Chapter 5 Reports

Introduction to Accounts Receivable Reports

This section describes the reports available to assist in the management of Accounts Receivable. Select the Accounts Receivable reporting options.

The reports fall into three categories:

Credit Control Reports

Overdue Analysis

Lists items which are overdue for payment aged by due date.

Aged Debt

Prints the age of outstanding debts based on the item posting period.

Outstanding Items

Lists open items for all customers, either for all transaction types, or for a single transaction type.

Customer Items

Lists open items or all items for a specific customer, with totals by period.

Credit Note Analysis

Lists all credit notes by period and reason code.

Cash Flow Analysis

Provides a summary or detailed analysis of the cash anticipated from outstanding debts, based on the payment terms set up against each customer account.

Disputed Invoices

Lists invoices flagged as being in dispute.

Rolling Trends

Prints the current trend values for the credit manager.

Text Diary

Prints a report of all customer diary text within the range of accounts, action dates etc. specified.

Audit reports

Session Audit

Prints details of transactions posted, by selected session, in detailed or summary format.

Debtor Balances

Reconciles G/L control account balances to their related customer accounts for any period - past, current or future.

Customer Item Audit

Produces a report showing all items for a specific customer.

Retrospective Open Items

Reports debit, credit and balance values for a selection of accounts up to and including the selected period.

Other reports

Customer Turnover

Lists customers showing total invoices, total credits and net total.

Customers With Negative Balances

Lists all customer accounts with a negative balance.

Inactive Customers

Lists all customers whose date of last sale is earlier than the specified date.

Labels By Customer

Produces labels for mailing purposes.

Customer Invoice Header

Lists invoice headers for a select range of customer accounts.

Note: If you are working in a multi-currency environment, several of the reports include currency selection criteria which are not visible in a base currency ledger.

For a multi-currency ledger, the selection criteria of the report screens often ask which currencies to print. Where this occurs you may select one or more of the following values:

Prime

The value in the currency in which it was entered.

Base

The equivalent value in base currency at the time the transaction was posted.

Revalued Base

The equivalent value in base currency when last revalued (available only where the company profile allows revaluation).

Groups

Some of these reports can be sequenced by different groups. Below is a reminder of the significance of the different groups, and where they are set up:

Group Type and Group Company

If you wish to set up a number of companies which are all to be maintained in a similar way, the GL option Group Company Maintenance enables you to do this. You could set up companies C1, C2 and C3, for example, under the group reference G1, and from then on maintain G1. Any changes will be applied to the member companies.

When you set up a group company such as G1, you must assign a group type. The types currently available are:

- 1 - Mass maintenance and creation.
- 2 - Mass creation.
- 3 - Mass maintenance.
- 4 - Division.
- 5 - Tax.
- 6 - Legal.

When you come to run your report, you can use the group as a selection and sequencing criterion. These fields are not displayed if the company you are in is not set up for group companies.

Ranges

Most reports allow you to select ranges e.g. Range of Customer. If a Single Selection is required then the relevant value should be entered in the 'from' field and the 'to' field left blank. Leaving both fields blank provides a Whole Selection and entering a value in the 'from' and 'to' field gives a selection restricted to the specified range of values. (The 'to' value must always be greater than the 'from' value).

Customer Groups

You can group your customers in up to four groups. These groups are set up using the GL maintenance option, and a customer is assigned to a group (or groups) in Names and Addresses, e.g. you may use Customer Group 1 to identify Home, Export and later Company Customers. This analysis can be used to sort and subtotal by this when running some reports.

Customer Turnover

1...
2...

11/ARE

This report lists customers showing total invoices, total credits and net total, with a total for all customers listed. The report is run for a range of periods.

Select the AR enquiry option Customer Turnover.

SL700	E1 - Demonstration Company	User ED3	25/03/94 16:03:53
Customer Turnover Report			
ALL accounts in ACCOUNT CODE sequence.....		Please enter '1' against one sequencing method only.	
Select a RANGE of ACCOUNT CODES.....		1

Sequenced by CUSTOMER GROUP 2.....		-	
Sequenced by CUSTOMER GROUP 3.....		-	
Sequenced by CUSTOMER GROUP 4.....		-	
Sequenced by ALPHA SEQUENCE CODE.....		-	
Print by Originating Account.....		0301	
Period from which to start.....		0312	
Period at which to end.....		0312	
Include period details on the report?.....		- (1=Yes)	
Currencies to print: Prime?.....		- (1=Yes)	
Base?.....		1 (1=Yes)	
F3=Exit(no report)			

Fields:

All Accounts

1 - For the report to include all accounts in account code sequence.

Range Of Accounts

1 - For the report to include only those accounts which fall within a specified range. A second screen will then be displayed to enable you to enter the range of accounts required.

Credit Control Responsibility

1 - If you want the report to be sequenced in credit control responsibility order.

Sales Region Code

1 - If you want the report to be sequenced in sales region code order.

Sales Rep Code

1 - If you want the report to be sequenced in sales representative code order.

Customer Groups 1-4

If you want the report to be sequenced in customer group order, enter 1 against the required customer group.

Alpha Sequence Code

1 - If you want the report to be sequenced in alpha sequence code order.

Print By Originating Account

1 - To print the report by the lowest level account on the customer hierarchy.

Start Period

The start period defaults to the first period of the current year but may be changed if required.

End Period

The end period defaults to the current period but may be changed.

Include Period Details

Leave blank to print a summary total for the selected periods.

1 - To print the values for each period in the selected range.

Prime

1 - To see prime values printed on the report.

Both prime and base may be selected.

Base

1 - To see base values printed on the report.

Both prime and base may be selected.

If you decide to select a range of account codes, the following fields will be displayed when you press **Enter**:

Account Range

Enter the range of accounts to be included in the report.

Make your selections and press **Enter**. A confirmation message displays - press **Enter** again to submit a job to produce the report.

Negative Balances by Customer

1...
2...

12/ARE

This report lists all customer accounts which are showing a negative balance (e.g. outstanding credit note).

Select the SL enquiry option Negative Balances by Customer to see a window asking you to press **F8** to submit a job to produce the report.

Inactive Customers

13/ARE

This report lists all customers whose date of last sale is earlier than the date specified when running the report.

Select the AR report option *Inactive Customers*.

Fields:

Date Of Last Sale

Enter the cut-off date for the latest sale. (The date is the last invoice date i.e. there may be later credit notes.)

Print By Originating Account

1 - To print the report by the lowest level account on the customer hierarchy.

The report will include all the customers who last sale was on or before the date entered. Press **Enter** to submit a job to produce the report.

Labels by Customer

1...
2...**14/ARE**

This facility produces labels for mailing purposes. Your software supplier can advise you on what label stationery is required.

Select the AR report option Labels by Customer.

SL481	El - Demonstration Company	User ED3	25/03/94 16:13:58

Sequenced by CUSTOMER GROUP 3.....: -
Sequenced by CUSTOMER GROUP 4.....: -
Sequenced by POST CODE.....: -
Sequenced by CREDIT LIMIT CODE.....: -

Include delivery addresses?.....: - (1=Yes)

F3=Exit(no labels)

Fields:

Account Code

1 - If you want the report to include all accounts in account code sequence.

Account Code Range

1 - If you want the report to include only those accounts which fall within a specified range. A second screen will then be displayed to enable you to enter the range of accounts required.

Customer Groups 1-4

If you want the report to be sequenced in customer group order, enter 1 against the required customer group.

Post Code

1 - If you want the report to be sequenced in post code order.

Credit Limit Code

1 - If you want the report to be sequenced in credit limit code order.

Include Delivery Addresses

1 - If labels are to be produced for each delivery address attached to each customer selected.

-  If you decide to select a range of account codes, press **Enter** and the selection fields display.

Account Code Range

Enter the account code range for the labels print. The account codes entered here need not be existing accounts defined to the system, nor entire account codes.

-  Make your selections and the following field is displayed to enable you to specify the number of labels (per customer) to be printed:

Number Of Labels Per Customer

Enter the number of labels that are to be printed per customer account. This must be a number from 1 to 99.

-  Press **Enter** to submit a job to produce the report.

Customer Invoice Header

15/ARE

This report lists invoice headers for the selected range of customer accounts. This report is only used when extended payment terms are used with extended terms the invoice is split into its separate due dates, this report prints the summary information.

Select the AR report option Customer Invoice Header.

Customer Invoice Header Report Screen

Fields:

Account Code Range

Enter the range of customers whose details you want to see on the report. Leave both fields blank to print all customers.

Include All Items

Enter 1 if you want to include all items. The report defaults to printing open items only.

Currency To Print

Enter one of the following options:

- 1 - to print prime values.
- 2 - to print base values.
- 3 - to print revalued base values.

Make your selections and press **Enter** to submit a job to produce the report.

Overdue Analysis

31/ARE

The overdue payments report lists outstanding debts aged by the due date of outstanding items. You can choose to produce either a detailed or a summary report.

Select the AR report option Overdue Analysis.

Overdue Payments Report Selection Screen

F3=Exit F4=Prompt F8=Submit report F10=Report & save F14=Edit rules F18=Currency F22=Single company			

Fields:

User Code

If you have run this report previously and saved your parameters using F10 you can enter here your user code (a prompt is available). Press Enter, and any previous saved report parameters you have used will be automatically entered, and may be reused or maintained.

Group Type

If entered, this must be in the range 1 - 6. See Groups, and Groups Company Maintenance in General Ledger.

Group

You can choose to run the report over a group instead of the company. Enter a valid group. The current company must exist within the group.

Seq 1-9

These sequencing fields enable you to structure you report in exactly the way you want.

If, for example, if you want the report to list account codes within customer group 3, then enter 1 for the group 3 sequence, and 2 in the account code sequence.

Subtotal

Enter 1 against any sequence field for which a subtotal is required in addition to customer and currency.

Account Code Range

Enter the range of accounts for this report.

Alpha Sequence Range

To select the report by the alpha sequence codes which are entered in supplier maintenance, enter the alpha sequence range here.

Customer Groups 1-4

For each customer group, 1 - 4, you can enter a range as required.

Controller Range

Enter a range of credit controllers to be included in the report.

Region Range

Enter the range of regions to be included in the report.

Salesman Range

Enter the range of salesman codes to be included in the report.

Overdue Date

Enter the overdue date for the selection of report data.

Co/Balances/Items

Enter the appropriate code:

1 - Summary totals will be printed for each code within the parameters selected for sequencing. Individual customer balances will not be printed. The totals will be in base, and, if selected, in revalued base.

2 - Customer balances will be printed.

3 - Items will be printed.

If you enter 3 to print items in the Co/Balances/Items field, a further screen will be displayed.

Overdue Payments Transaction Report Selection Screen

This screen enables you to sequence the items.

SL407	E1 - Demonstration Company	USER ED3	8/04/94
			10:33:46

F3=Exit	F4=Prompt	F8=Submit report	F10=Report & save
F12=Previous		F14=Edit rules	F18=Currency

Fields:

Document Date Range

Enter the date range of documents to be included in the report.

Seq 1-6

These sequencing fields enable you to structure your report in exactly the way you want.

If, for example, if you want the report to list transaction types within due date, then enter 1 for the due date sequence, and 2 in the transaction type sequence.

Subtotal

1 - Against any sequence field for which a subtotal is required.

Due Date Range

Enter the due date range for items to be included in this report.

Discount Date Range

Enter the date range of discounts to be included in the report.

Transaction Type Range

Enter the range of transaction types to be included in the report.

Document Reference Range

Enter the range of document references to be included in the report.

Value Range

Enter the value range of documents to be included in the report.

Make your selection. If you press **F10** to produce the report and save the definition for future use, you must have entered a user code. If the code is blank, or if the code you have entered is a new one, you will see a window with the following fields:

Fields:

User Code

Enter a new code under which this report definition will be saved.

Desc

Enter a description for this user code.

If you want to create a new code, enter the above fields and press **F10** again.

Various rules control the editing of the report itself. Press **F14** to display the Edit rules window.

Overdue Payments Report Selection Edit Rules Window (F14)

Overdue periods			30	60	90 120 150
Overdue balance sequence			0		
Customer text			0		
F3=Exit F12=Previous F14=Edit rules F18=Currency					

Fields:

Include Negatives

- 0 - To omit negatives.
- 1 - To include negatives.
- 2 - To select negatives only.

Note: If balances are selected then this flag will apply to balances, otherwise it applies to the transaction value.

Double Space

- 0 - For single spacing.
- 1 - For double spacing.

New Page

- 1 - To start a new page after printing user defined subtotals.

Include Zero Accounts

- 1 - To include zero balance accounts when balances are requested.

Include Disputed Invoices

- 0 - To omit disputed invoices from the report.
- 1 - To include disputed invoices.

Print By Originating Account

1 - To print the report by the lowest level account on the customer hierarchy.

Suppress Collection Documents

0 - To include collection documents.

1 - To omit collection documents from the report,

Account Status

The valid entries here are:

1 - Stopped accounts (those customers with 1 in the Account Stop field in customer maintenance).

2 - Suspended accounts (those customers with S in the Account Status field in customer maintenance).

3 - Legal accounts (those customers with L in the Account Status field in customer maintenance).

4 - Uncertain accounts (those customers with U in the Account Status field in customer maintenance).

Minimum Balance

If used, this value means that only accounts with an outstanding balance greater than or equal to the minimum balance will be selected. If a single currency is used, the value entered here will be in that currency, otherwise it will be in base currency.

Minimum Age (Days)

If used, this value means that only items with a number of days overdue greater than or equal to this value will be selected.

Overdue Periods

Enter the ranges of days required - at least one range must be entered. The fields default to the company profile values.

Overdue Balance Sequence

1 - To sequence by overdue balance.

If 1 company was entered in the Co / Balances / Items field on the first screen, then the lowest level of sequencing for the report will be overdue balance rather than attribute code.

If 2 or 3 was entered, customers will be sequenced by overdue balance within the lowest level of sequencing.

Customer Text

1 - To include customer text on the report.

If you wish to specify the currency of the report, then press **F18**.

Overdue Payments Currency Window (F18)

Code

Enter a currency code if you wish to select only this currency.

Prime

If you select prime currency, items will be reported in prime; otherwise revalued base will be used.

Base

Base will be reported at item level only if it is the only selection.

Revalued Base

Select as required.

Specify particulars of the report, press **F8** to generate the report, or **F10** to generate the report and save the definition for future use.

Aged Debt

32/ARE

This report gives an analysis of outstanding debt for each customer account by posting period. If all accounts are selected the total debt on this report should reconcile back to the Debtors Control Account. If this is not the case, check for future postings, and customer who have a Control account different to the default company profile.

Select the AR report option Aged Debt..

Fields:

User Code

If you have used this report previously and saved your parameters using **F10** you can enter here your user code (a prompt is available). Press **Enter**, and any previous saved report parameters you have used will be automatically entered, and may be reused or maintained.

Group Type

If entered, this must be in the range 1 - 6. See Group Company Maintenance in General ledger and in the Groups section earlier in this Product Information.

Group

You can choose to run the report over a group instead of the company. Enter a valid group. The current company must exist within the group.

Seq 1-9

These sequencing fields enable you to structure you report in exactly the way you want.

If, for example, if you want the report to list account codes within customer group 3, then enter 1 for the group 3 sequence, and 2 in the account code sequence.

Subtotal

Enter 1 against any sequence field for which a subtotal is required in addition to customer and currency.

Account Code Range

Enter the range of accounts for this report.

Alpha Sequence Range

To select the report by the alpha sequence codes which are entered in supplier maintenance, enter the alpha sequence range here.

Customer Groups 1-4

For each customer group, 1 - 4, you can enter a range as required.

Controller Range

Enter a range of credit controllers to be included in the report.

Region Range

Enter the range of regions to be included in the report.

Salesman Range

Enter the range of salesman codes to be included in the report.

Start Period

Enter the start period for the report data.

Co/Balances/Items

Enter the appropriate code:

1 - Summary totals will be printed for each code within the parameters selected for sequencing. Individual customer balances will not be printed. The totals will be in base, and, if selected, in revalued base.

2- Customer balances will be printed.

3- Items will be printed.

If you enter 3 to print items in the Co/Balances/Items field, a further screen displays to enable you to sequence the items.

Enter the period number (YYP) for which the report is to be printed.

Prime / Base / Revalued Base

The report may print in any combination of prime, base or revalued base currency. Enter 1 against the currency values required.

Make your selections and press **Enter** to submit a job to produce the report.

Cash Flow Analysis

36/ARE

This report shows projected cash flows for each day up to 30 days, and totals for days 30 - 60, 60 - 90, and over 90. Totals for the selections made are also produced based on due dates of invoice from a date specified.

Select the AR Cash Flow Analysis option.

Fields:

Account Code

Enter 1 here if you want the report to include all accounts in account code sequence.

Account Code Range

Enter 1 if you want the report to include only those accounts which fall within a specified range. A second screen displays to enable you to enter the range of accounts required.

Customer Groups 1-4

If you want the report to be sequenced in customer group order, enter 1 against the required customer group.

Alpha Sequence

Enter 1 here if you want the report to be sequenced in alpha sequence code order.

Credit Control Responsibility

Enter 1 here if you want the report to be sequenced in credit control responsibility order.

Sales Region Code

Enter 1 here if you want the report to be sequenced in sales region code order.

Sales Rep Code

Enter 1 here if you want the report to be sequenced in sales representative code order.

Base On Average Days Slow

Enter 1 to see the cash flow information calculated on the basis of due date + the average days slow ratio calculated using the processing option Update Statistics.

Report Start Date

The start date defaults to the current date. This defines the date from which cash flow is to be projected.

Print Details

Enter 0 to produce a summary report showing the cash-flow breakdown as totals for the entire ledger. Totals are:

Printed for each day from days 0 - 30.

Summarised for days 31-60, 61-90 and 91+. (These buckets are independent of the overdue analysis periods on the company profile).

Enter 1 to produce a detailed report analysing cash-flow for each customer account. It omits customers with credit balances, but includes credit notes.

The summary page is printed at the end of the report.

Include Coll Docs

Enter 1 to include Accounts Receivable items only, 3 to include collection documents only, or 2 to include both.

Print By Originating Account

Enter a 1 to print the report by the lowest level account on the customer hierarchy.

Currency Of Items For Inclusion

If a currency code is entered, only transactions in that currency will be included in the report.

If left blank, the base equivalent of all transactions of all currencies will be included.

Revalued Base

Leave blank or enter 0 to report the original base value. Enter 1 to report the revalued base value.

If you decide to select a range of account codes press **Enter** to display the selection screen.

Cash Flow Report Accounts Selection Screen

Fields:

Starting Account Code

Enter the start point for the Cash Flow Analysis report. The account code entered here need not be an existing account defined to the system or an entire account code.

Ending Account Code.

Enter the end point for the Cash Flow Analysis report. The account code entered here need not be an existing account defined to the system or an entire account code.

Make your selections and press **Enter**. A confirmation message will be displayed, so press **Enter** again to submit a job to produce the report.

Disputed Invoices

37/ARE

This report lists invoices flagged as being in dispute. Invoices can be requested by account or by the dispute reason. The report is sequenced by account, and prints subtotals for each account.

Select the AR report option Disputed Invoices.

Disputed Invoices Report Selection Screen

Fields:

Customer Code

To produce a report for all customers, leave blank. If a report for a specific customer is required, enter the account code in this field.

Reason Code

To produce a report for all reason codes, leave blank. If a report for a specific code is required, enter that code in this field.

Print Originating Accounts

Enter 1 to print the report by the lowest level account on the customer hierarchy.

make your selections and press **Enter** to submit a job to produce the report.

Rolling Trends

38/ARE

This option produces a report of the credit manager trend statistics over selected periods of time, which is determined by the start period and the trend interval.

If, for example, the start period selected is 9510 and the trend interval is 3, the user defined periods will be 9508-9510, then 9507-9509, 9506-9508, and so on.

For more details of how the credit manager statistics are calculated, see the appendix at the end of this Product Information.

Select the AR report option Rolling Trends.

Note: The above 'from' and 'to' fields can be used only if 2 was entered in the Co / Customer field on the previous screen.

Fields:

User Code

If you have run this report previously and saved these parameters using F10 enter here your user code (a prompt is available). Press Enter, and any previous saved report parameters you have used will be automatically entered, and may be reused or maintained.

Seq 1-9

These sequencing fields enable you to structure you report in exactly the way you want.

If, for example, if you want the report to list account codes within customer group 3, then enter 1 for the group 3 sequence, and 2 in the account code sequence.

Subtotal

Enter 1 against any sequence field for which a subtotal is required.

Account Code Range

Enter the range of accounts for this report.

Alpha Sequence Range

To select the report by the alpha sequence codes which are entered in supplier maintenance, enter the alpha sequence range here.

Customer Groups 1-4

For each customer group, 1 - 4, you can enter a range as required.

Controller Range

Enter a range of credit controllers to be included in the report.

Region Range

Enter the range of regions to be included in the report.

Salesman Range

Enter the range of salesman codes to be included in the report.

Performance Code Range

If you wish to limit the report to customers within a certain range of performance codes, enter that range here.

Start Period

Enter the period at which the report is to start.

Trend Interval

Enter here the number of periods you want to include in each user defined period for this report.

This field defaults to the trend interval defined to the credit manager.

Co / Customers

1 - To print summary ratios for each code within sequencing parameters.

2 - To print ratios for each customer selected.

Make your selection and press **Enter** to see the next screen of selection fields.

Fields:

Debtor Days Range

If you wish to select customers to be included in the report by the number of debtor days, enter the required range of days in these fields.

Req

1 - Against each ratio you want to include in the report.

Note: If 1 is entered against a ratio with the 'to' and 'from' fields left blank, then all values are selected.

Days Sales Outstanding Range

If you wish to select customers to be included in the report by the number of days sales are outstanding, enter the required range of days in these fields.

Average Days To Pay Range

If you wish to select customers to be included in the report by the average number of days they take to pay debts, then enter the required range of days in these fields.

Slow Days To Pay Range

If you wish to select customers to be included in the report by the average number of days they take to pay debts after the debt is due, then enter the required range of days in these fields.

Hierarchy Level

To select customers by hierarchy level, enter the required level here.

-  Make your selection. If you press **F10** to produce the report and save the definition for future use, you must have entered a user code. If the code field is blank, or if the code you have entered is a new one, you will see the following fields:

Fields:

User Code

Enter a new code under which this report definition will be saved.

Desc

Enter a description for this user code.

-  If you want to create a new code, enter the above fields and press **F10**. Otherwise, press **F12**, and produce a report without saving by pressing **F8**.

Text Diary

39/ARE

This option prints a report of all customer diary text within the range of accounts, action dates etc. specified.

It could be used as a telephone conversation follow up report, e.g. a customer promises cheque by a certain date, text with an action by date can be entered and the report run as a reminder.

Select the AR credit control report option *Text Diary*.

06-32 SF MK KS IM II EDN400A PET165S2

Fields:

Controller Range

Enter the range of controllers whose customer diary entries are to be included in the report.

Account Range

Enter the range of customers whose diary entries are to be included in the report.

Date Range

Enter the range of dates of diary entries to be included in the report.

Performance Code Range

Enter the range of performance codes whose customer diary entries are to be included in the report.

Text Status Code Range

Enter the range of status codes whose customer diary entries are to be included in the report.

Overdue Period Range

Enter the overdue periods for which customer diary entries are to be included in the report.

Customer Group 1 - 4

Enter a range(s) of customer groups to be included in the report. Leave blank for all customer groups (within the screen selection) to be included.

Minimum Value

If you enter a value here, no customer with a debt which is less than the given value will be included in the report.

Recorded By

When diary text is entered, the user ID of whoever makes the entry is recorded. This can be used here as a selection criterion for the report.

Action Date Sequence

0 - To sequence the report in descending order of the size of debt.

1 - To sequence the report in order of action date.

Press **Enter**, then **F8** to submit a job to produce the report.

Session Audit

Warning: It is imperative that this report be run daily and reconciled to the appropriate General Ledger control account. Any discrepancies should be investigated and resolved immediately. This report should be run as part of your auto day end routine.

41/ARE

This audit report is the fundamental transaction audit report. It should be printed each day, reconciled to the General Ledger control account, and filed for audit purposes. This enables any errors to be trapped immediately.

The report will provide a hard copy of all items posted for each session number. The information given for each session number includes the following:

- Type of item posted
- Document references
- Reason code
- Total value of transaction and VAT split
- Discounts
- Posting period

Select the AR report option *Session Audit*.

Session Audit Selection Screen

Fields:

Session Range

To print all sessions not previously printed, leave both of these fields blank.

To print all sessions up to an entered number, leave the 'from' field blank.

To print all sessions from an entered number onwards, enter the 'from' number and a 'to' value of 99999.

Detailed Report

Enter 1 for a detailed report:

For a range of session numbers, each transaction in the selected sessions is linked.

For all unprinted sessions, a one-page summary of values posted for each transaction file is printed.

Leave blank for a summary report, which prints a one-page summary of total values posted for each transaction type for the selected range.

Note that the summary report is not available for the session audit of all unprinted sessions, so in that case 1 should always be entered.

Make your selections and press **Enter** to submit a batch job to produce the report.

Debtor Balances

42/ARE

This report enables you to reconcile your General Ledger control account balances to their related customer accounts for any period - past, current or future.

Select the AR report option *Debtor Balances*.

Debtor Balances Report Selection Screen

Fields:

Period Range

Enter the period range to be printed.

Control Account Range

Enter the control account range to be included in the report. This selection criterion cannot be used with the customer range fields.

Customer Account Range

Enter the customer account range to be included in the report. This selection criterion cannot be used with the control account range fields.

Detailed Or Summary

Enter 1 for a detailed report including transactions, 2 for a summary, showing customer debit and credit balances but no transactions.

Make your selections and press **Enter** to submit a job to produce the report.

Customer Item Audit

43/ARE

This report lists items for a specific customer. You can choose whether to include all items or whether to limit the report to open items, and you can also include payments if required.

Select the AR reports option Customer Item Audit.

Customer Item Audit Selection Screen

Fields:

Account Code

Enter the customer account code that you want to report on. You can use the account search facility if you cannot remember the account code you require.

Items Required

Enter 1 to include all items. Enter 0 to include outstanding items only.

Print Payments Of Items

Enter 1 to include all payment transactions for the selected customer.

Include Coll Docs

Enter 1 to include Accounts Receivable items only, 3 to include collection documents only, or 2 to include both.

Make your selections and press **Enter** to submit a job to produce the report.

Retrospective Open Items

44/ARE

This report prints a snapshot of the position, by customer, of the General Ledger debtor control account as at the end of any selected period. All open items are listed, with a total for each account, and a grand total.

The report is used for end-of-year auditing purposes.

Select the AR reports option Retrospective Open Items.

Retrospective Open Items Audit Selection Screen

Fields:

Period

The report produces the debt position at the end of the period entered here.

Control Account Range

Enter the range of accounts to be included in the report. Leave blank for all accounts.
