Credit Manager, Controller, Items And Customer Master Enquiries

Four menu options are available for you to enquire on customer, item and balance details:

- Credit Manager Enquiry
- Controller Enquiry
- Items Enquiry
- Customer Master File Enquiry

Credit Manager Enquiry

1... **1/ARE**
2...

This enquiry provides essential customer balance details, representing the key data for effective credit control.

Credit Manager Enquiry Screen

-  Select the AR enquiry option Credit Manager to see the customer selection screen. Enter the customer code and press **Enter** to display the Credit Manager Enquiry screen.

Each quarter of the Credit Manager Enquiry screen displays a different kind of information:

- The top left hand quarter displays common performance ratios.
- The top right displays credit information.
- The bottom left displays balances, by overdue category.
- The bottom right displays posting information, and details of the status of the account.

Fields:

Debtor Days

The figure shown here represents the weighted average number of days outstanding for the customer's outstanding debt.

Take all open items for the customer. For each item, multiply the number of days between document and current date by the outstanding balance.

Divide the resulting total by the total of the outstanding balances. The result is the number of debtor days:

Open Items Value	X	Days Outstanding	=	Result
500	X	30	=	15000
200	X	60	=	12000
700				27000
$\frac{27000}{700} = 38.5 \text{ debtor days}$				

Days Sales Outstanding

This figure shows the number of days sales that the outstanding debtor value represents.

Assume that the outstanding sales value is 10,000. Follow the steps numbered below and relate them to this table:

1 - Compare the outstanding sales value (OSV) with the total sales value (TSV) for the most recent (or current) period. The OSV > TSV, so enter the total number of days elapsed so far in that period into the days outstanding column.

2 - OSV - TSV = Working value.

3 - Compare the working value with TSV of the next period down. The working value is greater than the TSV, so put the total number of days in the period into the days outstanding column.

4 - Repeat operations 2 and 3 until you reach the final period, when the working value is only 50% of the TSV. In this case, take the same percentage of days in the period, 50%, which is about 15 days, and put this in the days outstanding column.

5 - The sum of the figures in the days outstanding column, 108, is therefore the days sales outstanding figure.

Period	No. of Days	Sales Value	Days Outstanding
9405	31	2000	4*
9404	30	3000	30
9493	31	1000	31
9402	28	2000	28
9401	31	4000	15
			108

* Assume a current date of 4/5/94

Average Days To Pay

This figure shows the average number of days a customer takes to pay an invoice, from document date to payment date, with appropriate weighting depending upon the size of the invoice.

Take all paid items for the customer. For each item, multiply the number of days between document and payment date by the invoice value.

Divide the resulting total by the invoice value total. The result is the average number of days taken to pay:

Paid Items Value	X	Payment Date minus Document Date	=	Result
100	X	30	=	3000
300	X	60	=	12000
400				15000

$$\frac{15000}{400} = 50 \text{ days slow}$$

Average Days Slow

This figure shows the average number of days late a customer pays an invoice, from due date to payment date, with appropriate weighting depending upon the size of the invoice.

Take all paid items for the customer. For each item, multiply the number of days between due date and payment date by the invoice value.

Divide the resulting total by the invoice value total. The result is the average number of days payment is late:

Paid Items Value	X	Payment Date minus Due Date	=	Result
200	X	30	=	6000
100	X	60	=	6000
300				12000

$$\frac{12000}{300} = 40 \text{ days slow}$$

Performance Code

This is a user-defined code, set up in the AR maintenance option Trends Parameters. It is assigned to a customer and can be based upon one of the fields above. It is intended to give an indication of a customer's payment performance.

Note: Much of the information on this screen is provided by running the AR processing option, Update Statistics. This updates the information displayed.

Functions:

F5

Displays contra posting details when the customer is also a supplier and has been set up as a contra account.

F10

You can select the action you want to enquire on or maintain

F13

Item Details - Open Items for All Periods (Prime) screen displays

F14

A list of all items for the customer displays.

F15

Displays items for specific currency, period and transaction reference.

F16

Displays transactions for all periods

F17

Displays ratios for credit manager trends.

F18

Displays balances for the customer.

F19

Details of the customer account held in the customer master file - set up in Customer Maintenance.

F20

A window displays balances for collection documents.

F21

The Headers option allows you to view invoice header details.

Note: Details of this screen are documented at the Customer Enquiry Item Text Screen (F21).

Note: For further details see the maintenance option Customer And Item Text.

F22

Disputed Code Text. Allows you to view Reason Code text against disputed invoices.

Note: Disputed Invoice Reason Codes are entered at the Disputed Invoice Codes maintenance option.

F23

External. Allows you to access a customised program option. The function of such a program will have been designed by your company to suit your customer maintenance records' requirements.

*Note: The appearance of the **F23** function key on this screen depends on GL Country Specific*

*Parameter External Function 042 being set to 1
and a suitable program being linked.*

Contra Accounting Details Window (F5)

- ➔ When **F5** is selected on the Credit Manager Enquiry screen, the Contra Accounting Details window displays containing the contra accounting details for this account.

Fields:

Controller Range

Enter the range of controllers whose customers are to be included in the list on the next screen.

Account Range

Enter the range of customer accounts to be included in the list on the next screen.

Performance Code Range

Enter a range of performance codes, as required.

Overdue Period Range

Enter the range of overdue periods. The periods available are shown to the right of the fields, as set up in the company profile.

Customer Group 1 - 4

Enter a range(s) of customer groups to be included in the enquiry. Leave blank for all customer groups (within the screen selection) to be included.

Minimum Value

Enter a value as required. The list on the next screen will display only those customers with a debt equal to or greater than this value.

Currency

If you enter a currency code, only debts in that chosen currency will be displayed. If you leave this field blank, all existing debts will be displayed, transferred into base currency.

Hierarchy Level

Enter 0 to include accounts of any hierarchy level (or accounts not defined to a hierarchy) in the list of accounts on the next screen. To restrict the list to accounts of a certain hierarchy level, enter that level here.

Enter the selection of customers you want to enquire on, and press **Enter** to display the Controller Enquiry - Customer A/Cs screen.

Controller Enquiry Customer A/Cs Screen

Press **Enter** on the Controller Enquiry - Selection screen to display the Controller Enquiry - Customer A/Cs screen.
