays. To override the warning, press **F19**.

To override the transaction rate, press **F17**.

Bank Currency

The currency code, rate code and rate (bank to base) of the default bank account are displayed. If the bank account is changed, they are redisplayed.

To override the bank rate, press **F16**.

Text

1 - If text is to be entered against this transaction.

Direct Rate

The Rate Code and rate (Transaction to Bank) are displayed. If the Receipt currency or Bank Account is changed, they are redisplayed.

To override the direct rate, press **F18**.

If no conversion rate is defined between the Receipt and Bank currencies, then this rate is calculated via the conversion rates defined for the Receipt and Bank currencies (to base).

Functions:

F15

To enter a value date to take effect when the session is completed and posted. The date entered will override the date calculated by the value dates table in Cash Management.

F16

To override the conversion rate between the bank currency and the base currency.

F17

To override the conversion rate between the prime currency and the base currency.

F18

To override the conversion rate between the prime currency and the bank currency.

F20

To display the currency values.

Unallocated Cash Postings Override Conversion Parameters Window (F18)

-  Select F18 at the Unallocated Cash Postings screen to display the Override Conversion Parameters window.

To override the current rate you may:

- Enter a predefined rate code.

Enter a rate by which the value is to be multiplied or divided.

Unallocated Cash Postings Ending the Session Screen

When you have entered all the items for this customer, press **Enter** from the main entry screen to update. You will be returned to the customer selection screen. Enter another customer and continue to enter items, or you can press **F8** to end the batch.

Fields:

Batch Total

This field displays only if batch totals are being used.

The system displays the original total entered, compares it to the actual total entered, and displays any discrepancy. You can alter the batch total required.

Functions:

F8

Updates and completes the session. This can be done whether or not a discrepancy shows on the screen.

F15

Takes you to a screen which lists all the transactions entered for the session and allows you to review each one, and also to delete unwanted items.

F19

Enables you to enter more items in this batch.

F23

Cancels the batch completely. Everything entered in the batch or session is deleted.

Press **F8=Update** to end the batch.
